

GLASS ETCHING TUTORIAL

Check out www.melissaesplin.com for more tutorials.

Supplies:

Roll of Contact Paper
Glassware
Junk Brush
Bonefolder
X-Acto Knife
Pencil
Armour Etch Acid

Step 1:

Clean your glassware and dry thoroughly. Apply contact paper to the outside of the glass. Smooth out bubbles with a bonefolder.

Step 2:

With a pencil or sharpie marker, make your marks. *If you don't want to hand draw the image, print out the desired design on regular paper and tape image onto contact paper.

Step 3:

With an X-acto knife or scalpal, cut and remove contact paper for etching.

Step 4:

In a well ventilated room, generously apply armour etch acid with a junk brush. Wait 5-10 minutes for acid to etch the glass.

Step 5:

Rinse and wash glass, brush and your hands thoroughly with soap. Remove contact paper, dry, and enjoy.
