

Information on the "Bosch Global Supplier Award 2023"

Bosch obtains materials and services from a total of around 35,000 suppliers worldwide. The majority of the use of resources in the supply chains is attributable to the purchase of components - in most cases in the form of semi-finished products or finished components. The purchasing spectrum also includes, for example, raw materials, trade goods, software, services, and equipment. In 2022, the value of the Bosch Group's purchasing volume was around 50 billion euros.

For Bosch, the suppliers are also development and innovation partners that contribute to the company's competitiveness and sustainability goals. For this purpose, Bosch is focusing on long-term partnerships with suppliers in order to jointly pursue these projects successfully. Partners who are characterized by close cooperation can participate in the company's strategies and development projects at an early stage and thus align themselves for the future. The partnership-based cooperation between suppliers and Bosch also strengthens resilience in global supply chains.

Every two years, Bosch honors the best of its global suppliers with the "Bosch Global Supplier Award". The technology and services company awards the award for outstanding performance in the manufacture and supply of raw materials, products, or services. The awarding is based on various criteria in the areas of indirect purchasing and services as well as raw materials and components.

Since 1987, Bosch has been honoring the excellence of its suppliers with an award recognized in the industry. In 2023, 46 suppliers from 11 countries received awards. The winners come from Asia Pacific (19), Europe (25), including Germany (15), and North America (2). For the second year, suppliers received an award in the special category "Sustainability". In this case, an interdisciplinary jury evaluates the sustainability performance of suppliers. Finalists in this category have at least a rating "A-" in the renowned Carbon Disclosure Project (CDP) and make an exemplary contribution to climate neutrality.

The Award Winners 2023

Area "Indirect Purchasing"

- A-D-W GmbH
- ALBERT & BERGMANN GMBH
- Alten S.A
- BALLUFF Verwaltungsgesellschaft mbH
- Computacenter AG and Co. oHG
- COSCO SHIPPING Logistics (Europe) GmbH
- Global Brand Concepts GmbH
- HH Associates Limited
- Schäflein AG
- Schnaithmann Maschinenbau GmbH
- SMC Corporation
- TOKYO ELECTRON EUROPE LIMITED Pioneer

Area "Direct Purchasing"

- Alupress AG (Technicon Spa)
- COGNE ACCIAI SPECIALI S.p.a.
- CONSTRUCCIONES GRAVALOS, S.A.
- Cyntec Co., Ltd. (DELTA ELECTRONICS INC.)
- Elektra GmbH
- EuroGroup Laminations S.p.A.
- Global Wafers Co., Ltd.

- Guoguang Electric Co., Ltd.
- HENGDIAN GROUP DMEGC
- Heraeus GmbH
- Hermann Erkert GmbH
- IKD Co., Ltd.
- IRISO ELECTRONICS CO., LTD.
- LG Display Germany GmbH
- Micron Semiconductor Products Inc.
- Minebea Mitsumi Inc.
- Murata Manufacturing Co. Ltd.
- NIRA DYNAMICS AB
- NITTO DENKO CORP.
- NSK Deutschland GmbH
- Reich GmbH
- RECHI PRECISION CO., LTD.
- RENESAS ELECTRONICS EUROPE GMBH
- SALZGITTER FLACHSTAHL GMBH
- Societe Tunisienne des Filtres s.a MISFAT
- Suzhou CMS Machinery Co. Ltd.
- Ten Pao International Limited
- WANHUA CHEMICAL
- WUXI WEIFU HIGH-TECHNOLOGY CO., LTD.
- Yantai Dongxing Magnetic Materials Inc.
- Zhejiang Yat Electrical Appliance Co. Ltd.

Category "Sustainability"

- BT GmbH & Co. oHG
- Emerson Electric Co.
- ROHM Co., Ltd.
