

RSC Professional Development Programme for Science Teachers

A science empowerment project from the Royal Society of Chemistry Yusuf Hamied Inspirational Science Programme

The aim of the Teacher Development programme is to provide teachers with new tools for delivering engaging and effective science lessons. We are now offering teacher training workshops online.

Who can attend?

Science teachers for classes 6th to 12th standard from across India can register themselves or their schools.

Duration

There are three modules in a workshop. Each module lasts two to three hours.

By the end of the three modules teachers will be able to:

- extend their repertoire of teaching techniques
- plan a lesson using active learning strategies
- access and explore online resources to help students learn science
- use diagnostic questions to challenge common misconceptions
- use a range of active learning techniques to teach abstract ideas
- and much more!

To find out more or register for a training workshop please contact us at teacherdevelopers@rsc.org
