## New Hampshire Liberty Alliance

# 2021 Liberty Rating

This is the eighteenth annual Liberty Rating issued by the New Hampshire Liberty Alliance, based on 49 roll call votes in the House and 25 in the Senate. Individual grades for each representative and senator are based on pro-liberty or anti-liberty roll call votes and sponsorship/co-sponsorship for a subset of bills that have been included in our Gold Standard liberty voting guides distributed to Senators and Representatives each session day. Each bill/vote is assigned an impact score by the NHLA considering the degree to which the bill or vote impacts (positively or negatively) liberty. The impact of bill sponsorship is designed a full negative weight is applied for submitting anti-liberty bills and incremental weight is applied to pro-liberty bills reflecting how far the bill has progressed through the legislative process.

**Pro-liberty bills** protect individual freedom of choice and personal responsibility; recognize the superiority of freedom over coercion; respect the citizen's right of self-ownership; promote governance that is transparent, accountable, and adheres to the Constitution; and recognize the value of voluntary economic decisions.

**Anti-liberty bills** replace self-governance with interventionist regulation; assume rules made by agencies backed by force are superior to voluntary choices backed by personal accountability; and assume a better economy can be managed by a central authority that compels people and businesses to pay for policies they may not willingly support.

The Liberty Rating is the result of hundreds of hours of work by many volunteers who have read and analyzed bills, testified before committees, called and written their representatives, worked on our other signature publication, the Gold Standard, and culled extensive data from legislative voting records. We encourage New Hampshire citizens to learn the facts about how their elected representatives are voting in Concord and to use this tool to hold them accountable. This report card serves as a valuable voter guide when these same representatives are running for re-election.

Motions of Ought to Pass (“**OTP**”), Ought to Pass with Amendment (“**OTP/A**”), and to accept a Committee of Conference report (“**C of C**”) pass a bill. If we recommended yea on these motions, it was a pro-liberty bill; if nay, it was an anti-liberty bill. Motions of Inexpedient to Legislate (“**ITL**”), **Table**, or **Indefinitely Postpone** kill a bill. Interim Study (“**IS**”) will result in the matter being studied and effectively terminates the bill for this legislative session. If we recommended yea on these motions, it was an anti-liberty bill; if nay, it was a pro-liberty bill.

Scores are based primarily on roll-call votes but also include a small modifier for sponsorship score. Sponsorship score is calculated based on all the bills a representative has sponsored or cosponsored, which were recognized on the Gold Standard as being pro- or anti-liberty and which did not materially change from introduction to first appearance in the Gold Standard. Each bill sponsorship is assigned a weight, as with roll calls. Prime sponsorship of a bill is weighted more heavily than co-sponsorship. A representative with a score near zero has sponsored few bills, or equally pro and anti-liberty bills. A representative with a high positive score has sponsored primarily pro-liberty legislation. A representative with a high negative score has sponsored primarily anti-liberty legislation. Weight was further scaled to reflect the effort that it takes for a sponsor to shepherd a bill through the legislature. For pro-liberty bills, a fraction of the weight is applied as the bill successfully moves through the process. For anti-liberty bills, the full weight is applied upon submission of the bill. These scores are used in combination to produce the final grade. Both voting performance (a percentage) and raw sponsorship (a weighted total) are also provided individually.
