H. 198

An act relating to a transportation policy to accommodate all users

Rep. Burke of Brattleboro, for the Committee on **Transportation**, recommends the bill be amended by striking all after the enacting clause and inserting in lieu thereof the following:

Sec. 1. PURPOSE

The purpose of this bill is to ensure that the needs of all users of Vermont's transportation system—including motorists, bicyclists, public transportation users, and pedestrians of all ages and abilities—are considered in all state and locally managed transportation project phases, including planning, development, construction, and maintenance, except in the case of projects or project components involving unpaved highways. These "complete streets" principles shall be integral to state and local transportation policy in Vermont.

Sec. 2. 19 V.S.A. § 10b is amended to read:

§ 10b. STATEMENT OF POLICY; GENERAL

(a) The agency shall be the responsible agency of the state for the development of transportation policy. It shall develop a mission statement to reflect:

(1) that state transportation policy encompassing, coordinating, and integrating shall be to encompass, coordinate, and integrate all modes of transportation, and to follow “complete streets” principles, which means to consider the safety and accommodation of all transportation system users, regardless of age, ability, or modal preference; and

(2) the need for transportation projects that will improve the state’s economic infrastructure, as well as the use of resources in efficient, coordinated, integrated, cost-effective, and environmentally sound ways.

(b) The agency shall coordinate planning and education efforts with those of the Vermont climate change oversight committee and those of local and regional planning entities:

(1) to assure that the transportation system as a whole is integrated, that access to the transportation system as a whole is integrated, and that statewide, local, and regional conservation and efficiency opportunities and practices are integrated; and

(2) to support employer or local or regional government-led conservation, efficiency, rideshare, and bicycle programs and other innovative transportation advances, especially employer-based incentives.

(b)(c) In developing the state’s annual transportation program, the agency shall, consistent with the planning goals listed in 24 V.S.A. § 4302 as amended by No. 200 of the Acts of the 1987 Adj. Sess. (1988) and with appropriate consideration to local, regional, and state agency plans:

(1) Develop or incorporate designs that provide integrated, safe, and efficient transportation and promote.

(2) Consider the safety and accommodation of all transportation system users—including motorists, bicyclists, public transportation users, and pedestrians of all ages and abilities—in all state and locally managed transportation project phases, including planning, development, construction, and maintenance, except in the case of projects or project components involving unpaved highways. If, after the consideration required under this subdivision, a state-managed project does not incorporate complete streets principles, the project manager shall make a written determination, supported

by documentation and available for public inspection at the agency, that one or more of the following circumstances exists:

(A) Use of the transportation facility by pedestrians, bicyclists, or other users is prohibited by law.

(B) The cost of incorporating complete streets principles is disproportionate to the need or probable use as determined by factors including land use, current and projected user volumes, population density, crash data, historic and natural resource constraints, and maintenance requirements. The agency shall consult local and regional plans in assessing these and any other relevant factors.

(C) Incorporating complete streets principles is outside the scope of a project because of its very nature. The written determination required under this subdivision (2) shall be final and shall not be subject to appeal or further review.

(3) Promote economic opportunities for Vermonters and the best use of the state's environmental and historic resources.

(2)(4) Manage available funding to:

(A) give priority to preserving the functionality of the existing transportation infrastructure, including bicycle and pedestrian trails regardless of whether they are located along a highway shoulder; and

(B) adhere to credible project delivery schedules.

(e)(d) The agency of transportation, in developing each of the program prioritization systems schedules for all modes of transportation, shall include the following throughout the process:

(1) The agency shall annually solicit input from each of the regional planning commissions and the Chittenden County metropolitan planning organization on regional priorities within each schedule, and those inputs shall be factored into the prioritizations for each program area and shall afford the opportunity of adding new projects to the schedules.

(2) Each year the agency shall provide in the front of the transportation program book a detailed explanation describing the factors in the prioritization system that creates each project list.

