

***Sierra Club - John Muir Chapter
2013-2014 Legislative Scorecard***

***Protecting Wisconsin's Air, Water and Wild Places
for Future Generations***

<http://www.wisconsin.sierraclub.org>

The Sierra Club - John Muir Chapter is your statewide voice for the nation's oldest, largest and most influential grassroots environmental organization. Our members include 15,000 of your friends and neighbors located throughout Wisconsin, following the footsteps of legendary Wisconsin conservationists, including Sierra Club founder, John Muir, Aldo Leopold and Gaylord Nelson. Inspired by Wisconsin's beautiful lakes, forests, and other natural features, we work together to protect our communities and the planet.

The Mission of the Sierra Club is to explore, enjoy, and protect the wild places of the earth; to practice and promote the responsible use of the earth's ecosystems and resources; to educate and enlist humanity to protect and restore the quality of the natural and human environment; and to use all lawful means to carry out those objectives.

The John Muir Chapter's priority issues are reducing the threat of climate change and protecting land and water resources. Group and Chapter leaders also work on a broad range of related environmental issues throughout Wisconsin, such as air quality, forest protection, threatened and endangered species, reducing environmental toxins, invasive species, smart growth, recycling and waste disposal, agricultural policies, and more. *We are also active in local elections, since one of our best hopes for long term gains is building a strong legislative base to protect our environment.*

Sierra Club - John Muir Chapter's 2013-14 Legislative Scorecard reflects votes taken by the Wisconsin State Assembly and State Senate on environmental bills. You can learn about bills that affect you by using our Legislative Tracker at <http://wisconsin.sierraclub.org/tracker>. Our scorecard focuses on bills related to the John Muir Chapter's priority issues of reducing climate change and protecting land and water resources in Wisconsin. Use this scorecard as a guide to judge candidates in your district this election year. Let your representatives know if you're pleased or disappointed with their voting records. **Then, don't forget to vote in the primary election on August 12, and in the general election November 4, 2014!**

Thank you for taking an interest in environmental legislation by picking up this guide and for all the other things you do to participate in the democratic process. Your efforts contribute to a cleaner environment and a healthier future for Wisconsin.

The Sierra Club - John Muir Chapter

2013-14 Legislative Recap

The 2013-14 legislative session brought another wave of environmental attacks led by Governor Walker and rubber stamped by the majority party in the Assembly and State Senate. The toughest loss was the passage of the open pit mining bill, aka the Bad River Watershed Destruction Act (2013 Act 1) and the subsequent new law allowing landowners to close thousands of acres of managed forest land near Gogebic Taconite's proposed mine site without paying back taxes to the local community. However, news on the mining regulatory front improved later on in the session as grassroots activism helped beat back two bills designed to strip local control from mining decisions (and other developments), with the defeat of Sen. Tiffany's SB 349, later rewritten and defeated as SB 632.

Water protection laws were weakened once again in 2013-14 with motion 375 passing in the state budget, a measure which seeks to prevent individuals from challenging high capacity well permit decisions that threaten groundwater. That provision, along with a measure forcing the sale of 10,000 acres of stewardship land, formed the basis for opposing the state budget. Two other disappointing water laws that were enacted gut shoreland zoning protections and weaken phosphorus rules by making it easier to obtain variances, increasing compliance timelines, and capping investments for controlling non-point pollution at \$640,000. Although this news is discouraging, we were encouraged by the defeat of SB 302, a bill that would have further threatened groundwater by limiting DNR's authority to consider cumulative impacts in high capacity well decisions, transferring water rights in property sales, and rushing permit reviews. We expect this bill to resurface next session, so we are gearing up now to amass local allies to defeat it when reintroduced.

Clean energy proposals were a mixed bag. Bills designed to make it easier to bring frivolous lawsuits against wind developers and host landowners and freeze renewable standards at 2010 levels did not advance. However, a bill that exempts small utilities from the 10% renewable electricity standard was enacted as 2013 WI Act 290 (based on the incorrect assumption that renewable energy increases costs); and another bill that allows renewable energy credits to be used regardless of facility age was enacted as 2013 WI Act 300. Also, Wisconsin lags behind 22 other states that allow 3rd party leasing, known as Clean Energy Choice. A bill designed to allow Clean Energy Choice, which would allow landowners to lease their roof space for solar panels owned by others, unfortunately did not advance. All in all, these policies, combined with stagnant renewable standards, unfavorable net metering, and the suspension of residential renewable incentives caused Wisconsin to fall behind neighboring states in clean energy development in 2013.

