Give Us a Student, We'll Give You a Pilot

# Turnkey Training Solutions

## Give Us a Student, We'll Give You a Pilot

Lockheed Martin's turnkey training solutions produce fully trained, mission-ready warfighters. Turnkey training solutions are adaptable to specific training requirements and constraints, helping customers overcome training challenges by providing innovative, cost-effective answers.

Turnkey training begins with a Training Needs Analysis (TNA) that studies training needs. Using Human Performance Engineering, Lockheed

Martin subject matter experts can analyze exactly what training will be required for students to reach their maximum potential. The TNA then guides the development of the course syllabi, associated lesson plans, courseware (instructor led and computer based training) and ultimately simulator and actual Aircraft Sortie Training. Lockheed Martin can provide all of these pieces to the training puzzle, including simulators and leased aircraft assets, packaged into

an integrated solution that takes your students from training day one to warfighter.

Lockheed Martin puts it all together using our experience as a training systems integrator, and produces extremely cost effective solutions, tailored to address your unique funding challenges.

**Turnkey Training Solutions (Turnkey TS):** Give Us a Student, We'll Give You a Pilot.

### Turnkey Training Solutions provide:

- Front-end Training Needs Analysis, syllabus development and instructional design
- Courseware design and development
- Interactive distance learning
- Training integrated management system
- Operational flight simulators
  - Virtual database development
  - High resolution eight channel system
  - PC-based Image Generator solution
  - Multi-ship operations
  - Linked, tandem cockpit operations
- Training Aircraft
  - State-of-the-art Flight Trainer
  - Glass cockpit
  - Airborne Synthetic Training
- Logistics Management
  - Logistics Information Management System
  - Flight Line and intermediate maintenance management
  - Aircraft and Ground Based Training System Supply Chain Management
- Engineering Design Office
  - Aircraft design authority
  - Airworthiness management
- Aircrew Instruction
  - Ground school instructors
  - Simulator instructors
  - Electronic classrooms
- Mission planning system
- Ground debriefing stations
- Ejection seat trainer