Sec. 3. 24 V.S.A. § 4302 is amended to read:

§ 4302. PURPOSE; GOALS

(a) General purposes. It is the intent and purpose of this chapter to encourage the appropriate development of all lands in this state by the action of

its constituent municipalities and regions, with the aid and assistance of the state, in a manner which will promote the public health, safety against fire, floods, explosions, and other dangers; to promote prosperity, comfort, access to adequate light and air, convenience, efficiency, economy, and general welfare; to enable the mitigation of the burden of property taxes on agricultural, forest, and other open lands; to encourage appropriate architectural design; to encourage the development of renewable resources; to protect residential, agricultural, and other areas from undue concentrations of population and overcrowding of land and buildings, from traffic congestion, from inadequate parking and the invasion of through traffic, and from the loss of peace, quiet, and privacy; to facilitate the needs of all transportation users, regardless of age, ability, or modal preference and to consider such needs in all locally managed transportation project phases, including planning, development, construction, and maintenance; to facilitate the growth of villages, towns, and cities and of their communities and neighborhoods so as to create an optimum environment, with good civic design; to encourage development of a rich cultural environment and to foster the arts; and to provide means and methods for the municipalities and regions of this state to plan for the prevention, minimization and future elimination of such land development problems as may presently exist or which may be foreseen and to implement those plans when and where appropriate. In implementing any regulatory power under this chapter, municipalities shall take care to protect the constitutional right of the people to acquire, possess, and protect property.

(b) It is also the intent of the legislature that municipalities, regional planning commissions, and state agencies shall engage in a continuing planning process that will further the following goals:

- (1) To establish a coordinated, comprehensive planning process and policy framework to guide decisions by municipalities, regional planning commissions, and state agencies.
- (2) To encourage citizen participation at all levels of the planning process, and to assure that decisions shall be made at the most local level possible commensurate with their impact.
- (3) To consider the use of resources and the consequences of growth and development for the region and the state, as well as the community in which it takes place.
- (4) To encourage and assist municipalities to work creatively together to develop and implement plans.

(c) In addition, this chapter shall be used to further the following specific goals:

* * *

(4) To provide for safe, convenient, economic, integrated, and energy efficient transportation systems that respect the integrity of the natural environment, ~~including public transit options and paths for pedestrians and bicyclists and to follow “complete streets” principles, which means to consider the safety and accommodation of all transportation system users, regardless of age, ability, or modal preference—in all locally managed transportation project phases, including planning, development, construction, and maintenance, except in the case of projects or project components involving unpaved highways.~~

~~(A) Highways, air, rail and other means of transportation should be mutually supportive, balanced, and integrated. If, after the consideration required under this subdivision, a project does not incorporate complete streets principles, the municipality managing the project shall make a written determination, supported by documentation and available for public inspection at the office of the municipal clerk and at the agency of transportation, that one or more of the following circumstances exists:~~

(A) Use of the transportation facility by pedestrians, bicyclists, or other users is prohibited by law.

(B) The cost of incorporating complete streets principles is disproportionate to the need or probable use as determined by factors such as land use, current and projected user volumes, population density, crash data, historic and natural resource constraints, and maintenance requirements. The municipality shall consult local and regional plans in assessing these and any other relevant factors.

(C) Incorporating complete streets principles is outside the scope of a project because of its very nature.

The written determination required under this subdivision (4) shall be final and shall not be subject to appeal or further review.

* * *

Sec. 4. REPORTING AND TRANSITION RULE

(a) By March 15, 2012, the agency of transportation shall report to the house and senate committees on transportation on its activities to comply with this act.

(b) The agency shall make available to the public upon request and in an easily understandable format a list of all state- and locally managed projects that have incorporated complete streets principles, accompanied by a description of each project and its location.

(c) The agency shall make available to the public upon request and in an easily understandable format a list of all state- and locally managed projects that have not incorporated complete streets principles pursuant to an exemption of 19 V.S.A. § 10b(c)(2) or 24 V.S.A. § 4302(c)(4). This list shall specify which exemption applied.

(d) The agency shall be exempt from the requirements to assign exemptions pursuant to Sec. 2, 19 V.S.A. § 10b(c)(2), and Sec. 3, 24 V.S.A. § 4302(c)(4), of this act and from the reporting requirements of this section with respect to any project for which preliminary engineering is complete as of the effective date of this act.
