

Information Statement
**International Bank for Reconstruction
and Development**

The International Bank for Reconstruction and Development (IBRD) intends from time to time to issue its notes and bonds with maturities and on terms determined by market conditions at the time of sale. The notes and bonds may be sold to dealers or underwriters, who may resell them, or they may be sold by IBRD directly or through agents.

The specific currency, aggregate principal amount, maturity, interest rate or method for determining such rate, interest payment dates, if any, purchase price to be paid to IBRD, any terms for redemption or other special terms, form and denomination of such notes and bonds, information as to stock exchange listing and the names of the dealers, underwriters or agents in connection with the sale of such notes and bonds being offered at a particular time, as well as any other information that may be required, will be set forth in a prospectus or supplemental information statement.

Except as otherwise indicated, in this Information Statement (1) all amounts are stated in current United States dollars translated as indicated in the Notes to Financial Statements: Note A and (2) all information is given as of June 30, 2023.

AVAILABILITY OF INFORMATION

This Information Statement will be filed with the U.S. Securities and Exchange Commission electronically through the EDGAR system and will be available at the Internet address <http://www.sec.gov/edgar.shtml>.

Upon request, IBRD will provide additional copies of this Information Statement without charge. Written or telephone requests should be directed to IBRD's main office at 1818 H Street, N.W., Washington, D.C. 20433, Attention: Capital Markets and Investments Department, tel: (202) 477-2880, or to IBRD's Tokyo office at Fukoku Seimei Building 14F, 2-2-2 Uchisaiwai-cho, Chiyoda-ku, Tokyo 100-0011, Japan, tel: (81)-3-3597-6650.

The Information Statement is also available on IBRD's Investor Relations website at <http://www.worldbank.org/debtsecurities/>. Other documents and information on IBRD's website are not intended to be incorporated by reference in this Information Statement.

Recipients of this Information Statement should retain it for future reference, since it is intended that each prospectus and any supplemental information statement issued after the date hereof will refer to this Information Statement for a description of IBRD and its financial condition, until a subsequent information statement is filed.

October 2, 2023

SUMMARY INFORMATION
As of June 30, 2023, unless otherwise indicated

The International Bank for Reconstruction and Development (IBRD) is an international organization established in 1945 and owned by its member countries. As a global development cooperative owned by 189 member countries, IBRD's purpose is to work with its borrowing members so that they can achieve equitable and sustainable economic growth in their national economies and find effective solutions to pressing regional and global problems in economic development and environmental sustainability, all with a view to overcoming poverty and improving standards of living. It pursues this goal primarily by providing financing, risk management products, and other financial services, access to experts and a pool of knowledge in development-related disciplines, so that borrowing members can pool, administer and prioritize resources they dedicate to development-related objectives. IBRD has 189 shareholders, of which the six largest shareholders are the United States (with 15.75% of the total voting power), Japan (7.19%), China (5.58%), Germany (4.28%), and France and the United Kingdom (with 3.92% each).

The financial strength of IBRD is based on the continued support it receives from its shareholders, and on its array of financial policies and practices. Shareholder support for IBRD is reflected in the capital backing it continues to receive from its members and in the record of its borrowing member countries in meeting their debt service obligations to IBRD. In October 2018, the Governors approved the new General and Selective Capital Increases (GCI and SCI) as part of a capital package that includes institutional and financial reforms designed to ensure long-term financial sustainability. The capital increases will result in additional subscribed capital of up to \$60.1 billion, with \$7.5 billion of paid-in capital and \$52.6 billion of callable capital. In May 2023, the Board approved the extension of the subscription period for GCI and SCI from October 1, 2023 to October 1, 2025.

To meet its development goals, IBRD continues to work with partners at global and country levels to support its borrowing countries in addressing the impact of multiple crises, to enhance resilience, and lay the groundwork for rebuilding better. To further support these efforts, the Board and Management have been working on an Evolution Roadmap for the WBG to better address the scale of development challenges by adapting the WBG's vision and mission, strengthening its operating model, and enhancing its financial capacity and model. Management is in the process of advancing agreed actions and developing further proposals, including efforts to expand crisis preparedness, response and recovery and increase private finance mobilization, with particular efforts to scale investment in emerging markets. In addition, as a part of increasing IBRD's financing capacity, in April 2023, the Board approved a reduction in the policy minimum Equity-to-Loans ratio from 20% to 19% and a pilot program for issuing up to \$1 billion of Hybrid Capital to capital market investors.

Basis of Reporting and Results of Operations

IBRD's financial statements conform with accounting principles generally accepted in the United States of America (U.S. GAAP). All financial instruments in the investment and borrowing portfolios and all other derivatives are reported at fair value, with changes in fair value reported in the Statement of Income, except for changes in IBRD's own credit, which are reflected in Other Comprehensive Income. IBRD's loans are reported at amortized cost, except for loans with embedded derivatives, if any, which are reported at fair value. Management uses net income as the basis for deriving allocable income.

IBRD had net income of \$1,144 million for the fiscal year ended June 30, 2023. Management recommends allocations out of net income at the end of each fiscal year, to augment reserves and support developmental activities. Net income allocation decisions are based on allocable income, which is derived by adjusting the reported net income to exclude certain items, in order to arrive at amounts realized during the year and available for use. IBRD has earned positive allocable income in every year since 1964. IBRD's allocable income was \$1,312 million for the fiscal year ended June 30, 2023.

Equity and Borrowings

Equity – As of June 30, 2023, IBRD’s shareholders have subscribed to \$317.8 billion of capital, \$21.8 billion of which has been paid in and the remainder of which is callable. The callable portion may be called only to meet IBRD’s obligations for funds borrowed or loans guaranteed and is, thus, not available for use by IBRD in making loans. IBRD’s equity also included \$36.1 billion of retained earnings. The equity-to-loans ratio was 22.0%.

Borrowings – IBRD diversifies its borrowings by currency, country, source and maturity to provide flexibility and cost-effectiveness in funding. It has borrowed in all of the world’s major capital markets, as well as directly from member governments and central banks. IBRD’s outstanding borrowings totaled \$237.3 billion as of June 30, 2023.

Assets

Loans – The largest component of IBRD’s assets are its loans outstanding. The net loans outstanding were \$241.0 billion as of June 30, 2023. IBRD’s net loan commitments in FY23 totaled \$38.6 billion. In accordance with the Articles of Agreement (Articles), all of IBRD’s loans are made to, or guaranteed by, member countries. IBRD’s Articles also limit the total amount of loans and guarantees IBRD can extend. IBRD loans are made only to countries deemed creditworthy. It is IBRD’s practice not to reschedule interest or principal payments on its loans.

Loans in nonaccrual status totaled 0.6% of IBRD’s loan portfolio and related to two borrower countries. IBRD’s accumulated loan loss provision was 1.0% of its total loans outstanding as of June 30, 2023.

Liquid Asset Portfolio – IBRD holds a portfolio of liquid investments to help ensure that it can meet its financial commitments and to retain flexibility in the timing of its market borrowings. As of June 30, 2023, its liquid asset portfolio totaled \$75.4 billion. Under IBRD’s liquidity management guidelines, aggregate liquid asset holdings are kept at or above a specified prudential minimum to safeguard against cash flow interruptions. The Target Liquidity Level represents twelve-months’ coverage as calculated at the start of every fiscal year. The Prudential Minimum is defined as 80% of the Target Liquidity Level. The maximum guideline of 150% of the Target Liquidity Level continues to function as a guideline rather than a hard ceiling. As of June 30, 2023, the liquid asset portfolio was 140% of the Target Liquidity Level. The FY24 Target Liquidity Level is set at \$59.0 billion, \$5.0 billion higher than FY23 Target Liquidity Level due to higher projected debt service in FY24.

Asset / Liability Management

IBRD seeks to avoid exchange rate risks by matching its liabilities in various currencies with assets in those same currencies and by matching the currency composition of its equity to that of its outstanding loans. IBRD also seeks to limit its interest rate risk in its loan and liquidity portfolio. IBRD uses derivatives, including currency and interest rate swaps, in connection with its operations in order to better manage balance sheet risks. The credit exposures on swaps are controlled through specified credit-rating requirements for counterparties and through netting and collateralization arrangements.

**The above information is qualified by the detailed information
and financial statements appearing elsewhere in this Information Statement.**

This Management’s Discussion and Analysis (MD&A) discusses the financial results of the International Bank for Reconstruction and Development (IBRD) for the fiscal year ended June 30, 2023 (FY23). IBRD undertakes no obligation to update any forward-looking statements. Certain reclassifications of prior years’ information have been made to conform with the current year’s presentation. For discussion of IBRD’s financial results for the year ended June 30, 2022 as compared to the year ended June 30, 2021, see Section III – Financial Results in IBRD’s MD&A and Financial Statements for the fiscal year ended June 30, 2022.

- a. Amounts include guarantee commitments and guarantee facilities that have been approved by the Executive Directors (referred to as “the Board” in this document), and are net of full terminations and cancellations relating to commitments approved in the same fiscal year.
- b. For the composition of the net investment portfolio, see Notes to the Financial Statements, Note C—Investments—Table C3.
- c. Includes associated derivatives.
- d. The June 30, 2023 amount represents the transfer to the General Reserve from FY23 net income, which was approved by the Board on August 3, 2023.
- e. Excludes amounts associated with unrealized mark-to-market gains/losses on non-trading portfolios, net and related cumulative translation adjustments.
- f. Usable Equity includes the transfer to the General Reserve from FY23 net income, which was approved by the Board on August 3, 2023. See Table 27: Usable Equity.
- g. As defined in Table 28: Equity-to-Loans Ratio.

SECTION I: EXECUTIVE SUMMARY

With its many years of experience and its depth of knowledge in international development, IBRD plays a key role in achieving the World Bank Group's (WBG¹) goal of helping countries achieve better development outcomes, by providing countries with loans, guarantees, advisory services, analytical support and other products.

IBRD and its affiliated organizations seek to help countries in reducing poverty and inequality, achieve improvements in growth, job creation, governance, the environment, climate adaptation, mitigation and resilience, human capital, infrastructure and debt transparency, among others. To meet its development goals, the WBG supports client countries' efforts to implement programs to improve growth and development outcomes. Further, new and ongoing challenges continue to influence the global outlook. These include high inflation, the rise in food insecurity, growing inequality, global fragility, pandemic risk, Russia's invasion of Ukraine and other geopolitical events, rising debt, climate change, and macroeconomic imbalances. In response, IBRD, as part of the WBG efforts, continues to work with partners at global and country levels to support its borrowing countries in addressing the impact of these multiple crises, to enhance resilience, and lay the groundwork for rebuilding better. To further support these efforts, the Board and Management have been working on an Evolution Roadmap for the WBG to better address the scale of development challenges by adapting the WBG's vision and mission, strengthening its operating model, and enhancing its financial capacity and model. Management is in the process of advancing agreed actions and developing further proposals, including efforts to expand crisis preparedness, response and recovery and increase private finance mobilization, with particular efforts to scale investment in emerging markets. In addition, as a part of increasing IBRD's financing capacity, in April 2023, the Board approved a reduction in the policy minimum Equity-to-Loans ratio from 20% to 19% and a pilot program for issuing up to \$1 billion of Hybrid Capital to capital market investors.

¹ *The other WBG institutions are the International Development Association (IDA), the International Finance Corporation (IFC), the Multilateral Investment Guarantee Agency (MIGA), and the International Centre for Settlement of Investment Disputes (ICSID). The World Bank consists of IBRD and IDA.*

Summary Financial Results

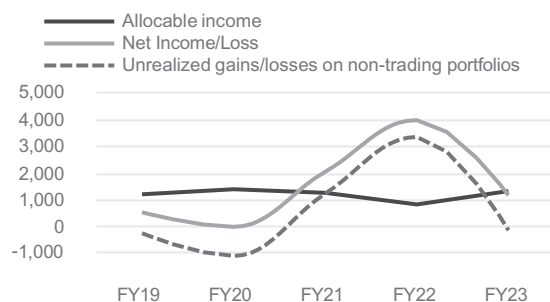

Net Income

IBRD recorded net income of \$1,144 million for the fiscal year ended June 30, 2023, a decrease of \$2,846 million, compared with net income of \$3,990 million for the fiscal year ended June 30, 2022. The decrease in FY23 was primarily due to unrealized mark-to-market losses on IBRD's non-trading portfolios in FY23, compared to unrealized mark-to-market gains in FY22, partially offset by higher net loan interest revenue. Given IBRD's intention to maintain its non-trading portfolio positions to maturity, unrealized mark-to-market gains and losses are not included in IBRD's allocable income.

Allocable Income

Allocable income is the measure IBRD uses for making net income allocation decisions. For the fiscal year ended June 30, 2023, allocable income was \$1,312 million, compared with \$806 million for the fiscal year ended June 30, 2022. The increase in allocable income was mainly due to higher net revenue on interest earning assets, primarily reflecting the increase in the average balance of loans outstanding and the impact from the increase in interest rates during the year.

In millions of U.S. dollars

Lending Operations

IBRD's lending operations during the fiscal year ended June 30, 2023 provided \$38.6 billion of net commitments, and \$25.5 billion of gross loan disbursements. Net disbursements of \$12.7 billion were the key driver for the increase in net loans outstanding, from \$227.1 billion as of June 30, 2022, to \$241.0 billion as of June 30, 2023.

In billions of U.S. dollars

Net commitments were \$5.5 billion higher compared with FY22 (Table 8). The regions with the largest share of commitments during FY23 were Europe and Central Asia and Latin America and the Caribbean with 26% each.

Net Investment Portfolio

IBRD's net investment portfolio decreased by \$2.9 billion, from \$82.1 billion as of June 30, 2022, to \$79.2 billion as of June 30, 2023. The decrease was primarily due to net loan disbursements that were higher than net debt issuances during the year and is consistent with the lower target liquidity level in FY23, compared to FY22. The investments remain concentrated in the upper end of the credit spectrum, with 79% rated AA or above (Table 29), reflecting IBRD's objective of principal protection and its preference for high-quality investments.

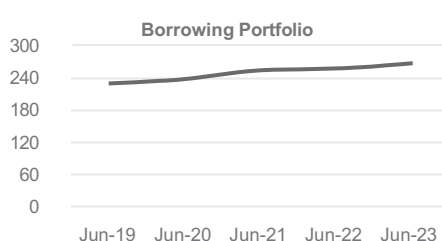

In billions of U.S. dollars

Borrowing Portfolio

As of June 30, 2023, the borrowings portfolio was \$266.8 billion, \$9.9 billion higher than June 30, 2022. The increase was mainly due to net new debt issuances that financed development and lending operations and satisfied liquidity requirements.

In billions of U.S. dollars

Equity-to-Loans Ratio

The Equity-to-Loans ratio was 22.0% as of June 30, 2023, unchanged from June 30, 2022, and above the policy minimum of 19%. In line with IBRD's currency management policy, exchange rate movements during the year did not have an impact on IBRD's Equity-to-Loans ratio.

Ratio in percentages

In FY23, IBRD received \$1.3 billion of paid-in capital subscribed under the 2018 General and Selective Capital Increases (GCI and SCI), bringing the cumulative amounts received to \$5.4 billion, representing 72% of the total amount expected over the subscription period. In May 2023, the Board approved the extension of the subscription period for the GCI and SCI from October 1, 2023 to October 1, 2025.

SECTION II: OVERVIEW

Introduction

IBRD, an international organization owned by its 189 member countries, is one of the five institutions of the WBG. Each institution is legally and financially independent, with separate assets and liabilities. IBRD is not liable for the obligations of the other institutions.

IBRD is a Multilateral Development Bank that combines knowledge services and financing with a global reach. IBRD's value is derived from its ability to help eligible borrowing members address their development challenges and meet their rising demand for innovative products. IBRD provides loans, guarantees, and other financial products for development-focused projects and programs to creditworthy middle-income and lower-income countries to support sustainable development. By operating across a full range of country clients, IBRD maintains a depth of development knowledge, uses its convening power to promote development and advance the global public goods agenda, and coordinates responses to regional and global challenges.

Member countries use IBRD's technical advice and analysis and convening power to develop or implement better policies, programs, and reforms that help sustain development over the long term. The products delivered range from development data, to reports on key social economic and social issues at the local, country, regional and global levels. The products also include knowledge-sharing workshops focused on local issues, flagship events and fora to address the most pressing global development challenges.

Financial Business Model

IBRD's objective is not to maximize profits, but to earn adequate income to ensure that it has the long-term financial capacity necessary to support its development activities. IBRD seeks to generate sufficient revenue to finance its operations as well as to be able to set aside funds in reserves to strengthen its financial position.

It also seeks to provide support to IDA and trust funds through income transfers for other developmental purposes.

IBRD's financial strength rests on the support it receives from its shareholders, and on its array of financial policies and practices. Shareholder support for IBRD is reflected in the capital backing it continues to receive from its members and in the record of its borrowing member countries in meeting their debt service obligations to IBRD. Sound financial and risk management policies and practices have enabled IBRD to maintain adequate capital, diversify its funding sources, hold a portfolio of liquid investments to meet its financial commitments, and limit its risks, including credit and market risks.

IBRD offers its borrowers, in middle income and creditworthy low-income countries, long-term loans with maturities up to 35 years. Borrowers may customize their repayment terms to meet their debt management or project needs, in multiple currencies on variable spread terms. Previously, loans on fixed spread terms were also available to borrowers. Borrowers have generally preferred loans denominated in U.S dollars and euros. IBRD also supports its borrowers by providing access to risk management products such as derivative instruments, including currency and interest rate swaps, catastrophe derivatives, and interest rate caps and collars.

To meet its development goals, IBRD intermediates funds for lending from the international capital markets. IBRD's loans are financed through its equity and from borrowings raised in the capital markets. IBRD is rated triple-A by the major rating agencies and its bonds are viewed as high-quality securities by investors. IBRD's funding strategy is aimed at achieving the best long-term value on a sustainable basis for its borrowing members. This strategy has enabled IBRD to borrow at favorable market terms and pass the savings on to its borrowing members. IBRD's annual funding volumes vary from year to year, and funds raised are used to finance IBRD's development projects and programs in member countries. Funds not deployed for lending are maintained in IBRD's investment portfolio to supply liquidity for its operations.

IBRD uses derivatives to manage its exposure to various market risks from the above activities. These are used to align the interest and currency composition of its assets (loan and investment trading portfolios) with that of its liabilities (borrowing portfolio), and to stabilize earnings on the portion of the loan portfolio funded by equity. See Section IX: Risk Management for additional details on how IBRD uses derivatives.

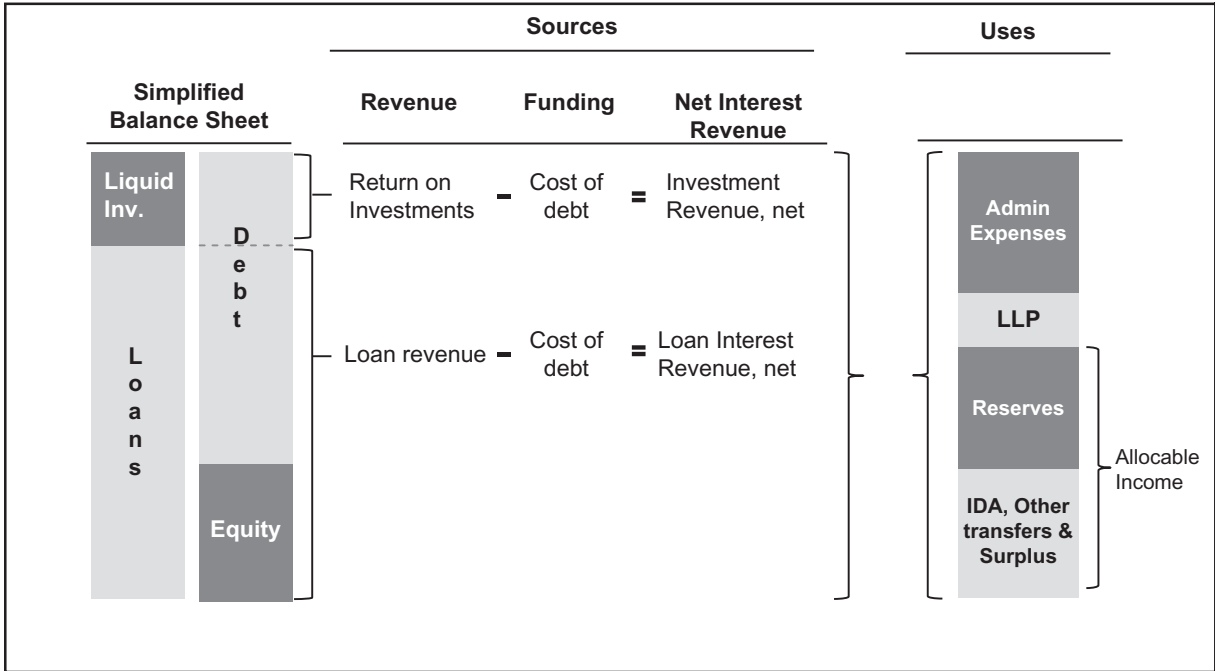

Management believes that these risk management strategies, taken together, effectively manage market risk in IBRD’s operations from an economic perspective. However, these strategies entail the use of derivatives, which introduce volatility in net income through unrealized mark-to-market gains and losses (particularly given the long- term nature of some of IBRD’s assets and liabilities). Accordingly, management makes decisions on income allocation without reference to unrealized mark-to-market gains and losses on risk management instruments in the non-trading portfolios – see Basis of Reporting – Allocable Income.

Financial Performance

IBRD’s primary sources of revenue are from loans and investments, both net of funding costs (see Figure 1). These revenues cover administrative expenses, provisions for losses on loans and other exposures² (LLP), as well as transfers to Reserves, Surplus, and for other development purposes, including transfers to IDA.

In addition, other development activities generate non-interest revenue that is classified as Revenue from externally funded activities. These external funds include trust funds, reimbursable funds and revenues from fee-based services. Non-interest revenue from externally funded activities provides additional capacity to support the development needs of client countries.

Figure 1: Sources and Uses of Revenue

² Other exposures include deferred drawdown options (DDO), irrevocable commitments, exposures to member countries’ derivatives and guarantees.

Basis of Reporting

Audited Financial Statements

IBRD's financial statements conform with accounting principles generally accepted in the United States of America (U.S. GAAP). All financial instruments in the investment and borrowing portfolios and all other derivatives are reported at fair value, with changes in fair value reported in the Statements of Income, except for changes in IBRD's own credit, which are reflected in Other Comprehensive Income. IBRD's loans are reported at amortized cost, except for loans with embedded derivatives, if any, which are reported at fair value. Management uses net income as the basis for deriving allocable income, as discussed below.

Allocable Income

IBRD's Articles of Agreement (the Articles) require that the Governors determine the allocation of income at the end of every fiscal year. Allocable income, which is a non-GAAP financial measure, is an internal management measure that reflects income available for allocation. IBRD defines allocable income as net income after certain adjustments, that are approved by the Board at the end of every fiscal year. These adjustments primarily relate to unrealized mark-to-market gains and losses associated with the non-trading portfolios, as well as the expenses for Board of Governors-approved and other transfers, which primarily relate to the allocation of the prior year's net income.

See Financial Results Section (Section III) and Table 1, for details of the adjustments to reported net income to calculate allocable income.

The volatility in IBRD's reported net income is usually driven by the unrealized mark-to-market gains and losses on the derivative instruments in IBRD's non-trading portfolios: loans, borrowings, and other asset/liability management (ALM). IBRD's risk management strategy entails the use of derivatives to manage market risk. These derivatives are primarily used to align the interest rate and currency bases of its assets and liabilities. IBRD has elected not to designate any hedging relationships for accounting purposes. Rather, all derivative instruments are reported at fair value on the Balance Sheets, with changes in fair values accounted for through the Statements of Income.

In line with its financial risk management policies, for the non-trading portfolios, unrealized mark-to-market gains and losses from instruments carried at fair value (borrowing portfolio, and derivatives in the loan and other ALM portfolios) are excluded from allocable income.

For the trading portfolio (investment portfolio), allocable income generally includes both realized and unrealized mark-to-market gains and losses. In some cases, the unrealized mark-to-market gains and losses on certain trades are excluded from allocable income when the underlying item is a physical asset held at amortized cost.

SECTION III: FINANCIAL RESULTS

Financial Results and Portfolio Performance

The following is a discussion of the key drivers of IBRD's financial performance, including a reconciliation between IBRD's net income and allocable income.

Table 1: Statements of Income

<i>In millions of U.S. dollars For the fiscal year ended June 30,</i>	<u>2023</u>	<u>2022</u>	<i>Impact on income</i>	
			<i>Decrease</i>	<i>Increase</i>

Unrealized mark-to-market (losses) gains on non-trading portfolios, net ^c	(167)	3,356	(3,523)	
Net Income	<u>\$ 1,144</u>	<u>\$ 3,990</u>	(2,846)	
Adjustments to reconcile net income to allocable income:				
Pension ^d and other adjustments	(181)	(32)	(149)	
Board of Governors-approved and other transfers	221	354	(133)	
Non-functional currency translation adjustment gains, net	(39)	(150)		111
Unrealized mark-to-market losses (gains) on non-trading portfolios, net ^c	167	(3,356)		3,523
Allocable Income	<u>\$ 1,312</u>	<u>\$ 806</u>		506

a. Includes unrealized mark-to-market gains on the Investments-Trading portfolio of \$28 million in FY23 (unrealized mark-to-market losses of \$21 million for FY22) and excludes Post Employment Benefit Plan (PEBP) and Post Retirement Contribution Reserve Fund (PCRF) gains of \$74 million in FY23 (\$33 million losses for FY22) reported in Net other revenue (Table 3).

b. Includes changes on recoverable asset relating to Guarantee received under the Exposure Exchange Agreements (EEAs).

c. Adjusted to exclude amounts reclassified to realized gains (losses).

d. Adjustment to pension accounting expense to arrive at pension plan contributions. Pension plan and PCRF contributions were \$264 million in FY23 and \$250 million in FY22.

Table 2: Balance Sheets

*In millions of U.S. dollars
As of June 30,*

	2023	2022	<i>Decrease</i>	<i>Increase</i>
Investments and due from banks	\$ 79,824	\$ 82,299	(2,475)	
Net loans outstanding ^a	241,041	227,092		13,949
Derivative assets, net	271	804		
Other assets	11,505	7,347	(533)	
Total Assets	\$332,641	\$317,542		4,158
Borrowings	237,265	235,173		2,092
Derivative liabilities, net	26,893	20,041		6,852
Other liabilities	8,101	7,008		1,093
Equity	60,382	55,320		5,062
Total Liabilities and Equity	\$332,641	\$317,542		15,099

a. The fair value of IBRD's loans was \$236,521 million as of June 30, 2023 (\$225,046 million – June 30, 2022).

The main drivers of the change in the Balance Sheet items are below:

- Increase in net loans outstanding primarily from net loan disbursements;
- Increase in other assets mainly from the increase in the overfunded status of the Staff Retirement Plan (SRP) and Retired Staff Benefits Plan (RSBP) and higher accrued interest receivable on loans consistent with the increase in interest rates; partially offset by:
- Decrease in investments and due from banks primarily due to net loan disbursements, and in line with the decrease in the target liquidity level;
- Increase in derivative liabilities primarily due to mark-to-market losses on borrowing-related derivatives as a result of the increase in interest rates; and
- Increase in equity, mostly from the increase in accumulated other comprehensive income due to the increase in the unrecognized net actuarial gains on benefit plans and increase in paid-in capital during the year.

Net Income

IBRD's net income was \$1,144 million in FY23, compared with net income of \$3,990 million in FY22. The decrease was primarily due to unrealized mark-to-market losses on IBRD's non-trading portfolios in FY23, compared to unrealized mark-to-market gains in FY22. This was partially offset by higher net loan interest revenue during the year (see Table 1).

Results from Lending activities

Loan Interest Revenue, net

Under IBRD's pricing policy, the lending rates for all loans are based on the underlying cost of the borrowings funding these loans. After the effect of related derivatives (see Figure 21 and Figure 22), the loan and borrowing portfolios are based on variable interest rates. The portion of the loan portfolio funded by equity is sensitive to changes in interest rates.

Figure 2: Loan interest revenue and funding cost (including derivatives)

In millions of U.S. dollars

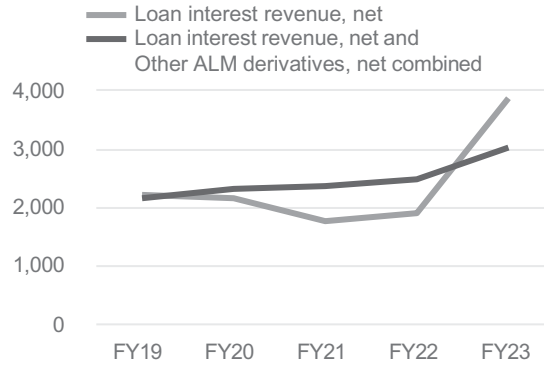

Figure 3: Loan Interest Revenue, net

In millions of U.S. dollars

IBRD's FY23 loan interest revenue, net of funding costs was \$3,874 million, an increase of \$1,982 million compared with \$1,892 million in FY22 (Figure 3). Other ALM derivatives moderate the impact of interest rate changes on the portion of the loan portfolio that is sensitive to interest rate movements, thereby partially stabilizing the net interest revenue earned from these loans (see Figure 3). Other ALM derivatives comprise interest rate swaps, which are used to convert the variable rate cash flows from these loans to fixed rate cash flows. The combined effect of the increase in loan interest revenue, net of \$1,982 million and the decrease in interest revenue from Other ALM derivatives, net of \$1,433 million from FY22 to FY23, resulted in a total increase in net loan interest revenue of \$549 million. The increase was primarily due to the higher average loan balance and partially due to the interest rate reset lag between the Secured Overnight Financing Rate SOFR-based loans and the mixed 6-month LIBOR and SOFR based borrowing portfolio, in a rising interest rate environment.

Provision for losses on loans and other exposures

During FY23, IBRD recorded a provision for losses on loans and other exposures expense of \$683 million, \$121 million higher expense compared to FY22. This increase was primarily driven by the increase in the loss given default (severity) due to the increase in the implied forward interest rates in FY23 compared to FY22. The severity reflects the expected losses from delays in receiving interest payments since IBRD does not charge

interest for overdue interest. As the majority of IBRD's loans carry a variable interest rate, changes in forward interest rates impact the expected losses that are recorded through the provision for losses on loans and other exposures in the Statements of Income.

Figure 4: Change in Net Loans Outstanding
In billions of U.S. dollars

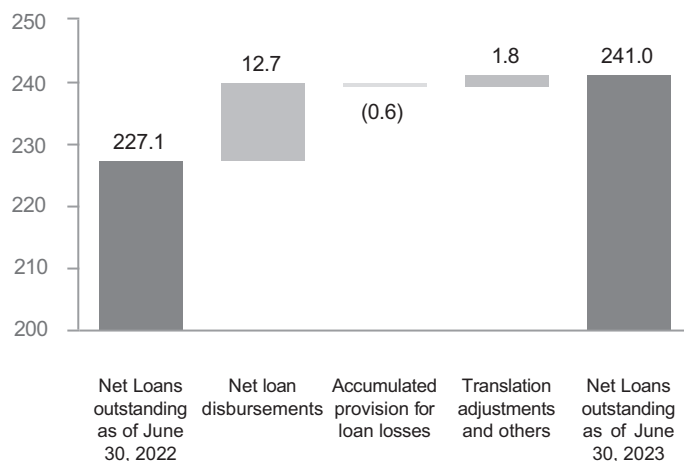

Figure 5: Net Loans Outstanding
In billions of U.S. dollars

As of June 30, 2023, IBRD's net loans outstanding totaled \$241.0 billion, \$13.9 billion or 6% higher than June 30, 2022 (see Figure 5). The increase was mainly attributable to \$12.7 billion of net loan disbursements in FY23 and currency translation gains of \$1.8 billion, primarily due to the 4.4% appreciation of the euro against the U.S. dollar during the year.

Gross disbursements were \$25.5 billion, 9.5% lower compared to FY22, primarily due to lower COVID-19 related gross disbursements in FY23.

Results from Investing activities

Net Investment Portfolio

IBRD's net investment portfolio was \$79.2 billion as of June 30, 2023 (\$82.1 billion as of June 30, 2022). Of this amount, \$75.4 billion related to the liquid asset portfolio (\$78.8 billion as of June 30, 2022). See Note C: Investments in the Notes to the Financial Statements. The decrease in the liquid asset portfolio is primarily due to the net loan disbursements during the year and in line with the lower target liquidity level in FY23 (see Section VI).

Net Investment Revenue

During FY23, IBRD's net investment revenue increased by \$191 million, compared to FY22. This was primarily driven by higher interest income due to the increase in average interest rates in FY23.

Figure 6: Net Investment Portfolio

In billions of U.S. dollars

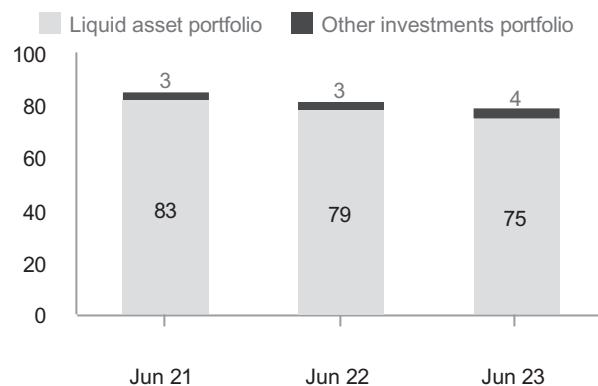

Figure 7: Investment Revenue, net

In billions of U.S. dollars

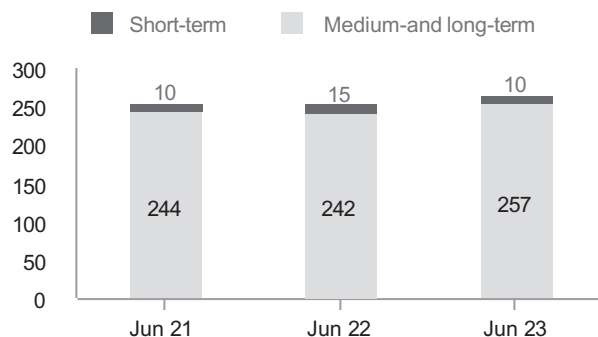

Results from Borrowing activities

As of June 30, 2023, the borrowing portfolio was \$266.8 billion, \$9.9 billion higher than June 30, 2022 (see Note E: Borrowings in the Notes to the Financial Statements). The increase was primarily due to net new debt issuances during the year. New issuances of medium-and long-term debt of \$42.2 billion during the year (Table 23) were highly diversified by investor profile and location, with an average maturity of 6.3 years. The funds raised financed development lending operations and satisfied the liquidity requirements.

Figure 8: Borrowing Portfolio (original maturities)

In billions of U.S. dollars

Net Other Revenue

Net other revenue represents certain non-interest sources of revenue, which was higher by \$115 million during FY23. The increase was mainly due to the higher investment earnings from the PEBP and PCRFB holdings, consistent with prevailing market conditions.

Table 3: Net Other Revenue

In millions of U.S. dollars

Net other revenue (Table 1)	<u>\$218</u>	<u>\$103</u>	<u>\$115</u>

Net Non-Interest Expenses

As shown in Table 4, IBRD’s net non-interest expenses are primarily comprised of administrative expenses, net of revenue from externally funded activities. IBRD and IDA’s administrative budget is a single resource envelope that funds the combined work programs of both entities. The allocation of net administrative expenses between IBRD and IDA is based on an agreed cost and revenue sharing methodology, approved by their Boards, which is primarily driven by the relative level of lending, knowledge services, and other services between these two entities. The administrative expenses shown in Table 4 include costs related to IBRD-executed trust funds and other externally funded activities.

Figure 9: Net Non-Interest Expenses (GAAP basis)

In millions of U.S. dollars

The increase in net non-interest expenses on both a GAAP basis and allocable income basis from FY22 to FY23 was primarily driven by higher staff costs and higher travel expenses (Table 4). Travel expenses have been gradually increasing since the easing of the COVID-19-related travel restrictions and office closures and are now approximately 83% of the pre-COVID level for the World Bank.

