Exhibit No. 99 Description Lockheed Martin Corporation Press Release dated April 21, 2009 (earnings release for the quarter ended March 29, 2009).

Information

For Immediate Release

LOCKHEED MARTIN ANNOUNCES FIRST QUARTER 2009 RESULTS

- First quarter net sales of \$10.4 billion
- First quarter earnings per share of \$1.68
- First quarter net earnings of \$666 million
- Generated \$1.2 billion in cash from operations for the quarter
- Increases outlook for 2009 earnings per share, cash from operations, and return on invested capital (ROIC)

BETHESDA, Md, April 21, 2009 – Lockheed Martin Corporation (NYSE: LMT) today reported first quarter 2009 net earnings of \$666 million (\$1.68 per diluted share), compared to \$730 million (\$1.75 per diluted share) in 2008. Net earnings in 2009 included higher pension expense as previously disclosed in our January 22, 2009 earnings release and in our 2008 Form 10-K. In 2009, the FAS/CAS pension adjustment was (\$114) million, which decreased net earnings by \$74 million (\$0.19 per share). In 2008, the FAS/CAS pension adjustment was \$32 million, which increased net earnings by \$21 million (\$0.05 per share).

Net sales for the first quarter of 2009 were \$10.4 billion, compared to \$10.0 billion in 2008. Cash from operations for the first quarter of 2009 was \$1.2 billion, compared to \$880 million in 2008.

"The Corporation is off to a solid start in the first quarter of 2009," said Bob Stevens, Chairman, President and CEO. "Our team of 146,000 dedicated employees continues to focus on enhancing shareholder and customer value by utilizing the depth and breadth of our capabilities as the world's premier global security company."

The \$0.10 increase in the Corporation's projected 2009 diluted earnings per share primarily results from lower average diluted shares outstanding as a result of share repurchases.

It is the Corporation's practice not to incorporate adjustments to its outlook for proposed acquisitions, divestitures, joint ventures, or other unusual activities until such transactions have been consummated.

Balanced Cash Deployment Strategy

The Corporation continued to execute its balanced cash deployment strategy during 2009 by:

- repurchasing 8.1 million shares at a cost of \$555 million;
- paying cash dividends totaling \$227 million;
- investing \$156 million for acquisition and investment activities; and
- making capital expenditures of \$132 million.

Segment Results

The Corporation operates in four principal business segments: Electronic Systems; Information Systems & Global Services (IS&GS); Aeronautics; and Space Systems.

The following table presents the operating results of the four business segments and reconciles these amounts to the Corporation's consolidated financial results.

In our discussion of comparative results, changes in net sales and operating profit generally are expressed in terms of volume and/or performance. Volume refers to increases (or decreases) in sales resulting from varying production activity levels, deliveries, or service levels on individual contracts. Volume changes typically include a corresponding change in operating profit based on the estimated profit rate at completion for a particular contract for design, development, and production activities. Performance generally refers to changes in contract profit booking rates. These changes to our contracts for products usually relate to profit recognition associated with revisions to total estimated costs at completion of the contracts that reflect improved (or deteriorated) operating or award fee performance on a particular contract. Changes in contract profit booking rates on contracts for products are recognized by recording adjustments in the current period for the inception-to-date effect of the changes on current and prior periods. Recognition of the inception-to-date adjustment in the current or prior periods may affect the comparison of segment operating results.

Electronic Systems

| (\$ millions) | | 1 st Quarter | | | |
|------------------|------|-------------------------|----|-------|--|
| | 2009 |) | | 2008 | |
| Net sales | \$ | 2,913 | \$ | 2,789 | |
| Operating profit | \$ | 390 | \$ | 366 | |
| Operating margin | | 13.4% | D | 13.1% | |

Net sales for Electronic Systems increased by 4% for the first quarter of 2009 compared to the first quarter of 2008. The increase mainly was due to higher volume on air defense, tactical missile and fire control programs at Missiles & Fire Control (M&FC) and in simulation and training activities at Platforms & Training (P&T). These increases partially were offset by declines in volume on integrated defense technology programs and surface naval warfare activities at Maritime Systems & Sensors (MS2).

