Lyrasis®

Connecting Knowledge

OUR STORY

Lyrasis was created by its members to help them tackle wide-reaching challenges with a collective strength, including: the development and selection of new technology solutions; fostering community-wide projects that help deliver better outcomes and services; content creation, acquisition and management; support for new content models and strategies; and large-scale knowledge management programs unique to collections-holding institutions.

Lyrasis catalyzes and enables equitable access to the world's knowledge and cultural heritage.

Who We Are

Lyrasis is a leader in open technologies, hosting, data-migration, content licensing, and community supported software programs for libraries, archives, museums and research organizations worldwide.

What We Do

We work with knowledge professionals to create, support, and deliver innovative programs, services, and technologies that allow for equitable access to the world's knowledge and cultural heritage.

Join Us

You can join us and our work through one of our membership tiers, by collaborating with us in our best of field programs and services, or by supporting one of our open source software communities.