IBRD’s goal is to have its net administrative expenses covered by its loan spread revenue (Box 2) and certain fee revenue, using an efficiency measure referred to as the Budget Anchor. In FY23, IBRD’s Budget Anchor was 60.3%, an improvement of 5.1 percentage points compared with 65.4% in FY22. The improvement was due to an increase in loan spread revenue, partially offset by an increase in net non-interest expenses during the year (see Table 5 for details of the Budget Anchor components).

a. *These adjustments are made to arrive at net administrative expenses used for allocable income purposes. For more information see Table 7 in Net Income Allocation section.*

Unrealized mark-to-market gains/losses on non-trading portfolios

Unrealized mark-to-market gains and losses associated with the non-trading portfolios are excluded from reported net income to arrive at allocable income. As a result, from a long-term financial sustainability perspective, income allocations are generally based on amounts that have been realized (except for the Investments-Trading portfolio, as previously discussed). For FY23, \$167 million of net unrealized mark-to-market losses (\$3,356 million net unrealized mark-to-market gains in FY22) were excluded from reported net income to arrive at allocable income (see Table 1).

Table 6: Unrealized Mark-to-Market gains/(losses) on non-trading portfolios ^a*In millions of U.S. dollars*

<i>For the fiscal year ended June 30,</i>	<u>2023</u>	<u>2022</u>	<u>Variance</u>

Loan Portfolio

Loans are reported at amortized cost on the Balance Sheets and therefore the mark-to-market effect on loans is not reflected in reported net income. However, the derivatives used to convert the loans from fixed-rate to variable-rate instruments, for asset / liability management purposes, are reported at fair value. From an economic perspective, IBRD's loans after the effect of derivatives carry variable interest rates and have a low sensitivity to interest rates. The unrealized mark-to-market gains on loan related derivatives were \$1,673 million in FY23, primarily due to the increase in interest rates during the year. The lower unrealized mark-to-market gains in FY23 were primarily due to the less prominent increase in interest rates compared to FY22. See Section IX: Risk Management for additional details on how IBRD uses derivatives in the loan portfolio.

Other ALM Portfolio

IBRD uses derivatives to stabilize its interest revenue from the portion of loans that is sensitive to changes in short-term interest rates. The Other ALM portfolio consists of derivatives which convert variable rate loan cash flows to fixed rate loan cash flows. In FY23, IBRD recorded unrealized mark-to-market losses of \$1,642 million on this portfolio primarily due to the increase in interest rates during the year. The lower unrealized mark-to-market losses in FY23 were primarily due to the less prominent increase in interest rates compared to FY22. As of June 30, 2023, the duration of this portfolio was 3.9 years, within the Board established limit of 5 years.

Borrowing Portfolio

IBRD's bonds and the related derivatives are reported at fair value. IBRD recorded \$198 million of net unrealized mark-to-market losses on IBRD's bonds and associated derivatives, due to the increase in interest rates for the year ended June 30, 2023. The losses on the bond-related derivatives exceeded the gains on the bonds. The net unrealized mark-to-market gains on IBRD's bonds exclude changes in IBRD's own credit, referred to as the Debit Valuation Adjustment (DVA) on Fair Value Option elected liabilities, which is instead recorded in Accumulated Other Comprehensive Income (AOCI). In FY23, the DVA was \$13 million of unrealized mark-to-market losses, resulting mainly from the tightening of IBRD's credit spreads relative to the applicable reference rate during the year. As of June 30, 2023, IBRD's Balance Sheets included a cumulative DVA of \$351 million of mark-to-market gains reflected in AOCI (See Notes to the Financial Statements, Note L –Fair Value Disclosures).

Net Income Allocation

Management recommends allocations of income to the Board, at the end of each fiscal year, to augment reserves and support developmental activities. These allocations are based on allocable income. As illustrated in Table 7, the key differences between allocable income and reported net income relate to unrealized mark-to-market gains and losses on IBRD's non-trading portfolios, and expenses related to Board of Governors-approved and other transfers.

Table 7: Allocable Income

In millions of U.S. dollars

<i>For the fiscal years ended June 30,</i>	<u>2023</u>	<u>2022</u>
Net Income	\$1,144	\$ 3,990
Adjustments to Reconcile Net Income to Allocable Income:		
Board of Governors-approved and other transfers	221	354
Non-functional currency translation adjustments gains, net ^a	(39)	(150)
Unrealized mark-to-market losses (gains) on non-trading portfolios, net ^b	167	(3,356)
Pension ^c	(119)	(79)
PEBP and PCRF adjustment	(74)	33

Allocable Income	<u>\$1,312</u>	<u>\$ 806</u>
Recommended Allocations		
General Reserve	921	589
Surplus	100	100
Transfer to IDA	291	117
Total Allocations	<u>\$1,312</u>	<u>\$ 806</u>

a. Translation adjustments relating to assets and liabilities denominated in non-functional currencies.

b. Adjusted to exclude amounts reclassified to realized gains (losses).

c. Represents the difference between the pension cost incurred and pension contributions.

All of the adjustments between reported net income and allocable income are recommended by management and approved by the Board:

Board of Governors-approved and other transfers

Board of Governors-approved and other transfers refer to the allocations recommended by the Board and approved by the Governors, as part of the prior year's net income allocation process and subsequent decisions on uses of surplus, as well as on payments from restricted retained earnings.

Since these amounts primarily relate to allocations out of IBRD's FY22 allocable income, Surplus, or restricted retained earnings, they are excluded from FY23 reported net income in calculating FY23 allocable income.

Non-functional currency translation adjustment gains/losses

Translation gains and losses relating to non-functional currencies are reflected in reported net income. Since these are unrealized gains/losses that relate to asset/liability positions still held by IBRD, they are excluded from reported net income to arrive at allocable income.

Unrealized mark-to-market gains/losses on non-trading portfolios

These mainly comprise unrealized mark-to-market gains and losses on the loan, borrowing, and other ALM portfolios as previously discussed.

Unrealized mark-to-market gains/losses on certain positions in the investments-trading portfolio, net

This adjustment applies to trades where the unrealized gains and losses on derivative forward contracts are recorded in the Statements of Income and the underlying physical assets being purchased and sold are recorded at amortized cost during the holding period. In these cases, the unrealized gains and losses on the forward contract at the end of the reporting period (if any) are excluded from net income when calculating allocable income. As of June 30, 2023, there were no active trades requiring adjustment.

Pension, PEBP and PCRF adjustments

The Pension adjustment reflects the difference between the accounting expense and IBRD's cash contributions to the pension plans, the Post-Employment Benefit Plan (PEBP), and the Post-Retirement Contribution Reserve Fund (PCRF). It also includes investment revenue earned on pension plan, PEBP, and PCRF assets. The PCRF was established by the Board to stabilize contributions to the pension and post-retirement benefits plans. Management bases allocation decisions on IBRD's cash contributions to the pension plans, PEBP and PCRF, rather than pension accounting expenses. In addition, Management has designated the income from these assets to meet the future needs of the pension plans. As a result, PEBP and PCRF investment revenues are excluded from allocable income.

Other Adjustments

- Under certain arrangements (such as Externally Financed Outputs), IBRD enters into agreements with donors under which it receives grants to finance specified IBRD outputs or services. These funds may be utilized only for the purposes specified in the agreements and are, therefore, considered restricted until IBRD has fulfilled those purposes. Management excludes amounts arising from these arrangements from allocable income because IBRD has no discretion over the use of the related funds. In line with this, in FY23, the income of \$11 million was transferred out of restricted retained earnings (Table 7). Consequently, the net balance of these restricted funds decreased by the same amount.

- Under the Board-approved framework, RAMP fees are dedicated for the purpose of providing technical assistance and asset management services to external clients. Due to the potential timing mismatch between fee revenue (recognized as earned) and program expenditures (recognized when incurred), fees earned in a given fiscal year may be used to provide services in a future fiscal year. To ensure that RAMP revenues are only used for the delivery of RAMP services, and not allocated for other purposes, any difference between fee revenue and expenses from RAMP included in reported net income are excluded to arrive at allocable net income. Allocable income for FY23 was adjusted for the excess of RAMP expenses over the fee revenue from RAMP of \$1 million (Table 7).

Income Allocation

Since 1964, IBRD has made transfers to IDA from its net income, upon approval by the Board of Governors. In FY17, the Board approved a formula-based approach for determining IBRD’s transfers to IDA. The approach links transfers to IBRD’s allocable income for the year, ensuring that most allocable income is retained to grow IBRD’s reserves. In addition, as part of the commitment made under the 2018 capital package, the incremental revenue from the 2018 price increase is excluded from the formula used to calculate the amount to be transferred to IDA, and fully retained in IBRD’s reserves.

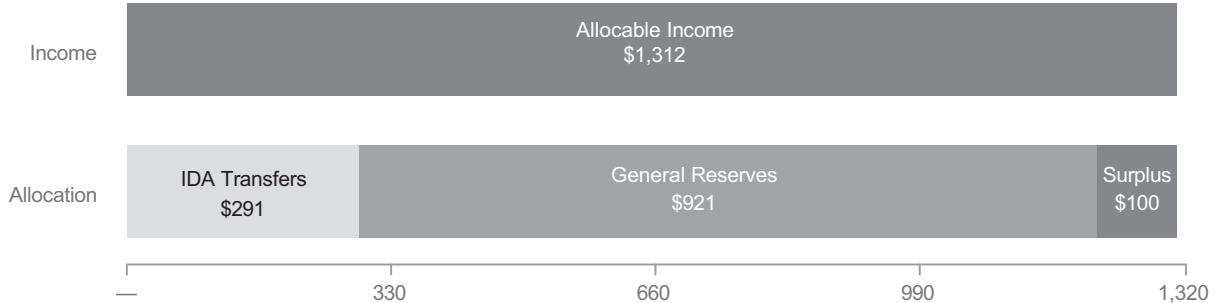

IBRD’s strong support of IDA is reflected in the \$16.5 billion of cumulative income transfers it has made since IDA’s first replenishment.

Annual IDA transfer recommendations are subject to approval by the Governors as part of the net income allocation process in accordance with IBRD’s Articles. In making their decisions, Governors will continue to take the overall financial standing of IBRD into consideration.

Allocable income in FY23 was \$1,312 million, and out of this, the Board approved the allocation of \$921 million to the General Reserve on August 3, 2023, and the Board recommended to IBRD’s Governors a transfer of \$291 million to IDA and \$100 million to Surplus.

Figure 10: FY23 Allocable Income and Income Allocation

In millions of U.S. dollars

SECTION IV: LENDING ACTIVITIES

IBRD provides financing instruments and knowledge services to middle-income and creditworthy low-income countries, while ensuring that social, environmental, and governance considerations are taken into account. Country teams with an understanding of each country’s circumstances work with clients to tailor the mix of instruments, products, and services.

Engagement with borrowing members is increasingly aligned with IBRD’s strategic priorities, including engagements that support global public goods such as climate, fragility and gender.

Projects and programs supported by IBRD are designed to achieve a positive social impact and undergo a rigorous review and internal approval process, aimed at safeguarding equitable and sustainable economic growth, that includes early screening to identify environmental and social impacts and designing mitigation actions. From July 1, 2023, new financing and guarantees provided by IBRD are being tracked against the objectives of the Paris Agreement and a country’s pathway towards low greenhouse gas emissions and climate-resilient development.

Financing cycles involve identifying and appraising a project and approving and disbursing the funds. In response to emergency situations, such as natural disasters and crises, IBRD is able to accelerate the preparation and approval cycle.

Loan disbursements must meet the requirements set out in loan agreements. During implementation of IBRD-supported operations, IBRD’s staff review progress, monitor compliance with IBRD policies, and help resolve any problems that may arise. The Independent Evaluation Group, an IBRD unit whose Director General reports to the Board, evaluates the extent to which operations have met their development objectives.

All IBRD loans, are made to, or guaranteed by, member countries. IBRD may also make loans to IFC without any guarantee. In most cases, IBRD’s Board approves each loan and guarantee after appraisal of a project by staff. Under the Multiphase Programmatic Approach, the Board may approve an overall program framework, its financing envelope and the first appraised phase, and then authorize Management to appraise and commit financing for later program phases.

For FY24, eligible countries with 2022 per capita Gross National Income (GNI) of more than \$1,315 are eligible for new lending from IBRD.

Net Lending Commitments and Gross Disbursements

IBRD provided \$38.6 billion of new net loan commitments in FY23, through 136 operations (including blend operations), an increase of \$5.5 billion (17%) compared to FY22, mainly driven by the increase in Investment Project Financing commitments (Figure 11).

Table 8: Net Commitments by Region

Lending Categories

IBRD's lending is classified in three categories: investment project financing, development policy financing, and program-for-results (Figure 11).

Investment Project Financing (IPF)

IPF provides financing for a wide range of activities aimed at creating the physical and social infrastructure necessary to reduce poverty and create sustainable development. IPF is usually disbursed over the long-term (roughly a 5 to 10-year horizon). FY23 net commitments under this lending category were \$17.4 billion, compared with \$14.1 billion in FY22.

Development Policy Financing (DPF)

DPF aims to support borrowers in achieving sustainable development through a program of policy and institutional actions. Examples of DPF projects include strengthening public financial management, improving the investment climate, addressing bottlenecks to improve service delivery, and diversifying the economy. DPF supports reforms through non-earmarked general budget financing. DPF provides fast-disbursing financing (roughly 1 to 3 years) to help borrowers address actual or anticipated financing requirements. FY23 net commitments under this lending category were \$14.0 billion, compared with \$13.2 billion in FY22.

Program-for-Results (PforR)

PforR helps countries improve the design and implementation of their development programs and achieve specific results by strengthening institutions and building capacity. PforR disburses when agreed results are achieved and verified. Results are identified and agreed upon during the loan preparation stage.

FY23 net commitments under this lending category were \$7.2 billion compared with \$5.8 billion in FY22.

Figure 11: Percentage Share of Lending Categories for Annual Net Commitments

Currently Available Lending Products

As of July 1, 2023, 84 member countries were eligible to borrow from IBRD. See Appendix for a list of eligible countries.

IBRD Flexible Loans (IFLs)

IFLs allow borrowers to customize their repayment terms (i.e., grace period, repayment period, and amortization profile) to meet their debt management or project needs. The IFL previously offered two types of loan terms: variable-spread terms and fixed-spread terms. Effective April 1, 2021, IBRD’s offering of loans on fixed spread terms as well as a related conversion feature from the variable spread terms to fixed spread terms was suspended (see section IX: Risk Management). As of June 30, 2023, 73% of IBRD’s loans outstanding carried variable-spread terms and 27% had fixed-spread terms. See Table 12 for details of loan terms for IFL loans.

IFLs include options to manage the currency and/or interest rate risk over the life of the loan. The outstanding balance of loans for which currency or interest rate conversions have been exercised was \$41.7 billion as of June 30, 2023 and \$41.6 billion as of June 30, 2022. IFLs may be denominated in the currency or currencies chosen by the borrower if IBRD can efficiently intermediate in that currency. Using currency conversions, some borrowing member countries have converted their IBRD loans into domestic currencies to reduce their foreign currency exposure for projects or programs that do not generate foreign currency revenue. These local currency loans may carry fixed or variable-spread terms. The balance of such loans outstanding was \$3.4 billion as of June 30, 2023 and \$3.7 billion as of June 30, 2022, respectively. Box 2 below shows the components of the spread on IBRD’s IFLs and how these are determined.

Box 2: Components of Loan spread

Contractual lending spread	Subject to the Board’s periodic review
Maturity Premium	
Market Risk Premium ^a	Set by Management
Funding Cost Margin	

a. This is only applicable to fixed spread loans which are not currently offered.

The ability to offer long-term financing distinguishes development banks from other sources of funding for member countries. Since IBRD introduced maturity-based pricing in 2010, most countries continue to choose

loans with the longer maturities with a higher maturity premium, highlighting the value of longer maturities to member countries. However, in FY23, due to the ongoing multiple crises, some countries requested more fast-disbursing loans with shorter maturities (See Table 10).

Table 10: Net Commitments by Maturity

In millions of U.S. dollars

<i>Maturity</i>	<i>For the fiscal year ended June 30, 2023</i>	<i>For the fiscal year ended June 30, 2022</i>

Other Lending Products Currently Available

In addition to IFLs, IBRD offers loans with a deferred drawdown option, Special Development Policy Loans (SDPLs), loan-related derivatives, and loans to IFC (See Box 3).

Box 3: Other Lending Products Currently Available

Lending Product	Description
Loans with a Deferred Drawdown Option	The Development Policy Loan Deferred Drawdown Option (DPL DDO) gives borrowers the flexibility to rapidly obtain the financing they require. For example, such funds could be needed owing to a shortfall in resources caused by unfavorable economic events, such as declines in growth or unfavorable shifts in commodity prices or terms of trade. The Catastrophe Risk DDO (CAT DDO) enables borrowers to access immediate funding to respond rapidly in the wake of a natural disaster. Under the DPL DDO, borrowers may defer disbursement for up to three years, renewable for an additional three years. The CAT DDO has a revolving feature and the three-year drawdown period may be renewed up to four times, for a total maximum drawdown period of 15 years (Table 12). As of June 30, 2023, the amount of DDOs disbursed and outstanding was \$9.3 billion (compared to \$8.8 billion on June 30, 2022), and the undisbursed amount of effective DDOs was \$0.1 billion, compared to \$0.6 billion a year earlier.
Special Development Policy Loans (SDPLs)	SDPLs support structural and social reforms by creditworthy borrowers that face a possible global financial crisis or are already in a crisis and have extraordinary and urgent external financing needs. There was no amount outstanding as of June 30, 2023 and June 30, 2022. IBRD made no new SDPL commitments in either FY23 or FY22.

Lending Product	Description
Loan-Related Derivatives	IBRD assists its borrowers with access to better risk management tools by offering derivative instruments, including currency and interest rate swaps and interest rate caps and collars, associated with their loans. These instruments may be executed either under a master derivatives agreement, which substantially conforms to industry standards, or under individually negotiated agreements. Under these arrangements, IBRD passes through the market cost of these instruments to its borrowers. The balance of loans outstanding for which borrowers had entered into currency or interest rate derivative transactions under a master derivatives agreement with IBRD was \$9 billion as of June 30, 2023 and June 30, 2022.
Loans with IFC	IBRD provides loans to IFC in connection with the release of a member's National Currency Paid-In Capital (NCPIC) to IBRD. (See Section VIII for explanation of NCPIC). There was no outstanding amount as of June 30, 2023 and June 30, 2022.

Lending Terms Applicable to IBRD Products

Until the end of FY19, loans for all eligible members were subject to the same pricing. However, as part of the 2018 capital package, IBRD implemented a new pricing structure that classifies member countries into four pricing groups, based on income and other factors, and relates the maturity premium to the exemptions, discounts or surcharges applicable to each pricing group (See Table 11 below).

Table 11: Country Pricing Group and Maturity Premium (in basis points)

<i>Country pricing group</i>	<i>Description</i>	<i>Maturity Premium^a</i>
A	Blends ^b , small states, countries in fragile and conflict-affected situations (FCS) and recent IDA graduates. These countries are exempt from the maturity premium increase regardless of their income levels.	0-50 ^c
B	Countries below-GDI which do not qualify for an exemption listed in Group A. Countries above-GDI, but below high-income status and which do not qualify for an	0-70
C	exemption listed in Group A. Countries with high income status and which do not qualify for an exemption listed in	0-90
D	Group A.	5-115

a. Based on the weighted average maturity of the loan, borrower's income, and other factors, approved by the Board and reviewed annually.

b. Countries eligible for IDA and IBRD loans.

c. Member countries in group A are exempt from the maturity premium increase applicable from July 1, 2018.

Table 12: Loan Terms Available During Fiscal Year Ended June 30, 2023

Basis points, unless otherwise noted

	<i>IBRD Flexible Loan (IFL) ^{a b} Variable-spread Terms</i>	<i>Special Development Policy Loans (SDPL)</i>
<i>Final maturity</i>	35 years	10 years
<i>Maximum weighted average maturity</i>	20 years	7.5 years
<u>Reference market rate</u>	<u>Market-based variable rate index</u>	<u>Market-based variable rate index</u>
<i>Spread</i>		
Contractual lending spread	50	min. 200
Maturity premium	0-115 ^c	—
Market risk premium	—	—
Funding cost margin	Actual average funding cost incurred during the preceding six- month period	—
<i>Charges</i>		
Front-end fee	25	100
Late service charge on principal payments received after 30 days of due date ^d . . .	50	—
Commitment Fee ^{e g}	25	25
	<i>Development Policy Loan Deferred Drawdown Option</i>	<i>Catastrophe Risk Deferred Drawdown Option</i>
<u>Reference market rate</u>	<u>Market-based variable rate index</u>	<u>Market-based variable rate index</u>
Contractual lending spread	IFL variable in effect at the time of withdrawal	50 ^f
Front-end fee	25	25
Renewal fee	—	—
Stand-by fee	50 ^e	—

- a. *There is an implicit floor of zero on the overall interest rate in IBRD's loans.*
- b. *Effective April 1, 2021, IBRD suspended offering loans with fixed spread terms.*
- c. *Based on the weighted average maturity of the loan and on country pricing group.*
- d. *See Box 7 in Section IX for a discussion of overdue payments.*
- e. *Certain waivers of commitment / stand-by fees payable during the first year of financing for health-related COVID-19 operations are approved under the Fast Track COVID-19 Facility.*
- f. *For CAT-DDOs approved under the Fast Track COVID-19 Facility, the Front-End Fee is reduced to 25bps.*
- g. *For operations approved under the Additional Financing to the COVID-19 Strategic Preparedness and Response Program (SPRP), the commitment fee is waived for a period of up to 18 months starting from the date of approval of the relevant operation.*

Discontinued Lending Products

IBRD's loan portfolio includes lending products whose terms are no longer available for new commitments. These products include currency pool loans and fixed-rate single-currency loans. As of June 30, 2023, loans outstanding of \$457 million (0.2% of the portfolio) carried terms no longer offered, with final maturity in May 2026.

Waivers

Loan terms offered prior to September 28, 2007 included a partial waiver of interest and commitment charges on eligible loans. For these loans, waivers were approved on an annual basis by the Board through fiscal year 2023. In view of the small residual balance in these loans, the Board has now in addition approved the same waiver rates on all future payments for all eligible loans. The foregone income in FY23 due to such approved waivers was \$16 million (FY22: \$20 million).

Figure 12 illustrates a breakdown of IBRD’s loans outstanding and undisbursed balances by loan terms, as well as loans outstanding by currency composition. The interest and currency profile of loans outstanding after the use of derivatives for risk management purposes is discussed under Market Risk in Section IX.

SECTION V: OTHER DEVELOPMENT ACTIVITIES

IBRD continues to deliver value to its client countries through its knowledge services, convening power, and capacity to implement solutions that address global issues where coordinated action is critical.

IBRD also assists clients with designing financial products and structuring transactions to help mobilize resources for development projects and mitigate the financial effects of market volatility and disasters.

Other financial products and services provided to borrowing member countries, and to affiliated and non-affiliated organizations, include financial guarantees, grants, externally-funded activities, and advisory services and analytics.

Guarantees

IBRD’s exposure on its guarantees was \$6.5 billion as of June 30, 2023 compared to \$6.3 billion as of June 30, 2022 (see Table 14). Exposure is measured by discounting each guaranteed amount from its next call date.

IBRD offers project-based and policy-based guarantees for priority projects and programs in member countries. Project-based guarantees are provided to mobilize private financing for projects; they are also used to mitigate projects’ payment- and performance-related risks. Policy-based guarantees are provided to mobilize private financing for sovereigns or sub- sovereigns. IBRD’s guarantees are partial and are intended to provide only the coverage necessary to obtain the required private financing, considering country, market and, if appropriate, project circumstances. All guarantees require a sovereign counter-guarantee and indemnity, comparable to the requirement of a sovereign guarantee for IBRD lending to sub-sovereign and non-sovereign borrowers (see Box 4). The Corporate Risk Guarantee Committee reviews the choice of instrument for all proposed new guarantee operations.

Box 4: Types of Guarantees Provided by IBRD

Guarantee	Description
Project-based guarantees	<p>Two types of project-based guarantees are offered:</p> <ol style="list-style-type: none"> 1. Loan guarantees: these cover loan-related debt service defaults caused by the government’s failure to meet specific payment and/or performance obligations arising from contract, law or regulation, in relation to a project. Loan guarantees include coverage for debt service defaults on: (i) commercial debt, normally for a private sector project where the cause of debt service default is specifically covered by IBRD’s guarantee; and, (ii) a specific portion of commercial debt irrespective of the cause of such default, normally for a public-sector project. 2. Payment guarantees: These cover payment default on non-loan related government payment obligations to private entities and foreign public entities arising from contract, law or regulation.
Policy-based guarantees	<p>These cover debt service default, irrespective of the cause of such default, on a specific portion of commercial debt owed by national or sub national government and associated with the supported government’s program of policy and institutional actions.</p>
Guarantees for enclave operations	<p>IBRD extends guarantees for projects in IDA-only member countries that (i) are expected to generate large economic benefits with significant developmental impact in the member country; and (ii) cannot be fully financed out of the country’s own resources, IDA resources, or other concessional financing. Those projects are known as enclave operations. The provision of IBRD support to enclave operations is subject to credit enhancement features that adequately mitigate IBRD’s credit risk.</p>

Table 14: Guarantees Exposure*In million U.S. dollars*

<u>As of June 30,</u>	<u>2023</u>	<u>2022</u>
Guarantees (project, policy and enclave)	\$ 2,840	\$2,703
Exposure Exchange Agreements	3,619	3,630
Total	<u>\$ 6,459</u>	<u>\$6,333</u>

Table 15: Pricing for IBRD Project-Based and Policy-Based Guarantees

<u>Charges for the fiscal year ended June 30,</u>	<u>Basis Points</u>	
	<u>2023</u>	<u>2022</u>
Front-end fee	25	25
Processing fee ^{a b}	Up to 50	Up to 50
Initiation fee ^{c b}	15	15
Standby fee	25	25
Guarantee fee ^d	50 - 165	50 - 165

- a. *Determined on a case by case basis. In exceptional cases, projects can be charged over 50 bps of the guarantee amount.*
- b. *Not applicable for public projects.*
- c. *The initiation fee is 15 basis points of the guaranteed amount or \$100,000, whichever is greater.*
- d. *Based on the weighted average maturity of the guarantee and country pricing group.*

In addition, IBRD has entered into the following arrangements, which are treated as financial guarantees under U.S. GAAP:

- *Exposure Exchange Agreements (EEA):* IBRD has an exposure exchange agreement outstanding with MIGA under which IBRD and MIGA exchanged selected exposures through reciprocal guarantees, with each divesting itself of exposure in countries where their lending capacities are limited, in return for exposure in countries where they had excess lending capacity.

IBRD also has a Multilateral Development Bank (MDB) EEA with the African Development Bank (AfDB) and the Inter-American Development Bank (IADB). Under this EEA, each MDB exchanged credit risk exposure of a reference portfolio supported by underlying loans to borrowing member countries. For each MDB, EEAs through diversification benefits, help reduce credit risk at the portfolio level; improve the risk-weighted capital ratios especially by addressing exposure concentration concerns; and create lending headroom for individual borrowing countries where MDBs may be constrained. The EEA involved the receipt of a guarantee and the provision of a guarantee against nonpayment in the reference portfolio by each MDB to the other. The guarantee received and the guarantee provided are two separate transactions: (a) a receipt of an asset for the right to be indemnified and receive risk coverage (recoverable asset) and (b) the provision of a financial guarantee, respectively (see Notes to the Financial Statements, Note D: Loans and Other Exposures).

- *Other guarantee arrangements:* As of June 30, 2023, IBRD had received guarantees totaling \$3,325 million (\$2,116 million as of June 30, 2022). These guarantees serve as a credit enhancement which increase IBRD's lending capacity in certain countries (see Notes to the Financial Statements, Note D: Loans and Other Exposures).

Table 16: Exposure Exchange Agreements*In millions of U.S. dollars**As of June 30,*

	2023		2022	
	<i>Guarantee Received</i>	<i>Guarantee Provided</i>	<i>Guarantee Received</i>	<i>Guarantee Provided</i>
Exposure Exchange Agreement				
MIGA	\$ 10	\$ 10	\$ 21	\$ 21
IADB	2,021	2,021	2,021	2,021
AfDB	1,588	1,588	1,588	1,588
Total notional	\$ 3,619	\$ 3,619	\$3,630	\$ 3,630

Grant Making Facilities

Grant Making Facilities (GMFs) are contributions to specific trust funds and are complementary to IBRD's work. IBRD deployed \$17 million under this program in FY23 (\$17 million in FY22). These amounts are reflected in contributions to special programs in IBRD's Statements of Income, after IDA's share is determined in accordance with the cost sharing ratio.

Externally-Funded Activities

Mobilization of external funds from third-party partners includes trust funds. Additional external funds include reimbursable funds and revenues from fee-based services to member countries, which are related to RAS, EFOs, and other financial products and services, including RAMP.

Trust Funds

Trust Funds provide development solutions that serve member recipients and donors. Trust funded partnerships often serve as a platform for IBRD and the partners to access WBG's diverse technical and financial resources, and achieve development goals whose complexity, scale, and scope exceed any individual partner's capabilities. IBRD's roles and responsibilities in managing trust funds depend on the type of fund, outlined as follows:

- *IBRD-Executed Trust Funds (BETFs)*: IBRD, alone or jointly with one or more of its affiliated organizations, manages the funds and implements the activities financed. These trust funds support IBRD's work program. IBRD disbursed \$570 million in FY23 (\$494 million in FY22) of trust fund program funds, which was included in Non-interest expenses, Administrative in IBRD's Statements of Income.
- *Recipient-Executed Trust Funds (RETFs)*: Funds are provided to a third party, normally in the form of project grant financing, and are supervised by IBRD.
- *Financial Intermediary Funds (FIFs)*: IBRD, as trustee, administrator, or treasury manager, offers specific administrative or financial services with a limited operational role. Arrangements include the administration of debt service trust funds, fiscal agency funds and other more specialized limited fund management roles.

IBRD uses a cost recovery framework for trust funds, which aims to recover the costs of performing agreed roles in administering trust funds, and is guided by principles of transparency, fairness, simplification, standardization, predictability and consistent treatment across all trust fund donors.

Management continues to implement measures to improve planning, support sustainability and enhance alignment of external funds with mission priorities through greater use of umbrella trust fund programs, increased cost recovery, and new budgetary measures to manage External Funds usage.

During FY23, IBRD’s share of revenue and fees from trust fund administration was \$62 million (\$50 million in FY22) (see Notes to Financial Statements, Note I: Management of External Funds and Other Services).

Reimbursable Advisory Services (RAS)

While most of IBRD’s advisory and analytical work is financed by its own budget or donor contributions (e.g., Trust Funds), clients may also pay for services. IBRD offers technical assistance and other advisory services to its member countries, in connection with, and independent of, lending operations. Available services include, for example, assigning qualified professionals to survey developmental opportunities in member countries; analyzing member countries fiscal, economic, and developmental environments; helping members devise coordinated development programs; and improving their asset and liability management techniques. In FY23, IBRD earned revenue of \$52 million (\$47 million in FY22) from RAS.

Externally Financed Outputs (EFOs)

IBRD offers donors the ability to contribute to specific projects and programs. EFO contributions are recorded as restricted revenue when received because they are for contractually specified purposes. In FY23, IBRD had \$3 million of restricted revenue, compared with \$4 million in FY22, which are included in Net non-interest expenses – GAAP basis in Table 4.

Restrictions are released once the funds are used for the purposes specified by donors. In FY23, there was a release of \$14 million (\$20 million in FY22).

Other Financial Products and Services

Managing Financial Risks for Clients

IBRD helps member countries build resilience by facilitating access to risk management solutions to mitigate the financial effects of currency, interest rate, and commodity price volatility, disasters, and extreme weather events.

Box 5 below lists some financial solutions and disaster risk financing instruments IBRD offers:

Box 5: Financing Instruments

<i>Hedging Transactions</i>	<i>Disaster Risk Financing</i>
Interest Rate Currency Commodity Price	Catastrophe Derivatives and Bonds Insurance & Reinsurance Regional Pooling Facilities

IBRD also intermediates the following risk management transactions for clients:

- *Affiliated Organization:* To assist IDA with its asset/liability management IBRD executed currency forward contracts on its behalf. There were no open trades as of June 30, 2023.
- *Unaffiliated Organization:* To assist the International Finance Facility for Immunization (IFFIm) with its asset/liability management strategy, IBRD executes currency and interest rate swaps on its behalf. In addition, IBRD, as Treasury Manager, is a counterparty to IFFIm and enters into offsetting swaps with market counterparties. During FY23, IBRD did not execute any swaps under this agreement.

(See Risk Management, Section IX, for a detailed discussion of IBRD’s risk mitigation of these derivative transactions).

Asset Management

The Reserves Advisory and Management Partnership (RAMP) provides services that build clients' capacity to support the sound management of their official sector assets. Clients include central banks, sovereign wealth funds, national pension funds, and supranational organizations. RAMP helps clients upgrade their asset management capabilities, including portfolio and risk management, operational infrastructure, and human resources capacity. Under most of these arrangements, IBRD is responsible for managing a portion of the institution's assets and, in return, receives a fee based on the average value of the portfolio managed (see Table 17). The fees earned are used to provide training and capacity-building services. In addition to RAMP, IBRD invests and manages investments on behalf of IDA, MIGA, and trust funds; those investments are not included in IBRD's assets.

Table 17: RAMP – Assets and Revenues

In millions of U.S. dollars

<i>As of June 30,</i>	<u>2023</u>	<u>2022</u>
Assets managed under RAMP	\$24,010	\$23,884
Revenue from RAMP	\$ 14	\$ 15

As noted in the discussion of Trust Fund Activities above, IBRD, alone or jointly with one or more of its affiliated organizations, administers on donors' behalf funds restricted for specific uses. This administration is governed by agreements with donors, who include members, their agencies and other entities. These funds are held in trust and are not included on IBRD's Balance Sheets, except for \$588 million of undisbursed third-party contributions made to IBRD-executed trust funds, which are recognized on the Balance Sheets. The funds held in trust by IBRD as administrator and trustee totaled \$42.0 billion in FY23, of which \$94 million (\$108 million in FY22) relates to IBRD's own contributions to these trust funds (Table 18).

Table 18: Funds Held in Trust by IBRD

In millions of U.S. dollars

<i>As of June 30,</i>	<u>2023</u>	<u>2022</u>
IBRD-executed	\$ 257	\$ 249
Jointly executed with affiliated organizations	1,027	1,004
Recipient-executed	3,142	2,965
Financial intermediary funds	28,060	22,399
Execution not yet assigned ^a	<u>9,554</u>	<u>7,114</u>
Total fiduciary assets	<u>\$42,040</u>	<u>\$33,731</u>

a. These represent assets held in trust for which the determination as to the type of execution is yet to be finalized.

SECTION VI: INVESTMENT ACTIVITIES

IBRD’s investment portfolio consists mainly of the liquid asset portfolio. As of June 30, 2023, the net investment portfolio totaled \$79.2 billion with \$75.4 billion representing the liquid asset portfolio. This compares with \$82.1 billion a year earlier, of which \$78.8 billion represented the liquid asset portfolio (see Note C: Investments in the Notes to the Financial Statements). The decreased level of liquidity reflects the lower debt service requirements and higher loan disbursements during the year.

Liquid Asset Portfolio

Funds raised through IBRD’s borrowing activities that have not yet been deployed for lending are held in the liquid asset portfolio to provide liquidity for IBRD’s operations. The portfolio is managed with the goal of ensuring sufficient cash flows to meet all IBRD’s financial commitments. While it seeks a reasonable return on this portfolio, IBRD restricts its liquid assets to high-quality investments, consistent with its investment objective of prioritizing principal protection over yield. Liquid assets are managed conservatively and are primarily held against disruptions in IBRD’s access to capital markets.

IBRD’s liquid assets are held mainly in highly rated, fixed-income instruments (see Box 8: Eligibility Criteria for IBRD’s Investments) and include the following:

- Government and agency obligations
- Time deposits and other unconditional obligations of banks and financial institutions
- Asset-backed securities (including agency mortgage-backed securities)
- Currency, interest rate and other risk management derivatives
- Exchange-traded options and futures

Figure 13: Liquid Asset Portfolio by Asset Class

In millions of U.S. dollars, except for ratios

IBRD keeps liquidity volumes above a Prudential Minimum which is defined as 80% of the twelve-month Target Liquidity Level. The twelve-month Target Liquidity Level is calculated before the end of each fiscal year based on Management’s estimates of projected net loan disbursements approved at the time of projection and debt-service for the upcoming fiscal year. This twelve-month estimate becomes the target for the upcoming fiscal year and the Prudential Minimum is 80% of this target (see Section IX for details of how IBRD manages liquidity risk).

The liquid asset portfolio is composed largely of assets denominated in, or swapped into, U.S. dollars, with net exposure to short-term interest rates after derivatives. The portfolio has an average duration of less than three months, and the debt funding these liquid assets has a similar currency and duration profile. This is a direct result of IBRD's exchange-rate and interest-rate-risk-management policies (see Section IX), combined with appropriate investment guidelines (see Box 8).

