Despite improvements in vaccine coverage rates in recent years, there is still much work to be done to achieve the Healthy People 2030 goal of preventing infectious diseases through increasing vaccination rates. The focus of the Utah Department of Health and Human Services Immunization Program continues to be those areas, groups, and communities where immunization interventions can be concentrated to make significant improvements in immunization coverage levels.

The Immunization Coverage Report, State of Utah: 2023, supports the mission and goal of state and local immunization programs which is: “. . . to improve the health of Utah citizens through vaccination to reduce illness, disability, and death from vaccine-preventable infections.”

This annual immunization coverage report provides an overview of immunization information about Utah residents, organized by immunization coverage status for Utah children, adolescents, and adults. The report presents data obtained from 4 primary sources: the National Immunization Survey (NIS), the Behavioral Risk Factor Surveillance System (BRFSS), the Utah Statewide Immunization Information System (USIIS), and an online survey administered through the research electronic data capture (REDCap) system for tracking immunization and exemption rates in Utah schools, licensed daycare facilities, and long-term care facilities. Care should be taken before considering comparisons because of the differences in the collection methodologies of these data sources.

Continuing efforts to increase childhood immunization levels include a variety of interventions, such as making sure healthcare providers have current information on immunization best practices. The Utah Immunization Program maintains collaborations with school nursing staff, local healthcare providers, health systems, school districts, childcare licensing facilities, and local health districts. These combined efforts will help make sure Utah children are protected from vaccine-preventable diseases now and into the future.

This report can be a resource for local immunization programs to evaluate coverage areas, identify gaps in services, develop immunization intervention strategies, and consider further investigations. We value your opinion and welcome your feedback about this report.

## 2023 summary

### Report purpose:

This annual report is intended to capture and summarize Utah’s most recent immunization data across several different data sources. This comprehensive reporting of many immunization metrics allows the DHHS immunization program and our partners to identify geographic and demographic subgroups in Utah with low or worsening vaccination coverage. This, in turn, permits efficient targeting of intervention efforts to improve protection against vaccine-preventable diseases for all Utahns.

### Intended audience:

This report is intended to present relevant immunization data for use by local public health officials and community partners. Data is presented at the state level and at each local health department level for comparison.

### Important takeaways:

- Vaccine coverage estimates in Utah exceed that of our region and the nation for early childhood vaccinations ([pages 1-7](#)).
- Coverage for most teen vaccines decreased in 2022 after an improvement in the prior year ([pages 15-18](#)). The biggest decrease was seen in the HPV vaccine series completion for males ages 13-17 in Utah ([page 18](#)).
- School vaccine exemptions have increased dramatically across the state during the previous two school years, with 7% of in-person kindergarteners and 47% of online kindergarteners claiming exemption. Even though the parents of online students claim the most exemptions, parents of approximately 10% of charter students and 5% of district school students also claim exemptions for their students. Exemptions are highest in local health departments off of the Wasatch Front and in charter and online schools ([pages 10-14](#)).
- Influenza vaccine uptake has decreased in each of the past two years, primarily among younger adult age groups ([pages 21-22](#)).
- Many vaccination metrics are worse in rural or frontier areas than in more urban areas of the state ([pages 11-13, 21](#), and the [LHD sections](#)).

The 29 counties in Utah are divided between 13 local health districts (LHDs) which are used in this report as the geographic boundaries of reporting service areas (see the map of Utah below). Statewide, regional, and national information is presented for comparison where appropriate.

Although limited comments may follow a specific graph or chart, more detailed notes may be found in the References section, page 155. Explanatory footnotes are provided on some pages and are intended to supply information pertaining to data sources and limitations on data interpretation.

### Early childhood immunization

The Advisory Committee on Immunization Practices (ACIP) and the Centers for Disease Control and Prevention (CDC) establish standards of comparison for immunization status. Up-to-date (UTD) at age 2 is the percentage of children 24 months of age who received all doses of recommended vaccines. This standard is used across the U.S. by state immunization programs and provider sites to evaluate their effectiveness in protecting children from vaccine-preventable diseases.

### Child and adult immunization

Exposure to groups of people of any age increases the risks for getting and transmitting infectious diseases. More than two-thirds of children younger than 6 years and nearly all older children spend significant time in childcare and school settings outside the home. The Utah Immunization Rule for Students (R396-100) became effective in 1975 to implement consistent requirements to protect children who attend school.

### School entry (Kindergarten and 7th Grade) and 2 Doses of MMR (K-12)

Required kindergarten school entry immunizations include: DTaP, polio, MMR, hepatitis B, hepatitis A, and varicella vaccines.

Required 7th grade school entry immunizations include: hepatitis B, varicella, Tdap, and meningococcal vaccines.

### Influenza and pneumococcal

The incidence of childhood vaccine-preventable diseases has declined dramatically, but we have not achieved similar successes among adults. Adults still suffer most from certain vaccine-preventable diseases in the U.S.

The 2022 Behavioral Risk Factor Surveillance System (BRFSS) survey results on influenza and pneumococcal immunization data are included in this report. These data provide a summary of the coverage of influenza and pneumococcal vaccinations for adults 18 years of age and older.

Appendix B includes 2022 immunization information for residents of long-term care and assisted living facilities. This data is collected by the Utah Department of Health and Human Services Immunization Program through an annual REDcap survey.

### National Immunization Survey (NIS)

The NIS is sponsored by the National Center for Immunizations and Respiratory Diseases (NCIRD) and conducted jointly by NCIRD and the National Center for Health Statistics (NCHS) at the Centers for Disease Control and Prevention (CDC). The NIS is a random-digit-dialing telephone survey of parents followed by a mailed survey to children's immunization providers. The survey asks providers for immunization information. The results are tabulated and presented by the CDC. The NIS assesses vaccination levels of young children (ages 19–35 months), teens (ages 13–17 years) and, for flu only, children (ages 6–18 months and ages 3–12 years). Further descriptions of the NIS surveys can be found here: <https://www.cdc.gov/vaccines/imz-managers/nis/about.html>.

### Behavioral Risk Factor Surveillance System (BRFSS)

The Utah BRFSS is an ongoing information collection effort by the Utah Department of Health and Human Services (DHHS) in conjunction with the CDC to assess the prevalence of and trends in health-related behaviors in the noninstitutionalized Utah adult population ages 18 years and older. The BRFSS survey is conducted by DHHS employees who contact Utahns by landline and cell phones and use a scripted questionnaire to conduct interviews. The CDC then aggregates annual results. In Utah for 2022, 1,330 interviews were conducted by landline phones and 8,679 interviews were conducted by cell phones.

### REDCap web database and survey tool

Research electronic data capture (REDCap) is a secure web online survey and database platform used to track immunization coverage rates for Utah schools, Head Start programs, licensed daycare facilities, and long-term care facilities. The Utah Department of Health and Human Services Immunization Program staff access the online database to track data and run reports required by state rules. Users at schools, Head Start programs, daycare facilities, and long-term care facilities access the secure web survey to enter immunization data for their facilities.

### Utah Statewide Immunization Information System (USIIS)

Established in 1998, USIIS collects, consolidates, and manages immunization records for Utah residents of all ages. The primary sources of USIIS data are healthcare providers, including public clinics, private clinics and practices, hospitals, and pharmacies (see table on the next page). Additionally, USIIS contains birth certificate data from the DHHS Office of Vital Records and Statistics. Participation in USIIS is voluntary; not all providers of immunizations participate. However, participation is required for all Vaccines for Children (VFC) providers. See page 118 for more details about the VFC program.