Although Rep. Penny Bernard Schaber and Sen. Mike Ellis's Fox Cities Regional Transit Authority bill, SB 259, had bipartisan support and passed the Senate by a vote of 25-7, the Assembly unfortunately failed to take up this bill, making it harder to maintain much-needed transit service in the Fox Valley. Despite the failure of SB 259 in the Assembly, we were able to score the "pull vote" on this bill, which is an accountability measure designed to record whether legislators support bringing the measure to the floor for a vote.

Despite these attacks, some proactive measures were enacted. We supported an increase in transit in the state budget, and our efforts to continue funding transit from the transportation fund prevailed. Another bright spot in the session was 2013 WI Act 72, a measure designed to provide funds for barriers to prevent invasive sea lampreys from traveling from the Great Lakes to coldwater streams and rivers, which passed with unanimous support. Finally, the passage of 2013 Wisconsin Act 253, the vulnerable users law, was a modest gain that requires driver's education on safely sharing the road with pedestrians and bicyclists.

This session taught us that working with local allies and diverse coalitions can help us fight the worst environmental attacks. We will return in January ready to take what we've learned into the next session to stave off future attacks on our air, water, and land and to support bills that represent the kind of policies Wisconsin needs.

The Sierra Club - John Muir Chapter

2013-14 Senate Bill Descriptions

SB 1, Bad River Watershed Mining Destruction Act

SB 1 paves the way for out-of-state mining company Gogebic Taconite (GTAC) to construct the largest open-pit iron ore mine in Northwestern Wisconsin, jeopardizing the Bad River Watershed, Penokee Hills, Copper Falls State Park, and Lake Superior. This horrible bill requires a decision on iron mining permits within 420 days; eliminates contested case hearings; allows mining waste to be dumped in sensitive areas; allows groundwater contamination with minimal public health protections; allows drawdowns of lakes, rivers, and streams; and shortchanges taxpayers and local communities by capping permit fees at \$2 million and depositing 40% of tax revenues into the state's general fund. STATUS = **PASSED**: [2013 Act 1](#) was signed into law on 03/11/13. **Pro-Environment Vote = NAY**

AB 40 Biennial State Budget

(See Assembly Bill Description) STATUS = **PASSED**: [2013 Act 20](#) was signed into law on 06/30/13. **Pro-Environment Vote = NAY**

SB 278, Closes Managed Forest Lands for GTAC

A shameful example of unfair legislation that benefits a single corporate donor at the expense of the public, SB 278 closes public access to 3,500 acres of Managed Forest Land as a special favor for Gogebic Taconite (GTAC) near the proposed open pit iron ore mine, without requiring the landowner to pay \$891,000 in back taxes (tax breaks are only given to other MFL owners who maintain public access). STATUS = **PASSED**: [2013 Act 81](#) was signed into law on 12/13/13. **Pro-Environment Vote = NAY**

SB 183, Weakens Shoreland Zoning

Under current law, cities, towns, and villages are to follow the shoreland zoning rules set by their county. Under this bill,

smaller municipalities would be able to annex land in an effort to avoid adhering to existing environmental regulations. STATUS = **PASSED**: [2013 Act 80](#) was signed into law on 12/14/13. **Pro-Environment Vote = NAY**

AB 161 Undermines Judiciary

(See Assembly Bill Description) STATUS = **PASSED**: [2013 Act 156](#) was signed into law on 03/28/14. **Pro-Environment Vote = NAY**

SB 259, Fox Cities Regional Transit Authority (RTA)

Transit is essential for making Wisconsin's communities more attractive to businesses and young professionals, for reducing our dependence on oil, and for meeting mobility needs of low-income communities, disabled citizens, and our growing senior population. Had it passed, SB 259 would have authorized the Fox Cities (Appleton, Buchanan, Grand Chute, Kaukauna, Kimberly, Little Chute, the City of Menasha, the Town of Menasha, and Neenah) to form a Regional Transit Authority. An RTA would have allowed municipalities to work across political boundaries to raise stable, dedicated local funds to support an efficient, integrated transit system, and insulated them against impacts of state and federal funding fluctuations. Although many areas of Wisconsin would benefit from being able to form an RTA, the Fox Cities is in critical need of one, as their population exceeded 200,000 in the Census, making them potentially ineligible for federal transportation operating funds. Without an RTA, Valley transit may need to raise fares or cut service routes. STATUS = **FAILED**, The Senate passed SB 259 by a vote of 25-7 on 02/11/14. Unfortunately, Speaker Vos refused to schedule SB 259 for a floor vote in the Assembly, prompting it to be sent to the floor for a pull vote for accountability purposes. **Pro-Environment Vote = AYE**