The maturity profile of IBRD's liquid asset portfolio reflects a high degree of liquidity. As of June 30, 2023, \$68.5 billion (approximately 91% of total volume) was due to mature within six months, of which \$22.4 billion was expected to mature within one month.

The liquid asset portfolio is held in three sub-portfolios: Stable, Operational, and Discretionary, each may have different risk profiles and performance guidelines (see Table 19).

- *Stable portfolio* is mainly an investment portfolio holding all or a portion of the Prudential Minimum level of liquidity, set at the start of each fiscal year.
- *Operational portfolio* is used to meet IBRD's day-to-day cash flow requirements.
- *Discretionary portfolio* gives IBRD the flexibility to execute its borrowing program and can be used to tap attractive market opportunities. Additional portions of the Prudential Minimum may also be held in this portfolio.

Table 19: Liquid Asset Portfolio Composition

*In millions of U.S. dollars, except ratios which are in percentages
As of June 30,*

	<u>2023</u>	<u>%</u>	<u>2022</u>	<u>%</u>
Liquid asset portfolio				
Stable	\$48,205	64%	\$49,296	63%
Operational	14,404	19	13,345	17
Discretionary	12,804	17	16,155	20
Total	\$75,413	100%	\$78,796	100%

Table 20: Liquid Asset Portfolio - Average Balances and Returns

In millions of U.S. dollars, except rates which are in percentages

	<u>Average Balances</u>		<u>Financial Returns %</u>	
	<u>2023</u>	<u>2022</u>	<u>2023</u>	<u>2022</u>
Liquid asset portfolio				
Stable	\$47,734	\$55,925	4.11%	0.31%
Operational	13,049	13,736	4.04	0.24
Discretionary	15,668	9,398	4.36	0.61
Total	\$76,451	\$79,059	4.16%	0.32%

During FY23, IBRD's total return on the liquid asset portfolio was 4.16%, an increase compared to last year and consistent with the rising interest rate environment. In addition to monitoring gross investment returns relative to their benchmarks, IBRD also monitors overall earnings from the investment portfolio, net of funding costs. In FY23, IBRD had \$188 million of revenue, net of funding costs on the investment portfolio as discussed in Section III.

Other Investments

In addition to the liquid asset portfolio, the investment portfolio also includes holdings related to the PEBP, PCRF, and the Local Currency Market Development program (LCMD). Table 21 below summarizes the net carrying value of other investments:

Table 21: Net Carrying Value of Other Investments

In millions of U.S. dollars
As of June 30,

	<u>2023</u>	<u>2022</u>
PEBP	\$2,684	\$2,456
PCRF	1,098	766
LCMD	—	39
Total	<u>\$3,782</u>	<u>\$3,261</u>

SECTION VII: BORROWING ACTIVITIES

IBRD has been issuing bonds in the international capital markets since 1947. The proceeds of these bonds support IBRD’s lending operations which are aimed at promoting sustainable development for IBRD’s borrowing member countries.

Borrowing Portfolio

IBRD borrows at attractive rates underpinned by its strong financial profile and shareholder support that together are the basis for its triple-A credit rating. As a result of its financial strength and triple-A credit rating, IBRD is recognized as a premier borrower and its bonds and notes are viewed as a high credit quality investment in the global capital markets.

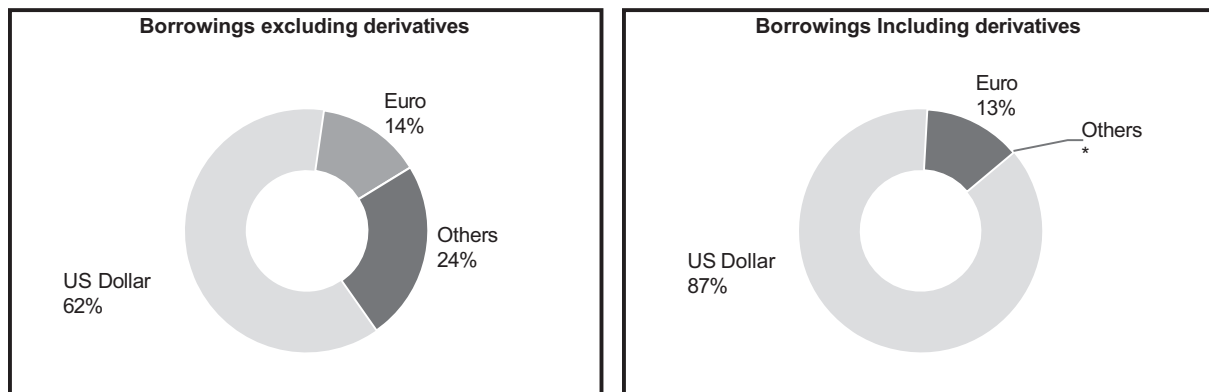

IBRD uses the proceeds to finance development activities in creditworthy middle-income and low-income countries eligible to borrow from IBRD at market-based rates. Funding raised in any given year is used for IBRD’s operations, including loan disbursements, replacement of maturing debt, and prefunding for lending activities. IBRD determines its funding requirements based on a three-year rolling horizon and funds about one-third of the projected amount in the current fiscal year.

As discussed in Section II, IBRD uses currency and interest rate derivatives in connection with its borrowings for asset and liability management purposes. New medium- and long-term funding is swapped into variable-rate U.S. dollar instruments, with conversion to other currencies carried out subsequently, as needed. This is in accordance with loan funding requirements, so that IBRD can minimize interest rate and currency risk. IBRD also uses derivatives to manage the re-pricing risks between loans and borrowings. Further discussion on how IBRD manages this risk is included in the Risk Management Section, Section IX.

In FY23, IBRD raised a total of \$42.2 billion of medium- and long-term debt (Table 23). IBRD issues short-term debt (maturing in one year or less), and medium- and long-term debt (with a maturity greater than one year). From time to time, IBRD exercises the call option in its callable bond issues; it may also repurchase its debt to meet other operational or strategic needs such as providing liquidity to its investors (Table 23).

As of June 30, 2023, the borrowing portfolio totaled \$266.8 billion, \$9.9 billion higher than June 30, 2022 (see Note E: Borrowings in the Notes to the Financial Statements). The increase was primarily due to net medium-and long- term debt issuances during the year (Table 23).

Figure 14: Effect of Derivatives on Currency Composition of the Borrowing Portfolio – June 30, 2023

* Denotes percentage less than 0.5%.

As of June 30, 2023, IBRD's total borrowing portfolio, after the effects of derivatives, carried variable rates, with a weighted average cost of 5.1% (1.0% as of June 30, 2022). The increase in the weighted average cost from the prior year reflects the increase in the short-term market interest rates during the year. This also resulted in an increase in IBRD's weighted average loan rates, which are also based on IBRD's funding cost. IBRD's lending spread was therefore not impacted by the increase in short-term interest rates (Figure 2).

Short-Term Borrowings

Table 22 summarizes IBRD's short-term borrowings, which mainly include discount notes, securities lent or sold under securities lending and repurchase agreements, and other short-term borrowings.

Discount Notes

IBRD's short-term borrowings consist mainly of discount notes issued in U.S. dollars. These borrowings have a weighted average maturity of approximately 135 days.

Securities Lent or Sold under Repurchase Agreements

These short-term borrowings are secured mainly by highly-rated collateral in the form of securities, including government-issued debt, and have an average maturity of less than 30 days.

Other Short-Term Borrowings

Other short-term borrowings are mostly money market instruments that have maturities of one year or less.

Table 22: Short-Term Borrowings

*In millions of U.S. dollars, except rates which are in percentages
As of June 30,*

	2023	2022
Discount notes ^a		
Average daily balance during the fiscal year	\$13,389	\$10,276
Weighted-average rate during the fiscal year	3.58%	0.29%
Securities lent or sold under repurchase agreements ^b		
Average monthly balance during the fiscal year	\$ 578	\$ 145
Weighted-average rate during the fiscal year	2.37%	0.02%
Other short-term borrowings ^a		
Average daily balance during the fiscal year	\$ 120	\$ 199
Weighted-average rate during the fiscal year	3.03%	0.28%

a. At amortized cost which approximates fair value.

b. Excludes securities related to PEBP.

Medium- and Long-Term Borrowings

In FY23, medium- and long-term debt raised directly by IBRD in the capital markets amounted to \$42.2 billion with an average maturity to first call of 6.3 years (Table 23). The increase in medium- and long-term debt issuances in FY23 is primarily due to higher debt servicing and refinancing requirements.

Table 23: Funding Operations Indicators

*In millions of U.S. dollars, except maturities which are in years
For the fiscal year ended June 30,*

	2023	2022
Issuances ^a

In millions of U.S. dollars

	<i>As of June 30, 2023</i>						<i>Total</i>
	<i>Less than 1 year</i>	<i>1 to 2 years</i>	<i>2 to 3 years</i>	<i>3 to 4 years</i>	<i>4 to 5 years</i>	<i>Due After 5 years</i>	
Medium and Long-Term Debt	\$28,959	\$31,917	\$29,004	\$27,040	\$25,850	\$84,458	\$227,228

As shown below, 65% of IBRD’s medium-and long-term borrowings issued during the year are in U.S. dollars:

Figure 15: Medium- and Long-Term Borrowings Raised by Currency during the year, Excluding Derivatives

SECTION VIII: CAPITAL ACTIVITIES

Capital Structure

Principal Shareholders and Voting Power

As of June 30, 2023, IBRD had 189 member countries, with the top six accounting for 41% of the total voting power (Figure 16). The percentage of votes held by members rated AA and above by at least two major rating agencies was 37% (Figure 17).

The United States is IBRD’s largest shareholder, with 16% of total voting power. Accordingly, it also has the largest share of IBRD’s uncalled capital, \$49,206 million, or 17% of total uncalled capital.

Subscribed Capital

Total subscribed capital is comprised of paid-in capital and uncalled subscribed capital. See Statement of Subscriptions to Capital Stock and Voting Power in IBRD’s Financial Statements for balances by country.

Figure 16: Voting Power of Top Six Members as of June 30, 2023

Figure 17: Percentage of Votes held by Member Countries, as of June 30, 2023

Table 25: Breakdown of IBRD Subscribed Capital

*In millions of U.S. dollars, except ratios which are in percentages
As of June 30,*

	<u>%</u>	<u>2023</u>	<u>2022</u>	<u>Variance</u>
Subscribed capital				
Uncalled Subscribed capital	93%	\$296,021	\$286,636	\$ 9,385
Paid-in capital	7%	21,819	20,499	1,320
Total subscribed capital	<u>100%</u>	<u>\$317,840</u>	<u>\$307,135</u>	<u>\$10,705</u>

Uncalled Subscribed Capital

As of June 30, 2023, the total uncalled portion of subscriptions was \$296,021 million. The amount may be called only when required to meet IBRD’s obligations for funds borrowed or loans guaranteed and is, thus, not available for use by IBRD in making loans. Of this amount, \$41,749 million was restricted pursuant to resolutions of the Governors (though such conditions are not required by IBRD’s Articles). While these resolutions are not legally binding on future Governors, they do record an understanding among members that this amount will not be called for use by IBRD in its lending activities or for administrative purposes.

No call has ever been made on IBRD’s capital. Any such calls are required to be uniform, but the obligations of IBRD’s members to make payment on such calls are independent of one another. If the amount received on a call

is insufficient to meet the obligations of IBRD for which the call is made, IBRD has the right to make further calls until the amounts received are sufficient to meet such obligations. On any such call or calls, however, no member is required to pay more than the unpaid balance of its capital subscription.

Under the Bretton Woods Agreements Act and other U.S. legislation, the Secretary of the U.S. Treasury is permitted to pay approximately \$7,663 million of the uncalled portion of the subscription of the United States, if called for use by IBRD, without need for further congressional action.

The balance of the uncalled portion of the U.S. subscription, \$41,543 million, has been authorized but not appropriated by the U.S. Congress. Further action by the U.S. Congress is required to enable the Secretary of the Treasury to pay any portion of this balance. The General Counsel of the U.S. Treasury has rendered an opinion that the entire uncalled portion of the U.S. subscription is an obligation backed by the full faith and credit of the U.S., notwithstanding that congressional appropriations have not been obtained with respect to certain portions of the subscription.

Capital Increases

In October 2018, the Governors approved a new GCI and SCI as part of a capital package that includes institutional and financial reforms designed to ensure long-term financial sustainability. The capital increases will result in additional subscribed capital of up to \$60.1 billion, with \$7.5 billion of paid-in capital and \$52.6 billion of callable capital. In May 2023, the Board approved the extension of the subscription period for GCI and SCI from October 1, 2023 to October 1, 2025.

Paid-In Capital

Paid-in capital has two components:

- The U.S. dollar portion, which is freely available for use by IBRD.
- National Currency Paid-In Capital (NCPIC) portion, usage of which is subject to certain restrictions under IBRD's Articles and is subject to Maintenance-Of-Value (MOV) requirements. For additional details see the Notes to the Financial Statements, Note A: Summary of Significant Accounting and Related Policies.

Usable Paid-in Capital

Usable paid-in capital represents the portion of paid-in capital that is available to support IBRD's risk bearing capacity and includes all U.S. dollar paid-in capital, as well as NCPIC for which use restrictions have been lifted (referred to as released NCPIC). The adjustments made to paid-in capital to arrive at usable paid-in capital are provided in Table 26.

The \$1,317 million increase in usable paid-in capital between FY22 and FY23 was primarily due to the receipt of \$968 million for GCI and \$352 million for SCI during FY23.

Table 26: Usable Paid-In Capital

*In millions of U.S. dollars
As of June 30,*

	<u>2023</u>	<u>2022</u>	<u>Variance</u>
Paid-in Capital	\$21,819	\$20,499	\$1,320
Adjustment on released NCPIC for net deferred MOV (receivable) payable ^a	(436)	(424)	(12)
Adjustments for unreleased NCPIC:			
Restricted cash	(51)	(55)	4
Demand notes	(320)	(316)	(4)
MOV receivable	(345)	(354)	9
MOV payable	<u>2</u>	<u>2</u>	<u>—</u>
Total Adjustments for unreleased NCPIC	<u>(714)</u>	<u>(723)</u>	<u>9</u>
Usable paid-in capital	<u>\$20,669</u>	<u>\$19,352</u>	<u>\$1,317</u>

a. *The MOV on released NCPIC is considered to be deferred.*

Usable Equity

Usable equity represents the amount of equity that is available to support IBRD's lending operations. Usable equity is central to the three frameworks IBRD uses to manage its capital adequacy, credit risk, and equity earnings. These frameworks, described in Section IX, are:

- Strategic Capital Adequacy Framework
- Credit Risk and Loan Loss Provisioning Framework
- Other ALM Framework

Usable equity consists of usable paid-in capital, and elements of retained earnings and reserves (see Table 27). The components of retained earnings and reserves included in usable equity are as follows:

Special Reserve: Amount set aside pursuant to IBRD's Articles, held in liquid form and to be used only for meeting IBRD's liabilities on its borrowings and guarantees;

General Reserve: Generally consists of earnings from prior fiscal years which the Board has approved for retention in IBRD's equity. On August 3, 2023, the Board approved the transfer of \$921 million to the General Reserve from FY23 net income;

Cumulative Translation Adjustments: Comprise translation adjustments that arise upon revaluing currency balances to U.S. dollars for reporting purposes. IBRD's functional currencies are the U.S. dollar and euro and changes in cumulative translation adjustments only relate to translation adjustments on euro-denominated balances. Translation adjustments associated with non-functional currencies are reflected in other adjustments in Table 27. Usable equity excludes cumulative translation adjustments associated with unrealized mark-to-market gains/losses on non-trading portfolios;

Other Adjustments: These adjustments relate to the income earned on PEBP assets before FY11, and currency translation adjustments on non-functional currencies. These also reflect the measure of the underfunded status of the pension plans, if any, which is based on the funding methodology used by the Pension Finance Committee to determine sustainable funding levels for the pension plans.

The increase in usable equity in FY23, primarily reflects the increase in usable paid-in capital and the increase in reserve retention out of the FY23 allocable income.

Table 27: Usable Equity*In millions of U.S. dollars*

As of June 30,	2023	2022	Variance		
			Total	Due to Activities	Due to Translation Adjustment
Usable paid-in capital	\$20,669	\$19,352	\$1,317	\$1,325	\$ (8)
Special reserve	293	293	—	—	—
General reserve ^a	32,974	32,053	921	921	—
Cumulative translation adjustment	(1,004)	(1,342)	338	—	338
Other adjustments ^b	173	125	48	—	48
Equity (usable equity)	<u>\$53,105</u>	<u>\$50,481</u>	<u>\$2,624</u>	<u>\$2,246</u>	<u>\$378</u>

- a. *Includes transfer to the General Reserve, which for FY23 (FY22) was approved by the Board on August 3, 2023 (August 4, 2022).*
- b. *Includes cumulative translation gains on non-functional currencies of \$221 million for FY23 (\$173 million gains for FY22).*

SECTION IX: RISK MANAGEMENT

Risk Governance

IBRD's risk management processes and practices evolve to reflect changes in activities in response to market, credit, product, operational, and other developments. The Board, particularly the Audit Committee (AC), periodically reviews trends in IBRD's risk profiles and performance, and any major developments in risk management policies and controls.

Management believes that effective risk management is critical for its overall operations. Accordingly, the risk management governance structure is designed to manage the principal risks IBRD assumes in its activities, and supports Management in its oversight function, particularly in coordinating different aspects of risk management and in connection with risks that are common across functional areas.

IBRD's financial and operational risk governance structure is built on the "three lines model" where:

- Business units are responsible for directly managing risks in their respective functional areas;
- The Vice President and WBG Chief Risk Officer (CRO) provides direction, challenge, and oversight over financial and operational risk activities; and
- Internal Audit provides independent oversight.

IBRD's risk management process comprises risk identification, assessment, response and risk monitoring and reporting. IBRD has policies and procedures under which risk owners and corporate functions are responsible for identifying, assessing, responding to, monitoring and reporting risks.

Risk Oversight and Coverage

Financial and Operational Risk Management

The CRO oversees both financial and operational risks. These risks include (i) country credit risks in the core sovereign-lending business, (ii) market and counterparty risks, including liquidity risk, and (iii) operational risks relating to people, processes and systems, or from external events. In addition, the CRO works closely with IFC, MIGA, and IDA's Management, to review, measure, aggregate, and report on risks, and share best practices across the WBG. The CRO also helps enhance cooperation between the entities and facilitates knowledge sharing in the risk management function.

The following three departments report directly to the CRO:

Credit Risk Department

- Identifies, measures, monitors, and manages country credit risk faced by IBRD. By agreement with the Board, the individual country credit risk ratings are not shared with the Board and are not made public.
- Assesses loan portfolio risk, determines the adequacy of provisions for losses on loans and other exposures, and monitors borrowers that are vulnerable to crises in the near term. These reviews are taken into account in determining the overall country programs and lending operations, and they are included in the assessment of IBRD's capital adequacy.
- Reviews proposed new financial products for any implications for country credit risk.

Market and Counterparty Risk Department

- Responsible for market, liquidity, and counterparty credit risk oversight, assessment, and reporting. It does these in coordination with IBRD's financial managers who are responsible for the day-to-day execution of trades for the liquid asset and derivative portfolios, within applicable policy and guideline limits.

- Ensures effective oversight, including: (i) maintaining sound credit assessments, (ii) addressing transaction and product risk issues, (iii) providing an independent review function, (iv) monitoring market and counterparty risk in the investment, borrowing and client operation portfolios, and (v) implementing the model risk governance framework. It also provides reports to the Audit Committee and the Board on the extent and nature of risks, risk management, and oversight.

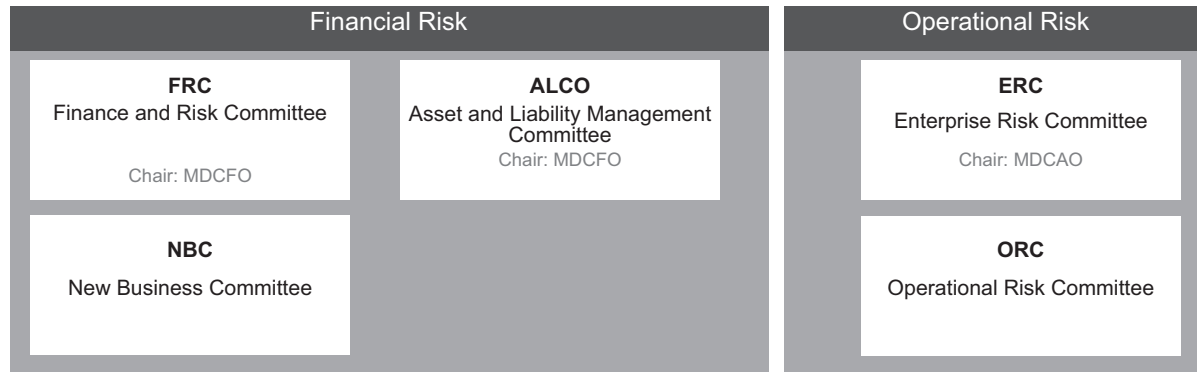

Operational Risk Department

- Provides direction and oversight for operational risk activities by business function.
- Key operational risk management responsibilities include: (i) administering the Operational Risk Committee (ORC) for IBRD, (ii) implementing the operational risk management framework which is aligned with Basel principles and provides direction to business unit partners to ensure consistent application, (iii) assisting and guiding business units in identifying and prioritizing significant operational risks and enabling monitoring and reporting of risks through suitable metrics (or risk indicators), (iv) helping identify emerging risks and trends through monitoring of internal and external risk events, (v) supporting risk response and mitigating actions, and prepares a corporate Operational Risk Report for review and discussion by the ORC.
- Responsible for the oversight of the enterprise risk, operational risk, business continuity, corporate insurance, and data privacy functions.

The risk of IBRD’s operations not meeting their development outcomes (development outcome risk) in IBRD’s lending activities is monitored at the corporate level by Operations Policy and Country Services (OPCS). Where fraud and corruption risks may impact IBRD-financed projects, OPCS, the regions and practice groups, and the Integrity Vice Presidency jointly address such issues.

Figure 18 depicts IBRD’s management risk committee structure for financial and operational risks.

Figure 18: Risk Committee Structure for Financial and Operational Risks

Financial Risk Committees:

The Finance and Risk Committee (FRC), a Vice President level committee, provides a high-level governance structure for decisions that may have financial risks. The FRC was created under the authority of the Managing Director and WBG Chief Financial Officer (MDCFO) to approve, clear, or discuss: (a) risk policy and procedure documents related to financial integrity, income sustainability and balance sheet strength, and (b) issues and new business initiatives with policy implications related to IBRD’s financial risks, including country credit, market, counterparty, liquidity and model risks; and operational risks related to the finance business functions. The FRC helps to integrate individual components of finance and risk management activities by building on mechanisms and processes already in place and provides a forum for discussing and communicating significant risk related issues. The FRC meets regularly to discuss the financial performance, new products and services, and risk management of IBRD.

New Business Committee (NBC) is a standing subcommittee of the FRC. The NBC provides advice, guidance and recommendations to the FRC, by performing due diligence over new financial products or services to ensure that Management has a full understanding of the rationale, costs, risks and rewards of the product or service being considered.

Asset Liability Management Committee (ALCO), a Vice President-level committee chaired by the MDCFO, provides a high-level forum to ensure prudent balance sheet management of IBRD by: a) monitoring its financial positions and Asset-Liability Management (ALM) activities for compliance with its respective guidelines, policies and procedures, including borrowing and investment activities; b) identifying and providing recommendations on emerging ALM issues for IBRD, as well as those related to capital, balance-sheet planning, and financial sustainability and c) serving as a reviewing and recommending body for ongoing decisions as part of implementing the ALM policies and procedures of IBRD, including those that impact lending rates and net income.

Operational Risk Committees:

The Enterprise Risk Committee (ERC) is a Vice President-level committee chaired by the Managing Director and Chief Administrative Officer (MDCAO) that oversees IBRD’s non-financial risks through reviewing, discussing and/or formulating proposed policies, procedures, directives, guidance, and other matters requested by its members. ERC’s scope comprises of: a) operational risk, including business continuity, corporate security, cyber security, and IT service continuity; b) enterprise risk; c) Integrity Vice Presidency (INT) and Ethics and Business Conduct (EBC) policies and methodologies; d) shared services; and e) any other matters brought by the MDCAO. The ERC leverages existing risk management mechanisms that are in place to provide a corporate view of operational and non-financial risks.

Operational Risk Committee (ORC) is the main governance committee for operational risk and provides a mechanism for an integrated review and response across IBRD units on operational risks associated with people, processes, and systems, including business continuity, and recognizing that business units remain responsible for managing operational risks. The Committee’s key responsibilities include monitoring significant operational risk matters and events on a quarterly basis to ensure that appropriate risk-response measures are taken and reviewing and concluding on IBRD’s overall operational risk profile. The ORC is chaired by the CROVP and escalates significant risks and decisions to the FRC and ERC.

Box 6: Summary of IBRD’s Specific Risk Categories

Types of Risk	How the Risk is Managed
Credit Risk	
Country Credit Risk	IBRD’s credit-risk-bearing capacity and individual country exposure limits
Counterparty Credit Risk	Counterparty credit limits and collateral
Market Risk	
Interest Rate Risk	Interest rate derivatives to match the sensitivity of assets and liabilities
Exchange Rate Risk	Currency derivatives to align the currency composition of assets and
Liquidity Risk	liabilities Prudential minimum liquidity level
Operational Risk	Risk assessment and monitoring of key risk indicators and internal and external operational risk events

Management of IBRD’s Risks

IBRD assumes financial risks in order to achieve its development and strategic objectives. IBRD’s financial risk management framework is designed to enable and support the institution in achieving its goals in a financially sustainable manner. IBRD manages credit, market and operational risks for its financial activities, which include lending, borrowing and investing (Box 6). The primary financial risk to IBRD is the country credit risk inherent

in its loan portfolio. IBRD is also exposed to risks in its liquid asset and derivative portfolios, where the major risks are interest rate, exchange rate, commercial counterparty credit, and liquidity risks. IBRD's operational risk management framework is based on a structured and uniform approach to identify, assess and monitor key operational risks across business units.

In an effort to maximize IBRD's capacity to lend to member countries for development purposes, IBRD limits its exposure to market and counterparty credit risks. In addition, to ensure that the financial risks associated with its loans and other exposures do not exceed its risk-bearing capacity, IBRD uses a strategic capital adequacy framework as a key medium-term capital planning tool.

Geopolitical Events and Global Outlook

Russia's invasion of Ukraine that began in February 2022 negatively impacted regional and global financial markets and economic conditions. It has also created significant needs for humanitarian and other critical support. From the outbreak of the conflict, through June 30, 2023, IBRD committed \$4.2 billion to Ukraine. Over the same period, IBRD disbursed \$2.8 billion (including commitments made prior to the start of the invasion) to help the government of Ukraine provide critical services.

As of June 30, 2023, IBRD's loans outstanding to Ukraine were \$8.7 billion with \$2.3 billion guaranteed by third parties. In addition, IBRD provided \$0.7 billion of guarantees to Ukraine that were outstanding as of June 30, 2023. As of June 30, 2023, there were no loans outstanding to the Russian Federation.

As of June 30, 2023, IBRD had sufficient resources to meet its liquidity requirements and continues to have access to capital market resources. The liquid asset portfolio was above the Target Liquidity Level (Table 31) .

Management remains vigilant in assessing funding needs in the medium and longer-term to manage the effect of possible severe market movements.

IBRD's capital adequacy, as indicated by Equity-to-Loans ratio (Figure 19 and Table 28) remains above the minimum level.

As of the reporting date, country credit risk and counterparty credit risk remain in line with the existing governance framework and established credit limits. The loan loss provisions include IBRD's current assessment of country credit risk. The fair values of related financial instruments reflect counterparty credit risk in IBRD's portfolios. Developments in the market continue to be closely monitored and managed.

Capital Adequacy

IBRD holds capital to cover the credit, market and operational risks inherent in its operating activities and financial assets. Country credit risk is the most substantive risk covered by IBRD's equity.

IBRD's capital adequacy is the degree to which its equity is sufficient to withstand unexpected shocks. IBRD's Board monitors IBRD's capital adequacy within a strategic capital adequacy framework and uses the Equity-to-Loans ratio as a key indicator of capital adequacy. The framework seeks to ensure that IBRD's equity is aligned with the financial risk associated with its loan portfolio and other exposures over a medium-term capital-planning horizon.

In April 2023, as part of the Evolution Roadmap, the Board approved a reduction in the policy minimum Equity-to- Loans ratio from 20% to 19% based on IBRD's review of the capital adequacy framework. The minimum Equity-to- Loans ratio policy continues to support IBRD's triple-A rating and long-term financial sustainability.

As shown in Table 28, IBRD's Equity-to-Loans ratio was unchanged at 22.0% as of June 30, 2023, compared to June 30, 2022, and remained above the 19% minimum ratio under the strategic capital adequacy framework. The increase in total exposure of approximately \$10.8 billion was offset by the receipt of capital subscription payments of \$1.3 billion and the retention of \$0.9 billion in the General Reserve out of FY23 allocable income.

In FY23, IBRD received \$1.3 billion of paid-in capital subscribed under the 2018 General and Selective Capital Increases (GCI and SCI), bringing the cumulative amounts received to \$5.4 billion, representing 72% of the total amount expected over the subscription period. In line with IBRD's currency management policy, exchange rate movements during the year did not have an impact on IBRD's Equity-to-Loans ratio. Under the currency management policy, to minimize exchange rate risk, IBRD matches its borrowing obligations in any one currency (after derivatives) with assets in the same currency. In addition, IBRD periodically undertakes currency conversions to align the currency composition of its equity with that of its outstanding loans, across major currencies.

Figure 19: Equity-to-Loans Ratio

Equity-to-Loans Ratio		22.0%	22.0%		

- Includes transfer to the General Reserve, which for FY23 (FY22) was approved by the Board on August 3, 2023 (August 4, 2022).
- Excludes cumulative translation amounts associated with the unrealized mark-to-market gains/losses on non-trading portfolios, net.
- Includes cumulative translation gains on non-functional currencies of \$221 million for FY23 (\$173 million gains for FY22).
- Includes \$1,877 million (\$876 million as of June 30, 2022) related to guarantees received from third parties that reduced IBRD's Loan exposures.

Credit Risk

IBRD faces two types of credit risk: country credit risk and counterparty credit risk. Country credit risk is the risk of loss due to a country not meeting its contractual obligations, and counterparty credit risk is the risk of loss attributable to a counterparty not honoring its contractual obligations. IBRD is exposed to commercial as well as non-commercial counterparty credit risk.

Country Credit Risk

IBRD's mandate is to take only sovereign credit risk in its lending activities. Within country credit risk, three distinct types of risks can be identified: idiosyncratic risk, correlation risk, and concentration risk. Idiosyncratic risk is the risk of an individual borrowing country's exposure falling into nonaccrual status for country-specific reasons (such as policy slippage or political instability). Correlation risk is the risk that exposure to two or more borrowing countries will fall into nonaccrual in response to common global or regional economic, political, or financial developments. Concentration risk is the risk resulting from having a large portion of exposure outstanding which, if the exposure fell into nonaccrual, would result in IBRD's financial health being excessively impaired. Concentration risk needs to be evaluated both on a stand-alone basis (exposure of one borrowing country) and when taking into account correlation when more than one borrowing country is affected by a common event, such that when combined, IBRD's exposure to a common risk is elevated.

To estimate idiosyncratic risk and stand-alone concentration risk, the Credit Risk Department looks at IBRD's exposure to each borrowing country and each borrowing country's expected default to IBRD as captured in its credit rating. Credit ratings and default probabilities reflect country economic, financial and political circumstances, and also consider Environmental, Social and Governance (ESG) risk factors. For correlation risk, the Credit Risk Department models the potential common factors that could impact borrowing countries simultaneously. The existence of correlation increases the likelihood of large nonaccrual events, as most of these nonaccrual events involve the joint default of two or more obligors in the portfolio.

IBRD manages country credit risk by using individual country exposure limits and takes into account factors such as population size and the economic situation of the country. In addition, IBRD conducts stress tests of the effects of changes in market variables and of potential geopolitical events on its portfolio to complement its capital adequacy framework.

Portfolio Concentration Risk

Portfolio concentration risk, which arises when a small group of borrowing countries account for a large share of loans outstanding, is a key concern for IBRD. It is carefully managed for each borrowing country, in part, through an exposure limit for the aggregate balance of loans outstanding, the present value of guarantees, and the undisbursed portion of Deferred Drawdown Options (DDOs) that have become effective, among other potential exposures. Under current guidelines, IBRD's exposure to a single borrowing country is restricted to the lower of an Equitable Access Limit (EAL) or the Single Borrower Limit (SBL).

Equitable Access Limit

The EAL is equal to 10% of IBRD's Statutory Lending Limit (SLL). Under IBRD's Articles, as applied, total loans outstanding, including participations in loans and callable guarantees, may not exceed the sum of unimpaired subscribed capital, reserves and surplus, referred to as the SLL. As of June 30, 2023, the SLL totaled \$350.3 billion, of which the outstanding loans and callable guarantees totaled \$250.4 billion, or 71% of the SLL. The EAL was \$35.0 billion, as of June 30, 2023. The SLL was originally intended to ensure that sufficient resources are available to meet IBRD's obligations to bondholders in the highly unlikely event of substantial and historically unprecedented losses on IBRD's loans. IBRD has subsequently adopted an internal risk-based capital adequacy framework based on risk management practices that have evolved significantly since the time the SLL

was established. The SLL is not a risk-based metric, and could constrain IBRD's lending capacity below levels that are consistent with its risk-based framework. Accordingly, IBRD is in the process of amending the Articles to remove the SLL. The Board of Governors approved a Resolution to remove the SLL on July 10, 2023. IBRD is now going through the final stage of the amendment process, which requires acceptance by three-fifths of the members having eighty-five percent of the voting power.

Single Borrower Limit

The SBL amount is established, in part, by assessing its impact on overall portfolio risk relative to equity. The SBL caps the maximum exposure to IBRD's most creditworthy and largest borrowing countries in terms of population and economic size. The SBL framework reflects a dual-SBL system, with the SBL for countries above the Graduation Discussion Income (GDI) threshold set lower than the SBL for countries below GDI. GDI is the level of GNI per capita of a member country above which graduation from IBRD starts being discussed. The GDI threshold was \$7,445 as of July 1, 2022. Under the dual-SBL system, the SBL for FY23 was \$28.0 billion for highly creditworthy countries below the GDI and \$21.2 billion for highly creditworthy countries above the GDI. On June 29, 2023, the Board approved the FY24 SBL limits of \$28.9 billion and \$21.2 billion, respectively. The SBL framework also contains a 50-basis point surcharge (SBL surcharge) payable on the incremental exposure in excess of the SBL surcharge threshold (defined as \$2.5 billion below the SBL for the respective GDI group). In the event that a borrowing country eligible for one of the limits set under the SBL framework is downgraded to the high-risk category, management may determine that the borrowing country continue to be eligible for borrowing at the currently applicable limit, but the borrowing country would not be eligible for any future increases in the SBL approved by the Board. During FY23, there were two countries below-GDI and two countries above-GDI, which have their exposure limits set at the applicable SBLs. For all other countries, the individual country exposure limits were set below the relevant SBL. In the context of IBRD's overall response to the impact of the COVID-19 crisis, on June 17, 2021, the Board approved temporary relief from the SBL surcharge by excluding all financings approved between May 20, 2021 and the end of FY23 for purposes of calculating whether a country's exposure exceeds the SBL surcharge threshold. Operations excluded from the SBL surcharge calculation will continue to count towards SBL compliance.

As of June 30, 2023, the ten countries with the highest exposures accounted for about 60% of IBRD's total exposure (Figure 20: Country Exposures as of June 30, 2023). IBRD's largest exposure to a single borrowing country was \$20.1 billion on June 30, 2023. Monitoring these exposures relative to the limit, however, requires consideration of the repayment profiles of existing loans, as well as disbursement profiles and projected new loans and guarantees.

Sustainable Annual Lending Limit (SALL)

The "Financial Sustainability Framework" (FSF) requires IBRD to align its annual lending levels to its long-term sustainable capacity, while retaining flexibility to respond to crises by maintaining a crisis buffer.

