

Training Opportunities Within the Division of Cancer Control and Population Sciences

Become a Fellow

The Division of Cancer Control and Population Sciences (DCCPS) hosts different types of fellows throughout the year. The program has opportunities for people at most levels of educational training, from high school students to postdocs. Research areas include:

- Epidemiology and genomics
- Behavioral research
- Healthcare delivery
- Surveillance
- Implementation science
- Big data
- Survivorship
- Health disparities

Fellows work with a mentor on research projects, literature reviews, data analyses, presentations, and/or manuscript preparation. Fellows receive a monthly stipend, fully covered health insurance benefits, and a commuter subsidy.

Richard P. Moser, Ph.D.

Training Director, Division of Cancer Control and Population Sciences, National Cancer Institute

Training and Fellowships at NCI

There are many ways to join the National Institutes of Health, NCI, and DCCPS as a fellow, even if not directly through the DCCPS opportunities above. These broader fellowship opportunities can lead you to working with us!

Cancer Prevention Fellowship Program

Open to postdoctoral, post-medical, or J.D. students. Applications accepted annually between May and August. Learn more: <https://cpfp.cancer.gov/>

Summer Internship Program in Biomedical Research

Open to high school, undergraduate, graduate, or professional students. Applications accepted until March 1 of each year. Learn more: <https://www.training.nih.gov/programs/sip>

Presidential Management Fellows Program

Open to post-master's, postdoctoral, post-medical, or J.D. students. This fellowship is sponsored by the US Office of Personnel Management and has specific requirements. Learn more: <https://www.pmf.gov/>

NCI Communications Fellowship

Open to post-master's or postdoctoral students. Learn more: <https://ncf.nci.nih.gov/>

Why Join DCCPS as a Fellow?

"DCCPS [is] a wonderful, supportive, and innovative environment. It has benefitted me both personally and professionally to be a part of this inclusive group of public health professionals."

- Postdoctoral fellow in the Epidemiology and Genomics Research Program

"[I] Really enjoyed my experience at NCI and felt that it prepared me to be a competitive candidate when applying to Ph.D. programs."

- Postbaccalaureate fellow in the Healthcare Delivery Research Program