For the 2023 Immunization Coverage Report, USIIS records were grouped into 13 local health district service areas by their most up-to-date ZIP code and county information. Coverage results reflect 2022–2023 data submitted to USIIS as of July 1, 2023. Child coverage results include approximately 90% of Utah children—persons 18 years of age and younger with at least 1 immunization. Adult immunization coverage estimates include approximately 70–90% of Utah adults—persons age 19 and older with at least 1 immunization. Although USIIS data provides helpful vaccination estimates, it is not a comprehensive archive of all vaccinations given in the state and should be interpreted with caution.

Count of enrolled USIIS provider facilities		
	2022	2023
Charter schools	133	136
District schools	729	735
Private schools	74	79
School districts	46	46
Daycare facilities	267	289
Early childhood programs	48	50
Head Start centers	31	34
EHR vendor or interface vendor	61	65
Federally qualified health center (FQHC)/ rural health center (RHC)/ community health center (CHC)	68	73
Health maintenance organizations	4	5
Hospitals	63	68
Indian health centers	20	21
Local health departments	54	55
Long-term care/ nursing home	170	191
Pharmacies	525	534
Private providers	891	939
Vital records	1	1
Women, Infants, and Children (WIC) program	2	2
Immunization information systems	-	2
Other public providers	106	109
Total	3293	3434

Acronyms and abbreviations

ACIP—Advisory Committee on Immunization Practices  
BRFSS—Behavioral Risk Factor Surveillance System  
CDC—Centers for Disease Control and Prevention  
CHC—Community health center  
CI—Confidence interval  
DTaP—Diphtheria, tetanus toxoids, and acellular pertussis vaccine  
FQHC—Federally qualified health center  
Hep A—Hepatitis A vaccine  
Hep B—Hepatitis B vaccine  
HHS—U.S. Health and Human Services  
Hib—Haemophilus influenzae type B  
HPV—Human papillomavirus  
IQIP—Immunization quality improvement program  
LHD—Local health district  
MenACWY—Meningococcal conjugate vaccine  
MenB—Meningococcal B vaccine  
MMR—Measles, mumps, rubella vaccine  
NIS—National Immunization Survey  
PCV—Pneumococcal conjugate vaccine  
PPSV—Pneumococcal polysaccharide vaccine  
REDCap—Research electronic data capture online survey and database platform  
RHC—Rural health center  
Tdap—Tetanus, diphtheria, and pertussis vaccine  
DHHS—Utah Department of Health and Human Services  
USIIS—Utah Statewide Immunization Information System  
UTD—Up to date  
VFC—Vaccines for Children Program  
WIC—Women, Infant, and Children Program

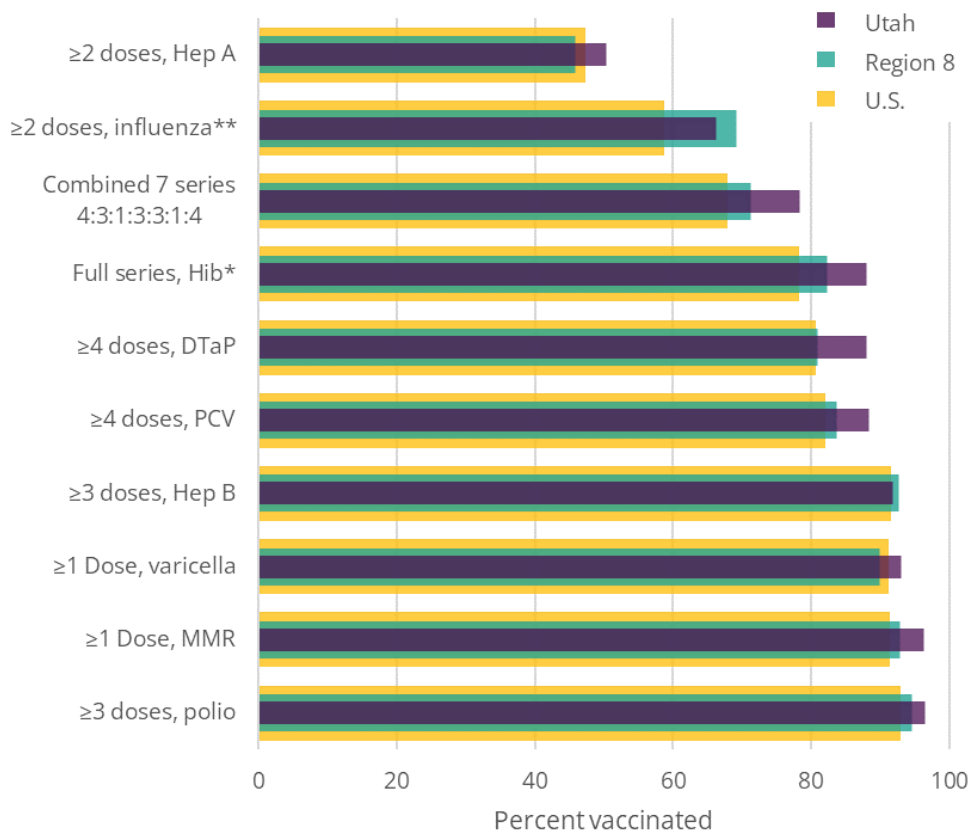

Combined series definitions

4:3:1 = 4 DTaP, 3 polio, 1 MMR  
4:3:1:3 = 4 DTaP, 3 polio, 1 MMR, 3 Hib  
4:3:1:4 = 4 DTaP, 3 polio, 1 MMR, 4 PCV  
4:3:1:3:3 = 4 DTaP, 3 polio, 1 MMR, 3 Hib, 3 Hep B  
4:3:1:0:3:1 = 4 DTaP, 3 polio, 1 MMR, 0 Hib, 3 Hep B, 1 varicella  
4:3:1:3:3:1 = 4 DTaP, 3 polio, 1 MMR, 3 Hib, 3 Hep B, 1 varicella  
4:3:1:4:3:1 = 4 DTaP, 3 polio, 1 MMR, 4 Hib, 3 HepB, 1 varicella  
4:3:1:0:3:1:4 = 4 DTaP, 3 polio, 1 MMR, 0 Hib, 3 HepB, 1 varicella  
4:3:1:3:3:1:4 = 4 DTaP, 3 polio, 1 MMR, 3 Hib, 3 Hep B, 1 varicella, 4 PCV

The National Immunization Survey (NIS)-Child Survey was first launched in 1994. The target population for the NIS-Child is children who live in the U.S., and are or will be 19–35 months old within a few weeks of being selected to participate in the survey. The NIS is a random-digit-dialed survey of parents or guardians and includes data for more than 15,000 children annually. The telephone survey is followed by a questionnaire mailed to vaccination providers to obtain the child’s vaccination history. Data are used to monitor vaccination coverage among 2-year-old children at the national, state, and selected local levels, and some in U.S. territories.

For the most recent survey year available, Utah’s estimates of vaccine coverage in 2-year-olds exceeded that of the U.S. and Region 8 in all categories except 2 or more doses of influenza vaccine and 3 or more doses of hepatitis B vaccine.

**Estimated vaccination coverage among children age 24 months, in Utah, Region 8, and the U.S., birth year 2020**

\*3 or 4 doses of Haemophilus influenzae type b conjugate vaccine, depending on vaccine type.  
 \*\*Doses must be at least 24 days apart (4 weeks with a 4-day grace period)

Health and Human Services Region 8 includes Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming.

Data source: 2022 National Immunization Survey (NIS) among children aged 24 months of age by birth year, CDC (Ref 5).

≥4 doses of DTaP vaccine for children age 24 months, by birth year 2016–2020, Utah, Region 8 and U.S.

