### PROFESSIONAL EXPERIENCE

- NATIONAL CANCER INSTITUTE, NATIONAL INSTITUTES OF HEALTH
- (2019 – present)
  - Senior Advisor for Health Disparities**, Office of the Director, Division of Cancer Control and Population Sciences
  - This position involves coordinating health disparities and health equity activities across the division and ensuring that we have a robust portfolio in these areas.
  - Liaison with other institutes and agencies across NIH, DHHS and other federal agencies to identify areas for research and funding especially pertaining to health challenges of underserved populations
  - Enhance the capacity of conducting population health intervention research including the social, behavioral, and health research fields by coordinating the publishing of articles in scientific literature to advance science and medical research
  - Build partnerships and coordinate activities across tribes, tribal councils, extramural researchers, and program staff at NIH for the promotion of projects that serve the Native American communities
  - Build networks and train extramural researchers that can address issues relating to social determinants of health and population health interventions
  - Participate in developing national objectives as they relate to social determinants of health and health disparities.
  - Identify areas for future research and develop consensus materials for future areas of research especially as they relate to underserved and hard-to-reach populations
  - Identify priority areas, develop areas for funding (both internal to NCI and across NIH) and funding opportunity announcements to stimulate the field