The SALL is the maximum annual commitment level sustainable, in real terms, for 10 years in line with IBRD's capital adequacy framework and the Statutory Lending Limit set out in IBRD's Articles, as determined by management. Under the FSF, the Board annually approves a crisis buffer. The crisis buffer-adjusted sustainable annual lending limit (SALL-Adj) serves as the upper bound for regular lending in the next year. For the fiscal year ending June 30, 2023, the Board had approved a crisis buffer of \$5.0 billion and a SALL-Adj of \$27.0 billion. On June 27, 2023, the Board approved a crisis buffer of \$10.0 billion for FY24. The corresponding SALL-Adj, which will be the lending ceiling for FY24, is \$36.0 billion.

Figure 20: Country Exposures as of June 30, 2023

In billions of U.S. dollars

Credit-Risk-Bearing Capacity

Management uses risk models to estimate the size of a potential nonaccrual shock that IBRD could face over the next three years at a given confidence level. The model-estimated nonaccrual shock is a single measure of the credit quality of the portfolio that combines the following:

- IBRD's country-credit-risk ratings and their associated expected risk of default;
- Covariance risks;
- The loan portfolio's distribution across risk rating categories; and
- The exposure concentration.

The shock estimated by this risk model is used in IBRD's capital adequacy testing to determine the impact of potential nonaccrual events on equity and income earning capacity.

Expected Losses, Overdue Payments, and Non-Performing Loans

The loan loss provision is calculated by taking into account IBRD's total estimated exposure, the Expected Default Frequency (EDF), i.e. probability of default, and the assumed loss in the event of default. Expected losses inherent in the loan portfolio attributable to country credit risk are covered by the accumulated provision for losses on loans and other exposures, while unexpected losses owing to country credit risk are covered by equity (see Notes to the Financial Statements, Note A: Summary of Significant Accounting and Related Policies and Note D: Loans and Other Exposures).

When a borrower fails to make payments due to IBRD on any principal, interest, or other charges, IBRD may suspend disbursements immediately on all loans to that borrower. IBRD's current practice is to exercise this option using a graduated approach (Box 7). These practices also apply to member countries eligible to borrow from both IBRD and IDA, and whose payments on IDA loans may become overdue. It is IBRD's practice not to reschedule interest or principal payments on its loans or participate in debt rescheduling agreements with respect to its loans. As of June 30, 2023, there were no principal or interest amounts on loans in accrual status, that were overdue by more than three months.

Effective October 17, 2022, all loans made to or guaranteed by Belarus were placed into nonaccrual status.

As of June 30, 2023, 0.6% of IBRD's loans were in nonaccrual status, all related to Zimbabwe and Belarus. During the year, IBRD received \$3 million (\$3 million in FY22) from borrowers in non-accrual status as payments towards amounts overdue, of which \$2 million (less than \$1 million in FY22) relates to the interest income recognized in the Statements of Income.

The exposure to Zimbabwe was \$427 million as of June 30, 2023, compared with \$428 million as of June 30, 2022. The exposure to Belarus was \$998 million as of June 30, 2023, compared with \$985 million as of June 30, 2022.

No loans to any borrowing country were restored to accrual status during the year.

Box 7: Treatment of Overdue Payments

Overdue by 30 days	Where the borrower is the member country, no new loans to the member country, or to any other borrower in the country, will be presented to the Board for approval, nor will any previously approved loan be signed, until payments for all amounts 30 days overdue or longer have been received. Where the borrower is not the member country, no new loans to that borrower will be signed or approved. In either case, the borrower will lose its eligibility for any waiver of interest charges in effect at that time for loans signed before May 16, 2007, and those loans signed between May 16, 2007, and September 27, 2007, if the borrowers elected not to convert the terms of their loans to the pricing terms effective September 27, 2007. For loans with the pricing terms applicable from May 16, 2007, an overdue interest penalty will be charged at a rate of 50 basis points on the overdue principal. In addition, if an overdue amount remains unpaid for a period of 30 days, then the borrower will pay a higher interest rate (Reference rate + spread) plus 50 basis points on the overdue principal amount until the overdue amount is fully paid.
Overdue by 45 days	In addition to the provisions cited above for payments overdue by 30 days, to avoid proceeding further on the notification process leading to suspension of disbursements, the country as borrower or guarantor and all borrowers in the country must pay not only all payments overdue by 30 days or more, but also all payments due regardless of the number of days since they have fallen due. Where the borrower is not the member country, no new loans to, or guaranteed by, the member country, will be signed or approved. Additionally, all borrowers in the country will lose eligibility for any waivers of interest in effect at the time.
Overdue by 60 days	In addition to the suspension of approval for new loans and signing of previously approved loans, disbursements on all loans to, or guaranteed by, the member country are suspended until all overdue amounts are paid. This policy applies even when the borrower is not the member country. Under exceptional circumstances, disbursements can be made to a member country upon the Board's approval.
Overdue by more than six months	All loans made to or guaranteed by a member of IBRD are placed in nonaccrual status, unless IBRD's management determines that the overdue amount will be collected in the immediate future. Unpaid interest and other charges accrued but not yet paid on loans outstanding are deducted from the revenue for the current period. Interest and other charges on nonaccruing exposures are included in revenue only to the extent that payments have been received by IBRD. A decision on the restoration of accrual status is made upon arrears clearance. If collectability risk is considered to be particularly high at the time of arrears clearance, the member's exposures may not automatically emerge from nonaccrual status until a suitable period of payment performance has passed.

Counterparty Credit Risk

IBRD is exposed to commercial and non-commercial counterparty credit risk.

Commercial Counterparty Credit Risk

Commercial counterparty credit risk is the risk that counterparties fail to meet their payment obligations under the terms of the contract or other financial instruments. Effective management of counterparty credit risk is vital

to the success of IBRD's funding, investment, and asset/liability management activities. The monitoring and management of these risks is continuous as the market environment evolves.

IBRD mitigates the counterparty credit risk from its investment and derivative holdings through the credit approval process, the use of collateral agreements and risk limits, and other monitoring procedures. The credit approval process involves evaluating counterparty and product-specific creditworthiness, assigning internal credit ratings and limits, and determining the risk profile of specific transactions. Credit limits are set and monitored throughout the year. Counterparty exposure is updated daily, considering the current market values of assets held, estimates of potential future movements of exposure for derivative instruments, and related counterparty collateral agreements, where collateral posting requirements are based on thresholds driven by public credit ratings. Collateral held includes cash and highly rated liquid investment securities. Commercial credit risk management includes ESG related assessments in the approval and monitoring of higher exposure counterparties for the liquid asset portfolio and for derivative counterparties. In addition, third-party ESG scores of the liquid asset portfolio and derivative exposures are monitored.

IBRD's liquid asset investment portfolio consists mostly of sovereign government bonds, debt instruments issued by sovereign government agencies, and bank time deposits. More than half of these investments are with issuers and counterparties rated triple-A and AA (Table 29).

Derivative Instruments

In the normal course of its business, IBRD enters into various derivative instruments to manage foreign exchange and interest rate risks. These derivatives are used mainly to meet the financial needs of IBRD borrowers and to manage the institution's exposure to fluctuations in interest and exchange rates. These transactions are conducted with other financial institutions and, by their nature, entail commercial counterparty credit risk.

While the volume of derivative activity can be measured by the contracted notional value of derivatives, notional value is not an accurate measure of credit or market risk. IBRD uses the estimated replacement cost of the derivative instrument, or potential future exposure to measure counterparty credit risk with these trading partners.

Under IBRD's collateral arrangements, IBRD receives collateral when mark-to-market exposure is greater than the ratings based collateral threshold. As of June 30, 2023, IBRD had received collateral of cash and securities totaling \$0.3 billion.

IBRD is not required to post collateral under its derivative agreements as long as it maintains a triple-A credit rating. (For the contractual value, notional amounts, related credit risk exposure amounts, and the amount IBRD would be required to post in the event of a downgrade, see Notes to Financial Statements, Note F: Derivative Instruments).

Investment Securities

The Board-approved General Investment Authorization provides the basic authority for IBRD to invest its liquid assets. Furthermore, all investment activities are conducted in accordance with a more detailed set of Investment Guidelines. The Investment Guidelines are approved by the MDCFO and implemented by the Treasurer. These Investment Guidelines set out detailed trading and operational rules, including which instruments are eligible for investment, and establish risk parameters relative to benchmarks. These include an overall consultative loss limit and duration deviation, specifying concentration limits on counterparties and instrument classes, as well as clear lines of responsibility for risk monitoring and compliance. Credit risk is controlled by applying eligibility criteria (Box 8).

The overall market risk of the investment portfolio is subject to a consultative loss limit to reflect a level of tolerance for the risk of underperforming the benchmark in any fiscal year. IBRD has procedures in place to monitor performance against this limit and potential risks, and it takes appropriate actions if the limit is reached. All investments are subject to additional conditions specified by the Chief Risk Officer, as deemed necessary.

IBRD’s exposure to futures and options and resale agreements is marginal. For futures and options, IBRD generally closes out open positions prior to expiration. Futures are settled on a daily basis. In addition, IBRD monitors the fair value of resale securities received and, if necessary, closes out transactions and enters into new repriced transactions.

Management has broadened its universe of investment assets in an effort to achieve greater diversification in the portfolio and better risk-adjusted investment performance. This exposure is monitored by the Market and Counterparty Risk Department.

Box 8: Eligibility Criteria for IBRD’s Investments ^a

Instrument Securities	Description
Sovereigns	IBRD may only invest in obligations issued or unconditionally guaranteed by governments of member countries with a minimum credit rating of AA-. However, no rating is required if government obligations are denominated in the national currency of the issuer.
Agencies	IBRD may invest only in obligations issued by an agency or instrumentality of a government of a member country, a multilateral organization, or any other official entity (other than the government of a member country), with a minimum credit rating of AA-.
Corporates and asset-backed securities	IBRD may only invest in securities with a triple-A credit rating.
Time deposits ^b	IBRD may only invest in time deposits issued or guaranteed by financial institutions, whose senior debt securities are rated at least A-.
Commercial Paper	IBRD may only invest in short-term borrowings (less than 190 days) from commercial banks, corporates, and financial institutions with at least two Prime-1 ratings.
Securities lending, and borrowing, repurchases, resales, and reverse repurchases	IBRD may engage in securities lending against adequate collateral, repurchases and reverse repurchases, against adequate margin protection, of the securities described under the sovereigns, agencies, and corporates and asset-backed security categories.
Collateral Assets	IBRD may engage in collateralized forward transactions, such as swap, repurchase, resale, securities lending, or equivalent transactions that involve certain underlying assets not independently eligible for investment. In each case, adequate margin protection needs to be received.

- a. All investments are subject to approval by the Market and Counterparty Risk Department and must appear on the “Approved List” created by the department.
- b. Time deposits include certificates of deposit, bankers’ acceptances, and other obligations issued or unconditionally guaranteed by banks or other financial institutions.

Commercial Counterparty Credit Risk Exposure

As a result of IBRD’s use of collateral arrangements for swap transactions, its residual commercial counterparty credit risk is concentrated in the investment portfolio, in instruments issued by sovereign governments and non-sovereign holdings (including agencies, asset-backed securities) (Table 29).

Table 29: Commercial Credit Exposure, Net of Collateral Held, by Counterparty Rating*In millions of U.S. dollars*

<u>Counterparty Rating</u> ^a	As of June 30, 2023				
	<u>Investments</u>		<u>Net Swap Exposure</u>	<u>Total Exposure</u>	<u>% of Total</u>
	<u>Sovereigns</u>	<u>Non-Sovereigns</u>			
AAA	\$21,337	\$ 8,157	\$—	\$29,494	38%
AA	156	31,763	19	31,938	41
A	7,096	8,711	135	15,942	21
BBB	3	35	—	38	*
BB or lower/unrated	—	3	2	5	*
Total	\$28,592	\$48,669	\$156	\$77,417	100%

<u>Counterparty Rating</u> ^a	As of June 30, 2022				
	<u>Investments</u>		<u>Net Swap Exposure</u>	<u>Total Exposure</u>	<u>% of Total</u>
	<u>Sovereigns</u>	<u>Non-Sovereigns</u>			
AAA	\$21,582	\$10,398	\$—	\$31,980	40%
AA	1,520	28,413	68	30,001	37
A	6,060	11,890	88	18,038	23
BBB	—	48	—	48	*
BB or lower/unrated	39	5	2	46	*
Total	\$29,201	\$50,754	\$158	\$80,113	100%

a. Average rating is calculated using available ratings from the three major rating agencies; however, if ratings are not available from each of the three rating agencies, IBRD uses the average of the ratings available from any of such rating agencies or a single rating to the extent that an instrument or issuer (as applicable) is rated by only one rating agency.

* Indicates percentage less than 0.5%.

IBRD's overall commercial counterparty credit exposure, net of collateral held, was \$77.4 billion as of June 30, 2023. As shown on Table 29, the credit quality of IBRD's portfolio remains concentrated in the upper end of the credit spectrum, with 79% of the portfolio rated AA or above and the remaining portfolio primarily rated A. The A rated counterparties primarily consisted of sovereigns and financial institutions (limited to short-term deposits and swaps).

Non-Commercial Counterparty Credit Risk

In addition to its derivative transactions with commercial counterparties, IBRD offers derivative-intermediation and other services to borrowing member countries, as well as to affiliated and non-affiliated organizations, to help meet their development needs or to carry out their development mandates (see Table 30):

Table 30: Non-Commercial Counterparty Credit Risk*In millions of U.S. dollars**Exposures as of June 30, 2023*

<u>Non-Commercial Counterparty</u>	<u>Instrument used</u>	<u>Purpose of derivative transaction</u>	<u>Notional</u>	<u>Net Exposure</u>
Borrowing Member Countries	Derivatives	Assist borrowing member countries with managing risks	\$ 7,921	\$—
Non-Affiliated Organization	Derivatives	Assist IFFIm with managing risks	3,120	—
			<u>\$11,041</u>	<u>\$—</u>

- *Borrowing Member Countries:* Currency and interest rate swap transactions are executed between IBRD and its borrowers under master derivative agreements. As of June 30, 2023, the notional amounts were \$7.9 billion with no net exposure to IBRD under these agreements. Expected losses inherent in these exposures due to country credit risk are incorporated in the fair value of these instruments.
- *Affiliated Organizations:* Derivative contracts were executed between IBRD and IDA, under an agreement allowing IBRD to intermediate derivative contracts on behalf of IDA. As of June 30, 2023, IBRD did not have any exposure to IDA under these agreements.
- *Non-Affiliated Organizations:* IBRD has a master derivatives agreement with IFFIm, under which several transactions have been executed. As of June 30, 2023, the notional amounts were \$3.1 billion with no net fair value exposures to IBRD under this agreement. IBRD has the right to call for collateral above an agreed specified threshold. As of June 30, 2023, IBRD had not exercised this right, but it reserves the right under the existing terms of the agreement. Rather than calling for collateral, IBRD and IFFIm have agreed to manage IBRD’s exposure by applying a risk management buffer to the gearing ratio limit. The gearing ratio limit represents the maximum amount of IFFIm’s net financial obligations less cash and liquid assets, as a percentage of the net present value of its financial assets.

Credit and Debit Valuation Adjustments

Most outstanding derivative positions are transacted over the counter and therefore valued using internally developed valuation models. For commercial and non-commercial counterparties where IBRD has a net exposure (net receivable position), IBRD calculates a Credit Valuation Adjustment (CVA) to reflect credit risk. For net derivative positions with commercial and non-commercial counterparties where IBRD is in a net payable position, IBRD calculates a Debit Valuation Adjustment (DVA) to reflect its own credit risk.

The CVA is calculated using future projected exposures of the derivative contracts, net of collateral received under credit support agreements, and the probability of counterparty default based on the Credit Default Swaps (CDS) spread and, where applicable, proxy CDS spreads. IBRD does not currently hedge this exposure. The DVA calculation is generally consistent with the CVA methodology and incorporates IBRD’s own credit spread as observed through the CDS market. As of June 30, 2023, IBRD recorded a CVA on its Balance Sheet of \$27 million, and a DVA of \$471 million.

Changes in Credit Spreads

The sensitivity of IBRD’s portfolios to credit represents the change in fair value corresponds to changes in credit spreads.

- *Investments:* IBRD purchases investment-grade securities for its liquid asset portfolio. Credit risk is controlled through appropriate eligibility criteria (see Box 8). The overall risk of the investment portfolio is also constrained by a consultative loss limit. In line with these risk management strategies, the potential effect of default risk on IBRD’s investment portfolio is therefore small.

- *Borrowings*: IBRD’s own credit risk reflects the cost of funding relative to applicable reference rates. Changes in IBRD’s credit spreads result in unrealized mark-to-market gains/losses, recorded as Net Change in DVA on Fair Value Option elected liabilities in the Statements of Comprehensive Income.
- *Loans*: IBRD’s fair value model represents a hypothetical exit price of the loan portfolio. It incorporates CDS spreads as an indicator of the credit risk for each borrower, after adjusting recovery levels to incorporate IBRD’s institutional experience and assumptions. These assumptions are reviewed annually. IBRD does not hedge its sovereign credit exposure but Management assesses its credit risk through a loan-loss provisioning framework. The loan loss provision represents the expected losses inherent in its accrual and nonaccrual portfolios. IBRD’s country credit risk is managed by using individual country exposure limits and by monitoring its credit-risk-bearing capacity.
- *Derivatives*: IBRD uses derivatives to manage exposures to currency and interest rate risks in its investment, loan, other ALM and borrowing portfolios. It is therefore exposed to commercial counterparty credit risk on these instruments. This risk is managed through:
 - Stringent selection of commercial derivative counterparties,
 - Daily marking-to-market of derivative positions, and
 - Use of collateral and collateral thresholds for all commercial counterparties.

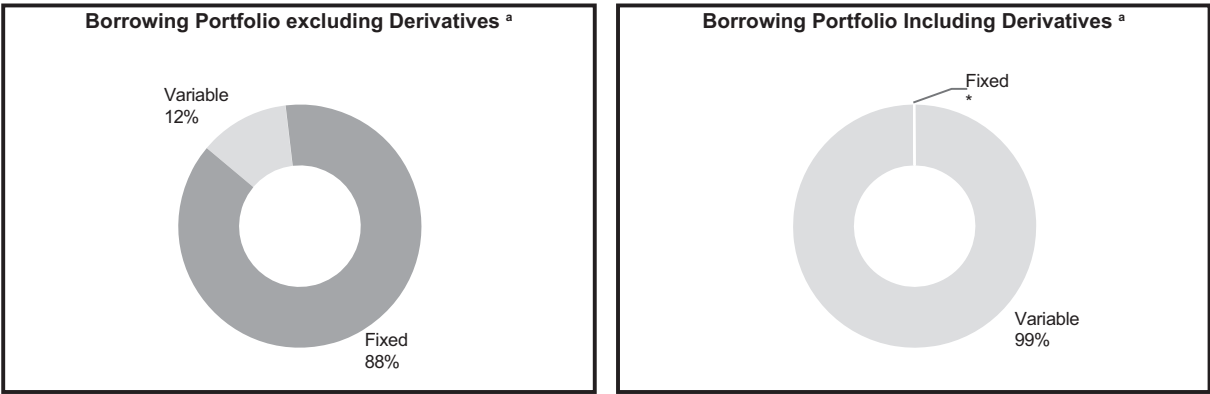

Market Risk

IBRD is exposed to changes in interest and exchange rates, and it uses various strategies to minimize its exposure to market risk.

Interest Rate Risk

Under its current interest rate risk management strategy, IBRD seeks to match the interest rate sensitivity of its assets (loan and investment trading portfolios) with those of its liabilities (borrowing portfolio) by using derivatives, such as interest rate swaps. These derivatives effectively convert IBRD’s financial assets and liabilities into variable- rate instruments. After considering the effects of these derivatives, virtually the entire loan and borrowing portfolios are carried at variable interest rates (Figure 21 and Figure 22).

Figure 21: Effect of Derivatives on Interest Rate Structure of the Borrowing Portfolio - June 30, 2023

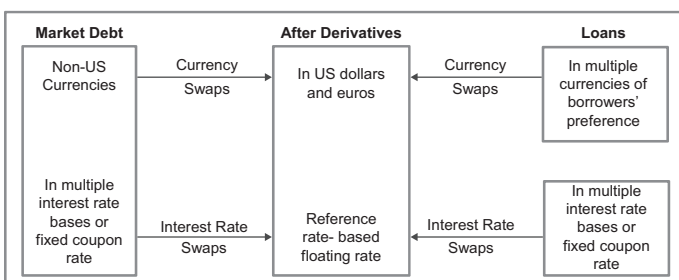

a. Excludes discount notes.
 * Denotes percentage less than 0.5%.

Figure 22: Effect of Derivatives on Interest Rate Structure of the Loan Portfolio - June 30, 2023

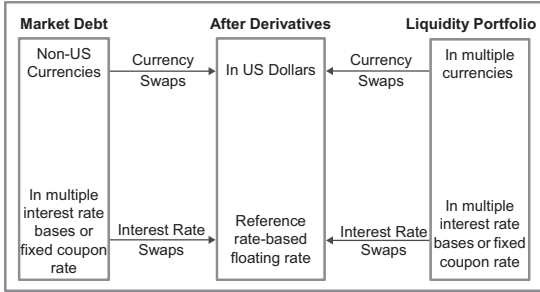

Alignment of Assets and Liabilities – IBRD borrows in multiple currency and interest rate bases worldwide and lends the proceeds of those borrowings to eligible member countries. IBRD offers its borrowers the option of converting the currency and interest rate bases on their loans where there is a liquid swap market, thereby enabling them to select loan terms that are best suited to their circumstances. Such options meet borrowers’ preferences and help mitigate their currency and interest rate risk. In the absence of active risk management, IBRD would be exposed to substantial market risk and asset-liability management imbalances. To address such imbalances, IBRD uses derivatives to swap its payment obligations on bonds to a currency and interest rate basis that is aligned with its loan portfolio. Likewise, when a borrower exercises a conversion option on a loan to change its currency or interest rate basis, IBRD uses derivatives to convert its exposure back to a currency and interest rate basis, that is aligned with its loan portfolio. Thus, IBRD’s payment obligations on its borrowings are aligned with its loans funded by such borrowings – generally, after the effect of derivatives, IBRD primarily pays U.S. dollar, short-term variable rates on its borrowings, and receives U.S. dollar, short-term variable rates on its loans. Figure 23 below illustrates the use of derivatives in the loan and borrowing portfolios:

Figure 23: Use of Derivatives for Loans and Borrowings

Derivatives are also used to manage market risk in the liquidity portfolio. In line with its development mandate, IBRD maintains a large liquidity balance to ensure that it can make payments on its borrowing obligations and loan disbursements, even in the event of severe market disruptions. Pending disbursement, the liquidity portfolio is invested on a global basis in multiple currencies and interest rates. Derivatives are also used to align the currency and duration of investments with the debt funding the liquidity portfolio. Figure 24 below illustrates the use of derivatives in the liquidity portfolio:

Figure 24: Use of Derivatives for Investments

Other ALM – Given most loans carry variable rates, for the portion of loans that are funded by equity, loan interest revenue, if left unmanaged, would be highly sensitive to fluctuations in short-term interest rates. The Equity-to- Loans ratio of 22.0% indicates the portion of loans funded by equity. To manage this exposure, Management has put in place a framework with the primary goal of stabilizing this revenue. Under this framework, IBRD uses derivatives to convert the variable rate cash flows on loans funded by equity back to fixed rate cash flows, thereby stabilizing loan interest revenue over time. See Figure 25 below.

Figure 25: Use of Derivatives for Other ALM

Although interest rates have been rising, low and negative interest rates present a challenge for various IBRD portfolios.

Loans to borrowing countries:

Under IBRD’s loan agreements, if an interest rate formula yields a negative rate, the interest rate charged is zero.

Liquid Asset Portfolio:

IBRD’s existing guidelines allow for the investment in a wide variety of credit products in both developed and emerging market economies (see investment eligibility criteria in Box 8). In FY23, IBRD’s liquid asset portfolio incurred unrealized mark-to-market losses due to the sharp increase in interest rates.

The interest rate risk on IBRD’s liquid asset portfolio, including the risk that the value of assets in the portfolio will fluctuate in response to changes in market interest rates, is managed within specified duration-mismatch limits. The liquid asset portfolio has spread exposure because IBRD holds instruments other than the short-term bank deposits represented by the portfolios’ London Interbank Bid Rate (LIBID) benchmark. These investments generally yield positive returns over the benchmark but can generate mark-to-market losses if their spreads relative to LIBOR widen.

Fixed Spread Loan Refinancing Risk

Refinancing risk for funding fixed-spread loans relates to the potential impact of any future deterioration in IBRD’s funding spread relative to what was computed in the fixed-spread when the loan was initially disbursed.

IBRD does not match the maturity of its funding with that of its fixed spread loans as this would result in significantly higher financing costs for all loans. Instead, IBRD targets a shorter average funding maturity and manages the refinancing risk by charging a risk premium.

Effective April 1, 2021, IBRD's offering of loans on fixed spread terms has been suspended.

Other Interest Rate Risks

Interest rate risk also arises from other variables, including differences in timing between the contractual maturities or re-pricing of IBRD's assets, liabilities, and derivative instruments. On variable-rate assets and liabilities, IBRD is exposed to timing mismatches between the re-set dates on its variable-rate receivables and payables. IBRD monitors these exposures and may execute overlay interest rates swaps to reduce sizable timing mismatches.

Alternative Reference Rate

The Financial Conduct Authority (FCA), the regulator of LIBOR, confirmed that effective December 31, 2021, all the LIBOR settings, except for certain USD LIBOR, which were available until June 30, 2023, ceased to be provided by any administrator or were no longer representative.

In consideration of the regulatory guidance and in preparation for the global markets' transition away from LIBOR, IBRD took the necessary steps to facilitate a smooth and orderly transition of its financial instruments to alternative reference rates. This transition started on January 1, 2022.

Out of the total loans outstanding as of June 30, 2023, approximately 58% have transitioned and 10% are still subject to transition to alternative reference rates. The remaining 32% of the total loans outstanding are not required to transition to alternative reference rates. The switch over of existing variable spread and non-USD fixed spread loans to alternative reference rates began in January 2022, at the loan reset dates, and was completed as of June 30, 2022. The USD fixed spread loans started transitioning in July 2023, as the loans reset, and will be completed by the end of December 2023.

Out of the total derivative portfolio notional as of June 30, 2023, less than 1% have transitioned and 68% are still subject to transition to alternative reference rates, which started in July 2023, as derivatives reset. The remaining 32% of the total derivative portfolio notional is not subject to transition to alternative reference rates. For the vast majority of the derivative portfolio subject to transition, IBRD either has sufficient provisions in the derivative agreements with its counterparties, has adhered to the International Swaps and Derivatives Association (ISDA) 2020 IBOR Fallbacks Protocol (IBOR Protocol) or works bilaterally with counterparties, to ensure a smooth transition to alternative reference rates.

As of June 30, 2023, almost all of IBRD's borrowings either carry fixed interest rates or are not subject to transition to alternative reference rates.

IBRD will continue to work with key stakeholders, including internal subject matter experts, senior management, borrowers, industry groups and other market participants, to mitigate potential financial and operational risks to which IBRD is exposed, and to ensure an orderly transition to the alternative reference rates.

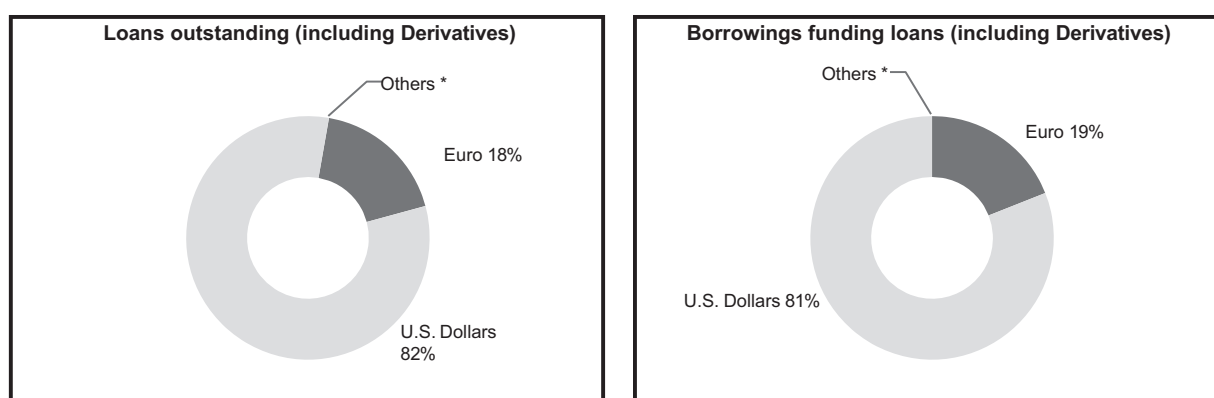

Exchange Rate Risk

IBRD holds the majority of its assets and liabilities in U.S. dollars and euro. However, the reported levels of its assets, liabilities, income, and expenses in the financial statements are affected by exchange rate movements in all the currencies in which IBRD transacts, relative to its reporting currency, the U.S. dollar. IBRD's functional currencies are the U.S. dollar and euro. Currency translation adjustments relating to euro-denominated balances

are reflected in other comprehensive income, a component of equity. Currency translation adjustments relating to non- euro denominated balances (non-functional currencies) are reported in the Statements of Income. While IBRD's equity could be affected by exchange rate movements, IBRD's risk management policies work to minimize the exchange rate risk in its capital adequacy, by immunizing the Equity-to-Loans ratio against exchange rate movements.

To minimize exchange risk, IBRD matches its borrowing obligations in any one currency (after derivatives) with assets in the same currency (Figure 26). In addition, IBRD undertakes periodic currency conversions to align the currency composition of its equity with that of its outstanding loans across major currencies. Together, these policies are designed to minimize the impact of exchange rate fluctuations on the Equity-to-Loans ratio; thereby preserving IBRD's ability to better absorb unexpected losses from arrears on loan repayments, regardless of exchange rate movements. As a result, exchange rate movements during the year generally do not have an impact on the overall Equity-to-Loans ratio.

Figure 26: Currency Composition of Loan and Borrowing Portfolios as of June 30, 2023

* Denotes percentage less than 0.5%.

Liquidity Risk

Liquidity risk arises in the general funding of IBRD's activities and in managing its financial position. It includes the risk of IBRD being unable to fund its portfolio of assets at appropriate maturities and rates, and the risk of being unable to liquidate a position in a timely manner at a reasonable price.

Under IBRD's liquidity management guidelines, aggregate liquid asset holdings are kept at or above a specified Prudential Minimum to safeguard against cash flow interruptions.

The Target Liquidity Level represents twelve-months' coverage as calculated at the start of every fiscal year. The Prudential Minimum is defined as 80% of the Target Liquidity Level. The maximum guideline of 150% of Target Liquidity Level continues to function as a guideline rather than a hard ceiling (see Table 31).

Table 31: Liquidity Levels

<i>Effective for FY23</i>	<i>In billions of U.S. dollars</i>	<i>% of Target Liquidity Level</i>
Target Liquidity Level	\$54.0	
Guideline Maximum Liquidity Level	81.0	150%
Prudential Minimum Liquidity Level	43.2	80%
Liquid Asset Portfolio as of June 30, 2023	\$75.4	140%

The FY24 Target Liquidity Level is set at \$59.0 billion, \$5.0 billion higher than FY23 Target Liquidity Level due to higher projected debt service in FY24.

Operational Risk

Operational risk is defined as the risk of financial loss or damage to IBRD's reputation resulting from inadequate or failed internal processes, people and systems, or from external events.

IBRD recognizes the importance of operational risk management activities, which are embedded in its financial operations. As part of its business activities, IBRD is exposed to a range of operational risks including physical security and staff health and safety, data and cyber security, business continuity, and third-party vendor risks. IBRD's approach to identifying and managing operational risk includes a dedicated program for these risks and a robust process that includes assessing and prioritizing operational risks, monitoring and reporting relevant key risk indicators, aggregating and analyzing internal and external events, identifying emerging risks that may affect business units, and developing risk responses and mitigating actions.

Cybersecurity Risk Management

IBRD's operations rely on the secure processing, storage and transmission of confidential and other information in computer systems and networks. As is the case for financial institutions generally, cybersecurity risk continues to be significant for IBRD due to the evolving sophistication and complexity of the cyber threat landscape. These risks are unavoidable and IBRD seeks to manage them on a cost-effective basis consistent with its risk appetite.

To protect the security of its computer systems, software, networks and other technology assets, IBRD has developed a cybersecurity risk management program, consisting of cybersecurity policies, procedures, compliance and awareness programs. IBRD deploys a multi-layered approach for cybersecurity risk management to help prevent and detect malicious activity, both from within the organization and from external sources. In managing emerging cyber threats such as malware including ransomware, denial of service and phishing attacks, IBRD strives to adapt its technical and process-level controls and raise the level of user awareness to mitigate the risk.

IBRD periodically assesses the maturity and effectiveness of its cyber defenses through risk mitigation techniques, including but not limited to, targeted testing, internal and external audits, incident response desktop exercises and industry benchmarking.

SECTION X: CONTRACTUAL OBLIGATIONS

In conducting its business, IBRD takes on contractual obligations that may require future payments. These include borrowings, operating leases, contractual purchases, capital expenditures, and other long-term liabilities. Table 32 shows IBRD's contractual obligations for the next five years and thereafter; it excludes the following obligations reflected on IBRD's Balance Sheets: undisbursed loans, amounts payable for currency and interest rate swaps, amounts payable for investment securities purchased, guarantees, and cash received under agency arrangements.

- *Borrowings*: IBRD issues debt in the form of securities to private and governmental buyers.
- *Operating Leases*: IBRD leases real estate and equipment under lease agreements for varying periods. Operating lease expenditures represents future cash payments for real estate-related obligations and equipment, based on contractual amounts.
- *Contractual Purchases*: IBRD is a party to various obligations to purchase products and services, which are purchase commitments in the ordinary course of business.
- *Other Long-Term Liabilities*: IBRD provides a variety of benefits to its employees. As some of these benefits are of a long-term nature, IBRD records the associated liability on its Balance Sheets. The obligations payable represents expected benefit payments as well as contributions to the pension plans. These include future service and pay accruals for current staff and new staff projections for the next 10 years.

Operating leases, contractual purchases and capital expenditures, and other long-term obligations include obligations shared with IDA, IFC, and MIGA under cost-sharing and service arrangements. These arrangements reflect the WBG strategy of maximizing synergies, to best leverage resources for development (see Notes to Financial Statements, Note H for Transactions with Affiliated Organizations).

Table 32: Contractual Obligations

In millions of U.S. dollars

	<i>As of June 30, 2023</i>				
	<i>Due in 1 year or Less</i>	<i>Due after 1 Year up to 3 Years</i>	<i>Due after 3 Years up to 5 Years</i>	<i>Due After 5 years</i>	<i>Total</i>
Borrowings (at fair value)	\$38,996	\$60,921	\$52,890	\$84,458	\$237,265
Operating leases	66	90	40	1,150	1,346
Contractual purchases	68	7	—	—	75
Other long-term liabilities	721	146	97	182	1,146
Total	<u>\$39,851</u>	<u>\$61,164</u>	<u>\$53,027</u>	<u>\$85,790</u>	<u>\$239,832</u>

SECTION XI: PENSION AND OTHER POST-RETIREMENT BENEFITS

Governance

IBRD participates, along with IFC and MIGA, in pension and post-retirement benefit plans. The Staff Retirement Plan (SRP), Retired Staff Benefits Plan (RSBP), and PEBP (collectively called the “Plans”) are defined benefit plans and cover substantially all WBG employees, retirees and their beneficiaries. Costs, assets, and liabilities associated with the Plans are allocated among IBRD, IFC, and MIGA, based on their employees’ respective participation in the Plans. Costs allocated to IBRD are subsequently shared with IDA, based on an agreed cost-sharing ratio (see Notes to Financial Statements, Note J: Pension and Other Post-Retirement Benefits).

The benefits of the Plans at retirement are determined pursuant to the Plan Documents adopted by the Board (Plan Document). IBRD has a contractual obligation to make benefit payments to the Plans’ beneficiaries. The governance mechanism of the Plans, including the funding and investment policies described here, are designed to support this objective.

There are two committees that govern the Plans. From a governance standpoint, both committees are independent of IBRD and the Board.

- The Pension Finance Committee (PFC), which is responsible for the financial management of the Plans and is supported by the Pension Finance Administrator.
- The Pension Benefits Administration Committee (PBAC), which is responsible for the administration of the benefits of the Plans.

Contributions to the SRP and RSBP are irrevocable, with assets held in separate trusts, and the PEBP assets are included in IBRD’s investment portfolio. IBRD acts as trustee for the Plans and the assets are used for the exclusive benefit of the participants and their beneficiaries. The objective of the Plans is to accumulate sufficient assets to meet future pension benefit obligations. As of June 30, 2023, IBRD and IDA’s share of the assets amounted to \$30.8 billion (see Table 33). This represents the accumulated contributions paid into the plans net of benefit payments, together with the accumulated value of investment earnings, net of related expenses.