≥3 doses of polio vaccine for children age 24 months, by birth year 2016–2020, Utah, Region 8 and U.S.

Data source: 2022 National Immunization Survey (NIS) among age children 24 months by birth year, CDC (Ref 5).

≥1 doses of MMR vaccine for children age 24 months, by birth year 2016–2020, Utah, Region 8 and U.S.

Full series of Hib vaccine for children age 24 months, by birth year 2016–2020, Utah, Region 8 and U.S.

Data source: 2022 National Immunization Survey (NIS) among age children 24 months by birth year, CDC (Ref 5).

Data source: 2022 National Immunization Survey (NIS) among age children 24 months by birth year, CDC (Ref 5).

≥3 doses of HepB vaccine for children age 24 months, by birth year 2016–2020, Utah, Region 8 and U.S.

≥1 doses of varicella vaccine for children age 24 months, by birth year 2016–2020, Utah, Region 8 and U.S.

≥4 doses of pneumococcal vaccine for children age 24 months, by birth year 2016–2020, Utah, Region 8 and U.S.

Combined 7\* series of vaccination for children age 24 months, by birth year 2016–2020, Utah, Region 8 and U.S.

\* 4:3:1:3:3:1:4 = 4 DTaP, 3 polio, 1 MMR, 3 Hib, 3 Hep B, 1 varicella, 4 PCV

≥1 doses of Hep B vaccination for children age 0-3 days, by birth year 2016–2020, Utah, Region 8 and U.S.

≥2 doses of rotavirus\*\* vaccine for children age 8 months, by birth year 2016–2020, Utah, Region 8 and U.S.

\*\* 2 or 3 doses, depending on vaccine type

Data source: 2022 National Immunization Survey (NIS) among age children 24 months by birth year, CDC (Ref 5).

≥2 doses of influenza vaccine† for children age 24 months, by birth year 2016–2020, Utah, Region 8 and U.S.

† Doses must be at least 24 days apart (4 weeks with a 4-day grace period)

≥2 doses of Hep A vaccine for children age 35 months, by birth year 2016–2020, Utah, Region 8 and U.S.

Data source: 2022 National Immunization Survey (NIS) among age children 24 months by birth year, CDC (Ref 5).

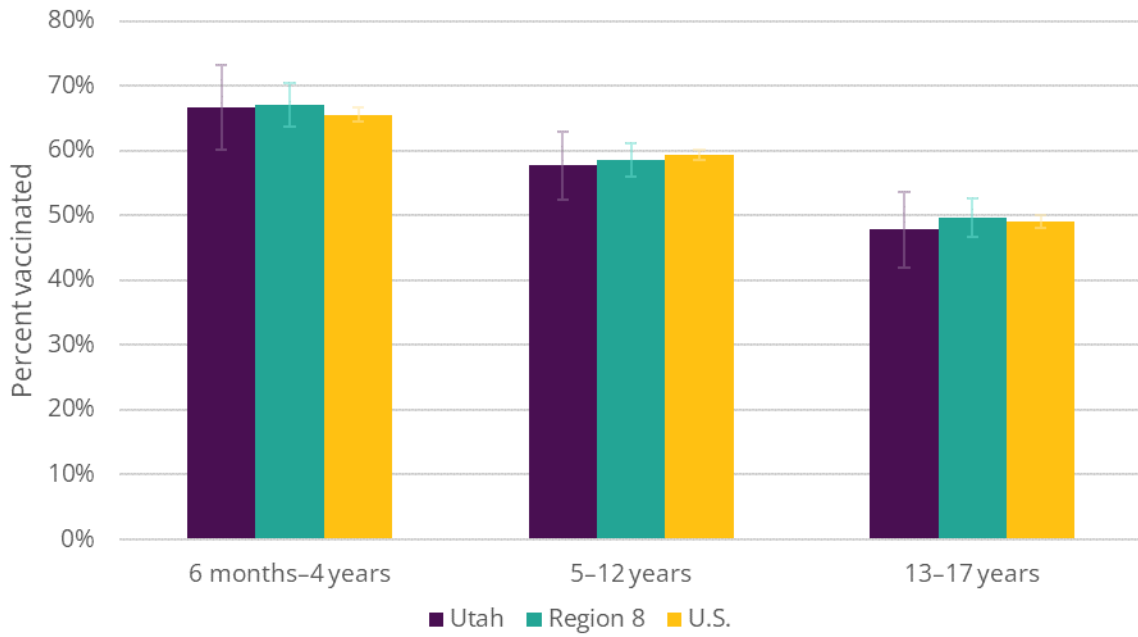

The table below shows vaccine coverage estimates for Utah 2-year-olds from 2 different data sources. The NIS estimate is from the nationally-administered survey and the USIIS estimate is from the state immunization registry. While both data sets may show similar trends, it is important to realize that each dataset may have different limitations and present somewhat different estimates. We suggest caution when comparing between datasets.

Estimated vaccination coverage among children age 24 months			
Comparing estimates from NIS–Child survey and USIIS database			
	Utah, NIS survey, birth year 2020		Utah, USIIS data, birth year 2020
	%	CI %	%
≥4 DTaP	88.1	82.3 to 92.8	78.5
≥3 polio	96.5	92.3 to 98.8	90.5
≥1 MMR	96.4	93.5 to 98.2	87.4
Hib, full series	88.1	82.3 to 92.6	89.7
≥3 Hep B	91.8	85.9 to 95.8	90.6
Hep B birth dose <sup>§</sup>	82.4	74.6 to 88.2	86.1
≥1 varicella	93.1	87.7 to 96.6	86.8
≥4 PCV	88.3	82.2 to 93.0	78.7
≥2 Hep A	50.3	41.9 to 59.4	69.6
4:3:1:3:3:1:4 <sup>§§</sup>	78.3	70.6 to 85.1	72.6

<sup>§</sup> One dose Hep B given from birth through age 3 days.

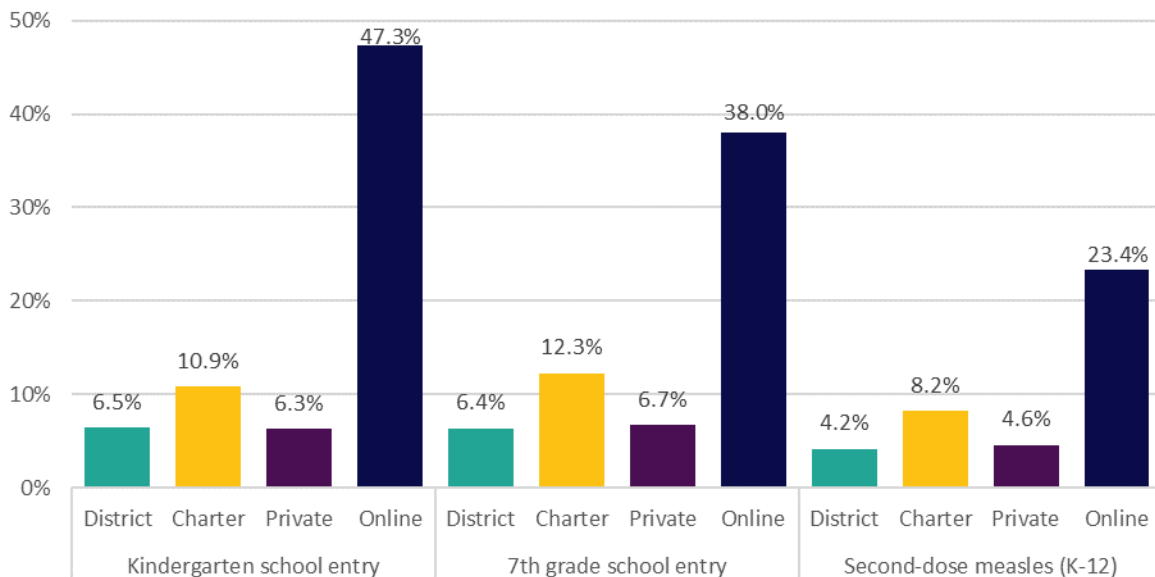

<sup>§§</sup> 4+ DTaP, 3+ polio, 1+ MMR, 3 or 4 doses Hib, depending on vaccine type, 3+ Hep B, 1+ varicella, and 4+ PCV.