2013-14 Assembly Bill Descriptions

SB 1 Bad River Watershed Destruction Act (see Senate bill description) STATUS = PASSED: [2013 Act 1](#) was signed into law on 03/11/13. **Pro-Environment Vote = NAY**

AB 40 Biennial State Budget The budget massively expands highway funding while failing to fully restore the 10% cut for transit from the last state budget. The budget also mandates the sale of 10,000 acres of stewardship land and included Motion 375, which prohibits individuals from challenging high capacity well permit decisions that threaten groundwater. STATUS = PASSED: [2013 Act 20](#) was signed into law on 06/30/13. **Pro-Environment Vote = NAY**

SB 278 Close GTAC Managed Forest Lands (see Senate bill description) STATUS = PASSED: [2013 Act 81](#) was signed into law on 12/13/13. **Pro-Environment Vote = NAY**

SB 183 Shoreland Zoning (see Senate bill description) STATUS = PASSED: [2013 Act 80](#) was signed into law on 12/14/13. **Pro-Environment Vote = NAY**

AB 161 Undermines Judiciary

Under this new law, if a circuit court or the Court of Appeals enters an injunction, restraining order, or any other final or interlocutory order suspending or restraining the enforcement of any state statute, the injunction or order is immediately appealable as a matter of right. Unfortunately, this undermines the judicial branch's authority to block laws that violate fundamental citizen rights protected by the state constitution. This could directly impact environmental issues if a new law should pass, for example, that violates the public trust doctrine. STATUS = PASSED: [2013 Act 156](#) was signed into law on 03/28/14. **Pro-Environment Vote = NAY**

SB 259 Fox Cities RTA Pull Vote (See Senate Bill Description)

SB 547 Weakens Phosphorus Water Quality Rules

In 2010 Wisconsin was proud to pass the strongest, most innovative Phosphorus rule in the country to address excess nutrient pollution impacting our lakes, rivers, and streams. Resulting algal blooms, including toxic blue green algae

decrease lakefront property values, threaten public health, and impede swimming, boating, and fishing opportunities throughout our state. Our phosphorus rule, which took years to finalize after gathering input from a diverse array of stakeholders, including farm and environmental groups, is flexible in that it allows point sources, like sewage treatment plants to comply using adaptive management. Adaptive management involves providing resources to farms and other landowners to reduce non-point pollution within the watershed rather than only allowing expensive point-source equipment upgrades. Unfortunately, SB 547 (even in its amended form) weakens the rules by increasing compliance time to 20 years (previously 15) and by making it easier to get a variance to the rules. Although SB 547 requires point sources to pay \$5 per pound for needed phosphorus reductions to counties, SB 547 caps their payments at just \$640,000 per year, despite the fact that reduction payments would have far exceeded that for large point source compliance. Because the EPA has finalized Wisconsin's Phosphorus rule, the federal agency will have the final say as to whether the new law still complies with our statewide water quality standards. STATUS = PASSED: [2013 Act 378](#) was signed into law on 04/23/14.

Pro-Environment Vote = NAY

Researchers have discovered a growing dead zone that extends north of Green Bay for 30 miles that is largely caused by Phosphorus pollution.

The Sierra Club - John Muir Chapter Thanks Environmental Leaders

The Sierra Club – John Muir Chapter thanks the lawmakers who scored a perfect 100% on the Scorecard (13 in the Senate, 20 in the Assembly).

In the Senate, these include **Tim Carpenter, Jon Erpenbach, Dave Hansen, Nikiya Harris, Chris Larson, Julie Lassa, John Lehman, Mark Miller, Fred Risser, Jennifer Shilling, Lena Taylor, Kathleen Vinehout, and Robert Wirch.**

In the Assembly, these include **Mandela Barnes, Terese Berceau, Penny Bernard Schaber, Jill Billings, Evan Goyke, Gary Hebl, Dianne Hesselbein, Brett Hulsey, LaTonya Johnson, Fred Kessler, Debra Kolste, Sandy Pasch, SONDY POPE, Janis Ringhand, Melissa Sargent, Katrina Shankland, Chris Taylor, Leon Young, JoCasta Zamarripa, and Josh Zepnick.**

*The Sierra Club - John Muir Chapter
Thanks Sen. Bob Jauch for his Legislative Service*

The Sierra Club thanks **Senator Bob Jauch** for the wisdom, dedication, and fairness he displayed throughout his legislative career.

We will miss him in the State Senate, and we are thankful for all his leadership and service on conservation issues! We wish him a happy, healthy future enjoying friends, family, and the solitude of the beautiful North Woods and Lake Superior.