Funding and Investment Policies

The key policies underpinning the financial management of the Plans, including the determination of WBG contributions and the investment of Plan assets, are the funding and investment policies. The objective of these policies is to ensure that the Plans have sufficient assets to meet benefit payments over the long term. The funding policy, as approved by the PFC, establishes the rules that determine the WBG’s contributions. The policy seeks to fund the Plans in a consistent and timely manner, while at the same time avoiding excessive volatility in WBG contributions. The funding policy determines how much the WBG must contribute annually to sustain and ensure the accumulation of sufficient assets over time to meet the expected benefit payments. Under the Plan Document, the PFC determines the WBG contribution based on actuarial valuations. IBRD is required to make the contribution determined by the PFC. In FY23, the WBG’s rate for contributions to the Plans was 14.61% of salaries.

The Projected Benefit Obligation (PBO) is derived from AA-rated corporate bonds, as required by U.S. GAAP. The selection of this rate as the basis for the discount rate is to establish a liability equivalent to an amount that if invested in high-quality fixed income securities would match the benefit payment stream. While this measure is based on an objective, observable market rate, it does not necessarily reflect the realized or expected returns of the Plan which depend on how the Plans are managed and invested. The PBO for funding purposes is discounted using a 3.5% real discount rate since the funding strategy for the Plans is based on a target of 3.5% real return on investments. This rate constitutes the long-term return objective for the Plan’s assets, referred to as the Long-Term Real Return Objective (LTRRO), which Management has followed since the year ended June 30, 1999 and last reaffirmed under the strategic asset allocation review in April 2021. If the return on pension assets is 3.5% in real terms and contributions are made at the actuarially required rates (which reflect the long-term cost of the plan benefit), the Plan benefits will be funded over time.

The assets of the Plans are diversified across a variety of asset classes, with the objective of achieving returns consistent with the LTRRO over the long term without taking undue risks. The returns on investments for the Plans have met or exceeded the LTRRO on a consistent basis in the long term as well as in recent years. The PFC periodically reviews the LTRRO for realism and appropriateness. See Notes to Financial Statements, Note J: Pension and Other Post-Retirement Benefits for asset allocation, expected return on Plan assets and assumptions used to determine the PBO.

Environmental, Social and Governance (ESG) Policies

The Plan has a long-standing ESG policy that reflects the latest developments in and understanding of responsible investments and ESG integration. The ESG policy is based on a principled and pragmatic approach in accordance with and subject to the fiduciary standard applicable to the administration and investment of Plan assets. The Plan's ESG policy states that consideration of ESG factors, including but not limited to environmental practices, worker safety and health standards, and corporate governance, can add value to the investment process and enhance the assessment of the risk and return characteristics of investments.

Projected Benefit Obligation

Given that pension plan liabilities can be defined and measured in different ways, it is possible to have different funded status measures for the same plans. The most widely used and publicly disclosed measure of pension plan liabilities is the PBO measure required under U.S. GAAP. It reflects the present value of all retirement benefits earned by participants (adjusted for assumed inflation) as of a given date, including projected salary increases to retirement. Therefore, the PBO measure is an appropriate metric for assessing the ability of the Plans to cover expected benefits as of a certain date. The underlying actuarial assumptions used to determine the PBO, accumulated benefit obligations, and funded status associated with the Plans are based on financial market interest rates, experience, and Management's best estimate of future benefit changes, economic conditions and earnings from plan assets.

Table 33: Funded Status of the Plans

In millions U.S. dollars

	<i>As of June 30, 2023</i>			
	<i>SRP</i>	<i>RSBP</i>	<i>PEBP</i>	<i>Total</i>
PBO	\$(21,208)	\$(3,341)	\$(2,057)	\$(26,606)
Plan assets	\$ 24,565	\$ 4,281	\$ 1,953	\$ 30,799
Net position	\$ 3,357	\$ 940	\$ (104)	\$ 4,193
IBRD's funded status				1,980
	<i>As of June 30, 2022</i>			
	<i>SRP</i>	<i>RSBP</i>	<i>PEBP</i>	<i>Total</i>
PBO	\$(21,831)	\$(3,666)	\$(2,107)	\$(27,604)
Plan assets	\$ 23,745	\$ 4,061	\$ 1,791	\$ 29,597
Net position	\$ 1,914	\$ 395	\$ (316)	\$ 1,993
IBRD's funded status				941

The discount rate used to convert future obligations into today's dollars is derived from high-grade, AA-rated corporate bond yields as required by U.S. GAAP. The overfunded status of the pension plans for IBRD and IDA of \$4,193 million as of June 30, 2023, net of PEBP assets, was primarily due to the actuarial gains in the projected benefit obligations as a result of the increase in the real discount rate. As the Plans are managed with a long-term horizon, results over shorter time periods may be impacted positively or negatively by market fluctuations.

SECTION XII: CRITICAL ACCOUNTING POLICIES AND THE USE OF ESTIMATES

IBRD's significant accounting policies, as well as estimates made by Management, are integral to its financial reporting. While all of these policies require a certain level of judgment and estimates, significant policies require Management to make highly difficult, complex, and subjective judgments as these relate to matters inherently uncertain and susceptible to change. Note A to the financial statements contains a summary of IBRD's significant accounting policies including a discussion of recently issued accounting pronouncements.

Fair Value of Financial Instruments

The fair values of financial instruments are based on a three-level hierarchy. For financial instruments classified as Level 1 or 2, less judgment is applied in arriving at fair value measures as the inputs are based on observable market data. For financial instruments classified as Level 3, unobservable inputs are used. These require Management to make important assumptions and judgments in determining fair value measures. Investments measured at net asset value per share (or its equivalent) are not classified in the fair value hierarchy.

Most of IBRD's financial instruments which are recorded at fair value are classified as Levels 1 and 2. Table 34 presents the summary of the fair value of financial instruments recorded at fair value on a recurring basis, and the amounts measured using significant Level 3 inputs. IBRD's level 3 instruments are mainly structured bonds and related swaps held in the borrowing portfolio; these use market observable inputs and unobservable inputs such as correlations and interest rate volatilities. There were no Level 3 instruments in IBRD's investment or loan portfolios as of June 30, 2023. All of IBRD's loans were carried at amortized cost as of June 30, 2023.

Table 34: Fair Value Level 3 Summary

In millions U.S. dollars

For the fiscal year ended June 30,

	2023		2022	
	Level 3	Total Balance	Level 3	Total Balance
Total Assets at fair value	\$ 221	\$ 92,093	\$ 120	\$ 93,312
As a percentage of total assets	0.24%		0.13%	
Total Liabilities at fair value	\$3,949	\$277,016	\$4,596	\$266,344
As a percentage of total liabilities	1.43%		1.73%	

IBRD reviews the methodology, inputs, and assumptions on a quarterly basis to assess the appropriateness of the fair value hierarchy classification of each financial instrument.

Some financial instruments are valued using pricing models. The valuation group, which is independent of treasury and risk management functions, reviews all financial instrument models affecting financial reporting through fair value and assesses model appropriateness and consistency. The review looks at whether the models accurately reflect the characteristics of the transaction and its risks, the suitability and convergence properties of numerical algorithms, the reliability of data sources, the consistency of the treatment with models for similar products, and sensitivity to input parameters and assumptions that cannot be priced from the market.

Reviews are conducted of new and/or changed models, as well as previously validated models, to assess whether any changes in the product or market may have affected the model's continued validity and whether any theoretical or competitive developments may require reassessment of the model's adequacy.

The financial models used for input to IBRD's financial statements are subject to both internal and periodic external verification and review by qualified personnel.

In cases where Management relies on instrument valuations supplied by external pricing vendors, procedures are in place to validate the appropriateness of the models used, as well as the inputs applied in determining those values.

Provision for Losses on Loans and Other Exposures

IBRD evaluates estimated exposures over the life of loans and other exposures, to incorporate undisbursed loan commitments in the measure of exposure, and to incorporate estimations of future market conditions for a reasonable and supportable forecast period along with historical experience. The overall provision for expected losses is the sum of the computed annual losses, taking into account borrower risk ratings and associated expected default frequencies, estimates of exposure, and severity of loss given default.

For loans carried at fair value, if any, the credit risk assessment is a determinant of fair value.

The determination of a borrower's risk rating is based on complex variables such as: political risk, external debt and liquidity, fiscal policy and the public debt burden, balance of payments risks, economic structure and growth prospects, monetary and exchange rate policy, and financial sector risks and corporate sector debt and other vulnerabilities. Additionally, estimations of disbursements and repayments of exposures are made, as well as estimations of future interest cash flows based on forward looking market variables.

IBRD periodically reviews these variables and reassesses the adequacy of the accumulated provision accordingly. Actual losses may differ from expected losses owing to unforeseen changes in any of the variables affecting the creditworthiness or estimates inherent in the exposure measurements of borrowers.

The Credit Risk Committee monitors aspects of country credit risk, in particular, reviewing the provision for losses on loans and guarantees taking into account, among other factors, any changes in exposure, risk ratings of borrowing member countries, or changes between the accrual and nonaccrual portfolios.

The accumulated provision for loan losses is reported separately in the Balance Sheets as a reduction from IBRD's total loans outstanding. The accumulated provision for losses on loan commitments and other exposures is included in accounts payable and miscellaneous liabilities. Increases or decreases in the accumulated provision for losses on loans and other exposures are reported in the Statements of Income as a provision for losses on loans and other exposures (see Notes to Financial Statements: Note A: Summary of Significant Accounting and Related Policies and Note D: Loans and Other Exposures).

Pension and Other Post-Retirement Benefits

The underlying actuarial assumptions used to determine the PBO, accumulated benefit obligations, and funded status associated with IBRD pension and other post-retirement benefit plans are based on financial market interest rates, experience, and Management's best estimate of future benefit changes and economic conditions. All costs, assets and liabilities associated with these plans are allocated between IBRD, IFC, and MIGA based upon their employees' respective participation in the plans. Costs allocated to IBRD are then shared between IBRD and IDA based on an agreed cost-sharing ratio. IDA, IFC and MIGA reimburse IBRD for their proportionate share of any contributions made to these plans by IBRD. Contributions to the plans are calculated as a percentage of salary (see Notes to Financial Statements, Note J: Pension and Other Post-Retirement Benefits).

SECTION XIII: GOVERNANCE AND CONTROLS

Business Conduct

The WBG promotes a positive work environment in which staff members understand their ethical obligations to the institution. In support of this commitment, the institution has in place a Code of Conduct. The WBG has both an Ethics Help Line and a Fraud and Corruption hotline. A third-party service offers many methods of worldwide communication. Reporting channels include telephone, mail, email, or confidential submission through a website.

IBRD has procedures in place for receiving, retaining, and handling recommendations and concerns relating to business conduct identified during the accounting, internal control, and auditing processes.

WBG staff rules clarify and codify the staff's obligations in reporting suspected fraud, corruption, or other misconduct that may threaten the operations or governance of the WBG. These rules also offer protection from retaliation.

Figure 27: Governance Structure

General Governance

IBRD's decision-making structure consists of the Board of Governors, Executive Directors, the President, Management, and staff. The Board of Governors is the highest decision-making authority. Governors are appointed by their member governments for a five-year term, which is renewable. The Board of Governors may delegate authority to the Executive Directors to exercise any of its powers, except for certain powers enumerated in IBRD's Articles. IBRD has its own policies and frameworks that are carried out by staff that share responsibilities over both IBRD and IDA.

In addition, IBRD and IDA have joint internal institutional oversight units which play an assurance role to shareholders and management that IBRD's work is impactful and accountable, informed by best practices, and delivered to the highest ethical standards with risk management controls and governance processes that are functioning effectively.

Executive Directors

In accordance with IBRD's Articles, Executive Directors are appointed or elected every two years by their member governments. The Board currently has 25 Executive Directors, who represent all 189 member countries. Executive Directors are neither officers nor staff of IBRD. The President is the only member of the Board from management, and he serves as a non-voting member and as Chairman of the Board.

The Board is required to consider proposals made by the President on IBRD loans, grants and guarantees and on other policies that affect its general operations. The Board is also responsible for presenting to the Governors, at the Annual Meetings, audited accounts, an administrative budget, and an annual report on operations and policies and other matters.

The Board and its committees are in continuous sessions based in Washington DC, as business requires. Each committee's terms of reference establish its respective roles and responsibilities. As committees do not vote on issues, their role is primarily to serve the Board in discharging its responsibilities.

The committees are made up of eight members and function under their respective stipulated terms of reference. These committees are as follows:

- Audit Committee - assists the Board in overseeing IBRD's finances, accounting, risk management and internal controls (*see further explanation below*).
- Budget Committee - assists the Board in approving the World Bank's budget and in overseeing the preparation and execution of IBRD's business plans. The committee provides guidance to management on strategic directions of IBRD.
- Committee on Development Effectiveness - supports the Board in assessing IBRD's development effectiveness, providing guidance on strategic directions of IBRD, monitoring the quality and results of operations.
- Committee on Governance and Executive Directors' Administrative Matters - assists the Board on issues related to the governance of IBRD, the Board's own effectiveness, and the administrative policy applicable to Executive Directors' offices.
- Human Resources Committee - strengthens the efficiency and effectiveness of the Board in discharging its oversight responsibility on the World Bank's human resources strategy, policies and practices, and their alignment with the business needs of the organization.

Audit Committee

Membership

The Audit Committee consists of eight Executive Directors. Membership in the Committee is determined by the Board, based on nominations by the Chairman of the Board, following informal consultation with Executive Directors.

Key Responsibilities

The Audit Committee is appointed by the Board for the primary purpose of assisting the Board in overseeing IBRD's finances, accounting, risk management, internal controls and institutional integrity. Specific responsibilities include:

- Oversight of the integrity of IBRD's financial statements.
- Appointment, qualifications, independence and performance of the External Auditor.
- Performance of the Group Internal Audit.
- Adequacy and effectiveness of financial and accounting policies and internal controls' and the mechanisms to deter, prevent and penalize fraud and corruption in IBRD operations and corporate procurement.
- Effective management of financial, fiduciary and compliance risks in IBRD.
- Oversight of the institutional arrangements and processes for risk management across IBRD.

In carrying out its role, the Audit Committee discusses financial issues and policies that affect IBRD's financial position and capital adequacy with Management, external auditors, and internal auditors. It recommends the annual audited financial statements for approval to the Board. The Audit Committee monitors and reviews developments in corporate governance and its own role on an ongoing basis.

Executive Sessions

Under the Audit Committee's terms of reference, it may convene in executive session at any time, without Management's presence. The Audit Committee meets separately in executive session with the external and internal auditors.

Access to Resources and to Management

Throughout the year, the Audit Committee receives a large volume of information to enable it to carry out its duties and meets both formally and informally throughout the year to discuss relevant matters. It has complete access to Management, and reviews and discusses with Management topics considered in its terms of reference.

The Audit Committee has the authority to seek advice and assistance from outside legal, accounting, or other advisors as it deems necessary.

Auditor Independence

The appointment of the external auditor for IBRD is governed by a set of Board-approved principles. These include:

- Limits on the external auditor's provision of non-audit-related services
- Requiring all audit-related services to be pre-approved on a case-by-case basis by the Board, upon recommendation of the Audit Committee, and
- Renewal of the external audit contract every five years, with a limit of two consecutive terms and mandatory rotation thereafter.

The external auditor may provide non-prohibited, non-audit related services subject to monetary limits. Broadly, the list of prohibited non-audit services include those that would put the external auditor in the roles typically performed by management and in a position of auditing their own work, such as accounting services, internal audit services, and provision of investment advice. The total non-audit services fees over the term of the relevant external audit contract shall not exceed 70 percent of the audit fees over the same period.

Communication between the external auditor and the Audit Committee is ongoing and carried out as often as deemed necessary by either party. The Audit Committee meets periodically with the external auditor and individual committee members have independent access to the external auditor. IBRD's external auditors also follow the communication requirements with the Audit Committee set out under generally accepted auditing standards in the United States.

External Auditors

The external auditor is appointed to a five-year term, with a limit of two consecutive terms, and is subject to annual reappointment based on the recommendation of the Audit Committee and approval of a resolution by the Board.

In May 2022, IBRD's Board approved Deloitte & Touche LLP as IBRD's external auditor for a second five-year term commencing in FY24.

Senior Management Changes

Effective June 1, 2023, David Malpass resigned as World Bank Group President. Ajay Banga was appointed as President of the World Bank Group effective June 2, 2023.

On March 1, 2023, Mari Pangestu retired as Managing Director for Development Policy and Partnerships.

Effective April 3, 2023, Axel van Trotsenburg became the Senior Managing Director for the World Bank's Development Policy and Partnerships, and Anna Bjerde was appointed Managing Director for Operations, succeeding Axel van Trotsenburg in that role.

Internal Control

Internal Control Over Financial Reporting

Each fiscal year, Management evaluates the internal controls over financial reporting to determine whether any changes made in these controls during the fiscal year materially affect, or would be reasonably likely to materially affect, IBRD's internal control over financial reporting. The internal control framework promulgated by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), "Internal Control—Integrated Framework (2013)" provides guidance for designing, implementing and conducting internal control and assessing its effectiveness. IBRD uses the 2013 COSO framework to assess the effectiveness of the internal control over financial reporting. As of June 30, 2023, management maintained effective internal control over financial reporting. See "Management's report regarding effectiveness of Internal Control over Financial Reporting" on page 84.

IBRD's internal control over financial reporting was audited by Deloitte & Touche LLP, and their report expresses an unqualified opinion on the effectiveness of IBRD's internal control over financial reporting as of June 30, 2023. See Independent Auditor's Report on page 86.

Disclosure Controls and Procedures

Disclosure controls and procedures are designed to ensure that information required to be disclosed is gathered and communicated to Management, as appropriate, to allow timely decisions regarding required disclosure by IBRD. Management conducted an evaluation of the effectiveness of such controls and procedures and the President and the MDCFO have concluded that these controls and procedures were effective as of June 30, 2023.

SECTION XIV: AFFILIATED ORGANIZATIONS—IDA, IFC AND MIGA

IDA's purpose is to promote economic development in the less developed areas of the world included in *IDA's* membership by providing a combination of grants and financing on concessionary and non-concessionary terms. *IDA* may not borrow from *IBRD*.

IDA has financed its operations over the years with its own equity, including regular additions to equity provided by member countries as part of the replenishment process. As a result of the strong support of member countries, *IDA* has built up a substantial equity base of \$185.8 billion as of June 30, 2023. By prudently leveraging its equity and blending market debt with equity contributions from members, *IDA* has increased its financial efficiency, and scaled up its financing to support the escalating demand for its resources while ensuring its long-term financial sustainability through a prudent risk management framework.

Under a statement of policy of *IBRD's* Board of Governors, *IBRD* may make transfers to *IDA* only out of net income that (a) accrued during the fiscal year in respect of which the transfer is made and (b) is not needed for allocation to reserves or otherwise required to be retained in *IBRD's* business. Transfers may also be made out of net income previously transferred to surplus, upon the approval of the Board of Governors. In FY23, *IDA* received \$117 million from *IBRD*, resulting in cumulative transfers to *IDA* from *IBRD* of \$16.5 billion as of June 30, 2023. For additional information on transfers of *IBRD's* net income to *IDA*, see Section III of the MD&A Net Income Allocation and the Notes to Financial Statements—Note G—Retained Earnings, Allocations and Transfers.

IFC helps developing countries achieve sustainable growth by financing private sector investments, mobilizing capital in international financial markets and providing advisory services to businesses and governments. Under its Articles, *IBRD* is permitted to make loans to *IFC* (without a guarantee), subject to the limitation that *IBRD* may not lend *IFC* any amount which would increase its total outstanding debt beyond a certain threshold. *IBRD* has a Local Currency Loan Facility Agreement with *IFC*, which is capped at \$300 million. As of June 30, 2023, and June 30, 2022, there were no loans outstanding under this facility.

MIGA was established to encourage the flow of investments for productive purposes by providing guarantees against noncommercial risks for foreign investment in its developing member countries. *IBRD* may not lend to *MIGA*.

For details of transactions with affiliated organizations, see the Notes to the Financial Statements—Note H—Transactions with Affiliated Organizations.

SECTION XV: ADMINISTRATION OF IBRD

IBRD's administration is composed of the Board of Governors, the Executive Directors, the President, other officers, and staff.

All the powers of IBRD are vested in the Board of Governors, which consists of a Governor and an Alternate Governor appointed by each member of IBRD, who exercise the voting power to which that member is entitled. Each member is entitled to an equal number of basic votes (representing 5.55 percent of the total voting power in aggregate) plus one vote for each share held. The Board of Governors holds regular annual meetings.

There are 25 Executive Directors. Five of these are appointed, one by each of the five members having the largest number of shares of capital stock at the time of such appointment (the United States, Japan, China, Germany, and France and the United Kingdom (tied for fifth)), and the remainder are elected by the Governors representing the other members. The Board of Governors has delegated to the Executive Directors authority to exercise all the powers of IBRD except those reserved to the Governors under the Articles. The Executive Directors function as a board, and each Executive Director is entitled to cast the number of votes of the member or members by which such person is appointed or elected.

The following is an alphabetical list of the Executive Directors of IBRD and the member countries by which they were appointed or elected:

<u>Name</u>	<u>Countries</u>
Ernesto Acevedo	Costa Rica, El Salvador, Guatemala, Honduras, Mexico, Nicaragua, Spain
Mansour Alshamali	Bahrain, Arab Republic of Egypt, Iraq, Jordan, Kuwait, Lebanon, Maldives, Oman, Qatar, United Arab Emirates, Republic of Yemen
Naveed Baloch	Afghanistan, Algeria, Ghana, Iran (Islamic Republic of), Libya, Morocco, Pakistan, Tunisia
Khalid Bawazier	Saudi Arabia
Abdoul Salam Bello	Benin, Burkina Faso, Cameroon, Cape Verde, Central African Republic, Chad, Comoros, Democratic Republic of Congo, Republic of Congo, Cote d'Ivoire, Djibouti, Equatorial Guinea, Gabon, Guinea, Guinea-Bissau, Madagascar, Mali, Mauritania, Mauritius, Niger, Sao Tome and Principe, Senegal, Togo
Matteo Bugamelli	Albania, Greece, Italy, Malta, Portugal, San Marino, Timor-Leste
Arnaud Fernand Buissé	France
Junhong Chang	China
Koen Davidse	Armenia, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Georgia, Israel, Moldova, Montenegro, Netherlands, North Macedonia, Romania, Ukraine
Hayrettin Demircan	Austria, Belarus, Belgium, Czechia, Hungary, Kosovo, Luxembourg, Slovak Republic, Slovenia, Turkiye
Ayanda Dlodlo	Angola, Nigeria, South Africa
Dominique Favre	Azerbaijan, Kazakhstan, Kyrgyz Republic, Poland, Serbia, Switzerland, Tajikistan, Turkmenistan, Uzbekistan
Vel Gnanendran	United Kingdom
Erivaldo Alfredo Gomes	Brazil, Colombia, Dominican Republic, Ecuador, Haiti, Panama, Philippines, Suriname, Trinidad and Tobago
L. Felice Gorordo (Alternate Executive Director)	United States
Hideaki Imamura	Japan
Param Iyer	Bangladesh, Bhutan, India, Sri Lanka

<u>Name</u>	<u>Countries</u>
Michael Krake	Germany
Lene Natasha Lind	Denmark, Estonia, Finland, Iceland, Latvia, Lithuania, Norway, Sweden
Roman Marshavin	Russian Federation, Syrian Arab Republic
Cecilia Nahón	Argentina, Bolivia, Chile, Paraguay, Peru, Uruguay
Floribert Ngaruko	Botswana, Burundi, Eritrea, Eswatini, Ethiopia, Gambia (The), Kenya, Lesotho, Liberia, Malawi, Mozambique, Namibia, Rwanda, Seychelles, Sierra Leone, Somalia, South Sudan, Sudan, Tanzania, Uganda, Zambia, Zimbabwe
Il Young Park	Australia, Cambodia, Kiribati, Republic of Korea, Marshall Islands, Federated States of Micronesia, Mongolia, Nauru, New Zealand, Palau, Papua New Guinea, Samoa, Solomon Islands, Tuvalu, Vanuatu
Katharine Rechico	Antigua and Barbuda, Bahamas (The), Barbados, Belize, Canada, Dominica, Grenada, Guyana, Ireland, Jamaica, St Kitts and Nevis, St Lucia, St Vincent and the Grenadines
Wempi Saputra	Brunei Darussalam, Fiji, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, Nepal, Singapore, Thailand, Tonga, Vietnam

The President is selected by the Executive Directors. Subject to their direction on questions of policy, the President is responsible for the conduct of the ordinary business of IBRD and for the organization, appointment, and dismissal of its officers and staff.

The following is a list of the principal officers of the Bank:

President	Ajay Banga
Senior Managing Director, Development and Policy	Axel van Trotsenburg
Managing Director, Operations	Anna Bjerde
Managing Director & WBG Chief Financial Officer	Anshula Kant
Managing Director & WBG Chief Administrative Officer	Shaolin Yang
Senior Vice President & WBG General Counsel	Christopher Stephens
Senior Vice President & World Bank Group Chief Economist, Development Economics	Indermit Gill
Vice President, Development Finance	Akihiko Nishio
Vice President and Auditor-General, Group Internal Audit	Anke D'Angelo
Vice President, Europe, and Central Asia.	Antonella Bassani
Vice President, Latin America and the Caribbean	Carlos Felipe Jaramillo
Vice President, World Bank Group People and Culture	Diarietou Gaye
Vice President, Operations Policy and Country Services	Edward Mountfield
Vice President, Middle East and North Africa	Ferid Belhaj
Vice President, Infrastructure	Guangzhe Chen
Vice President, WBG External and Corporate Relations	Jill Wilkins (Acting)
Vice President & Treasurer, Treasury	Jorge Familiar
Vice President, Sustainable Development	Juergen Voegelé
Vice President and WBG Chief Risk Officer	Lakshmi Shyam-Sunder
Vice President, Ethics & Internal Justice Services	Lisa Rosen
Vice President, Human Development	Mamta Murthi
Vice President, East Asia and Pacific	Manuela Ferro

Vice President, South Asia	Martin Raiser
Vice President and Corporate Secretary	Mercy Tembon
Vice President, Integrity	Mouhamadou Diagne
Secretary Accountability Mechanism	Orsolya Szekely
Vice President, Western & Central Africa	Ousmane Diagana
Vice President, Equitable Growth, Finance, and Institutions	Pablo Saaverdra
Vice President & WBG Controller, WBG Finance & Accounting	Pamela D. O'Connell
Chairperson, Inspection Panel	Ramanie Kunanayagam
Director-General, Independent Evaluation Group	Sabine Bernabe
Vice President, Budget, Performance Review and Strategic Planning	Samuel Munzele Maimbo
Vice President & WBG Chief Information Officer, Information and Technology Solutions	Valentin Prudius (Acting)
Vice President, Eastern & Southern Africa	Victoria Kwakwa

SECTION XVI: THE ARTICLES OF AGREEMENT

The Articles constitute IBRD's governing charter. They establish the status, privileges and immunities of IBRD, prescribe IBRD's purposes, capital structure and organization, authorize the operations in which it may engage and impose limitations on the conduct of those operations. The Articles also contain, among other things, provisions with respect to the admission of additional members, the increase of the authorized capital stock of IBRD, the terms and conditions under which IBRD may make or guarantee loans, the use of currencies held by IBRD, the distribution of net income of IBRD to its members, the withdrawal and suspension of members, and the suspension of operations of IBRD.

The Articles provide that they may be amended (except for certain provisions the amendment of which requires acceptance by all members) by consent of three-fifths of the members having 85% of the total voting power. The Articles further provide that questions of interpretation of provisions of the Articles arising between any member and IBRD or between members of IBRD shall be decided by the Executive Directors. Their decisions may be referred by any member to the Board of Governors, whose decision is final. Pending the result of such reference, IBRD may act on the basis of the decision of the Executive Directors.

The Articles and the decisions made by the Executive Directors on questions of interpretation may be obtained from IBRD.

SECTION XVII: LEGAL STATUS, PRIVILEGES AND IMMUNITIES

The Articles contain provisions which accord to IBRD, in the territories of each of its members, legal status and certain privileges and immunities. The following is a summary of the more important of these provisions.

IBRD has full juridical personality with capacity to make contracts, to acquire and dispose of property and to sue and be sued. Actions may be brought against IBRD in a court of competent jurisdiction in territories of any member in which IBRD has an office, has appointed an agent for accepting service or notice of process or has issued or guaranteed securities, but no actions against IBRD may be brought by its members or persons acting for or deriving claims from its members.

The Governors and Executive Directors, and their Alternates, and the officers and employees of IBRD are immune from legal process for acts performed by them in their official capacity, except when IBRD waives such immunity.

The archives of IBRD are inviolable. The assets of IBRD are immune from seizure, attachment or execution prior to delivery of final judgment against IBRD.

IBRD, its assets, property and income, and its operations and transactions authorized by the Articles, are immune from all taxation and from all customs duties. IBRD is also immune from liability for the collection or payment of any tax or duty.

The securities issued by IBRD and the interest thereon are not exempt from taxation generally.

Under the Articles, securities issued by IBRD and the interest thereon are not subject to any tax by a member (a) which tax discriminates against such securities solely because they are issued by IBRD, or (b) if the sole jurisdictional basis for the tax is the place or currency in which such securities are issued, made payable or paid, or the location of any office or place of business maintained by IBRD. Also, under the Articles, IBRD is not under any obligation to withhold or pay any tax on any interest on such securities.

SECTION XVIII: FISCAL YEAR, ANNOUNCEMENTS, AND ALLOCATION OF NET INCOME

FISCAL YEAR

IBRD's fiscal year runs from July 1 to June 30.

ANNOUNCEMENTS

Pursuant to the Articles, IBRD published an annual report containing its audited financial statements and distributed quarterly financial statements to its members.

ALLOCATION OF NET INCOME

The Board of Governors determines annually what part of IBRD's net income, after making provisions for reserves, shall be allocated to surplus and what part, if any, shall be distributed. Since its inception, IBRD has neither declared nor paid any dividend to its member countries. However, IBRD has periodically transferred a portion of its net income to IDA or to other uses that promote the purpose of IBRD (see Section III of the MD&A Net Income Allocation and the Notes to Financial Statements—Note G—Retained Earnings, Allocations and Transfers).

SECTION XIX: FEES TO EXTERNAL AUDITORS

The external auditor is appointed to a five-year term, with a limit of two consecutive terms, and is subject to annual reappointment based on the recommendation of the Audit Committee and approval of a resolution by the Board.

In May 2022, IBRD's Board approved Deloitte & Touche LLP as IBRD's external auditor for a second five-year term commencing in FY24.

For FY23 and FY22, Deloitte served as IBRD's independent external auditors. The aggregate fees for professional services rendered for IBRD and IDA by Deloitte for FY23 and FY22 are as follows: \$2.7 million for FY23 audit services (\$2.5 million—FY22) and \$0.6 million for FY23 audit-related services (\$0.6 million—FY22). Audit-related services include accounting consultations concerning financial accounting and reporting standards. Starting in FY19, the external auditors are now able to provide non-prohibited non-audit services. Fees related to non-audit services amounted to \$3.7 million for FY23 (\$4.1 million for FY22). IBRD records its share of these fees as part of administrative expenses based on an agreed cost sharing formula. (See the Notes to the Financial Statements—Note H—Transactions with Affiliated Organizations, for a description of the allocation of administrative expenses between IBRD and IDA.)

See the Governance section of this Information Statement for additional discussion of auditor independence matters.

SECTION XX: APPENDIX

Glossary of Terms

Articles: IBRD's Articles of Agreement

Below GDI Country: Country whose Gross National Income per capita is below the Graduation Discussion Income as published in the Per Capita Income Guidelines for Operational Purposes.

Board: The Executive Directors as established by IBRD's Articles of Agreement.

Budget Anchor: Efficiency measure that IBRD uses to monitor the coverage of its net administrative expenses by its loan spread revenue.

Capital Adequacy: A measure of IBRD's ability to withstand unexpected shocks and is based on the amount of IBRD's usable equity expressed as a percentage of its loans and other related exposures.

Credit Default Swaps (CDS): A derivative contract that provides protection against deteriorating credit quality and allows one party to receive payment in the event of a default or specified credit event by a third party.

Credit Valuation Adjustment (CVA): The CVA represents the counterparty credit risk exposure and is reflected in the fair value of derivative instruments.

Debit Valuation Adjustment (DVA): DVA on Fair Value Option (FVO) Elected Liabilities that corresponds to the change in fair value of the liability presented under the FVO that relate to the instrument specific credit risk ("own-credit risk").

Duration: Provides an indication of the sensitivity of underlying yield to changes in interest rates.

Equity-to-Loans Ratio: The Board monitors IBRD's capital adequacy within a Strategic Capital Adequacy Framework, using the Equity-to-Loans ratio as a key indicator of IBRD's capital adequacy. For details on the ratio, see Table 28.

Hybrid Capital: Instrument that has characteristics of both debt and equity.

Loan Spread Revenue, Net: The spread between loan returns and associated debt cost, assuming loans are fully funded by debt.

Lower-Middle-Income Countries: For FY23, income groups are classified according to the 2021 gross national income (GNI) per capita. For lower-middle-income countries, the GNI range was \$1,086 to \$4,255.

Maintenance of Value (MOV): Under IBRD's Articles, members are required to maintain the value of their subscriptions of national currency paid-in, which is subject to certain restrictions. MOV is determined by measuring the foreign exchange value of a member's national currency against the standard of value of IBRD's capital based on the 1974 SDR.

Lending Operations: Total projects from a fiscal year based on project approval date as of June 30 of the fiscal year.

Net Commitments: Commitments net of full terminations and cancellations approved in the same fiscal year and include guarantee commitments and guarantee facilities that have been approved by the Executive Directors.

Net Loan Disbursements: Loan disbursements net of repayments and prepayments.

Prudential Minimum: The minimum amount of liquidity that IBRD is required to hold and is defined as 80% of the Target Liquidity Level.

Sustainable Annual Lending Limit (SALL): The level of lending that can be sustained in real terms over 10 years.

Strategic Capital Adequacy Framework: Evaluates IBRD's capital adequacy as measured by stress tests and an appropriate minimum level for the long-term Equity-to-Loans ratio. The Equity-to-Loans ratio provides a background framework in the context of annual net income allocation decisions, as well as in the assessment of the initiatives for the use of capital. The framework has been approved by the Board.

Single Borrower Limit (SBL): The maximum authorized exposure to IBRD's most creditworthy and largest borrowing countries in terms of population and economic size.

Statutory Lending Limit (SLL): Under IBRD's Articles, as applied, the total amount outstanding of loans, participations in loans, and callable guarantees may not exceed the sum of unimpaired subscribed capital, reserves and surplus.

Target Liquidity Level (TLL): The twelve- month Target Liquidity Level is calculated before the end of each fiscal year based on Management's estimates of projected net loan disbursements approved at the time of projection and twelve-month of debt- service for the upcoming fiscal year. This twelve-month estimate becomes the target for the upcoming fiscal year.

U.S. GAAP: Accounting principles generally accepted in the United States of America.

World Bank: The World Bank consists of IBRD and IDA.

World Bank Group (WBG): The World Bank Group consists of IBRD, IDA, IFC, MIGA, and ICSID.

Management's Financial Reporting Assurance

August 4, 2023

Audit Committee of the Board of Executive Directors
International Bank for Reconstruction and Development

We have reviewed the financial statements for the period ending on June 30, 2023, and the accompanying management's discussion and analysis of the International Bank for Reconstruction and Development (IBRD) (collectively, the "Reports"). Based on our knowledge, the Reports do not (1) contain any untrue statement of a material fact, or (2) omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the Reports.

Based on our knowledge, the financial statements and other financial information included in the Reports fairly present in all material respects the financial condition, results of operations, changes in net assets, and cash flows of IBRD for the periods presented in the Reports.

Management is responsible for establishing and maintaining internal controls and procedures over financial reporting for IBRD. As part of carrying out these responsibilities, Management has:

- designed internal controls and procedures to ensure that material information required to meet the accuracy and completeness standards set forth above with regard to the Reports is recorded, processed, summarized and reported in a timely manner, as well as to ensure that such information is accumulated and communicated to Management as appropriate to allow timely decisions regarding required disclosure; and
- designed internal control over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Management has evaluated the effectiveness of IBRD's internal controls and procedures as of the date of the Reports; and presented in management's discussion and analysis its conclusions about the effectiveness of such controls and procedures, as of the end of the period covered by the Reports, based on such evaluation. Management has disclosed in the Reports any change in IBRD's internal control over financial reporting that occurred during the period covered by the Reports that has materially affected, or is reasonably likely to materially affect, IBRD's internal control over financial reporting.