Childhood influenza vaccination for the 2022/23 flu season, by age group, Utah, Region 8 and U.S.

Immunization status by school type, 2022–23 school year		
Facility type	Adequately immunized (%)	Total exemptions (%)
Childcare facilities and preschools	90.0	5.6
Head start centers	93.3	3.8
Kindergarten (online)	49.6	47.3
Kindergarten (in person or hybrid)	88.2	7.2
District schools	88.5	6.5
Charter schools	86.2	10.9
Private schools	89.8	6.3
7th grade (online)	54.4	38.0
7th grade (in person or hybrid)	88.1	7.0
District schools	88.5	6.4
Charter schools	84.2	12.3
Private schools	87.9	6.7
Second-dose MMR, K-12 (online)	75.7	23.4
Second-dose MMR, K-12 (in person or hybrid)	94.8	4.7
District schools	95.3	4.2
Charter schools	91.2	8.2
Private schools	93.9	4.6

Total student exemptions by school type, 2022–23 school year

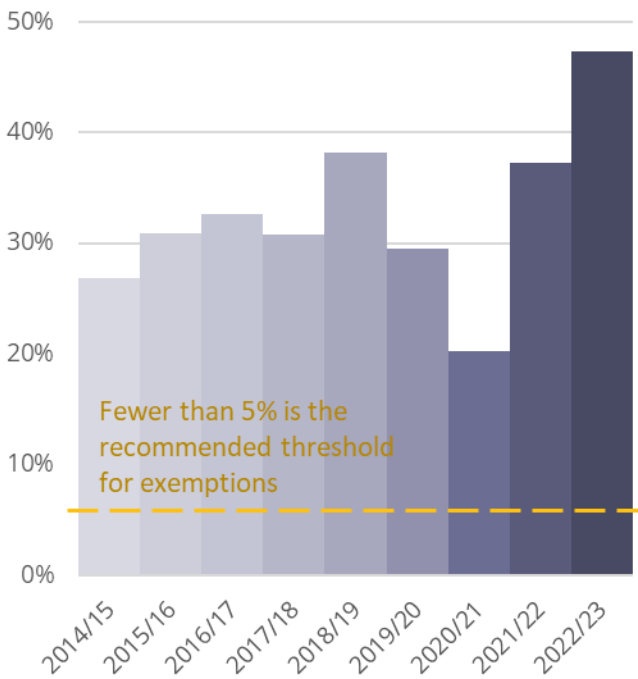

Data source: School immunization and exemption data are collected from agencies and school districts through electronic reporting to the DHHS Immunizations Program (Ref 1).

Kindergarten exemptions  
by health district and school year

Kindergarten exemptions for  
online students, by school year

Kindergarten exemptions for  
in-person students, by school year

Data source: School immunization and exemption data are collected from agencies and school districts through electronic reporting to the DHHS Immunizations Program (Ref 1).

