

CITIES CLIMATE FINANCE LEADERSHIP ALLIANCE

The Cities Climate Finance Leadership Alliance is a coalition of leaders committed to deploying finance for city-level climate action at scale by 2030.

70%

Population that will live in cities by 2050

90%

Cities that are on coasts

70%

Share of global emissions from cities

\$93tn

Sustainable infrastructure spending needed in the next 15 years

In its next phase, the Alliance aims to:

Build awareness of city finance needs and opportunities

Craft a strong global architecture to support measurement and evaluation

Identify existing solutions and gaps in city-level climate-related finance

Support new investment solutions that fill crucial gaps in cities climate finance

MEMBERS

By taking part in the Alliance, and by contributing expertise, access to networks, and funding, these leaders have committed to working together to bridge demand and supply for sustainable climate-friendly and resilient finance at the subnational level.

JOIN THE ALLIANCE

Who can join?

- Local and regional governments
- City and region networks
- Public and private finance institutions
- Non-governmental organizations and research institutions

- Academic institutions
- Foundations and philanthropies
- International organizations
- National governments

By taking part in the Alliance, members:

- Demonstrate leadership and ambition
- Accelerate NDC implementation and address investment barriers
- Exchange knowledge and best practices
- Send a strong signal to the market