Further, Management has disclosed, based on its most recent evaluation of internal control over financial reporting, to IBRD's external auditors and the Audit Committee of IBRD's Board of Executive Directors:

- all significant deficiencies in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect IBRD's ability to record, process, summarize, and report financial information; and
- any fraud, whether or not material, that involves Management or other employees who have a significant role in IBRD's internal control over financial reporting.

Management's Report Regarding Effectiveness of Internal Control over Financial Reporting

August 4, 2023

The management of the International Bank for Reconstruction and Development (IBRD) is responsible for the preparation, integrity, and fair presentation of its published financial statements. The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and include amounts based on informed judgments and estimates made by management.

The financial statements have been audited by an independent audit firm, which was given unrestricted access to all financial records and related data, including minutes of all meetings of the Executive Directors and their Committees. Management believes that all representations made to the independent auditors during their audit of IBRD's financial statements and audit of its internal control over financial reporting were valid and appropriate. The independent auditors' reports accompany the audited financial statements.

Management is responsible for establishing and maintaining effective internal control over financial reporting for financial statement presentations in conformity with accounting principles generally accepted in the United States of America. Management maintains a comprehensive system of controls intended to ensure that transactions are executed in accordance with management's authorization, assets are safeguarded, and financial records are reliable. The system of internal control contains monitoring mechanisms, and actions are taken to correct deficiencies identified. Management believes that internal control over financial reporting supports the integrity and reliability of the external financial statements.

There are inherent limitations in the effectiveness of any internal control, including the possibility of human error and the circumvention or overriding of controls. Accordingly, even effective internal controls can provide only reasonable assurance with respect to financial statement preparation. Further, because of changes in conditions, the effectiveness of internal controls may vary over time.

IBRD assessed its internal control over financial reporting for financial statement presentation in conformity with accounting principles generally accepted in the United States of America as of June 30, 2023. This assessment was based on the criteria for effective internal control over financial reporting described in the *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based upon this assessment, management believes that IBRD maintained effective internal control over financial reporting presented in conformity with accounting principles generally accepted in the United States of America as of June 30, 2023. The independent audit firm that audited the financial statements has issued an Independent Auditors Report which expresses an opinion on IBRD's internal control over financial reporting.

The Executive Directors of IBRD have appointed an Audit Committee responsible for monitoring the accounting practices and internal controls of IBRD. The Audit Committee is comprised entirely of Executive Directors who are independent of IBRD's management. The Audit Committee is responsible for recommending to the Executive Directors the selection of independent auditors. It meets periodically with management, the independent auditors, and the internal auditors to ensure that they are carrying out their responsibilities. The Audit Committee is responsible for performing an oversight role by reviewing and monitoring the financial, accounting and auditing procedures of IBRD in addition to reviewing IBRD's financial reports. The independent auditors and the internal auditors have full and free access to the Audit Committee, with or without the presence

of management, to discuss the adequacy of internal control over financial reporting and any other matters which they believe should be brought to the attention of the Audit Committee.

INDEPENDENT AUDITOR'S REPORT

President and Board of Executive Directors
International Bank for Reconstruction and Development

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of International Bank for Reconstruction and Development (“IBRD”) as of June 30, 2023, based on the criteria established in the *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, IBRD maintained, in all material respects, effective internal control over financial reporting as of June 30, 2023, based on the criteria established in the *Internal Control — Integrated Framework (2013)* issued by COSO.

We also have audited, in accordance with auditing standards generally accepted in the United States of America (GAAS), the financial statements as of and for the year ended June 30, 2023, of IBRD, and our report dated August 4, 2023, expressed an unmodified opinion on those financial statements.

Basis for Opinion

We conducted our audit in accordance with GAAS. Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of Internal Control over Financial Reporting section of our report. We are required to be independent of IBRD and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for Internal Control over Financial Reporting

Management is responsible for designing, implementing, and maintaining effective internal control over financial reporting, and for its assessment about the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report Regarding Effectiveness of Internal Control over Financial Reporting.

Auditor’s Responsibilities for the Audit of Internal Control over Financial Reporting

Our objectives are to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects and to issue an auditor’s report that includes our opinion on internal control over financial reporting. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit of internal control over financial reporting conducted in accordance with GAAS will always detect a material weakness when it exists.

In performing an audit of internal control over financial reporting in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Obtain an understanding of internal control over financial reporting, assess the risks that a material weakness exists, and test and evaluate the design and operating effectiveness of internal control over financial reporting based on the assessed risk.

Definition and Inherent Limitations of Internal Control over Financial Reporting

An entity's internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with accounting principles generally accepted in the United States of America. An entity's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct, misstatements. Also, projections of any assessment of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

INDEPENDENT AUDITOR'S REPORT

President and Board of Executive Directors
International Bank for Reconstruction and Development

Opinion

We have audited the financial statements of the International Bank for Reconstruction and Development (“IBRD”), which comprise the balance sheets as of June 30, 2023 and 2022, and the related statements of income, comprehensive income, changes in retained earnings, and cash flows for each of the three years in the period ended June 30, 2023, and the related notes to the financial statements (collectively referred to as the “financial statements”).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of IBRD as of June 30, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended June 30, 2023, in accordance with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with auditing standards generally accepted in the United States of America (GAAS), IBRD’s internal control over financial reporting as of June 30, 2023, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated August 4, 2023, expressed an unmodified opinion on IBRD’s internal control over financial reporting.

Basis for Opinion

We conducted our audits in accordance with GAAS. Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of IBRD and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about IBRD’s ability to continue as a going concern for one year after the date that the financial statements are issued.

Independent Auditor's Report

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about IBRD's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Report on Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information listed in the table of contents is presented for the purpose of additional analysis and are not a required part of the financial statements. These schedules are the responsibility IBRD's management and were derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. Such schedules have been subjected to the auditing procedures applied in our audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. In our opinion, such information is fairly stated in all material respects in relation to the financial statements as a whole.

Other Information Included in Management's Discussion & Analysis and Financial Statements

Management is responsible for the other information included in Management's Discussion & Analysis and Financial Statements. The other information comprises the information included in Management's Discussion & Analysis and Financial Statements but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

Independent Auditor's Report

In connection with our audits of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Notes

- Indicates a country for which a guarantee is provided under an Exposure Exchange Agreement (EEA) with a multilateral development organization (see Note D—Loans and Other Exposures). The amount of the guarantees is not included in the figures in the Statement above.
 - Indicates a country for which a guarantee has been received, under an EEA with a multilateral development organization or from another guarantee provider (see Note D—Loans and Other Exposures). The effect of the guarantee is not included in the figures in the Statement above.
 - Loan agreements totaling \$8,427 million (\$5,401 million—June 30, 2022) have been signed, but the loans are not effective and disbursements do not start until the borrowers and/or guarantors take certain actions and furnish documents.
 - May differ from the calculated figures or sum of individual figures shown due to rounding.
- * Indicates amount less than \$0.5 million or 0.005 percent

The Notes to Financial Statements are an integral part of these Statements.

NOTES TO FINANCIAL STATEMENTS

PURPOSE AND AFFILIATED ORGANIZATIONS

The International Bank for Reconstruction and Development (IBRD) is an international organization which commenced operations in 1946. The principal purpose of IBRD is to promote sustainable economic development and reduce poverty in its member countries, primarily by providing loans, guarantees and related technical assistance for specific projects and for programs of economic reform in developing member countries. The activities of IBRD are complemented by those of three affiliated organizations, the International Development Association (IDA), the International Finance Corporation (IFC), and the Multilateral Investment Guarantee Agency (MIGA). Each of these organizations is legally and financially independent from IBRD, with separate assets and liabilities, and IBRD is not liable for their respective obligations. Transactions with these affiliated organizations are disclosed in the notes that follow.

IBRD is immune from taxation pursuant to Article VII, Section 9, *Immunities from Taxation*, of IBRD's Articles of Agreement.

NOTE A—SUMMARY OF SIGNIFICANT ACCOUNTING AND RELATED POLICIES

IBRD's financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP).

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting periods. Due to the inherent uncertainty involved in making these estimates, actual results could differ from these estimates. Significant judgment has been used in the valuation of certain financial instruments, the determination of the adequacy of the accumulated provisions for losses on loans and other exposures, the determination of the net periodic cost from pension and other postretirement benefits plans, and the present value of projected benefit obligations.

Certain reclassifications of the prior year's information have been made to conform with the current year's presentation.

Translation of Currencies: IBRD's financial statements are expressed in terms of U.S. dollars for the purpose of reporting IBRD's financial position and the results of its operations. IBRD's functional currencies are the U.S. dollar and euro.

Assets and liabilities are translated at market exchange rates in effect at the end of the reporting period. Revenue and expenses are translated at either the market exchange rates in effect on the dates on which they are recognized or at an average of the market exchange rates in effect during the month of the transaction. Translation adjustments relating to non-functional currencies are reflected in the Statements of Income, while translation adjustments for assets and liabilities denominated in euro are reflected in the Statements of Comprehensive Income.

Valuation of Capital Stock: In the Articles of Agreement, the capital stock of IBRD is expressed in terms of "U.S. dollars of the weight and fineness in effect on July 1, 1944" ("1944 dollars"). Following the abolition of gold as a common denominator of the monetary system and the repeal of the provision of the U.S. law defining the par value of the U.S. dollar in terms of gold, the pre-existing basis for translating 1944 dollars into current dollars or into any other currency was eliminated. The Executive Directors of IBRD have decided, until such time as the relevant provisions of the Articles of Agreement are amended, that the words "U.S. dollars of the weight and fineness in effect on July 1, 1944" in Article II, Section 2(a) of the Articles of Agreement of IBRD are interpreted to mean the Special Drawing Right (SDR) introduced by the International Monetary Fund, as valued in terms of U.S. dollars immediately before the introduction of the basket method of valuing the SDR on July 1, 1974, such value being \$1.20635 for one SDR ("1974 SDR").

Maintenance of Value: Article II, Section 9 of the Articles of Agreement provides for maintenance of value (MOV), at the time of subscription, of national currencies paid-in, which are subject to certain restrictions. MOV is determined by measuring the foreign exchange value of a member's national currency against the standard of value of IBRD's capital based on the 1974 SDR. MOV receivable are amounts due from members on account of movements in exchange rates from the date of initial subscription, resulting in the reduction in the value of their paid-in capital denominated in national currencies. Members are required to make payments to IBRD if their currencies depreciate significantly relative to the standard of value. These amounts may be settled either in cash or a nonnegotiable, noninterest-bearing note, which is due on demand. Certain notes are due on demand only after IBRD's callable subscribed capital has been entirely called pursuant to Article IV, Section 2 (a) of the Articles of Agreement. Furthermore, the Executive Directors have adopted a policy of reimbursing members whose national currencies appreciate significantly in terms of the standard of value.

MOV is deferred when the restriction of national currencies paid-in is lifted and these currencies are being used in IBRD's operations and/or are being invested, swapped, or loaned to members by IBRD or through IFC. Once these restricted currencies are no longer being used in operations, the related MOV is no longer deferred, but rather, becomes due on the same terms as other MOV obligations.

All MOV receivable balances are shown as components of Equity, under Receivable amounts to maintain value of currency holdings. All MOV payable balances are included in Other liabilities-Accounts payable and miscellaneous liabilities on the Balance Sheets. The net receivable or payable MOV amounts relating to national currencies used in IBRD's lending and investing operations are also included as a component of Equity under Deferred amounts to maintain value of currency holdings.

Withdrawal of Membership: Under IBRD's Articles of Agreement, in the event a member withdraws from IBRD, the withdrawing member is entitled to receive the value of its shares payable to the extent the member does not have any outstanding obligations to IBRD. IBRD's Articles of Agreement also state that the former member has continuing obligations to IBRD after withdrawal. Specifically, the former member remains fully liable for its entire capital subscription, including both the previously paid-in portion and the callable portion, so long as any part of the loans or guarantees contracted before it ceased to be a member are outstanding.

Transfers Approved by the Board of Governors: In accordance with IBRD's Articles of Agreement, as interpreted by the Executive Directors, the Board of Governors may exercise its reserved power to approve transfers to other entities for development purposes. When unconditional, these transfers, which are included in the Board of Governors-approved and other transfers line in the Statements of Income, are reported as expenses upon approval. If conditional, these transfers are expensed when the conditions specified for the use by the beneficiaries have been met. The transfers are funded from the preceding fiscal year's Net Income, Surplus, Restricted Retained Earnings or Other Reserves.

Retained Earnings: Retained Earnings consist of allocated amounts (Special Reserve, General Reserve, Pension Reserve, Surplus, Cumulative Fair Value Adjustments, Restricted Retained Earnings, Other Reserves) and Unallocated Net Income (Loss).

The Special Reserve consists of loan commissions set aside pursuant to Article IV, Section 6 of the Articles of Agreement, which are to be held in liquid assets. These assets may be used only for the purpose of meeting liabilities of IBRD on its borrowings and guarantees in the event of default on loans made, participated in, or guaranteed by IBRD. The Special Reserve assets are included under Investments-Trading, and comprise obligations of the United States Government, its agencies, and other official entities. The allocation of such commissions to the Special Reserve was discontinued in 1964 with respect to subsequent loans and no further additions are being made to it.

The General Reserve consists of earnings from prior fiscal years which, in the judgment of the Executive Directors, should be retained in IBRD's operations.

The Pension Reserve consists of the difference between the cumulative actual funding of the Staff Retirement Plan and Trust (SRP) and other postretirement benefits plans, and the cumulative accounting income or expense for these plans, from prior fiscal years. This reserve is reduced when pension accounting expenses exceed the actual funding of these plans. In addition, the Pension Reserve also includes investment revenue earned on the Post-Employment Benefits Plan (PEBP) portfolio as well as Post Retirement Contribution Reserve Fund (PCRF), which is used to stabilize IBRD's contributions to the pension plan.

Surplus consists of earnings from prior fiscal years which are retained by IBRD until a further decision is made on their disposition.

Cumulative Fair Value Adjustments consist of the unrealized mark-to-market gains or losses on non-trading portfolios and certain positions in the trading portfolio.

Restricted Retained Earnings consists of contributions or revenue from prior years which are contractually restricted as to their purpose.

Unallocated Net Income (Loss) consists of the current fiscal year's net income (loss) adjusted for Board of Governors-approved and other transfers made during the year.

Other Reserves consist of allocations from Surplus, non-functional currency translation adjustment gains/losses from prior fiscal years, and revenue from prior years which is set aside for a dedicated purpose. Allocations from Surplus are retained by IBRD until the conditions specified for the use by their beneficiaries have been met.

Loans and Other Exposures: All IBRD loans are made to or guaranteed by countries that are members of IBRD, except for loans made to IFC. The majority of IBRD's loans have repayment obligations based on specific currencies. IBRD also holds multicurrency loans which have repayment obligations in various currencies determined on the basis of a currency pooling system. Other exposures comprise signed commitments (including deferred drawdown options that are effective, and irrevocable commitments), and guarantees.

Loans are reported on the balance sheets at amortized cost. Commitment charges on the undisbursed balance of loans are recognized in revenue as earned. Any loan origination fees incorporated in the terms of a loan are deferred and recognized over the life of the loan as an adjustment of the yield. The unamortized balance of loan origination fees is included as a reduction of the Loans outstanding on the Balance Sheets, and the amortization of loan origination fees are included in Interest revenue from Loans, net in the Statements of Income. Accrued interest is presented in the Balance Sheets line item Other receivables—Accrued income on loans and guarantee fees receivable.

It is IBRD's practice not to reschedule interest or principal payments on its loans or participate in debt rescheduling agreements with respect to its loans. Should modifications be made to the terms of existing loans, IBRD would perform an evaluation to determine the required accounting treatment, including whether the modification would result in the affected loans being accounted for as a trouble debt restructuring, as a new loan, or as a continuation of the existing loan.

It is IBRD's policy to place all loans and other exposures (collectively "exposures") made to or guaranteed by a member of IBRD into nonaccrual status if principal, interest, or other charges with respect to any such exposures are overdue by more than six months, unless IBRD's management determines that the overdue amount will be collected in the immediate future. In addition, if loans and other exposures made by IDA to a member country are placed in nonaccrual status, all loans and other exposures made to, or guaranteed by, that member country will also be placed in nonaccrual status by IBRD. On the date a member's exposures are placed into nonaccrual status, unpaid interest and other charges accrued on exposures to the member are deducted from the revenue of the current period.

Interest and other charges on nonaccruing exposures are included in revenue only to the extent that payments have been received by IBRD. A decision on the restoration of accrual status is made upon arrears clearance. If collectability risk is considered to be particularly high at the time of arrears clearance, the member's exposures may not automatically emerge from nonaccrual status until a suitable period of payment performance has passed.

Loan Commitments: Undisbursed loans relate to operations approved by the Executive Directors, for which disbursements are yet to be made. IBRD records a provision for expected losses on undisbursed loan commitments including Deferred Drawdown Options (DDOs), when signed by both parties. The signature of the loan agreement is a binding event that prevents IBRD from unconditionally withdrawing from the agreement.

Guarantees provided: Financial guarantees are commitments issued by IBRD to guarantee payment by a member country (the debtor) to a third party in the event that a member government (or a government-owned entity) fails to perform its contractual obligations to a third party.

Guarantees provided are regarded as outstanding when the underlying financial obligation of the debtor is incurred, and called when a guaranteed party demands payment under the guarantee. IBRD would be required to perform under its guarantees if the payments guaranteed were not made by the debtor and the guaranteed party called the guarantee by demanding payment from IBRD in accordance with the terms of the guarantee. In the event that a guarantee of a member country is called, IBRD has the contractual right to require payment from the member country.

IBRD records the fair value of the obligation to stand ready in Other Liabilities—Accounts payable and miscellaneous liabilities, and a corresponding fees receivable asset in the Other Receivables—Accrued income on loans and guarantee fees receivable line on IBRD's Balance Sheets. Upfront guarantee fees received are deferred and amortized over the life of the guarantee.

Accumulated Provision for Losses on Loans and Other Exposures: Management determines the appropriate level of accumulated provisions for losses on exposures, which reflects the expected losses inherent in IBRD's exposures.

Loans

Loan exposures are disaggregated into two groups: exposures in accrual status and exposures in nonaccrual status. In each group, a credit risk rating is assigned to exposures for each borrower.

The total exposure for provisioning is the current exposure and the estimated future exposure, taking into account expected disbursements and repayments over the life of the instruments. The expected credit losses related to loans and other exposures are calculated over the life of the instruments based on the annual estimated exposures, the expected default frequency (probability of default to IBRD) and the estimated loss given default. The provision for expected losses is the sum of the expected annual losses over the life of the instruments.

For countries in accrual status, these exposures are grouped in pools of borrowers with a similar risk rating. The determination of a borrower's rating is based on various factors (see Note D—Loans and other exposures). Each risk rating is mapped to an expected default frequency using IBRD's credit migration matrix, based on historical observations of credit ratings at the beginning and at the end of each year.

Expected losses on loan exposures comprise estimates of potential losses arising from the economic loss due to delays in receiving payments. The estimated loss given default is determined at each balance sheet date, based on IBRD's historical experience, as well as parameters adjusted for current conditions during the reasonable and supportable forecast period of IBRD. The loss given default is based on the borrower's eligibility, namely: IBRD, Blend (IBRD and IDA) and IDA, with the highest loss given default associated with IDA eligibility. The main factors used to determine the loss given default are the estimated length of delays in receiving loan payments, and the effective interest rate of the exposure. As the majority of IBRD's loans carry a variable interest rate, the loss severity is impacted by the changes in forward looking market interest rates.

For the calculation of expected credit losses, IBRD applies a three-year reasonable and supportable forecast period, representing the most reliable and available economic data during this period. IBRD also applies a ten-year straight-line reversion to the mean to reflect the historical pattern of rating migration to the mean of its loan portfolio.

This methodology is also applied to countries with exposures in nonaccrual status, although the expected default frequency is equal to a hundred percent. At times, to reflect certain distinguishing circumstances of a particular nonaccrual situation, different input assumptions may be used for a specific country.

All exposures for countries in nonaccrual status are individually assessed. Exposure for certain countries in accrual status may be individually assessed on the basis that they do not share common risk characteristics with an existing pool of exposures. It is IBRD's practice not to write off loans. All contractual obligations associated with exposures in nonaccrual status have eventually been cleared, and borrowers have emerged from nonaccrual status. To date, no loans have been written off.

Management reassesses the adequacy of the accumulated provision on a quarterly basis and adjustments to the accumulated provision are recorded as a charge to or release of provision in the Statements of Income. In addition, reasonableness of the inputs used is reassessed at least annually.

When IBRD receives a third-party guarantee in the form of a credit enhancement that is embedded in the loan agreement with the borrower, it considers the benefit of the credit enhancement in the loan loss provisioning credit risk assessment.

Loan Commitments

IBRD records the expected credit losses on loan commitments based on the projected disbursements of signed loan commitments (adjusted by cancellations based on historical experience), the expected probability of default and estimated loss given default. The provision is included in Other liabilities—Accounts payable and miscellaneous liabilities on the Balance Sheets.

Guarantees provided

IBRD records a contingent liability for the expected losses related to guarantees provided over the projected life of the instruments, which is determined based on the estimated exposure at default, multiplied by the corresponding loss given default and expected default probability for the projected life of the guarantee. This provision, as well as the unamortized balance of the deferred guarantee fees, and the unamortized balance of the obligation to stand-ready, are included in Other Liabilities—Accounts payable and miscellaneous liabilities on the Balance Sheets.

Exposure Exchange Agreements (EEAs)

IBRD executes EEAs with various organizations. While these agreements are not legally considered guarantees, in IBRD's financial statements they are recognized as financial guarantees as they meet the accounting criteria for financial guarantees. Under an EEA, each party exchanges credit risk exposure of a portfolio supported by underlying loans to borrowers, by providing and receiving guarantees from each other, for the amounts specified. The guarantee provided and the guarantee received are two separate transactions; namely (a) the provision of a financial guarantee, and (b) the receipt of an asset. There is generally no exchange of cash between the organizations for these transactions.

For a guarantee provided under an EEA, IBRD records a liability equivalent to the fair value of the obligation to stand ready. This liability is included in Other liabilities—Accounts payable and miscellaneous liabilities on the Balance Sheets and is amortized over the life of the EEA. IBRD also records a liability, and corresponding

expense, in recognition of the risk coverage provided (provision). The value of this liability reflects the credit quality of the underlying loans in the portfolio and changes over the life of the EEA as the credit quality of these loans changes.

For a guarantee received under an EEA, IBRD records an asset equivalent to the fair value of the right to be indemnified. This asset is included in Other assets – Miscellaneous on the Balance Sheets and is amortized over the life of the EEA. IBRD also records an asset, and corresponding income, in recognition of the risk coverage received (recoverable asset). The value of this asset reflects the credit quality of the underlying loans in the portfolio and changes over the life of the EEA contract as the credit quality of these loans changes.

Segment Reporting: Based on an evaluation of IBRD's operations, Management has determined that IBRD has one reportable segment since financial results are reviewed and resource allocation decisions are made at the entity level.

Statements of Cash Flows: For the purpose of IBRD's Statements of Cash Flows, cash is defined as the amount of Unrestricted cash and Restricted cash under the Due from banks line on the Balance Sheets.

Restricted Cash: This includes amounts which have been received from members as part of their capital subscriptions, as well as from donors and other sources, which are restricted for specified purposes. For capital subscriptions, a portion of these subscriptions have been paid to IBRD in the national currencies of the members. These amounts are usable by IBRD in its lending and investing operations, only with the consent of the respective members, and for administrative expenses incurred in national currencies.

Investments: Investment securities are classified based on Management's intention on the date of purchase, their nature, and IBRD's policies governing the level and use of such investments. As of June 30, 2023, all of the financial instruments in IBRD's investment portfolio were classified as trading. These securities are carried and reported at fair value, or at face value or net asset value (NAV), which approximate fair value.

Where available, quoted market prices are used to determine the fair value of trading securities. These include most government and agency securities, exchange-traded equity securities, Asset-backed Securities (ABS), and Mortgage-backed Securities (MBS). For instruments for which market quotations are not available, fair values are determined using model-based valuation techniques, whether internally-generated or vendor-supplied, that include the discounted cash flow method using observable market inputs such as yield curves, credit spreads, and conditional prepayment rates. Where applicable, unobservable inputs such as conditional prepayment rates, probability of default and loss severity are used. Unless quoted prices are available, time deposits are reported at face value which approximates fair value, as they are short term in nature. Purchases and sales of securities are recorded on a trade-date basis. Time deposits and money market deposits are recorded at settlement. The first-in first-out method is used to determine the cost of securities sold in computing the realized gains and losses on these instruments. Derivative instruments used in liquidity management are not designated as hedging instruments for accounting purposes.

Interest revenue is included in the Investments-Trading, net line in the Statements of Income. Unrealized gains and losses for investment securities and related financial instruments held in the trading portfolio are included in the Unrealized mark-to-market gains (losses) on Investments-Trading portfolio, net line in the Statements of Income. Realized gains and losses on trading securities are recognized in the Statements of Income when securities are sold.

IBRD may require collateral in the form of approved liquid securities from individual counterparties or cash, under legal agreements that provide for collateralization, in order to mitigate its credit exposure to these counterparties. For collateral received in the form of cash from counterparties, IBRD invests the amounts received and records the investment and a corresponding obligation to return the cash. Collateral received in the form of liquid securities is only recorded on IBRD's Balance Sheets to the extent that it has been transferred under securities lending agreements in return for cash.

Securities Purchased Under Resale Agreements, Securities Lent Under Securities Lending Agreements and Securities Sold Under Repurchase Agreements and Payable for Cash Collateral Received: Securities purchased under resale agreements, securities lent under securities lending agreements, securities sold under repurchase agreements and payable for cash collateral received are reported at face value which approximates fair value, as they are short term in nature. IBRD receives securities purchased under resale agreements, monitors the fair value of the securities and, if necessary, closes out transactions and enters into new repriced transactions. The securities transferred to counterparties under repurchase and security lending arrangements and the securities transferred to IBRD under resale agreements have not met the accounting criteria for treatment as a sale. Therefore, securities transferred under repurchase agreements and security lending arrangements are retained as assets on the Balance Sheets, and securities received under resale agreements are not recorded on the Balance Sheets. Securities lent under securities lending agreements and sold under securities repurchase agreements as well as securities purchased under resale agreements are presented on a gross basis which is consistent with the manner in which these instruments are settled. The interest earned from securities purchased under resale agreements is included in Investments–Trading, net in the Statements of Income. The interest expense pertaining to the securities sold under repurchase agreements and security lending arrangements, is included in the Borrowing expenses, net line in the Statements of Income.

Nonnegotiable, Noninterest-bearing Demand Obligations on Account of Subscribed Capital: All demand obligations are held in bank accounts which bear IBRD’s name and are carried and reported at face value as a reduction to equity. Payments on some of these instruments are due to IBRD upon demand. Others are due to IBRD on demand, but only after IBRD’s callable subscribed capital has been entirely called pursuant to Article IV, Section 2 (a) of the Articles of Agreement.

Premises and Equipment: Premises and equipment, including leasehold improvements, and information technology assets are carried at cost less accumulated depreciation and amortization. IBRD computes depreciation and amortization using the straight-line method over the estimated useful lives of the owned assets, which range between three and fifty years. For leasehold improvements, depreciation is computed over the lesser of the remaining term of the leased facility or the estimated economic life of the improvement.

Maintenance and repairs are charged to expense as incurred, while major improvements are capitalized and amortized over the estimated useful life.

Lessee Arrangements: IBRD’s lessee arrangements are mostly real estate operating leases. Under these arrangements, IBRD records right-of-use assets and lease liabilities at lease commencement. Right-of-use assets are reported in Other assets - Premises and equipment, net and the related lease liabilities are reported in Other liabilities

- Accounts payable and miscellaneous liabilities. IBRD has elected to account for the lease and non-lease components together as a single lease component. At lease commencement, lease liabilities are recognized based on the present value of the remaining lease payments and discounted using IBRD’s incremental borrowing rate. All leases are recorded on the Balance Sheets except short-term leases with an initial term of 12 months or less. Lease expense, including that for short-term leases, is recognized on a straight-line basis over the lease term and is recorded in Administrative expenses in the Statements of Income.

Borrowings: To ensure funds are available for lending and liquidity purposes, IBRD borrows in the international capital markets, offering its securities (discount notes, vanilla and structured bonds) to private and governmental buyers. IBRD issues debt instruments of varying maturities denominated in various currencies with both fixed and variable interest rates.

IBRD has elected the fair value option for all borrowings. All changes in fair value are recognized in the related Unrealized mark-to-market gains and losses on non-trading portfolios, net, line in the Statements of Income, except for changes in the fair value related to IBRD’s own credit risk, which are reported in Other

Comprehensive Income (OCI) as a Debit Valuation Adjustment (DVA). The DVA on fair value option elected liabilities is measured by revaluing each borrowing instrument to determine the changes in fair value of that instrument arising from changes in IBRD's funding spread relative to the applicable reference rate.

Structured bonds issued by IBRD have coupon or repayment terms linked to the level or the performance of interest rates, foreign exchange rates, equity indices, catastrophic events or commodities.

For the purpose of the Statements of Cash Flows, short-term borrowings, if any, with original maturities less than 90 days, are presented net of new issuances and retirements. By contrast, short-term borrowings with original maturities greater than 90 days and up to one year are presented on a gross basis.

Interest expense relating to all debt instruments in IBRD's borrowing portfolio is measured on an effective yield basis and is reported as part of Borrowing expenses, net in the Statements of Income.

Amortization of discounts and premiums is recorded using the effective interest method and is included in the Borrowing expenses, net line in the Statements of Income.

Accounting for Derivatives: IBRD has elected not to designate any hedging relationships for accounting purposes. Rather, all derivative instruments are reported at fair value on the Balance Sheets, with changes in fair values accounted for through the Statements of Income.

The presentation of derivative instruments on IBRD's Balance Sheets reflects the netting of derivative asset and liability positions and the related cash collateral received from the counterparty, when a legally enforceable master netting agreement exists, and the other conditions are met. In addition, in the Notes to the financial statements, unless stated differently, derivatives are presented on a net basis by instrument.

A master netting agreement is an industry standard agreement with a counterparty that permits multiple transactions governed by that agreement to be terminated or accelerated and settled through a single payment in a single currency in the event of a default (e.g., bankruptcy, failure to make a required payment or transfer security or deliver collateral when due). Obligations under master netting agreements are often secured by collateral posted under an industry standard credit support annex to the master netting agreement. Upon default by the counterparty, the collateral agreement grants an entity the right to set-off any amounts payable by the counterparty against any posted collateral.

IBRD uses derivative instruments in its investment trading portfolio to manage interest rate and currency risks. These derivatives are carried and reported at fair value. Interest revenue/expenses are reflected as part of Interest revenue, while unrealized mark-to-market gains and losses on these derivatives are reflected as part of the Unrealized mark-to-market gains (losses) in Investments-Trading, net line in the Statements of Income.

IBRD also uses derivatives in its loan, borrowing and asset/liability management activities. It also offers derivative intermediation services to clients. In the loan and borrowing portfolios, derivatives are used to modify the interest rate and/or currency characteristics of these portfolios. The interest component of these derivatives is recognized as an adjustment to the related loan revenue and borrowing costs over the life of the derivative contracts and is included in the related Interest revenue/expenses lines in the Statements of Income. Changes in fair values of these derivatives are recorded in the Statements of Income as Unrealized mark-to-market gains and losses in non-trading portfolios, net.

For the purpose of the Statements of Cash Flows, IBRD has elected to report the cash flows associated with the derivative instruments that are used to economically hedge its loans, investments and borrowings, in a manner consistent with the presentation of the related loan, investment and borrowing cash flows.

Derivative contracts include currency forward contracts, to-be-announced (TBA) securities, swaptions, exchange traded options and futures contracts, currency swaps and interest rate swaps. Currency swaps and interest rate

swaps are either plain vanilla or structured. Currency forward contracts and plain vanilla currency and interest rate swaps are valued using the discounted cash flow methods using observable market inputs such as yield curves, foreign exchange rates, basis spreads and funding spreads. For structured currency and interest rate swaps, which primarily consist of callable swaps linked to interest rates, foreign exchange rates, and equity indices, valuation models and inputs similar to the ones applicable to structured bond valuations are used. Where applicable, the models also incorporate significant unobservable inputs such as correlations and long-dated interest rate volatilities.

Most outstanding derivative positions are transacted over-the-counter and therefore valued using internally developed valuation models. For commercial and non-commercial counterparties where IBRD has a net receivable position, IBRD calculates a Credit Valuation Adjustment (CVA) to reflect credit risk. For net derivative positions with commercial and non-commercial counterparties where IBRD is in a net payable position, IBRD calculates a DVA to reflect its own credit risk. The CVA is calculated using future projected exposures of the derivative contracts, net of collateral received under credit support agreements, and the probability of counterparty default based on the Credit Default Swaps (CDS) spread and, where applicable, proxy CDS spreads. The DVA calculation is generally consistent with the CVA methodology and incorporates IBRD's own credit spread as observed through the CDS market.

Valuation of Financial Instruments: IBRD has an established and documented process for determining fair values. Fair value is based upon quoted market prices for the same or similar securities, where available. Financial instruments for which quoted market prices are not readily available are valued based on discounted cash flow models and other established valuation models. These models primarily use market-based or independently-sourced market parameters such as yield curves, interest rates, volatilities, foreign exchange rates and credit curves, and may incorporate unobservable inputs, some of which may be significant. Selection of these inputs may involve some judgment. In instances where management relies on instrument valuations supplied by external pricing vendors, there are procedures in place to validate the appropriateness of the models used as well as inputs applied in determining those values. The fair value of certain instruments is calculated using NAV as a practical expedient. To ensure that the valuations are appropriate where internally-developed models are used, IBRD has various controls in place, which include both internal and periodic external verification and review.

Fair Value Hierarchy: Financial instruments are categorized based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1), the next highest priority to observable market-based inputs or inputs that are corroborated by market data (Level 2) and the lowest priority to unobservable inputs that are not corroborated by market data (Level 3).

Financial assets and liabilities recorded at fair value on the Balance Sheets are categorized based on the inputs to the valuation techniques as follows:

Level 1: Financial assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2: Financial assets and liabilities whose values are based on quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; or pricing models for which all significant inputs are observable, either directly or indirectly for substantially the full term of the asset or liability.

Level 3: Financial assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement.

IBRD's policy is to recognize transfers in and transfers out of levels as of the end of the reporting period in which they occur.

Investments measured at NAV (or its equivalent) are not classified in the fair value hierarchy.

Accounting for Grant Expenses: IBRD recognizes an expense for unconditional grants, such as Contributions to Special Programs and most Board of Governors-approved and other transfers, upon approval. IBRD recognizes an expense for conditional grants when the conditions specified for use by the beneficiaries have been met.

Trust Funds: To the extent that IBRD acts as an agent for, or controls IBRD-executed trust funds, assets held on behalf of specified beneficiaries are recorded on IBRD's Balance Sheet, along with corresponding liabilities. Amounts disbursed from these trust funds are recorded as expenses with corresponding amounts recognized as revenues. For Recipient-executed trust funds, since IBRD acts as a trustee, no assets or liabilities relating to these activities are recorded on the Balance Sheets. In some trust funds, execution is split between Recipient-executed and IBRD-executed portions. Decisions on assignment of funding resources between the two types of execution may be made on an ongoing basis, therefore, the execution of a portion of these available resources may not yet be assigned.

IBRD also acts as a financial intermediary to provide specific administrative or financial services with a limited fiduciary or operational role. These arrangements, referred to as Financial Intermediary Funds, include, for example, administration of debt service trust funds, financial intermediation and other more specialized limited fund management roles. For these arrangements, funds are held and disbursed in accordance with instructions from donors or, in some cases, an external governance structure or a body operating on behalf of donors. For Financial Intermediary Funds, since IBRD acts as a trustee, no assets or liabilities relating to these activities are recorded on the Balance Sheets.

Accounting and Reporting Developments

Evaluated Accounting Standards:

In December 2022, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) 2022-06—*Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848*. The ASU extended the timeline for temporary relief to certain contract modification guidance provided by ASU 2020-04—*Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting* from December 31, 2022 to December 31, 2024. ASU 2022-06 was effective upon issuance, and the adoption did not have a material impact on IBRD's financial statements.