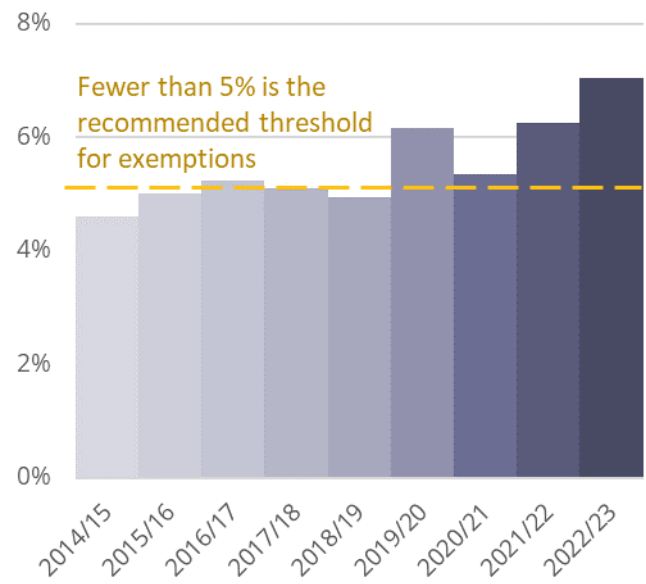

7th grade exemptions  
by and health district and school year

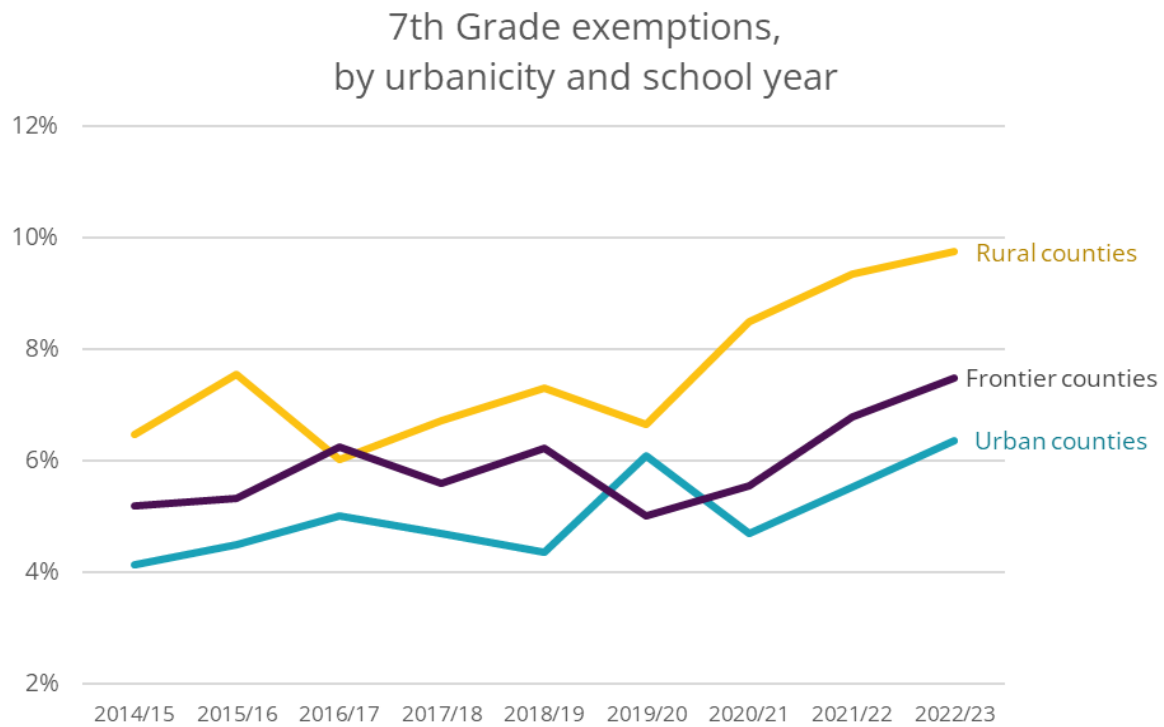

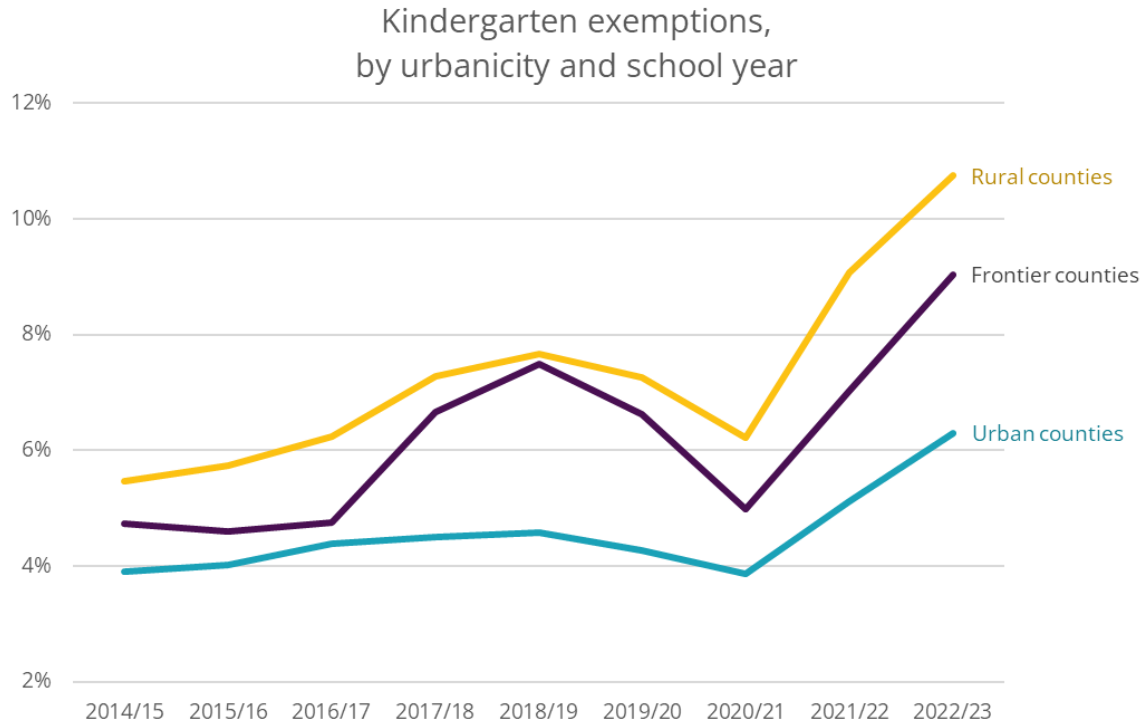

7th grade exemptions for online students, by school year

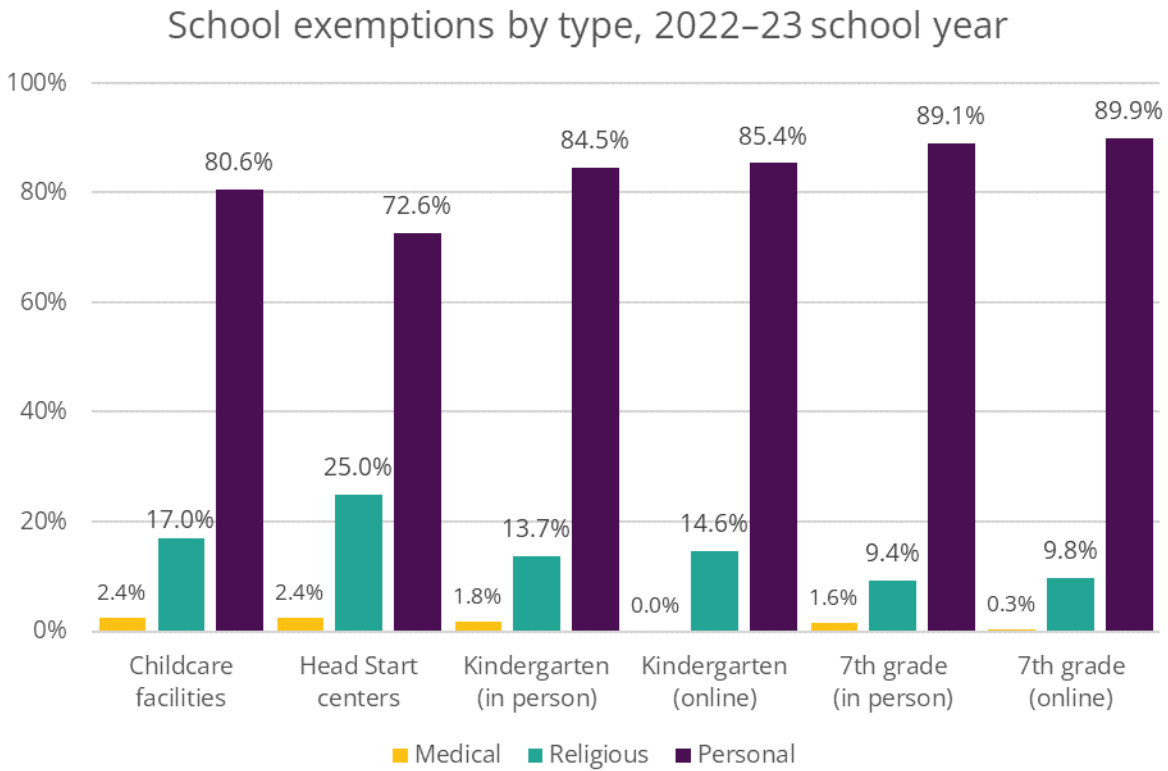

7th grade exemptions for in-person students, by school year

Data source: School immunization and exemption data are collected from agencies and school districts through electronic reporting to the DHHS Immunizations Program (Ref 1).

Data source: School immunization and exemption data are collected from agencies and school districts through electronic reporting to the DHHS Immunizations Program (Ref 1).

Data source: School immunization and exemption data are collected from agencies and school districts through electronic reporting to the DHHS Immunizations Program (Ref 1).

Since 2007, the CDC has published annual NIS data for teen populations. This survey is similar to the childhood NIS. Responses are collected via telephone through random-digit dialing to parents of children ages 13-17. Those who participated were asked to provide healthcare provider information so their verbal responses could be validated through the official immunization record. Participants were asked about receiving meningococcal conjugate (MenACWY), MMR, hepatitis B, varicella, Tdap, and HPV vaccines. The CDC identified 3 limitations to this survey: 1) there could be bias due to nonresponse and households without landline telephones; 2) underestimation of vaccine coverage may have occurred due to the exclusive use of provider-verified records; and 3) some state level and race/ethnicity level data should be interpreted with caution because of small sample sizes.

≥1 doses of Tdap vaccine for teens age 13-17 years, 2018–2022, Utah, Region 8 and U.S.

≥2 doses of varicella vaccine for teens age 13-17 years, 2018–2022, Utah, Region 8 and U.S.

≥1 doses of Men ACWY vaccine for teens age 13-17 years, 2018–2022, Utah, Region 8 and U.S.

≥1 doses of HPV vaccine for teens age 13-17 years, 2018–2022, Utah, Region 8 and U.S.

HPV vaccine up to date for teens age 13-17 years, 2018–2022, Utah, Region 8 and U.S.

