# NEURAL NETWORK WORLD

## VOLUME 29 (2019)

### CONTENTS

---

#### Number 1/2019

- [1] Vaitová M., Štemberk P., Rosseel T.M.: Fuzzy logic model of irradiated aggregates, 1–18
- [2] Snor J., Kukul J., Van Tran Q.: SOM in Hilbert space, 19–31
- [3] Fu X.Y., Luo H., Zhang G.Y., Zhong S.S.: A lazy support vector regression model for prediction problems with small sample size, 33–44
- [4] Yildirim O., Baloglu U.B.: RegP: A new pooling algorithm for deep convolutional neural networks, 45–60

#### Number 2/2019

- [1] Kratochvíl R., Jánešová M.: Use of clustering for creating economic-mathematical model of a web portal, 61–70
- [2] Ling Y., Chai C., Hou W., Hei D., Qing S., Jia W.: A new method for nuclear accident source term inversion based on ga-bpnn algorithm, 71–82
- [3] Cheng Y., Ye Z., Wang M., Zhang Q.: Document classification based on convolutional neural network and hierarchical attention network, 83–98
- [4] Ata A., Khan M.A., Abbas S., Ahmad G., Fatima A.: Modelling smart road traffic congestion control system using machine learning techniques, 99–110

#### Number 3/2019

- [1] Sharif S.M.A., Mahboob M.: Deep HOG: A hybrid model to classify Bangla isolated alpha-numerical symbols, 111–133
- [2] Min Xia, Chong Zhang, Yin Wang, Jia Liu, Chunzheng Li: Memory based decision making: A spiking neural circuit model, 135–149
- [3] Fister D., Mun J.C., Jagrič V., Jagrič T.: Deep learning for stock market trading: a superior trading strategy?, 151–171
- [4] Rybičková A., Mocková D., Teichmann D.: Genetic algorithm for the continuous location-routing problem, 173–187

## Number 4/2019

- [1] Tekerek A., Bay O.F.: Design and implementation of an artificial intelligence-based web application firewall model, 189–206
- [2] Alquran H., Alqudah A.M., Abu-Qasmieh I., Al-Badarneh A., Almashaqbeh S.: ECG classification using higher order spectral estimation and deep learning techniques, 207–219
- [3] Milošević N., Racković, M.: Classification based on missing features in deep Convolutional Neural Networks, 221–234
- [4] Kilic H., Yuzgec U., Karakuzu C.: Improved Antlion Optimizer Algorithm and its performance on neuro fuzzy inference system, 235–254
- [5] Křížek M.: Do Einstein's equations describe reality well?, 255–283

## Number 5/2019

- [1] Jha S.K., Bilalovikj J.: A comparative approach of neural network and regression analysis in very short-term wind speed prediction, 285–300
- [2] Raja Basha A., Yaashuwanth C.: An optimal data aggregation scheme for wireless sensor network using QoS parameters with efficient failure detection and loss recovery technique, 301–324
- [3] Henclová K.: Using CMA-ES for tuning coupled PID controllers within models of combustion engines, 325–344
- [4] Su T., Min S., Shi A., Cao Z., Dong M.: A CNN-LSVM model for imbalanced images identification of wheat leaf, 345–361
- [5] Svítek M.: Quantum multidimensional models of complex systems, 363–371

## Number 6/2019

- [1] Bouchner P., Novák M., Votruba Z.: EDITORIAL: How can artificial systems rise in a tool for mind?, 373–379
- [2] Abbas S., Adnan Khan M., Ata A., Ahmad G., Saeed A., Anwar N.: Multi user detection using fuzzy logic empowered adaptive back propagation neural network, 381–401
- [3] Saadi A., Belhadeh H.: Towards an optimal set of initial weights for a Deep Neural Network architecture, 403–426
- [4] Faber J., Novák M., Kovaljov M., Chalupová R., Bouchner P.: Dynamics of sinusoidal alpha waves asymmetry in brain electrical field, 427–445
- [5] Li Q., Liu X.: Voltage stability assessment of complex power system based on GA-SVM, 447–463
