a Live stock on ranches and ranges, as computed by special agent: Cattle, 3,750,022; sheep, 7,000,000; swine, 2,000,970. The office took no account, either by enumeration or estimate, of animals in the agricultural states owned by persons not cultivating farms, whether in cities and villages or not.

b Not including the following items, the result of special investigation: Texas and California fall clip of sheep reported on farms, 13,000,000 pounds; wool of other (ranch) sheep, 34,000,000 pounds; pulled wool and fleece of slaughtered sheep, 38,000,000 pounds; making an aggregate of 240,681,751 pounds.

c Pounds of butter made in factories during the census year (June 1, 1879, to May 31, 1880), 29,421,784.

d Pounds of full cream and skim-milk cheese made in factories during the census year, 215,885,361.

STATISTICS OF AGRICULTURE.

TABLE I.—SUMMARY FOR THE TENTH CENSUS.

^a The acreage of Irish potatoes is given for only thirteen of the states and territories, those being selected which show the greatest percentage of land in potatoes to total improved land in farms. In a number of the states the crop is a minor one, being grown, in a majority of instances, in small patches as a garden product, the evident tendency of which is to make the returns of area in crop excessive (e. g., through calling three-fourths or two-thirds of an acre, or even less, an acre) and the resulting average yield too small. Consequently it was not thought desirable to publish the number of acres as returned for these states.

b The reasons given in the preceding note for inaccurate reports of the acreage of Irish potatoes apply as well to sweet potatoes, so that it was thought best to publish the acres for only twenty-three of the states, those being selected which show the largest product.

c The noticeable features of these returns are: (1) The great proportional increase in the orchard products of 1880 over those of 1870 in the southern states generally, notably Alabama, Arkansas, Florida, Mississippi, and Texas, and in some of the extreme western states and territories now undergoing rapid settlement, owing to the wide extension of fruit culture in those regions; (2) the general falling off, relatively at least, in nearly all the great fruit-growing states of the north-eastern, central, and older western sections, owing to the fact that the census year was unfavorable for an average yield.

N. B.—In all comparisons of values between 1870 and 1880 it should be borne in mind that in the former year gold was at an average premium of 25.3 per cent.

N. B.—It will be noticed in the columns of the above table devoted to the census of 1860 that the number of farms of each specified class in the United States, and in every state and territory except Nevada, when added, fail to produce the total number of farms found on page 25. These discrepancies appear without explanation on pages 221 and 222 of the volume on Agriculture of the census of 1860.