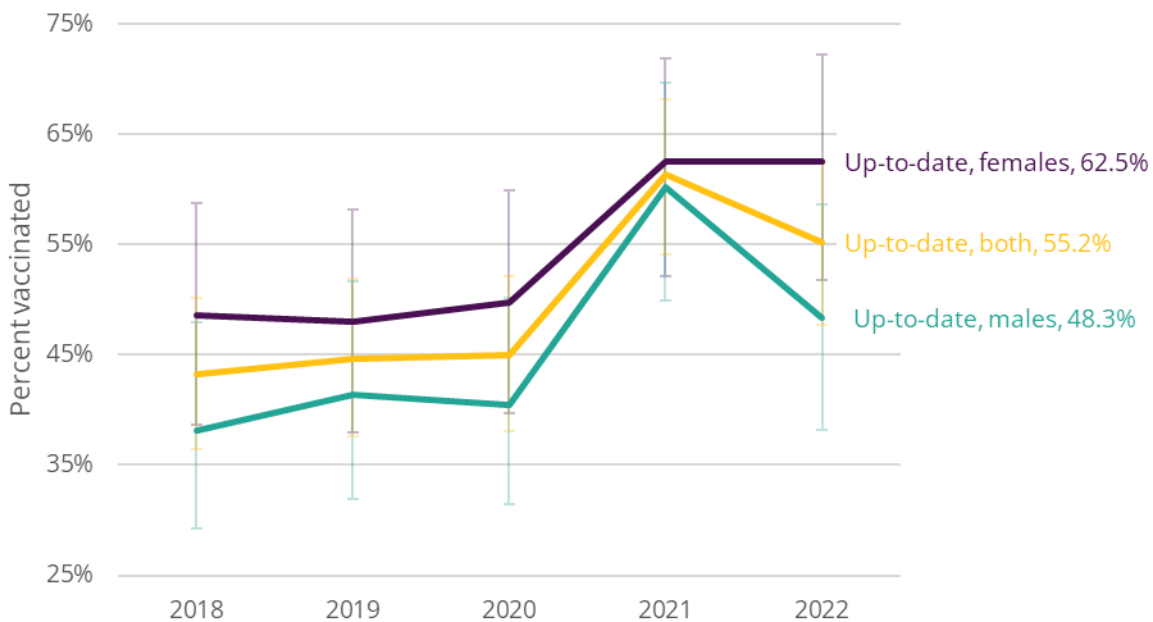

Data source: 2018-2022 National Immunization Survey (NIS), Adolescent/Teens—CDC (Ref 4).

≥1 doses of HPV vaccine for teens age 13-17 years, by gender, 2018–2022, Utah

HPV vaccine up to date for teens age 13-17 years, by gender, 2018–2022, Utah

Data source: 2018-2022 National Immunization Survey (NIS), Adolescent/Teens—CDC (Ref 4).

Since 1984, DHHS has conducted the Behavioral Risk Factor Surveillance System (BRFSS) in partnership with the Centers for Disease Control and Prevention to assess the prevalence of and trend in health-related behaviors in the non-institutionalized Utah adult population. Valuable adult vaccination data is collected in this survey for population throughout Utah.

Pneumococcal vaccination (ever received) rates for Utah adults, by age group, 2018–2022

Change in adult (18+) pneumococcal vaccination by urban, rural, and frontier location of residence from 2021 to 2022

Pneumococcal vaccination for Utah adults, by age group and sex, 2022

2022 Pneumococcal vaccination (ever received), age 18+ by local health district

Location	%	CI %
Bear River	30.0	25.3–35.2
Central Utah	33.2	27.4–39.5
Davis County	35.9	31.6–40.4

Weber-Morgan	67.4	58.6-75.2
State of Utah	66.5	64.0-68.9

Estimates of adult immunization rates with shingles/zoster vaccine and tetanus vaccine are collected by the BRFSS on a rotating basis every 3 years. Questions about tetanus vaccination were included in survey years 2013, 2016, 2019, and 2022. Questions about shingles/zoster vaccination were included in survey years 2014, 2017, and 2020. The most recent data for each measure is presented in the graphs below.

2022 Tetanus vaccination (within the past 10 years), age 50-64 by local health district

Location	%	CI %
Bear River	63.7	50.5–75.2
Central Utah	62.9	48.4–75.3

Central Utah kindergarten exemptions by type, by school year

Data source: School immunization and exemption data are collected from agencies and school districts through electronic reporting to the DHHS Immunizations Program (Ref 1).

≥19 Years of age		
Adults in USIIS born on or before 7/1/2004		
	Total	%
Central Utah Health District	81761	-
≥1 dose flu last season*	16020	19.6
≥1 dose Tdap	38422	47.0
≥1 dose varicella	11359	13.9
≥1 dose HPV	5981	7.3
≥1 dose zoster**	5987	15.9
≥1 dose MMR	26814	32.8
≥1 dose PCV	15332	18.8
≥1 dose PPSV23***	12439	51.0
≥1 dose HepA	24916	30.5
≥1 dose HepB	27788	34.0
≥1 dose meningococcal	10037	12.3
≥1 dose MenB	499	0.6
≥1 dose Hib	16151	19.8

\* Last flu season between 7/1/2022 and 6/30/2023.

\*\* Zoster vaccination only available to adults age 50+. This measure reports only the percentage of adults age 50+ who are vaccinated with the zoster vaccine.

\*\*\* PPSV23 vaccination only recommended for adults age 65+. This measure reports only the percentage of adults age 65+ who are vaccinated with PPSV23.

Adult COVID-19 vaccinations					
COVID vaccine administrations recorded in USIIS as of 7/1/2023					
Age 19–34 years	Total*	%	Age 50–65 years	Total*	%
Central Utah Health District	18515	-	Central Utah Health District	11260	-
≥ 1 dose COVID	6816	36.8	≥ 1 dose COVID	8288	73.6

## Immunization quality improvement program report

The Immunization Quality Improvement Program (IQIP) is a program designed to provide quality improvement activities for Vaccines for Children (VFC) providers. The purpose of IQIP is to promote and support provider-level quality improvement efforts designed to increase on-time vaccination of children and adolescents in adherence to the Advisory Committee on Immunization Practices (ACIP) routine immunization schedule.

### IQIP core strategies

Facilitate return for vaccination

Leverage IIS functionality to improve immunization practice

Give a strong vaccine recommendation  
(include HPV vaccine if the provider has adolescent patients)

Strengthen vaccine communications

The goal is to initiate the IQIP process with 25% of our providers. We were able to meet this goal with 83 initial visits among the 330 VFC providers. These visits are followed up throughout the entire 12-month cycle.

#### PY4 Requirements Met

#### Site Visit Method

## IQIP process

## Site visit (In-Person)

- Discuss provider's vaccination workflow
- Review initial coverage assessments and set coverage goals
- Discuss, select, and practice QI strategies

## 2-Month check-in (phone call)

- Monitor progress
- Provide technical assistance and motivation
- Update Strategy Implementation Plan

## 6-Month check-in (phone call)

- Monitor progress
- Provide technical assistance and motivation
- Update strategy implementation plan