In June 2022, FASB issued Accounting Standard Update (ASU) 2022-03, *Fair Value Measurement (Topic 820) Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions*, which clarifies that a contractual restriction on the sale of an equity security is not considered part of the unit of account of the equity security and should not be factored in when measuring fair value. The ASU also clarifies that an entity cannot, as a separate unit of account, recognize and measure a contractual sale restriction. The ASU requires certain disclosures for equity securities subject to contractual sale restrictions. For IBRD, the ASU will be effective from the quarter ending September 30, 2024 (fiscal year 2025 for IBRD), and the adoption of this ASU is not expected to have a material impact on IBRD's financial statements.

In March 2022, the FASB issued ASU 2022-02, *Troubled Debt Restructurings and Vintage Disclosures*, which eliminates the accounting guidance on troubled debt restructurings (TDRs) for creditors and amends the guidance on "vintage disclosures" to require disclosure of current-period gross write-offs by year of origination. This ASU will be effective from the quarter ending September 30, 2023 (fiscal year 2024 for IBRD), and the adoption of this ASU is not expected to have a material impact on IBRD's financial statements.

In November 2021, the FASB issued ASU 2021-10, *Disclosure by Business Entities about Government Assistance*, which requires entities to make certain annual disclosures about government assistance transactions. This ASU is effective for the annual period ending June 30, 2023 (annual statements of fiscal year 2023). IBRD has evaluated the ASU and determined that no additional disclosures are required on its financial statements.

NOTE B—CAPITAL STOCK, MAINTENANCE OF VALUE, AND MEMBERSHIP

The following table provides a summary of the changes in IBRD's authorized and subscribed shares:

Table B1: IBRD's shares

	<u>Authorized shares</u>	<u>Subscribed shares</u>
As of June 30, 2021	2,783,873	2,469,065
General Capital Increase/Selective Capital Increase (GCI/SCI)	—	76,919
As of June 30, 2022	2,783,873	2,545,984
GCI/SCI	—	88,744
As of June 30, 2023	<u>2,783,873</u>	<u>2,634,728</u>

The following table provides a summary of the changes in subscribed capital, uncalled portion of subscriptions, and paid-in capital:

Table B2: IBRD's capital

In millions of U.S. dollars

	<u>Subscribed capital</u>	<u>Uncalled portion of subscriptions</u>	<u>Paid-in capital</u>
As of June 30, 2021	\$297,856	\$(278,612)	\$19,244
GCI/SCI	9,279	(8,024)	1,255
As of June 30, 2022	307,135	(286,636)	20,499
GCI/SCI	10,705	(9,385)	1,320
As of June 30, 2023	<u>\$317,840</u>	<u>\$(296,021)</u>	<u>\$21,819</u>

The uncalled portion of subscriptions is subject to call only when required to meet the obligations incurred by IBRD as a result of borrowings or guaranteeing loans.

On October 1, 2018, IBRD's Board of Governors approved two resolutions that increased IBRD's authorized capital. The total increase in authorized capital was \$57.5 billion, of which, \$27.8 billion and \$29.7 billion relate to the GCI and SCI, respectively. Under the terms of the 2018 GCI and SCI, paid-in capital is expected to increase by up to \$7.5 billion. On May 23, 2023, the Board approved the extension of the subscription period for GCI and SCI from October 1, 2023 to October 1, 2025. As of June 30, 2023, the cumulative subscription payments received under the 2018 capital increases was \$5.4 billion.

Amounts to Maintain the Value of Currency Holdings

The following table summarizes the amounts to Maintain the Value of Currency (MOV), classified as components of equity:

Table B3: MOV balances

In millions of U.S. dollars

	<u>June 30, 2023</u>	<u>June 30, 2022</u>
MOV receivable	\$(345)	\$(354)
Net Deferred MOV (receivable)/payable	(306)	(294)
Deferred demand obligations	(130)	(130)
Deferred MOV (receivable)/payable	<u>\$(436)</u>	<u>\$(424)</u>

NOTE C—INVESTMENTS

IBRD's investments include the liquid asset portfolio, and holdings relating the Post Employment Benefit Plan (PEBP), the Post Retirement Contribution Reserve Fund (PCRF), and the Local Currency Market Development (LCMD) investments. LCMD investments are sovereign bonds denominated in the local currencies of less developed markets, and funded by borrowings in the same currency with matching volume, payment and maturity characteristics.

Investments held by IBRD are designated as trading and reported at fair value, or at face value, which approximates fair value. As of June 30, 2023, Investments were primarily comprised of government and agency obligations, and time deposits (49% and 47%, respectively), with all the instruments classified as Level 1 or Level 2 within the fair value hierarchy. As of June 30, 2023, the largest holdings of investments from a single counterparty was the Monetary Authority of Singapore (8%).

A summary of IBRD's Investments-Trading is as follows:

Table C1: Investments – Trading composition

In millions of U.S. dollars

	<u>June 30, 2023</u>	<u>June 30, 2022</u>
Government and agency obligations	\$39,046	\$38,727
Time deposits	36,809	39,454
Asset-backed Securities (ABS)	1,087	1,603
Other fund investments ^a	1,982	1,704
Equity securities ^a	275	295
Total	<u>\$79,199</u>	<u>\$81,783</u>

a. *Related to PEBP holdings. Other fund investments are comprised of investments in hedge funds, private equity funds, commingled funds, credit strategy funds and real estate funds, at net asset value (NAV).*

IBRD manages its investments on a net portfolio basis. The following table summarizes IBRD's net portfolio position:

Table C2: Net investment portfolio position

In millions of U.S. dollars

	<u>June 30, 2023</u>	<u>June 30, 2022</u>
Investments-Trading	\$79,199	\$81,783
Securities purchased under resale agreements	78	37
Securities sold under repurchase agreements, securities lent under securities lending agreements, and payable for cash collateral received ^a	(149)	(201)
Derivative assets		
Currency swaps and forward contracts	926	941
Interest rate swaps	18	19
Other	—	2
Total	<u>944</u>	<u>962</u>
Derivative liabilities		
Currency swaps and forward contracts	(33)	(55)
Interest rate swaps	(300)	(523)
Other	(6)	—
Total	<u>(339)</u>	<u>(578)</u>
Cash held in investment portfolio ^b	385	262
Receivable from investment securities traded	102	103
Payable for investment securities purchased ^c	(1,025)	(311)
Net investment portfolio	<u>\$79,195</u>	<u>\$82,057</u>

a. Includes \$140 million of cash collateral received from counterparties under derivative agreements (\$164 million—June 30, 2022).

b. This amount is included in Unrestricted cash under Due from banks on the Balance Sheets.

c. This amount includes \$385 million of liabilities related to IFC PCRf payable, which is included in Other liabilities – Accounts payable and miscellaneous liabilities on the Balance Sheets (\$260 million—June 30, 2022), and \$59 million of liabilities related to short sales (Nil—June 30, 2022).

The composition of IBRD's net investment portfolio was as follows:

Table C3: Net investment portfolio composition

In millions of U.S. dollars

	<u>June 30, 2023</u>	<u>June 30, 2022</u>
Net investment portfolio		
Liquid asset portfolio	\$75,413	\$78,796
PEBP holdings	2,684	2,456
PCRf holdings	1,098	766
LCMD investments	—	39
Total	<u>\$79,195</u>	<u>\$82,057</u>

IBRD uses derivative instruments to manage the associated currency and interest rate risk in the portfolio. For details regarding these instruments, see Note F—Derivative Instruments. After considering the effects of these derivatives, IBRD's investment portfolio is predominantly denominated in U.S. dollars.

Commercial Credit Risk

For the purpose of risk management, IBRD is party to a variety of financial transactions, certain of which involve elements of credit risk. Credit risk exposure represents the maximum potential loss due to possible non-performance by obligors and counterparties under the terms of the contracts. For all securities, IBRD limits trading to a list of authorized dealers and counterparties. In addition, IBRD may require collateral in connection with resale and swap agreements. The collateral serves to mitigate IBRD's exposure to credit risk.

Swap Agreements: Credit risk is mitigated through the application of eligibility criteria and volume limits for transactions with individual counterparties and through the use of mark-to-market collateral arrangements for swap transactions. IBRD may require collateral in the form of cash or other approved liquid securities from individual counterparties in order to mitigate its credit exposure.

IBRD has entered into master derivative agreements, which contain legally enforceable close-out netting provisions. These agreements may further reduce the gross credit risk exposure related to the swaps. Credit risk with financial assets subject to a master derivatives arrangement is further reduced under these agreements to the extent that payments and receipts with the counterparty are netted at settlement. The reduction in exposure as a result of these netting provisions can vary due to the impact of changes in market conditions on existing and new transactions. The extent of the reduction in exposure may, therefore, change substantially within a short period of time following the balance sheet date. For more information on netting and offsetting provisions see Note F—Derivative Instruments.

The following is a summary of the collateral received by IBRD related to swap transactions:

Table C4: Collateral received

In millions of U.S. dollars

	<u>June 30, 2023</u>	<u>June 30, 2022</u>
Collateral received		
Cash	\$140	\$164
Securities	<u>161</u>	<u>427</u>
Total collateral received	<u>\$301</u>	<u>\$591</u>
Collateral permitted to be repledged	\$301	\$591
Amount of collateral repledged	—	—
Amount of cash collateral invested	134	143

Securities Lending: IBRD may engage in securities lending and repurchases, against adequate collateral, as well as secured borrowing and reverse repurchases (resales) of government and agency obligations, corporate securities, ABS and MBS. These transactions, if any, are conducted under legally enforceable master netting arrangements, which allow IBRD to reduce its gross credit exposure related to these transactions. For balance sheet presentation purposes, IBRD presents its securities lending and repurchases, as well as resales, on a gross basis. As of June 30, 2023, and June 30, 2022, there were no amounts which could potentially be offset as a result of legally enforceable master netting arrangements.

Securities lending and repurchase agreements expose IBRD to several risks, including counterparty risk, reinvestment risk, and risk of a collateral gap (increase or decrease in the fair value of collateral pledged). IBRD has procedures in place to ensure that trading activity and balances under these agreements are below predefined counterparty and maturity limits, and to actively manage net counterparty exposure, after collateral, using daily market values. Whenever the collateral pledged by IBRD related to its borrowings under repurchase agreements and securities lending agreements declines in value, the transaction is re-priced as appropriate by returning cash or pledging additional collateral.

Transfers of securities by IBRD to counterparties are not accounted for as sales as the accounting criteria for the treatment as a sale have not been met. Counterparties are permitted to repledge these securities until the repurchase date.

As of June 30, 2023, liabilities relating to securities transferred under repurchase or securities lending agreements amounted to \$9 million (\$37 million — June 30, 2022) and there were no unsettled trades relating to repurchase or securities lending agreements. There were no replacement trades entered into in anticipation of maturing trades of a similar amount (Nil— June 30, 2022). As of June 30, 2023 and June 30, 2022, the remaining contractual maturity of these agreements were overnight and continuous. The securities transferred were mainly comprised of government and agency obligations and equity securities.

In the case of resale agreements, IBRD receives collateral in the form of liquid securities and is permitted to repledge these securities. While these transactions are legally considered to be true purchases and sales, the securities received are not recorded on IBRD's Balance Sheets as the accounting criteria for treatment as a sale have not been met. As of June 30, 2023 and June 30, 2022, there were no unsettled trades pertaining to securities purchased under resale agreements. For resale agreements, IBRD received securities with a fair value of \$78 million (\$38 million — June 30, 2022). As of June 30, 2023, and June 30, 2022, none of these securities had been transferred under repurchase or security lending agreements.

NOTE D—LOANS AND OTHER EXPOSURES

IBRD's loans and other exposures (collectively "exposures") are generally made to, or guaranteed by, member countries of IBRD. In addition, IBRD may also make loans to the International Finance Corporation (IFC), an affiliated organization, without any guarantee. As of June 30, 2023, all IBRD's loans were reported at amortized cost.

IBRD's loan portfolio includes loans with multicurrency terms, variable spread terms and fixed spread terms. As of June 30, 2023, only loans with variable spread terms (including special development policy loans), were available for new commitments. Effective April 1, 2021, IBRD suspended the offering of loans on fixed spread terms.

As of June 30, 2023, 86% of IBRD's loans carried variable interest rates. IBRD uses derivative instruments to manage the currency risk as well as repricing risk between its loans and borrowings. After the effects of these derivatives, the entire loan portfolio carried variable interest rates, with a weighted average interest rate of 5.63% as of June 30, 2023 (1.92%—June 30, 2022). For details regarding derivatives used in the loan portfolio see Note F— Derivative Instruments.

The majority of IBRD's loans outstanding are denominated in U.S. dollars (80%) and euro (18%).

IBRD excludes the interest receivable balance from the amortized cost basis and from the related disclosures. As of June 30, 2023, accrued interest receivable on loans of \$3,138 million is included in Other Receivables – Accrued income on loans and guarantee fees receivable in the Balance Sheets (\$1,029 million—June 30, 2022).

As of June 30, 2023, 0.6% of IBRD's loans were in nonaccrual status and related to two borrowers (see Table D6: Loans in nonaccrual status). The total accumulated provision for losses on loans in accrual and nonaccrual loans accounted for 1.0% of the total loan portfolio. Based on IBRD's internal credit quality indicators, the majority of loans outstanding are in the medium-risk or high-risk classes.

A summary of IBRD's loans outstanding by currency and by interest rate characteristics (fixed or variable) is as follows:

Table D1: Loans outstanding currency and interest rate structure

Credit Quality of Sovereign Exposures

Based on an evaluation of IBRD's exposures, management has determined that IBRD has one portfolio segment – Sovereign Exposures. IBRD's loans constitute the majority of the Sovereign Exposures portfolio segment.

IBRD's country risk ratings are an assessment of its borrowers' ability and willingness to repay IBRD on time and in full. These ratings are internal credit quality indicators. Individual country risk ratings are derived on the basis of both quantitative and qualitative analysis. The components considered in the analysis can be grouped

broadly into eight categories: political risk, external debt and liquidity, fiscal policy and public debt burden, balance of payments risks, economic structure and growth prospects, monetary and exchange rate policy, financial sector risks, and corporate sector debt and vulnerabilities. The analysis also takes into account Environmental, Social, and Governance (ESG) factors. For the purpose of analyzing the risk characteristics of IBRD's exposures, these exposures are grouped into three classes in accordance with assigned borrower risk ratings, which relate to the likelihood of loss: Low, Medium and High-risk classes, as well as exposures in nonaccrual status.

IBRD's borrowers' country risk ratings are key determinants in the provision for losses. Country risk ratings are grouped in pools of borrowers with similar credit ratings for the purpose of the calculation of the expected credit losses. Exposure for certain countries in accrual status may be individually assessed on the basis that they do not share common risk characteristics with an existing pool of exposures. All exposures for countries in nonaccrual status are individually assessed. Country risk ratings are determined in review meetings that take place several times a year. All countries are reviewed at least once a year, or more frequently, if circumstances warrant, to determine the appropriate ratings.

An assessment was also performed to determine whether a qualitative adjustment of the loan loss provision was needed as of June 30, 2023, including consideration of global and macroeconomic events. Management concluded that a qualitative adjustment beyond the regular application of IBRD's loan loss provision framework was not warranted.

The following tables provides an aging analysis of the loan portfolio:

Table D3: Loan portfolio aging structure

IBRD considers the signature date of a loan agreement as the best indicator of the decision point in the origination process, rather than the disbursement date. The table below discloses the outstanding balances of IBRD's loan portfolio as of June 30, 2023 and June 30, 2022, classified by the year the loan agreement was signed.

Table D4: Loan portfolio vintage disclosure

The amount of Catastrophe Deferred Drawdown Option (CAT DDOs) converted to term loans during the fiscal year ended June 30, 2023, is \$473 million (\$671 million—June 30, 2022).

Accumulated Provision for Losses on Loans and Other Exposures

Management determines the appropriate level of accumulated provision for losses, which reflects the expected losses inherent in IBRD's exposures.

Changes to the accumulated provision for losses on loans and other exposures are summarized below:

Table D5: Accumulated provision

In millions of U.S. dollars

	<i>June 30, 2023</i>			
	<i>Loans outstanding</i>	<i>Loan commitments</i>	<i>Other^a</i>	<i>Total</i>
Accumulated provision, beginning of the fiscal year	\$ 1,742	\$359	\$64	\$2,165

Overdue Amounts

IBRD considers loans to be past due when a borrower fails to make payment on any principal, interest or other charges due to IBRD on the dates provided in the contractual loan agreement.

As of June 30, 2023, there were no principal or interest amounts on loans in accrual status that were overdue by more than three months.

The following table provides a summary of selected financial information related to loans in nonaccrual status as of and for the stated fiscal years:

Table D6: Loans in nonaccrual status

In millions of U.S. dollars

<u>Borrower</u>	<u>Nonaccrual since</u>	<u>Recorded investment</u>	<u>Accumulated Provision for loan losses</u>	<u>Average recorded investment</u>	<u>Overdue amounts</u>

Zimbabwe	October 2000	427	213	427	427	660
Total - June 30, 2023		<u>\$1,425</u>	<u>\$322</u>	<u>\$1,419</u>	<u>\$598</u>	<u>\$690</u>
Total - June 30, 2022		<u>\$ 428</u>	<u>\$214</u>	<u>\$ 430</u>	<u>\$428</u>	<u>\$633</u>

Effective October 17, 2022, all loans made to or guaranteed by Belarus were placed in nonaccrual status. No loans to any borrowing country were restored to accrual status during the fiscal years ended June 30, 2023 and June 30, 2022.

During the fiscal year ended June 30, 2023, interest and other revenue not recognized as a result of loans being in nonaccrual status was \$69 million (\$27 million—June 30, 2022 and \$27 million—June 30, 2021).

In addition, during the fiscal year ended June 30, 2023, \$2 million of interest revenue was recognized on loans in nonaccrual status upon receipt of payment (less than \$1 million—June 30, 2022 and less than \$1 million—June 30, 2021).

Guarantees

Guarantees provided

Guarantees of \$6,542 million were outstanding as of June 30, 2023 (\$6,379 million—June 30, 2022). This amount represents the maximum potential amount of undiscounted future payments that IBRD could be required to make under these guarantees, and is not included in the Balance Sheets. These guarantees have original maturities ranging between 10 and 21 years, and expire in decreasing amounts through 2042.

As of June 30, 2023, liabilities related to IBRD's obligations under guarantees included the obligation to stand ready of \$303 million (\$298 million—June 30, 2022), and the accumulated provision for guarantee losses of \$76 million (\$59 million—June 30, 2022). These are included in Other liabilities—Accounts payable and miscellaneous liabilities on the Balance Sheets.

During the fiscal years ended June 30, 2023 and June 30, 2022, no guarantees provided by IBRD were called.

IBRD participates in EEAs which are recognized as financial guarantees in the financial statements. Information on the location and amounts associated with the EEAs executed with Multilateral Investment Guarantee Agency (MIGA), African Development Bank and Inter-American Development Bank included on the Balance Sheets and in the Statements of Income is presented in the following table:

Table D7: Amounts associated with EEA

In millions of U.S. dollars

	June 30, 2023			June 30, 2022			provision) Location on asset Balance Sheet
	Notional amount	(Stand ready obligation) Asset	(Accumulated provision) Recoverable asset	Notional amount	(Stand ready obligation) Asset	(Accumulated provision) Recoverable asset	
Guarantees provided ^{a,c}	\$ 3,619	\$(149)	\$(29)	\$ 3,630	\$(170)	\$(27)	Other liabilities
Guarantees received ^b	(3,619)	149	27	(3,630)	170	25	Other assets
.....	\$ —	\$—	\$ (2)	\$ —	\$—	\$ (2)	

- For the fiscal year ended June 30, 2023, Provisions for losses on loans and other exposures line on the Statements of Income includes \$2 million charge relating to Guarantees provided (\$7 million of charge — June 30, 2022 and less than \$1 million release of provision—June 30, 2021)
- For the fiscal year ended June 30, 2023, Non-interest revenue—Other, net, line on the Statements of Income includes \$2 million of gain in recoverable asset relating to Guarantees received (\$8 million of gain in recoverable asset —June 30, 2022 and less than \$1 million of reduction in recoverable asset —June 30, 2021).
- Notional amount, obligation to stand ready and provision for the guarantees provided are included in guarantees outstanding of \$6,542 million, obligations to stand ready of \$303 million and accumulated provision for guarantee losses of \$76 million, respectively (\$6,379 million, \$298 million and \$59 million, respectively—June 30, 2022).

Guarantees received

As of June 30, 2023, IBRD had received third-party guarantees totaling \$3,325 million (\$2,116 million as of June 30, 2022) that are contractually attached to the loan. These guarantees increase IBRD’s lending capacity in certain countries. IBRD considers the benefit of these credit enhancements in the determination of the loan loss provision.

Waivers of Loan Charges

The Executive Directors have approved waivers of certain charges on eligible loans. These include a portion of interest on loans, a portion of the commitment charge on undisbursed balances, and a portion of the front-end fee. The forgone income resulting from waivers of loan charges was \$16 million for the year ended June 30, 2023 (\$20 million —June 30, 2022 and \$31 million —June 30, 2021).

Concentration Risk

Loan revenue comprises interest, commitment fees, loan origination fees and prepayment premiums, net of waivers. For the fiscal year ended June 30, 2023, there was no country that contributed more than 10% of the total loan revenue.

Information about IBRD's loan revenue and associated loans outstanding by geographic region is presented in the following table:

Table D8: Loan revenue and associated outstanding loan balances

In millions of U.S. dollars

<i>Region</i>	<i>As of and for the fiscal years ended June 30,</i>			
	<i>2023</i>		<i>2022</i>	
	<i>Loan Revenue^a</i>	<i>Loan Outstanding</i>	<i>Loan Revenue^a</i>	<i>Loans Outstanding</i>
Latin America and the Caribbean	\$ 3,484	\$ 78,233	\$1,287	\$ 72,417
East Asia and Pacific	2,315	50,140	638	48,826
Europe and Central Asia	1,605	48,029	463	46,033
Middle East and North Africa	1,313	33,733	443	31,675

Eastern and Southern Africa	373	8,001	244	6,667
Western and Central Africa	53	1,898	33	1,718
Total	<u>\$10,279</u>	<u>\$243,896</u>	<u>\$3,365</u>	<u>\$229,344</u>

a. Does not include interest expenses, net from loan related derivatives. Includes commitment charges of \$124 million for the fiscal year ended June 30, 2023 (\$126 million—June 30, 2022).

For the fiscal year ended June 30, 2023, Interest revenue—Loans, net on the Statements of Income of \$10,522 million (\$2,368 million—June 30, 2022) includes \$367 million of interest revenue, net from loan related derivatives (interest expense, net of \$871 million—June 30, 2022).

NOTE E—BORROWINGS

IBRD issues unsubordinated and unsecured fixed and variable rate debt in a variety of currencies. Variable rates are primarily based on exchange rates or market interest rates.

Borrowings issued by IBRD are reported at fair value. As of June 30, 2023, 98% of the instruments in the portfolio were classified as Level 2, within the fair value hierarchy. In addition, most of these instruments were denominated in U.S. dollars and euro (62% and 14%, respectively).

IBRD uses derivative contracts, reported at fair value, to manage the currency risk as well as the interest rate risk between its loans and borrowings. For details regarding the derivatives used, see Note F—Derivative Instruments. After the effect of these derivatives, the borrowing portfolio carried variable interest rates, with a weighted average cost of 5.05% as of June 30, 2023 (1.04% as of June 30, 2022).

The following table summarizes IBRD's borrowing portfolio after derivatives:

Table E1: Borrowings and borrowing-related derivatives

In millions of U.S. dollars

	<u>June 30, 2023</u>	<u>June 30, 2022</u>
Borrowings ^a	\$237,265	\$235,173
Currency swaps, net	8,697	8,162
Interest rate swaps, net	20,866	13,574
	<u>\$266,828</u>	<u>\$256,909</u>

a. Includes \$19 million of unsettled borrowings, representing a non-cash financing activity, for which there is a related receivable included in *Other assets—Miscellaneous* on the Balance Sheets as of June 30, 2023 (Nil—June 30, 2022).

For the fiscal year ended June 30, 2023, Borrowing expenses, net in the Statements of Income of \$9,562 million (\$750 million—June 30, 2022 and \$662 million—June 30, 2021) include \$4,237 million of interest expense, net related to derivatives associated with the Borrowing portfolio (interest revenue, net of \$2,317 million—June 30, 2022 and \$3,323 million—June 30, 2021).

The following table provides a summary of the interest rate characteristics of IBRD's borrowings:

Table E2: Interest rate composition of Borrowings

In millions of U.S. dollars, except as otherwise noted

	<u>June 30, 2023</u>	<u>WAC ^a (%)</u>	<u>June 30, 2022</u>	<u>WAC ^a (%)</u>
Fixed	\$232,316	1.93	\$222,748	1.53
Variable	29,969	9.29	31,120	3.71
Borrowings ^b	\$262,285	2.76%	\$253,868	1.80%
Fair Value Adjustment	(25,020)		(18,695)	
Borrowings at fair value	<u>\$237,265</u>		<u>\$235,173</u>	

a. WAC refers to weighted average borrowings cost as of the reporting date.

b. At amortized cost.

The currency composition of IBRD's borrowing portfolio before derivatives was as follows:

Table E3: Currency composition of Borrowings (before derivatives)

	<u>June 30, 2023</u>	<u>June 30, 2022</u>
U.S. Dollar	62.3%	63.6%
Euro	13.6	11.6
Others	24.1	24.8
	<u>100.0%</u>	<u>100.0%</u>

The maturity structure of IBRD's borrowings outstanding was as follows:

Table E4: Maturity structure of Borrowings

In millions of U.S. dollars

	<u>June 30, 2023</u>	<u>June 30, 2022</u>
Less than 1 year	\$ 38,996	\$ 42,289
Between 1-2 years	31,917	28,483
2-3 years	29,004	32,274
3-4 years	27,040	27,479
4-5 years	25,850	19,163
Thereafter	84,458	85,485
	<u>\$237,265</u>	<u>\$235,173</u>

IBRD's borrowings have original maturities ranging from 17 days to 50 years, with the final maturity in 2069.

NOTE F—DERIVATIVE INSTRUMENTS

IBRD uses derivative instruments in its investment, loan and borrowing portfolios, and for asset/liability management purposes. It also offers derivative intermediation services to clients and, concurrently, enters into offsetting transactions with market counterparties.

The following table summarizes IBRD's use of derivatives in its various financial portfolios:

<i>Portfolio</i>	<i>Derivative instruments used</i>	<i>Purpose / Risk being managed</i>
Risk management purposes:		
Investments	Currency swaps, currency forward contracts, interest rate swaps, options, swaptions and futures contracts, TBA securities	Manage currency and interest rate risks
Loans	Currency swaps and interest rate swaps	Manage currency risk as well as interest rate risk between loans and borrowings
Borrowings	Currency swaps and interest rate swaps	Manage currency risk as well as interest rate risk between loans and borrowings
Other asset/liability management derivatives	Currency swaps and interest rate swaps	Manage currency risk and the duration of IBRD's equity
Other purposes:		
Client operations	Currency swaps, currency forward contracts, and interest rate swaps	Assist clients in managing risks

Under client operations, derivative intermediation services are provided to the following:

Borrowing Countries: Currency and interest rate swap transactions are executed between IBRD and its borrowers under master derivatives agreements.

Non-Affiliated Organizations: IBRD has a master derivatives agreement with the International Finance Facility for Immunisation (IFFIm), under which several transactions have been executed.

Affiliated Organizations: Derivative contracts are executed between IBRD and IDA, under an agreement allowing IBRD to intermediate derivative contracts on behalf of IDA.

The derivatives in the related tables of Note F are presented on a net basis by instrument. A reconciliation to the Balance Sheets presentation is shown in table F1.

Offsetting assets and liabilities

IBRD enters into International Swaps and Derivatives Association, Inc. (ISDA) master netting agreements with substantially all of its derivative counterparties. These legally enforceable master netting agreements give IBRD the right to liquidate securities held as collateral and to offset receivables and payables with the same counterparty, in the event of default by the counterparty.

The following tables summarize the gross and net derivative positions by instrument type. Instruments that are in a net asset position are included in the Derivative Assets columns and instruments that are in a net liability position are included in the Derivative Liabilities columns. The gross columns represent the fair value of the instrument leg that is in an asset or liability position that are then netted with the other leg of the instrument in the gross offset columns. The effects of the master netting agreements are applied on an aggregate basis to the total derivative asset and liability positions and are presented net of any cash collateral received on the Balance Sheets. The net derivative asset positions in the tables below have been further reduced by any securities received as collateral to disclose IBRD's net exposure on its derivative asset positions.

Table F1: Derivative assets and liabilities before and after netting adjustments

In millions of U.S. dollars

	June 30, 2023					
	Derivative Assets			Derivative Liabilities		
	Gross Amounts Recognized	Gross Amounts Offset	Net Amounts Presented	Gross Amounts Recognized	Gross Amounts Offset	Net Amounts Presented

a. Includes currency forward contracts.

b. These relate to swaptions, options and futures contracts.

c. Includes \$2 million CVA.

d. Includes \$571 million DVA.

The following table provides information about the credit risk exposures of IBRD's derivative instruments by portfolio, before the effects of master netting arrangements and collateral:

Table F2: Credit risk exposure of the derivative instruments ^a

In millions of U.S. dollars

Portfolio	June 30, 2023		
	Interest rate swaps	Currency swaps (including currency forward contracts)	Total
Investments	\$ 18	\$ 926	\$ 944
Loans	6,032	1,486	7,518
Client operations	323	531	854
Borrowings	1,415	1,680	3,095
Other asset/liability management derivatives	405	—	405
Total Exposure	<u>\$8,193</u>	<u>\$4,623</u>	<u>\$12,816</u>

Table F2.1*In millions of U.S. dollars*

<u>Portfolio</u>	<u>June 30, 2022</u>		
	<u>Interest rate swaps</u>	<u>Currency swaps (including currency forward contracts)</u>	<u>Total</u>
Investments	\$ 19	\$ 941	\$ 960
Loans	4,155	1,374	5,529
Client operations	402	877	1,279
Borrowings	1,728	1,761	3,489
Other asset/liability management derivatives	233	—	233
Total Exposure	<u>\$6,537</u>	<u>\$4,953</u>	<u>\$11,490</u>

a. *Exchange traded instruments are generally subject to daily margin requirements and are deemed to have no material credit risk.*

The volume of derivative contracts is measured using the U.S. dollar equivalent notional balance. The notional balance represents the face value, or reference value, on which the calculations of interim and final payments on the derivative instruments are determined. As of June 30, 2023, the notional amounts of IBRD's derivative contracts outstanding were as follows: interest rate contracts \$443,108 million (\$433,539 million as of June 30, 2022), currency swaps \$115,634 million (\$117,856 million as of June 30, 2022), long positions of other derivatives \$360 million (\$185 million as of June 30, 2022), and short positions of other derivatives \$113 million (\$143 million as of June 30, 2022).

IBRD is not required to post collateral under its derivative agreements as long as it maintains a triple-A credit rating. The aggregate fair value of all derivative instruments with credit-risk related contingent features that were in a liability position as of June 30, 2023 was \$27,110 million (\$20,203 million—June 30, 2022). IBRD has not posted any collateral with these counterparties due to its triple-A credit rating.

If the credit-risk related contingent features underlying these agreements were triggered to the extent that IBRD would be required to post collateral as of June 30, 2023, the amount of collateral that would need to be posted would be \$22,746 million (\$16,141 million—June 30, 2022). Subsequent triggers of contingent features would require posting of additional collateral, up to a maximum of \$27,110 million as of June 30, 2023 (\$20,203 million—June 30, 2022). In contrast, IBRD received collateral totaling \$301 million as of June 30, 2023 (\$591 million—June 30, 2022) in relation to swap transactions (see Note C—Investments).

The following table provides information on the amount of unrealized mark-to-market gains and losses on the non-trading derivatives and their location in the Statements of Income:

Table F3: Unrealized mark-to-market gains or losses on non-trading derivatives*In millions of U.S. dollars*

	<u>Reported as:</u>	<u>2023</u>	<u>2022</u>	<u>2021</u>
		Interest rate swaps	Unrealized mark-to-market (losses) gains on non-trading portfolios, net	\$(4,948)
Currency swaps (including currency forward contracts and structured swaps)		(867)	(4,336)	(1,702)
Total		<u>\$(5,815)</u>	<u>\$(18,180)</u>	<u>\$(5,930)</u>

All of the instruments in IBRD's investment portfolio are held for trading purposes. Within the investment portfolio, IBRD holds highly rated fixed income securities, equity securities as well as derivatives. The trading portfolio is primarily held to ensure the availability of funds to meet future cash flow requirements, and for liquidity management purposes.

The following table provides information on the amount of unrealized mark-to-market gains and losses on the net Investment-Trading portfolio and their location in the Statements of Income:

Table F4: Unrealized mark-to-market gains or losses on Investment-Trading portfolio

In millions of U.S. dollars

	<i>Reported as:</i>	<u>2023</u>	<u>2022</u>	<u>2021</u>
Type of instrument ^a

Net income for the year	—	—	—	—	—	1,144	—	—	1,144
As of June 30, 2023	\$293	\$32,053	\$739	\$ 120	\$ 1,271	\$ 1,364	\$ 21	\$ 280	\$36,141

- Represents the cumulative effect of adopting ASU 2016-13 on July 1, 2020. Subsequently transferred from Other reserves to the General Reserve upon IBRD's Executive Directors approval On August 5, 2021.*
- Amounts retained as Surplus from the allocation of net income are approved by the Board of Governors.*
- A concurrent transfer is made from Surplus to Unallocated Net Income (Loss) for all transfers reported in the Statements of Income and authorized to be funded from Surplus.*
- May differ from the sum of individual figures due to rounding.*
- Comprised of non-functional currency translation gains/losses, the unutilized portion of the transfer to the GPG Fund, and revenue from prior years which is set aside for a dedicated purpose.*

IBRD makes net income allocation decisions on the basis of reported net income, adjusted to exclude unrealized mark-to-market gains and losses on non-trading portfolios, net, restricted income, Board of Governors-approved and other transfers, non-functional currency translation adjustments and the allocation to the pension reserve.

On August 4, 2022, IBRD’s Executive Directors approved the following adjustments and allocations relating to the net income earned in the fiscal year ended June 30, 2022, to arrive at allocable income for that fiscal year:

In millions of U.S. dollars

<u>Adjustments and Allocations</u>	<u>Increase (decrease)</u>
Cumulative Fair Value Adjustments, for the Unrealized mark-to-market gain on non-trading portfolios (this excludes realized amounts).	\$3,356
Board of Governors-approved transfers, relating to income earned in prior fiscal years (See Table G2)	354
General Reserve	589
Pension Reserve	46
Other reserves	157
Restricted Retained Earnings	(21)

On August 2, 2022, IBRD’s Board of Governors approved a transfer of \$80 million from Surplus to the Trust fund for Gaza and the West Bank. The transfer was made on August 17, 2022.

On October 14, 2022, IBRD’s Board of Governors approved a transfer to IDA of \$117 million and a transfer of \$100 million to Surplus out of the net income earned in the fiscal year ended June 30, 2022. The transfer to IDA was made on October 20, 2022.

During the fiscal year ended June 30, 2023, \$24 million was utilized out of the cumulative transfers of \$85 million to the IBRD Fund for Innovative Global Public Goods Solutions (GPG Fund). Accordingly, an expense was recognized and Other reserves was reduced, as the conditions specified for use by the beneficiaries had been met. As of June 30, 2023, the unutilized balance of the cumulative transfers to the GPG Fund was \$61 million.

Board of Governors-approved and other transfers that were expensed during the stated fiscal years are included in the following table:

Table G2: Board of Governors-approved and other transfers expensed

In millions of U.S. dollars

<u>Transfers funded from:</u>	<u>2023</u>	<u>2022</u>	<u>2021</u>
Unallocated Net Income:			
IDA	\$117	\$274	\$331
Surplus:			
Trust fund for Gaza and West Bank	80	80	80
Other reserves:			
GPG Fund	24	—	—
Total	<u>\$221</u>	<u>\$354</u>	<u>\$411</u>

There were no amounts payable for the transfers approved by the Board of Governors as of June 30, 2023, and June 30, 2022.

NOTE H—TRANSACTIONS WITH AFFILIATED ORGANIZATIONS

IBRD transacts with affiliated organizations by providing loans, administrative and derivative intermediation services, and through its pension and other postretirement benefit plans.

In addition, IBRD provides transfers to IDA out of its net income, upon approval by the Board of Governors (see Note G—Retained Earnings, Allocations and Transfers).

