

ProQuest Curated Topics

Save time and support emerging research with expertly curated title lists

ProQuest Curated Topics are hand-selected lists of electronic and print titles designed to simplify the content-selection process, give librarians their time back, and ensure access to the newest content on the most important research topics.

Selectors can browse over 160 niche sets of titles and purchase using a combination of classic and innovative acquisition models, including Perpetual Access, Demand-Driven Acquisition (DDA), Short-Term Loan (STL), Access-to-Own (ATO), Evidence-Based Acquisition (EBA) through their preferred acquisition platform: LibCentral, OASIS or Rialto.

Use Curated Topics to:

- **Supplement curriculum** and quickly fill collection gaps on trending topics with librarian-selected recommendations
- **Identify quality content** that meets topical, multidisciplinary needs
- **Browse titles on trending topics** – with new content curated each month
- **Explore content published within the past 2-3 years** – and no overlap with previously published Curated Topics
- **Acquire titles** as complete sets or browse title-by-title using your preferred platform: Ebook Central, OASIS or Rialto

I truly appreciate the monthly Curated Topics. It's wonderful to have them at my disposal to quickly browse through title recommendations, especially when I'm busy with other tasks.

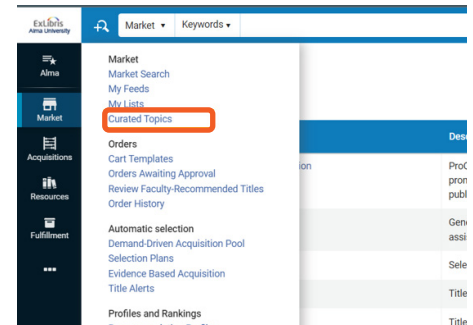

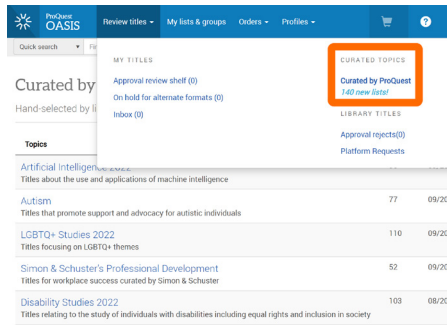

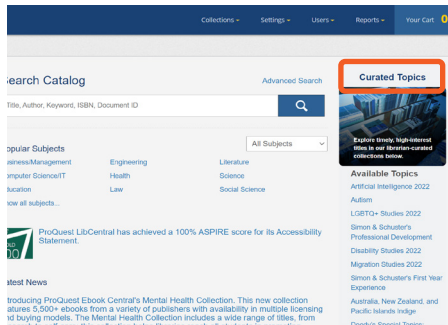

- Tiffanie Ford-Baxter, Associate Science Librarian, California State University