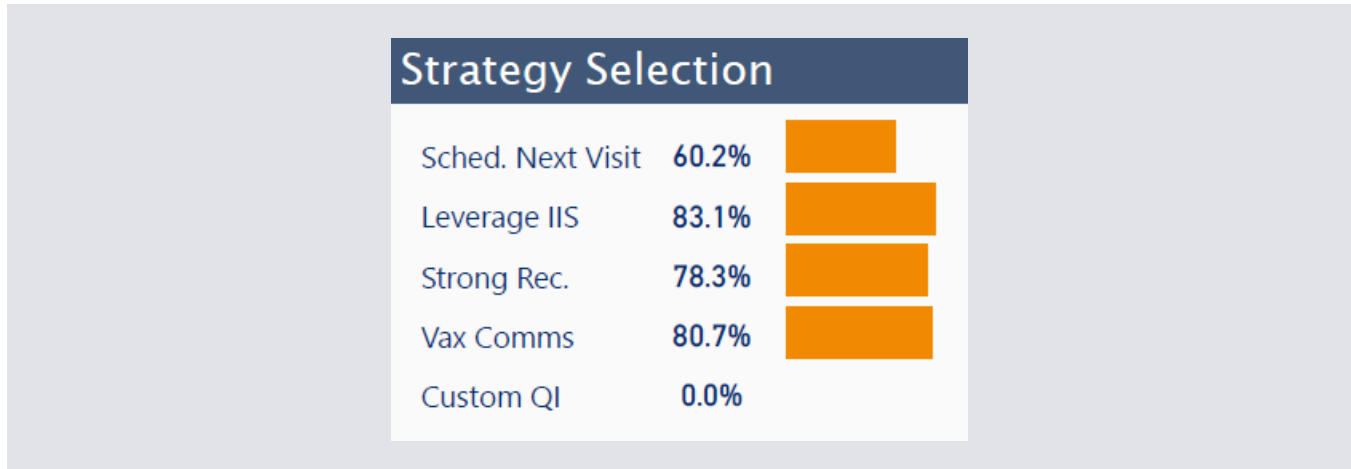

## 12-Month follow-up (phone call)

- Assess QI progress and provide technical assistance
- Evaluate year-over-year change in coverage levels
- Update strategy implementation plan and encourage continued effort

Each provider decides on a strategic implementation plan with the IQIP representative. The representative follows up at 2 months and 6 months and then re-runs the assessment rates. Progress is reviewed at 12 months after the initial site visit.

## Strategies selected

Each visited provider was allowed to select 2 of the QI strategies described below. This graph shows how often each strategy was picked.

Strategy 1: Schedule the next vaccination visit before the patient leaves the provider location.

Rationale: On-time vaccination depends upon providers telling patients and parents how important it is to return for follow-up doses to comply with the ACIP schedule. When you schedule the next visit before the patient leaves, you help them adhere to the schedule by telling them when doses are due. This supports their return to the office and reduces barriers regarding intentions to vaccinate.

Strategy 2: Leverage IIS functionality to improve immunization practice.

Rationale: Data in the ISS forecasts needed vaccinations, provides consolidated vaccination records, delivers reminders for upcoming appointment, and provides coverage assessments.

Strategy 3: Give a strong vaccination recommendation, including HPV vaccination.

Rationale: Provider recommendation is the number one indicator of vaccination. Making a presumptive recommendation results in higher levels of vaccination coverage.

Strategy 4: Strengthen vaccination communications.

Rationale: The spread of myths puts on-time vaccination at risk. Trust in vaccines is built through conversations between parents, doctors, nurses, etc. This strategy engages providers to increase vaccination messaging throughout their practice, provide accurate information, and engage in effective conversations with parents.

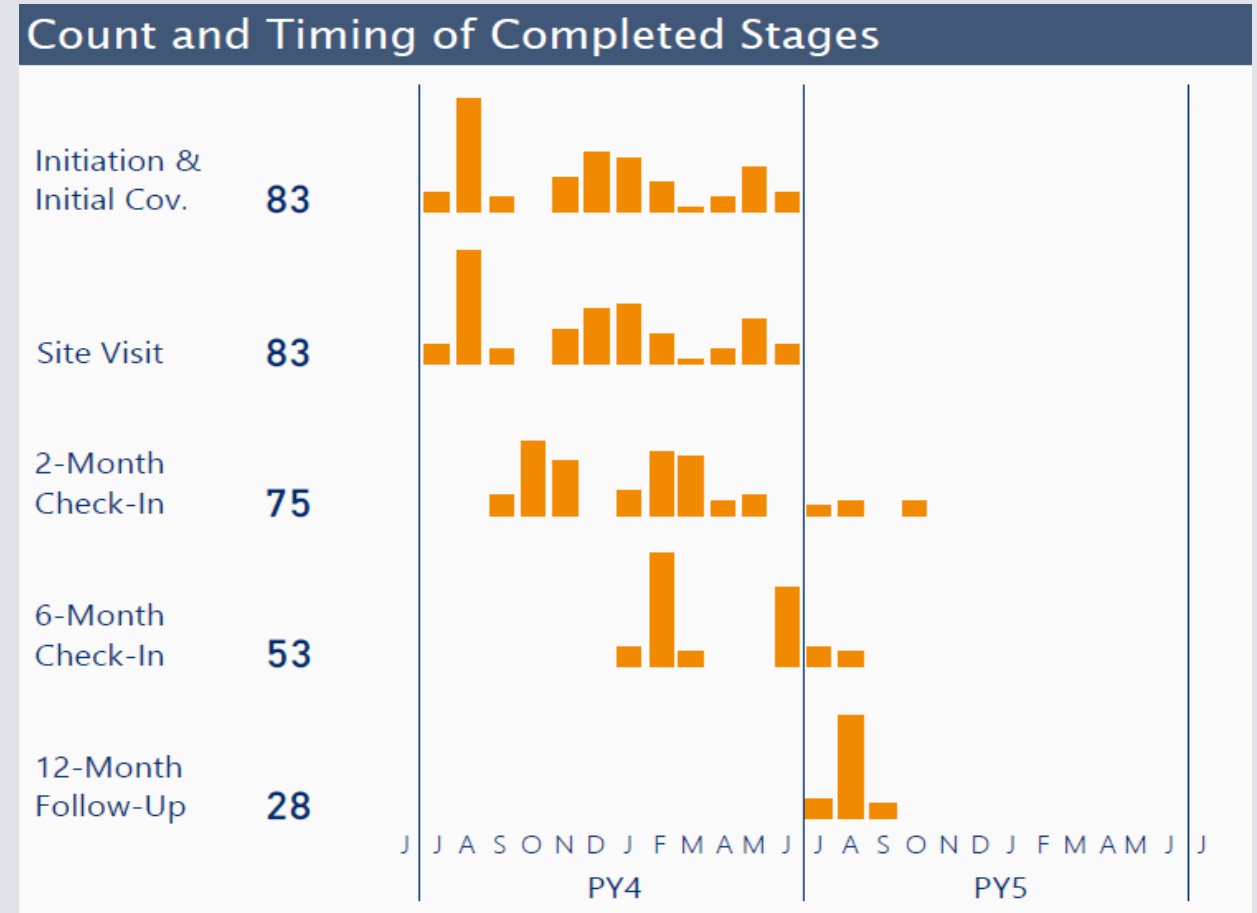

### IQIP visit timelines

The majority of providers completed their 2- and 6-month check-ins on time, 87% and 63% respectively. However, only 34% of providers completed their 12-month follow-up on time.

The table and graph below show the completeness and timing of the visits and check-ins with these 83 providers.

### Check-In & Follow-Up Status

Stage	Complete		Incomplete				
	Late	On Time	COVID-19	LTFU	Not Overdue	Overdue (Still Time)	Overdue (Too Late)
2-Month	3	72				1	7
6-Month	1	52	2		16	12	
12-Month		28		3	51	1	

### Immunization report for long-term care facilities

Long-term care facilities must report residents' influenza and pneumococcal vaccination status and the influenza vaccination status of employees to the Utah Department of Health and Human Services Immunization Program. Completing the annual report is necessary to prevent sanctions on a facility's license.

