

## ITS JPO CodeHub's Code Quality Best Practices Checklist

- No Usernames/Passwords
- No Confidential Business Information (CBI)
- No non-public internet protocol (IP) addresses
- Code uses open standards (from [U.S. DOT Source Code Management](#))
- Code uses Open Source Software (OSS) licenses
- Obtain appropriate data rights to custom-developed code
- Establish processes for the review and approval of all requests to release custom-developed code as OSS

For more information on coding practices, please see [U.S. DOT's Open Source Management](#).
