

Employee Benefit Plan Audits

Expert commentary, guidance, and audit workflow tools

Ensure your firm has a competitive edge with access to the broadest and most comprehensive employee benefit plan audit coverage on the market. Thomson Reuters® Employee Benefit Plan (EBP) audit products provide specific audit guidance for all types of EBP audits, including:

- Limited Scope Audits of Standard 401(k) Plans
- ERISA 403b Plan Audits
- Defined Contribution Plans that file Form 11-K Audits
- Full Scope Plan Audits, including defined benefit, defined contribution, and health and welfare benefit plans

More than 75% of the firms in the U.S. rely on Thomson Reuters when conducting EBP audits. With content by leading industry experts and award-winning PPC editors, you can quickly find the information you need and confidently complete your audits.

Win big by using Checkpoint® Engage to automate your EBP audits

- See at-a-glance risks identified in similar engagements, what risks you have tied to particular audit areas and those applicable assertions, and more with the new AI-powered “Identified Risks” feature in Checkpoint® Engage
- Decrease the firms IT burden by reducing the costly time and burden of installing and updating desktop software
- Collaborate with your colleagues and clients online from anywhere, anytime
- Save over 20% of time leveraging the customizable disclosure checklists based on average firm feedback
- Launch into Confirmation.com to manage, send, and follow the audit trail of confirmations for EBP participant data
- Get ahead on your Limited Scope Audits using Quick Start with pared down audit programs, pre-filled workpapers, and walk-thru forms

Access the employee benefit plan audit tools using Checkpoint Engage, plus a wealth of other resources with Cloud Audit Suite, the most preferred end-to-end solution providing accuracy and efficiency throughout the audit process. Confidently complete more audits in less time with single point access to a suite of AI-enabled audit tools, including the only true confirmation service and integration with third-party analytics. Leverage this modern technology experience to securely access your client’s data while seamlessly collaborating with your team and informing stakeholders from multiple locations with ease.