The report includes all residents and employees live in or employed by a facility between October 1 and December 31 of the reporting year. The survey is completed online by January 31 of the following year. Reporting facilities include nursing care, small health care, assisted living type I and type II, intermediate care for the intellectually disabled, and general acute hospital swing bed units. There were 354 licensed facilities in 2022; 68 submitted their reports late, 3 were sent for fines, and 2 did not report for 2022.

The portion of the survey reported is as follows:

- Influenza (flu) vaccinations received at any time during that reporting year's flu season for residents and employees.
- Pneumococcal (pneumonia) vaccinations received at any time for their residents.
- Hepatitis B vaccinations received at any time for their employees in direct contact with residents.

### Immunization rates for Utah long-term care facility residents and employees, 2018–2022

\*Hepatitis B vaccination is recommended for all adults, but per Utah Admin Rule R432-40, is not required for long-term care employees. Some Utah facilities do require it for their employees; consequently, data quality may vary across Utah facilities.

## Residents immunized in long-term care facilities

Location	Facilities*	Residents	Received influenza vaccine	Received pneumococcal vaccine
State of Utah	352	20083	71.6%	50.6%
Critical access hospitals	15	312	65.1%	50.0%
Bear River	22	1090	78.7%	62.9%
Central Utah	14	383	73.9%	57.7%

Southwest Utah	42	2116	61.6%	43.1%
Summit County	1	26	84.6%	0.0%
Tooele County	5	349	71.3%	24.4%
TriCounty	7	213	73.2%	45.5%
Utah County	72	4041	72.1%	53.8%
Wasatch County	3	222	55.0%	48.6%
Weber-Morgan	28	1996	71.7%	61.1%

\* 3 facilities did not report and were not included here; 1 in Davis County and 2 in Salt Lake County.

## Employees immunized in long-term care facilities

Location	Facilities*	All employees	Received influenza vaccine	Employees in direct patient care	Received hepatitis B vaccine**
State of Utah	352	23012	49.0%	17332	53.4%
Critical access hospitals	15	2719	87.0%	2043	92.2%
Bear River	22	1421	46.8%	1108	73.8%
Central Utah	14	432	46.1%	306	48.4%
Davis County	37	2354	51.9%	1796	54.3%
Salt Lake County	99	6338	43.8%	4400	35.5%
San Juan County	1	60	91.7%	50	24.0%
Southeast Utah	6	259	48.3%	181	54.7%
Southwest Utah	42	2232	36.6%	1678	41.0%
Summit County	1	21	0.0%	21	100.0%
Tooele County	5	282	50.4%	270	85.9%
TriCounty	7	222	47.7%	140	74.3%
Utah County	72	4478	41.9%	3664	47.1%
Wasatch County	3	159	18.9%	115	45.2%
Weber-Morgan	28	2035	44.0%	1560	59.9%

\* 3 facilities did not report and were not included here; 1 in Davis County and 2 in Salt Lake County.

\*\* Hepatitis B vaccination is recommended for all adults, but per Utah Admin Rule R432-40, is not required for long-term care employees. Some Utah facilities do require it for their employees; consequently, data quality may vary across Utah facilities.

## Vaccine-preventable diseases in Utah, 2022

Trends in vaccine-preventable diseases (VPDs) are tracked with the intent that the data can be helpful in the development of collaborative immunization campaign efforts. The following data were provided by the Utah Department of Health and Human Services Office of Communicable Disease, for statewide and local health district VPD rates.

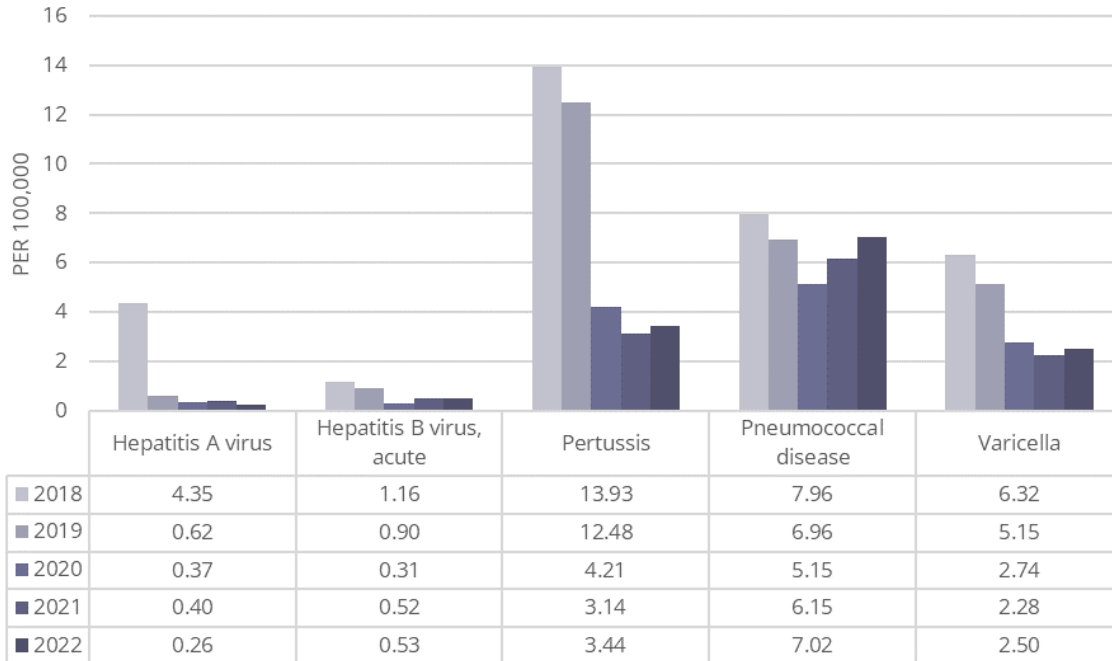

### 2022 Rates of Vaccine Preventable Disease (per 100,000)

	Haemophilus influenzae type B	Hepatitis A virus	Hepatitis B virus, acute	Measles	Meningococcal disease	Mumps

## Vaccines for children program report

The Vaccines for Children (VFC) Program helps provide vaccines to children whose parents or guardians may not be able to afford immunizations. This helps make sure all children have a better chance of getting their recommended vaccinations on schedule. A child is eligible for the VFC Program if they are younger than 19 years of age and falls into one of the following categories:

- Medicaid-eligible
- Uninsured
- Underinsured
- American Indian or Alaska Native

The CDC estimates vaccination of children born between 1994 and 2021 will<sup>1</sup>:

- Prevent 472 million illnesses
- Help avoid 1,052,000 deaths
- Save nearly \$2.2 trillion in total societal costs

For the 2023 fiscal year, it is estimated 376,434 children younger than 19 years old are eligible for VFC-funded vaccines in Utah.

VFC vaccines can be administered by any enrolled VFC program provider. Altogether there are more than 44,000 providers enrolled in the VFC Program nationwide<sup>2</sup>.

### Number of active VFC providers in Utah, 2023

	Total: 341
Private providers	220
FQHC/RHC/CHC	53
Hospitals	7
Indian Health Service	5
Local health departments	38
Pharmacies	9
Other providers	5
School based clinics	4

<sup>3</sup>Centers for Disease Control and Prevention (CDC) Vaccine Tracking System (VtrckS) System. Accessed October 2023. CDC.

Utah K–12 schools report the immunization status of all enrolled students via an online survey each year. Summaries are generated from these reports for kindergarten and 7th grade immunization status. The tables below report the percentage of students in kindergarten and 7th grade schools who are adequately immunized, who have an exemption to any school-required vaccine, who are enrolled via conditional enrollment or extended conditional enrollment, or are out of compliance with vaccination requirements.