IBRD had the following receivables from (payables to) its affiliated organizations:

Table H1: IBRD’s receivables and payables with affiliated organizations

Administrative services	Other assets
PCRf investments	Other liabilities
Derivative transactions	Derivative assets/liabilities – net
Pension and other postretirement benefits	Other liabilities

Loans and Other Exposures

IBRD has a Local Currency Loan Facility Agreement with IFC, which is capped at \$300 million. As of June 30, 2023 and June 30, 2022, there were no loans outstanding under this facility.

During the fiscal year ended June 30, 2014, IBRD entered into an EEA with MIGA under which IBRD and MIGA exchange selected exposures, with each divesting exposure in countries where their lending capacities are limited, in return for exposure in countries where they have excess lending capacity. Under the agreement, IBRD and MIGA have each exchanged \$120 million of notional exposure as follows: MIGA assumes IBRD’s loan principal and interest exposure in exchange for IBRD’s assumption of principal and interest exposure of MIGA under its Non-Honoring of Sovereign Financial Obligation agreement. As of June 30, 2023, assets related to IBRD’s right to be indemnified under this agreement amounted to less than \$1 million (\$1 million - June 30, 2022), while liabilities related to IBRD’s obligation under this agreement amounted to less than \$1 million (\$1 million - June 30, 2022). These include an accumulated provision for guarantee losses of less than \$1 million as of June 30, 2023 (less than \$1 million - June 30, 2022).

Administrative Services

Expenses jointly incurred by IBRD and IDA are allocated based on an agreed cost-sharing methodology, and amounts are settled quarterly. For the fiscal year ended June 30, 2023, IBRD’s administrative expenses are net of the share of expenses allocated to IDA of \$1,744 million (\$1,644 million—fiscal year ended June 30, 2022, and \$1,873 million—fiscal year ended June 30, 2021).

Revenue

Revenue jointly earned by IBRD and IDA is allocated based on an agreed revenue-sharing methodology, and amounts are settled quarterly. For the fiscal year ended June 30, 2023, IBRD's other revenue is net of revenue allocated to IDA of \$280 million (\$252 million—fiscal year ended June 30, 2022, and \$261 million—fiscal year ended June 30, 2021), and is included in Revenue from externally funded activities in the Statements of Income. This revenue also includes revenue from contracts with clients, who are not affiliated with IBRD as follows:

Table H2: Revenue from contracts with clients

In millions of U.S. dollars

	<u>2023</u>	<u>2022</u>	<u>2021</u>
Trust fund fees	\$ 119	\$ 93	\$ 82
Reimbursable advisory services	99	88	98
Asset management services	<u>31</u>	<u>30</u>	<u>28</u>
	<u>\$ 249</u>	<u>\$ 211</u>	<u>\$ 208</u>
Of which:			
IBRD's share	\$ 130	\$ 113	\$ 112
IDA's share	119	98	96

Each revenue stream represents compensation for services provided and the related revenue is recognized over time.

When IBRD performs services, its rights to consideration are deemed unconditional and are classified as receivables. IBRD also has an obligation to provide certain services for which it has received consideration in advance. Such considerations are presented as contract liabilities and are subsequently recognized as revenue, when the related performance obligation is satisfied.

The following table shows IBRD's receivables and contract liabilities related to revenue from contracts with clients:

Table H3: Receivables and contract liabilities related to revenue from contract with clients

In millions of U.S. dollars

	<u>June 30, 2023</u>	<u>June 30, 2022</u>
Receivables	\$125	\$103
Contract liabilities	181	179

The amount of fee revenue associated with services provided to affiliated organizations is included in Revenue from externally funded activities in the Statement of Income, as follows:

Table H4: Fee revenue from affiliated organizations

In millions of U.S. dollars

	<u>2023</u>	<u>2022</u>	<u>2021</u>
Fees charged to IFC	\$ 102	\$ 97	\$ 89
Fees charged to MIGA	7	6	6

Pension and Other Postretirement Benefits

The payable to IDA represents IDA's net share of prepaid cost for pension and other postretirement benefit plans and PEBP assets. These will be realized over the life of the plan participants. The payables to IFC and MIGA represent their respective share of PEBP assets.

The PEBP assets are managed by IBRD and are a part of the investment portfolio. For Pension and Other Postretirement Benefits-related disclosures see Note J—Pension and Other Postretirement Benefits.

Derivative Transactions

These relate to currency forward contracts entered into for IDA with IBRD acting as the intermediary with the market.

Investments

These relate to investments that IBRD has made on behalf of IFC, associated with the PCRF and are included in Investments-Trading on IBRD’s Balance Sheets. The corresponding payable to IFC is included in the amount Payable for Investment Securities Purchased on IBRD’s Balance Sheets. As a result, there is no impact on IBRD’s investments net asset value from these transactions.

NOTE I—MANAGEMENT OF EXTERNAL FUNDS AND OTHER SERVICES

Trust Funds

IBRD, alone or jointly with one or more of its affiliated organizations, administers on behalf of donors, including members, their agencies and other entities, funds restricted for specific uses in accordance with administration agreements with donors. Specified uses could include co-financing of IBRD lending projects, debt reduction operations, technical assistance including feasibility studies and project preparation, global and regional programs, and research and training programs. These funds are held in trust with IBRD and/or IDA, and are held in a separate investment portfolio which is not commingled with IBRD and/or IDA funds.

Trust fund execution may be carried out in one of two ways: Recipient-executed or IBRD-executed.

Recipient-executed trust funds involve activities carried out by a recipient third-party executing agency. IBRD enters into agreements with and disburses funds to those recipients, who then exercise spending authority to meet the objectives and comply with terms stipulated in the agreements.

IBRD-executed trust funds involve IBRD execution of activities as described in relevant administration agreements with donors, which define the terms and conditions for use of the funds. Spending authority is exercised by IBRD, under the terms of the administration agreements. The executing agency services provided by IBRD vary and include for example, activity preparation, analytical and advisory activities and project-related activities, including procurement of goods and services.

Table I1: Expenses pertaining to IBRD-executed trust funds

In millions of U.S. dollars

	<u>2023</u>	<u>2022</u>	<u>2021</u>
IBRD-executed trust fund expenses	\$570	\$494	\$470

These amounts are included in Administrative expenses and the corresponding revenue is included in Revenue from externally funded activities in the Statements of Income. Administrative expenses primarily relate to staff costs, travel and consultant fees.

The following table summarizes all undisbursed contributions made by third party donors to IBRD-executed trust funds, recognized on the Balance Sheets:

Table I2: Undisbursed contributions by third party donors to IBRD-executed trust funds

In millions of U.S. dollars

	<u>2023</u>	<u>2022</u>
IBRD-executed trust funds	\$ 588	\$ 566

These amounts are included in Other assets—Miscellaneous and the corresponding liabilities are included in Other liabilities – Accounts payable and miscellaneous liabilities on the Balance Sheets.

Revenues

IBRD’s revenues for the administration of trust fund operations were as follows:

Table I3: Trust fund administration revenues

<i>In millions of U.S. dollars</i>			
	<u>2023</u>	<u>2022</u>	<u>2021</u>
Revenues	\$ 62	\$ 50	\$ 44

These amounts are included in Revenue from externally funded activities in the Statements of Income.

Revenue collected from donor contributions for trust fund administration fees, but not yet earned by IBRD totaling \$94 million as of June 30, 2023 (\$88 million—June 30, 2022) is included in Other assets - Miscellaneous and in Other liabilities – Accounts payable and miscellaneous liabilities, respectively on the Balance Sheets.

Investment Management Services

IBRD offers treasury and investment management services to affiliated and non-affiliated organizations.

In addition, IBRD offers asset management and technical advisory services to central banks of member countries, under the Reserves Advisory and Management Program, for capacity building and other development purposes, and receives a fee for these services.

During the fiscal year ended June 30, 2023, IBRD’s fee revenue from investment management activities totaled \$16 million (\$18 million –June 30, 2022 and \$19 million – June 30, 2021) and is included in Revenue from externally funded activities in the Statements of Income.

NOTE J—PENSION AND OTHER POSTRETIREMENT BENEFITS

IBRD, IFC and MIGA participate in the defined benefit Staff Retirement Plan (SRP), a Retired Staff Benefits Plan (RSBP) and PEBP (collectively “the Pension Plans”) that cover substantially all of their staff members.

The SRP provides pension benefits and includes a cash balance plan. The RSBP provides certain health and life insurance benefits to eligible retirees. The PEBP provides certain pension benefits administered outside the SRP.

IBRD uses a June 30th measurement date for its pension and other postretirement benefit plans.

All costs, assets and liabilities associated with these plans are allocated between IBRD, IFC, and MIGA based upon their employees’ respective participation in the Pension Plans. Costs allocated to IBRD are then shared between IBRD and IDA based on an agreed cost-sharing methodology. IDA, IFC and MIGA reimburse IBRD for their proportionate share of any contributions made to these plans by IBRD. Contributions to the Pension Plans are calculated as a percentage of salary.

The following table summarizes the benefit costs associated with the SRP, RSBP, and PEBP for IBRD and IDA:

Table J1: Pension Plan benefit costs

In millions of U.S. dollars

	<i>SRP</i>			<i>RSBP</i>			<i>PEBP</i>

IDA's share	335	89	58	482

The following table summarizes the Projected Benefit Obligations (PBO), fair value of plan assets, and funded status associated with the SRP, RSBP, and PEBP for IBRD and IDA. The SRP and RSBP assets are held in separate trusts and the PEBP assets are included in IBRD's investment portfolio. The assets of the PEBP are mostly invested in fixed income, equity instruments and other fund investments.

Table J3: PBO, funded status and accumulated benefit obligations

a. *Funded status is included in Other Assets – Assets under retirement benefits plans on the Balance Sheets and Other liabilities – Liabilities under retirement benefits plans on the Balance Sheets.*

As of June 30, 2023, the SRP and RSBP were overfunded by \$3,357 million and \$940 million, respectively. The PEBP, after reflecting IBRD and IDA's share of assets which are included in the IBRD's investment portfolio (\$1,953 million), was underfunded by \$104 million.

During the fiscal years ended June 30, 2023 and June 30, 2022, there were no amendments made to the retirement benefit plans.

The following tables present the amounts included in Accumulated Other Comprehensive Income/Loss relating to Pension and Other Postretirement Benefits:

Table J4: Amounts included in Accumulated Other Comprehensive Income as of June 30, 2023

In millions of U.S. dollars

	<u>SRP</u>	<u>RSBP</u>	<u>PEBP</u>	<u>Total</u>

Net amount recognized in Accumulated Other Comprehensive Income	<u>\$(795)</u>	<u>\$(751)</u>	<u>\$ 202</u>	<u>\$ (1,344)</u>

Assumptions

The actuarial assumptions used are based on financial market interest rates, inflation expectations, past experience, and Management’s best estimate of future benefit changes and economic conditions. Changes in these assumptions will impact future benefit costs and obligations.

The expected long-term rate of return for the SRP assets is a weighted average of the expected long-term (10 years or more) returns for the various asset classes, weighted by the portfolio allocation. Asset class returns are developed using a forward-looking building block approach and are not strictly based on historical returns. Equity returns are generally developed as the sum of expected inflation, expected real earnings growth and expected long-term dividend yield. Bond returns are generally developed as the sum of expected inflation, real bond yield, duration- adjusted change in yields and risk premium/spread (as appropriate). Other asset class returns are derived from their relationship to equity and bond markets. The expected long-term rate of return for the RSBP is computed using procedures similar to those used for the SRP. The discount rate used in determining the benefit obligation is selected by reference to the year-end yield of AA corporate bonds.

Actuarial gains and losses occur when actual results are different from expected results. Amortization of these unrecognized gains and losses will be included in income if, at the beginning of the fiscal year, they exceed 10 percent of the greater of the projected benefit obligation or the market-related value of plan assets. If required, the unrecognized gains and losses are amortized over the expected average remaining service lives of the employee group.

The following tables present the weighted-average assumptions used in determining the projected benefit obligations and the net periodic pension costs:

Table J5: Weighted average assumptions used to determine projected benefit obligations

In percent, except years

	<i>SRP</i>		<i>RSBP</i>		<i>PEBP</i>	
	<u>2023</u>	<u>2022</u>	<u>2023</u>	<u>2022</u>	<u>2023</u>	<u>2022</u>
Discount rate	4.90	4.40	4.90	4.50	4.90	4.50
Rate of compensation increase	5.10	5.30			5.10	5.30
Health care growth rates – at end of fiscal year			5.40	5.80		
Ultimate health care growth rate			4.20	4.40		
Year in which ultimate rate is reached			2031	2031		
Interest crediting rate	5.20	5.40	n.a	n.a	5.20	5.40

Table J6: Weighted average assumptions used to determine net periodic pension cost

In percent, except years

	<i>SRP</i>			<i>RSBP</i>			<i>PEBP</i>		
	<u>2023</u>	<u>2022</u>	<u>2021</u>	<u>2023</u>	<u>2022</u>	<u>2021</u>	<u>2023</u>	<u>2022</u>	<u>2021</u>
Discount rate	4.40	2.70	2.60	4.50	2.80	2.70	4.50	2.80	2.60
Expected return on plan assets	5.90	5.40	5.10	5.90	5.40	5.10			
Rate of compensation increase	5.30	4.80	4.60				5.30	4.80	4.60
Health care growth rates – at end of fiscal year				5.80	5.40	5.40			
Ultimate health care growth rate				4.40	3.90	3.70			
Year in which ultimate rate is reached				2031	2031	2031			
Interest crediting rate	5.40	4.90	4.60	n.a	n.a	n.a	5.40	4.90	4.60

The medical cost trend rate can significantly affect the reported postretirement benefit income or costs and benefit obligations for the RSBP. For the fiscal years ended June 30, 2023 and June 30, 2022, the actuarial gains were primarily due to an increase in the discount rates.

Investment Strategy

The investment policies establish the framework for investment of the plan assets based on long-term investment objectives and the trade-offs inherent in seeking adequate investment returns within acceptable risk parameters. A key component of the investment policy is to establish a Strategic Asset Allocation (SAA) representing the policy portfolio (i.e., policy mix of assets) around which the SRP and RSBP (the Plans) are invested. The SAA is derived using a mix of quantitative analysis that incorporates expected returns and volatilities by asset class as well as correlations across the asset classes, and qualitative considerations such as the liquidity needs of the Plans. The SAA for the Plans is reviewed in detail and reset about every three to five years, with more frequent reviews and changes if and as needed based on market conditions.

The key long-term objective is to generate asset performance that is reasonable in relation to the growth rate of the underlying liabilities and the assumed sponsor contribution rates, without taking undue risks. Given the relatively long investment horizons of the SRP and RSBP, and the relatively modest liquidity needs over the short-term to pay benefits and meet other cash requirements, the focus of the investment strategy is on generating sustainable long- term investment returns through a globally diversified set of strategies including fixed income, public and private equity and real assets. In April 2022, the Pension Finance Committee (PFC) approved a revision to the SAA band around the target allocation for private equity from +/-3 percent to +/-5 percent to accommodate the illiquid nature of this asset class and the limited ability to rebalance the allocation on a short-term basis, with the effective date of May 1, 2022. The changes do not materially alter the risk profile of the portfolio but are expected to slightly increase the efficiency of the allocation.

The following table presents the policy asset allocation and the actual asset allocations by asset category for the SRP and RSBP:

Table J7: Policy and actual asset allocations

Asset class	SRP			RSBP		
	Policy allocation	Actual Allocation (%)		Policy allocation	Actual Allocation (%)	
	2023 (%)	2023	2022	2023 (%)	2023	2022
Fixed income and Cash	20	16	17	20	16	17
Credit Strategy	6	8	7	6	8	7
Public equity	31	22	23	31	22	22
Private equity	20	28	27	20	27	27
Market neutral hedge funds	10	11	10	10	11	10
Real assets ^a	13	14	15	13	15	16
Other ^b	—	1	1	—	1	1
Total	<u>100</u>	<u>100</u>	<u>100</u>	<u>100</u>	<u>100</u>	<u>100</u>

a. Includes public and private real estate, infrastructure and timber.

b. Includes authorized investments that are outside the policy allocations primarily in hedge funds.

Significant Concentrations of Risk in Plan Assets

The assets of the SRP and RSBP are diversified across a variety of asset classes. Investments in these asset classes are further diversified across funds, managers, strategies, geographies and sectors, to limit the impact of any individual investment. In spite of such level of diversification, equity market risk remains the primary source of the overall return volatility of the Plans. As of June 30, 2023, the largest exposure to a single counterparty was 9% and 11% of the plan assets in SRP and RSBP, respectively (7% and 6%, respectively—June 30, 2022).

Risk Management Practices

Managing investment risk is an integral part of managing the assets of the Plans. Asset diversification is central to the overall investment strategy and risk management approach for the Plans. Absolute risk indicators such as the overall return volatility and drawdown of the Plans are the primary measures used to define the risk tolerance level and establish the overall level of investment risk. In addition, the level of active risk (defined as the annualized standard deviation of portfolio returns relative to those of the policy portfolio) is closely monitored and managed on an ongoing basis.

Market risk is regularly monitored at the absolute level, as well as at the relative levels with respect to the investment policy, manager benchmarks, and liabilities of the Plans. Stress tests are performed periodically using relevant market scenarios to assess the impact of extreme market events.

Monitoring of performance (at both manager and asset class levels) against benchmarks, and compliance with investment guidelines, are carried out on a regular basis which provides helpful information for assessing the impact on the portfolios caused by market risk factors. Risk management for different asset classes is tailored to their specific characteristics and is an integral part of the external managers' due diligence and monitoring processes.

Credit risk is monitored on a regular basis and assessed for possible credit event impacts. The liquidity position of the Plans is analyzed at regular intervals and periodically tested using various stress scenarios to ensure that the Plans have sufficient liquidity to meet all cash flow requirements. In addition, the long-term cash flow needs of the Plans are considered during the SAA exercise and are one of the main drivers in determining maximum allocation to the illiquid investment vehicles. The Plans mitigate operational risk by maintaining a system of internal controls along with other checks and balances at various levels.

Fair Value Measurements and Disclosures

All plan assets are measured at fair value on a recurring basis. The following tables present the fair value hierarchy of major categories of plan assets:

Table J8: Plan assets fair value hierarchy

In millions of U.S. dollars

a. Investments measured at fair value using NAV as a practical expedient have not been included under the fair value hierarchy.

b. Includes receivables and payables carried at amounts that approximate fair value.

Valuation Methods and Assumptions

The following are general descriptions of asset categories, as well as the valuation methodologies and inputs used to determine the fair value of each major category of Plan assets. Investment amounts in the asset categories shown in the table above may be different from the asset category allocation shown in the Investment Strategy section of the note. Asset classes in the table above are grouped by the characteristics of the investments held. The asset class break-down in the Investment Strategy section is based on Management's view of the economic exposures after considering the impact of derivatives and certain trading strategies.

Debt securities

Debt securities include discount notes, securities purchased under resale agreements, U.S. treasuries and agencies, debt obligations of foreign governments, sub-sovereigns and debt obligations in corporations of

domestic and foreign issuers. Debt securities also include investments in ABS such as collateralized mortgage obligations and MBS. These securities are valued by independent pricing vendors at quoted market prices for the same or similar securities, where available. If quoted market prices are not available, fair values are based on discounted cash flow models using market-based parameters such as yield curves, interest rates, volatilities, foreign exchange rates and credit curves. Some debt securities are valued using techniques which require significant unobservable inputs. The selection of these inputs may involve some judgment. Management believes its estimates of fair value are reasonable given its processes for obtaining securities prices from multiple independent third-party vendors, ensuring that valuation models are reviewed and validated, and applying its approach consistently from period to period. Unless quoted prices are available, money market instruments and securities purchased under resale agreements are reported at face value which approximates fair value.

Equity securities

Equity securities (including REITs) represent investments in entities in various industries and countries. Investments in public equity listed on securities exchanges are valued at the last reported sale price on the last business day of the fiscal year.

Commingled funds

Commingled funds are typically collective investment vehicles, such as trusts that are reported at NAV as provided by the investment manager or sponsor of the fund based on the valuation of underlying investments.

Private equity funds

Private equity funds include investments primarily in leveraged buyouts, growth capital, distressed investments and venture capital funds across North America, Europe and Asia in a variety of sectors. Many of these funds are in the investment phase of their life cycle. Private Equity investments do not have a readily determinable fair market value and are reported at NAV provided by the fund managers, taking into consideration the latest audited financial statements of the funds.

Private credit funds

Private credit funds include investments primarily in direct lending and opportunistic credit funds. Direct lending funds provide private financing to performing medium-size companies primarily owned by private equity sponsors. Opportunistic credit strategies (including distressed debt and multi-strategy funds) have flexible mandates to invest across both public and private markets globally. Private credit investments do not have a readily determinable fair value and are reported at NAV provided by the fund managers, taking into consideration the latest audited financial statements of the funds.

Real estate funds (including infrastructure)

Real estate funds include investments in core real estate, non-core real estate investments (such as debt, value add, and opportunistic equity investments) and infrastructure. Real estate investments do not have a readily determinable fair market value and are reported at NAV provided by the fund managers, taking into consideration the latest audited financial statements of the funds.

Hedge funds

Hedge fund investments include those seeking to maximize absolute returns using a broad range of strategies to enhance returns and provide additional diversification. Hedge Funds include investments in equity, event driven, fixed income, multi strategy and macro relative value strategies. These investments do not have a readily determinable fair market value and are reported at NAV provided by external managers or fund administrators (based on the valuations of underlying investments) monthly, taking into consideration the latest audited financial statements of the funds.

Investments in hedge funds and commingled funds can typically be redeemed at NAV within the near term while investments in private equity and most real estate are inherently long term and illiquid in nature with a quarter lag in reporting by the fund managers. Since the reporting of those asset classes is done with a lag, management estimates are based on the latest available information considering underlying market fundamentals and significant events through the balance sheet date.

Investment in derivatives

Investment in derivatives such as equity or bond futures, TBA securities, swaps, options and currency forwards are used to achieve a variety of objectives that include hedging interest rates and currency risks, gaining desired market exposure of a security, an index or currency exposure and rebalancing the portfolio. Over-the-counter derivatives are reported using valuations based on discounted cash flow methods incorporating observable market inputs.

Estimated Future Benefit Payments

The following table shows the benefit payments expected to be paid in each of the next five years and subsequent five years. The expected benefit payments are based on the same assumptions used to measure the benefit obligation:

	<u>SRP</u>	<u>RSBP</u>	<u>PEBP</u>
July 1, 2023 - June 30, 2024	\$1,132	\$ 97	\$ 91
July 1, 2024 - June 30, 2025	1,134	106	89
July 1, 2025 - June 30, 2026	1,160	114	93
July 1, 2026 - June 30, 2027	1,191	122	97
July 1, 2027 - June 30, 2028	1,226	130	102
July 1, 2028 - June 30, 2033	6,728	774	599

Expected Contributions

IBRD’s contribution to the SRP and RSBP varies from year to year, as determined by the PFC, which bases its judgment on the results of annual actuarial valuations of the assets and liabilities of the SRP and RSBP. The best estimate of the amount of contributions expected to be paid to the SRP and RSBP by IBRD and IDA during the fiscal year beginning July 1, 2023 is \$149 million and \$38 million, respectively.

NOTE K—ACCUMULATED OTHER COMPREHENSIVE INCOME

Comprehensive income or loss consists of net income and other gains and losses affecting equity that, under U.S. GAAP, are excluded from net income. Other comprehensive income (loss) comprises currency translation adjustments on assets and liabilities denominated in euro, DVA on Fair Value Option elected liabilities, and pension-related items. These items are presented in the Statements of Comprehensive Income.

The following tables present the changes in Accumulated Other Comprehensive Income (AOCI) and Accumulated Other Comprehensive Loss (AOCL):

Table K1: AOCI/AOCL changes

a. See Note J—Pension and Other Post Retirement Benefits.

NOTE L—FAIR VALUE DISCLOSURES

Valuation Methods and Assumptions

As of June 30, 2023 and June 30, 2022, IBRD had no assets or liabilities measured at fair value on a non-recurring basis.

Due from Banks

The carrying amount of unrestricted and restricted cash is considered a reasonable estimate of the fair value of these positions.

Loans and Loan commitments

There were no loans carried at fair value as of June 30, 2023 and June 30, 2022. IBRD's loans and loan commitments would be classified as Level 3 within the fair value hierarchy.

Summarized below are the techniques applied in determining the fair values of IBRD's financial instruments.

Investment securities

Investment securities are classified based on management's intention on the date of purchase, their nature, and IBRD's policies governing the level and use of such investments. As of June 30, 2023, all of the financial instruments in IBRD's investment portfolio were classified as trading. These securities are carried and reported at fair value, or at face value or NAV, which approximates fair value. Where available, quoted market prices are used to determine the fair value of trading securities.

For instruments for which market quotations are not available, fair values are determined using model-based valuation techniques, whether internally-generated or vendor-supplied, that include the standard discounted cash flow method using observable market inputs such as yield curves, credit spreads, and conditional prepayment rates. Where applicable, unobservable inputs such as conditional prepayment rates, probability of default and loss severity are used. Unless quoted prices are available, time deposits are reported at face value, which approximates fair value, as they are short term in nature.

Securities purchased under resale agreements, Securities sold under repurchase agreements, and Securities lent under securities lending agreements

These securities are of a short-term nature and reported at face value, which approximates fair value.

Discount notes and vanilla bonds

Discount notes and vanilla bonds issued by IBRD are valued using the standard discounted cash flow method which relies on observable market inputs such as yield curves, foreign exchange rates, basis spreads and funding spreads. Where available, quoted market prices are used to determine the fair value of short-term notes, as well as some floating rate notes of longer maturity.

Structured bonds

Structured bonds issued by IBRD have coupon or repayment terms linked to the level or the performance of interest rates, foreign exchange rates, equity indices, catastrophic events or commodities. The fair value of the structured bonds is generally derived using the discounted cash flow method based on estimated future pay-offs determined by applicable models and computation of embedded optionality such as caps, floors and calls. A wide range of industry standard models such as one factor Hull-White, Generalized Forward Market Model and Black-Scholes are used depending on the specific structure. These models incorporate observable market inputs, such as

yield curves, foreign exchange rates, basis spreads, funding spreads, interest rate volatilities, equity index volatilities and equity indices. Where applicable, the models also incorporate significant unobservable inputs such as correlations and long- dated interest rate volatilities. Generally, the movements in correlations are considered to be independent of movements in long-dated interest rate volatilities.

Derivative instruments

Derivative contracts include currency forward contracts, TBA securities, swaptions, options and futures contracts, currency swaps and interest rate swaps. Currency swaps and interest rate swaps are either plain vanilla or structured. Currency forward contracts and plain vanilla currency and interest rate swaps are valued using the standard discounted cash flow methods using observable market inputs such as yield curves, foreign exchange rates, basis spreads and funding spreads. For structured currency and interest rate swaps, which primarily consist of callable swaps linked to interest rates, foreign exchange rates, and equity indices, valuation models and inputs similar to the ones applicable to structured bonds valuation are used. Where applicable, the models also incorporate significant unobservable inputs such as correlations and long-dated interest rate volatilities.

Valuation adjustments on fair value option elected liabilities

The DVA on fair value option elected liabilities is measured by revaluing each liability to determine the changes in fair value of that liability arising from changes in IBRD's funding spread applicable to the relevant reference rate.

The table below presents IBRD's estimates of fair value of its financial assets and liabilities along with their respective carrying amounts:

Table L1: Fair value and carrying amount of financial assets and liabilities

In millions of U.S. dollars

	<i>June 30, 2023</i>		<i>June 30, 2022</i>

Derivative liabilities, net	26,893	26,893	20,041	20,041

As of June 30, 2023, IBRD's signed loan commitments were \$59 billion (\$57 billion—June 30, 2022) and had a fair value of \$0.5 billion (\$0.6 billion—June 30, 2022).

The following tables present IBRD's fair value hierarchy for assets and liabilities measured at fair value on a recurring basis. The fair value of other fund investments measured using the NAV as a practical expedient are included in the table below but excluded from the fair value hierarchy.

Table L2: Fair value hierarchy of IBRD's assets and liabilities

b. Includes currency forward contracts.

c. These relate to swaptions, options and futures contracts and TBA securities.

d. Excludes \$164 million relating to payable for cash collateral received.

e. Includes \$2 million CVA.

f. Includes \$571 million DVA.

IBRD's Level 3 borrowings primarily relate to structured bonds. The fair value of these bonds is estimated using discounted cash flow valuation models that incorporate model parameters, observable market inputs, and unobservable inputs. The significant unobservable inputs used in the fair value measurement of structured bonds and swaps are correlations and long-dated market interest rate volatilities. Generally, the movements in correlations are considered to be independent of the movements in long-dated interest rate volatilities.

Correlation is the statistical measurement of the relationship between two variables. For contracts where the holder benefits from the convergence of the underlying index prices (e.g., interest rates and foreign exchange rates), an increase in correlation generally results in an increase in the fair value of the instrument. The magnitude and direction of the fair value adjustment will depend on whether the holder is short or long the option.

Interest rate volatility is the extent to which the level of interest rates changes over time. For purchased options, an increase in volatility will generally result in an increase in the fair value. In general, the volatility used to price the option depends on the maturity of the underlying instrument and the option strike price. In the fiscal years ended June 30, 2023, and June 30, 2022, the interest rate volatilities for certain currencies were extrapolated for certain tenors and, thus, are considered an unobservable input.

IBRD entered into transactions which have an embedded option associated with an equity index. Valuation inputs of such transactions include, among other valuation inputs, volatilities of the equity indices, that are the extent to which the level of equity index changes over time. These index volatility levels are consistent with the respective index construction methodologies and historical movements. Similar to the impact of the volatility of the other asset classes described above, an increase in the equity index volatility will result in an increase in the value of the purchase option and vice versa.

In certain instances, particularly for instruments with coupon or repayment terms linked to catastrophic events, management relies on instrument valuations supplied by external pricing vendors.

The following table provides a summary of the valuation technique applied in determining fair values of these Level 3 instruments and quantitative information regarding the significant unobservable inputs used. Level 3 instruments represent 2% of IBRD's borrowings.

Table L3: Level 3 Borrowings and derivatives valuation technique and quantitative information regarding the significant unobservable inputs:

In millions of U.S. dollars

<u>Portfolio</u>	<u>Fair Value as of June 30, 2023</u>	<u>Fair Value as of June 30, 2022</u>	<u>Valuation Technique</u>	<u>Unobservable input</u>	<u>Range (average), June 30, 2023</u>	<u>Range (average), June 30, 2022</u>

End of the fiscal year	<u>\$ 13</u>	<u>\$(134)</u>	<u>\$(121)</u>	<u>\$(379)</u>	<u>\$(165)</u>	<u>\$(544)</u>

Information on the unrealized gains or losses included in the Statements of Income and Statements of Comprehensive Income relating to IBRD's Level 3 borrowings and derivatives that are still held at the reporting dates, is presented in the following table:

Table L7: Unrealized gains or losses relating to IBRD's Level 3 borrowings and derivatives*In millions of U.S. dollars*

	<u>2023</u>	<u>2022</u>	<u>2021</u>
Reported as follows:			
Borrowings			
Net income (loss) ^a	\$ 56	\$ 220	\$(449)
Other comprehensive (loss) income ^b	(53)	130	(92)
Derivatives			
Net (loss) income ^a	\$(54)	\$(214)	\$ 446
Other comprehensive income (loss) ^c	5	(97)	25

- Amounts are included in Unrealized mark-to-market (losses) gains on non-trading portfolios, net, on the Statements of Income.
- Amounts are included in Currency translation adjustment on functional currency and Net Change in DVA on fair value option elected liabilities, on the Statements of Comprehensive Income.
- Amounts are included in Currency translation adjustment on functional currency, on the Statements of Comprehensive Income.

Table L8: Borrowings fair value and contractual principal balance*In millions of U.S. dollars*

	<u>Fair Value</u>	<u>Principal Amount Due Upon Maturity</u>	<u>Difference</u>
June 30, 2023	\$237,265	\$265,147	\$(27,882)
June 30, 2022	\$235,173	\$256,753	\$(21,580)

The following table provides information on the changes in fair value due to the change in IBRD's own credit risk for financial liabilities measured under the fair value option, included in the Statements of Comprehensive Income:

Table L9: Changes in fair value due to IBRD's own credit risk

In millions of U.S. dollars

<i>Unrealized mark-to-market (losses) gains due to DVA on fair value option elected liabilities</i>	<u>2023</u>	<u>2022</u>
DVA on Fair Value Option Elected Liabilities	\$(60)	\$564
Amounts reclassified to net income upon derecognition of a liability	<u>47</u>	<u>18</u>
Net change in DVA on Fair Value Option Elected Liabilities	<u>\$(13)</u>	<u>\$582</u>

The following table provides information on the cumulative changes in fair value due to the change in IBRD's own- credit risk for financial liabilities measured under the fair value option, as well as where those amounts are included on the Balance Sheets:

Table L10: Cumulative changes in fair value due to the change in IBRD's own credit risk

In millions of U.S. dollars

<i>DVA on fair value option elected liabilities- gain</i>	<u>June 30, 2023</u>	<u>June 30, 2022</u>
Reported as:		
Accumulated other comprehensive gain	\$351	\$364

Table L11: Unrealized mark-to-market gains or losses on investments-trading, and non-trading portfolios, net

In millions of U.S. dollars

	2023		
	<u>Realized gains (losses)</u>	<u>Unrealized gains (losses) excluding realized amounts ^a</u>	<u>Unrealized gains (losses)</u>
Investments-Trading	<u>\$(42)</u>	<u>\$ 126</u>	<u>\$ 84</u>
Non-trading portfolios, net			
Loan-related derivatives—Note F	4	1,673	1,677
Other asset/liability management derivatives, net	—	(1,642)	(1,642)
Borrowings, including derivatives—Notes E and F	8	(198)	(190) ^b

Others, net	<u>—</u>	<u>(1)</u>	<u>(1)</u>
Total non-trading portfolios, net	<u>\$ 12</u>	<u>\$ (167)</u>	<u>\$ (155)</u>

In millions of U.S. dollars

	2022		
	Realized gains (losses)	Unrealized gains (losses) excluding realized amounts ^a	Unrealized gains (losses)
Investments-Trading	\$1,106	\$(1,183)	\$ (77)
Non-trading portfolios, net			
Loan-related derivatives—Note F	6	5,988	5,994
Other asset/liability management derivatives, net	—	(3,392)	(3,392)
Borrowings, including derivatives—Notes E and F	12	747	759 ^b
Client operations derivatives	—	8	8
Others, net	—	5	5
Total non-trading portfolios, net	<u>\$ 18</u>	<u>\$ 3,356</u>	<u>\$ 3,374</u>

In millions of U.S. dollars

	2021		
	Realized gains (losses)	Unrealized gains (losses) excluding realized amounts ^a	Unrealized gains (losses)
Investments-Trading	\$(672)	\$ 903	\$ 231
Non-trading portfolios, net			
Loan-related derivatives—Note F	—	2,415	2,415
Other asset/liability management derivatives, net	—	(1,351)	(1,351)
Borrowings, including derivatives—Notes E and F	14	140	154 ^b
Client operations derivatives	—	14	14
Total non-trading portfolios, net	<u>\$ 14</u>	<u>\$ 1,218</u>	<u>\$ 1,232</u>

a. Adjusted to exclude amounts reclassified to realized gains (losses).

b. Includes \$5,851 million of unrealized mark-to-market losses related to derivatives associated with borrowings (unrealized mark-to-market losses of \$20,790 million—June 30, 2022 and unrealized mark-to-market losses of \$7,209 million—June 30, 2021).

NOTE M—CONTINGENCIES

From time to time, IBRD may be named as a defendant or co-defendant in legal actions on different grounds in various jurisdictions. The outcome of any existing legal action, in which IBRD has been named as a defendant or co-defendant, as of and for the fiscal year ended June 30, 2023, is not expected to have a material adverse effect on IBRD's financial position, results of operations or cash flows.

**Information Statement
International Bank for Reconstruction
and Development**

No person is authorized to give any information or to make any representation not contained in this Information Statement, any supplemental information statement or any prospectus; and any information or representation not contained herein must not be relied upon as having been authorized by IBRD or by any dealer, underwriter or agent of IBRD. Neither this Information Statement nor any supplemental information statement or prospectus constitutes an offer to sell or solicitation of an offer to buy securities in any jurisdiction to any person to whom it is unlawful to make such an offer or solicitation in such jurisdiction.

The Information Statement contains forward looking statements which may be identified by such terms as “anticipates”, “believes”, “expects”, “intends” or words of similar meaning. Such statements involve a number of assumptions and estimates that are based on current expectations, which are subject to risks and uncertainties beyond IBRD’s control. Consequently, actual future results could differ materially from those currently anticipated.
