**Subject: Florida Statewide General-Election survey conducted for  
FloridaPolitics.com**

**Date: October 28, 2018**

**Executive Summary:**

This poll of 2,118 likely Florida general election voters was conducted from October 27, 2018 to October 28, 2018. This poll used the registered voter lists supplied by the state of Florida as of October 15, 2018. The sample of voters that were contacted included random samples of registered voters within the boundaries of the state of Florida.

The issues surveyed included questions related to Florida's 2018 General Election.

**Methodology:**

The poll was conducted through an automated phone call polling system. The results were then weighted to account for proportional differences between the respondents' demographics and the demographics of the active general election voter population for the state of Florida. The weighting demographics used were: political party, race, age, gender and media market.

The voters polled were chosen at random within the registered voter population within the state of Florida. Voters who said they were not planning to vote were excluded from the results below.

The scientific results shown for the questions below have a sample size of 2,118 and a 2.1% Margin of Error at a 95% confidence level.
