## PREFACE

THE Fraternity Directory is increasing in popularity. The requirement of the Constitution that a Directory be issued each three years was passed in response to an active demand.

The members of the Fraternity have found it to be a most reliable lawyers' list and the exchange of business has increased many fold. Catalogues of lawyers as published are frequently an indiscriminate list of men whose names are inserted for a fee, but each man who is listed here has been chosen for his worth and is with you "in the bonds of Delta Chi."

Again, the publication of a Directory rekindles active interest in the Fraternity in those who have not had the opportunity to "meet the boys" and serves to bring back memories of "the old days and the happy ones."

It cannot be hoped that the Directory will be absolutely accurate for the simple reason that all of the members will not reply to a circular letter. If the individual only knew how little time it requires for him to fill out the postcard and mail it, and the immense amount of trouble that "searching" for him takes, there would be a universal response. For those who do not reply, there is a search of lawyers' lists, telephone directories, city directories, etc., etc., besides voluminous correspondence, making inquiry from colleges and members of the Fraternity. Nine-tenths of the actual labor in publishing a work of this character is devoted to "searching" for present addresses of members who do not respond to the circular letter. The man who does the searching must know the names of all the members of the Fraternity so that he will recognize those names wherever he sees them, and he must have an almost intimate knowledge of the personal history of the individual. This knowledge is obtained in the compiler's case from a close study of the Fraternity's membership covering over ten years.

In view of the fact that the book is so largely used as a lawyers' list, it has been thought wise in this issue to list only those men as "lawyers" who are definitely known to be practising law. Those men, even though they previously practised law, who did not reply to the circular letter, or have not been located as practitioners in lawyers' lists, have been listed with no specified occupation. This is regretted, but there has been complaint in the past that certain men listed as "lawyers" were not in fact engaged in the practise of their profession. If there is complaint among those who are not listed as "lawyers" when they in fact engaged in such practise, the omission is regretted, but the fault lies with the individual himself for he failed to reply to the request for information.

A list of those men who cannot be located will be found in the latter part of the book. If any "clue" can be furnished as to the whereabouts of any of them, the Fraternity will be under a deep debt of gratitude.

The compiler is indebted to many members of the Fraternity who have been of service to him in locating members whose present addresses were unknown. The compiler's particular thanks are due to Pierson W. Banning, Chicago-Kent, Howard Ellis, University of Chicago, and Robert Routh, Dickinson, for work of this character.

It is sincerely hoped that this Directory will be of actual service to members of the Fraternity.

WILLIAM W. BRIDE, "CC,"
