

14 June 2023

Request

Please can you tell me how much the Parish of St Helier has spent on feasibility studies looking at traffic engineering schemes which potentially affects traffic flow on any of the following roads:

- New St John's Road
- Parade Road
- Old St John's Road
- Rousell Street
- West Park Avenue

Response

The Parish of St Helier has not undertaken any feasibility studies to look at traffic engineering schemes which potentially affect traffic flow on the following roads:

- New St Johns Road
- Parade Road
- Old St Johns Road
- Rousell Street
- West Park Avenue

The only assessment undertaken was at Officer level and related to public engagement with residents of Old St Johns Road in relation to temporary speed humps. When the matter was presented to the Roads Committee, it was decided not to progress with temporary speedhumps and to instead trial access to premises only. Please refer to Roads Committee Minutes 26th January 2022 [TECHNICAL & ENVIRONMENTAL SERVICES \(sthelier.je\)](#)

St Johns Road was discussed again at the Roads Committee meeting of 15th March 2023 [TECHNICAL & ENVIRONMENTAL SERVICES \(sthelier.je\)](#) and the meeting of 12th April 2023 [TECHNICAL & ENVIRONMENTAL SERVICES \(sthelier.je\)](#)