Operating profit for Electronic Systems increased by 7% for the first quarter of 2009 compared to the first quarter of 2008. The increase primarily was attributable to higher volume and improved performance on fire control and air defense programs at M&FC and the benefit recognized in the first quarter of 2009 from favorably resolving a simulation and training contract matter at P&T. These increases partially were offset by declines in volume on integrated defense technology programs and surface naval warfare activities at MS2.

Information Systems & Global Services

| (\$ millions) | 1 st Quarter | | | |
|------------------|-------------------------|----|-------|--|
| | 2009 | | 2008 | |
| Net sales | \$ 2,761 | \$ | 2,504 | |
| Operating profit | \$ 242 | \$ | 230 | |
| Operating margin | 8.8% |) | 9.2% | |

Effective January 1, 2009, IS&GS redefined its lines of business to better align the segment based on its core customers and business activities. The new lines of business are as follows:

- Civil supports civil agency customer missions;
- Defense supports defense customer missions; and
- Intelligence supports intelligence customer missions.

The realignment had no impact on the segment's operating results. The prior period amounts have been reclassified to conform to the new lines of business.

Net sales for IS&GS increased by 10% for the first quarter of 2009 compared to the first quarter of 2008. The increase in sales primarily was attributable to higher volume on enterprise civilian services in Civil and on mission and combat systems activities in Defense.

Operating profit for IS&GS increased by 5% for the first quarter of 2009 compared to the first quarter of 2008. Operating profit increases in Defense partially were offset by declines in Civil. The increase in Defense mainly was due to volume and improved performance in mission and combat systems, as well as readiness and stability operations. The decrease in Civil primarily was attributable to the absence in 2009 of a benefit recognized in 2008 for a contract restructuring.

Aeronautics

| (\$ millions) | 1st Q | 1 st Quarter | | |
|------------------|----------|-------------------------|-------|--|
| | 2009 | | 2008 | |
| Net sales | \$ 2,781 | \$ | 2,807 | |
| Operating profit | \$ 355 | \$ | 323 | |
| Operating margin | 12.8% | , D | 11.5% | |

Net sales for Aeronautics decreased by 1% for the first quarter of 2009 compared to the first quarter of 2008. The decrease in sales resulted from declines in Combat Aircraft that partially were offset by increases in Air Mobility and Other Aeronautics Programs. The decrease in Combat Aircraft mainly was due to lower volume on F-22 and F-16 programs, which more than offset increased F-35 volume. The increase in Air Mobility mainly was due to higher volume on C-130 and C-5 programs. The increase in Other Aeronautics Programs principally was due to higher volume on sustainment activities and on advanced development programs.

Segment operating profit increased by 10% for the first quarter of 2009 compared to the first quarter of 2008. The growth in operating profit primarily was due to increases in Combat Aircraft and Other Aeronautics Programs. The increase in Combat Aircraft operating profit primarily was due to higher volume and improved performance on the F-35 program and improved performance on the F-22 program. These increases more than offset declines in operating profit on F-16 programs. The increase in Other Aeronautics Programs principally was due to higher volume and improved performance on sustainment activities.

Space Systems

| (\$ millions) | | 1 st Quarter | | | | |
|------------------|----|-------------------------|----|------------------|--|------|
| | 2 | 2009 | | 2009 2008 | | 2008 |
| Net sales | \$ | 1,918 | \$ | 1,883 | | |
| Operating profit | \$ | 212 | \$ | 231 | | |
| Operating margin | | 11.1% | | 12.3% | | |

Net sales for Space Systems increased by 2% for the first quarter of 2009 compared to the first quarter of 2008. During the quarter, sales growth in Satellites and Space Transportation partially were offset by declines in Strategic & Defensive Missile Systems (S&DMS). The sales growth in Satellites was due to higher volume in government satellite activities, which partially was offset by a decrease in commercial satellite activities. There were no deliveries in the first quarter of 2009 compared to one commercial satellite delivery in the first quarter of 2008. The increase in Space Transportation primarily was due to higher volume on the Orion program. S&DMS sales declined mainly due to lower volume on defensive missile programs.

Segment operating profit decreased by 8% for the first quarter of 2009 compared to the first quarter of 2008. During the quarter, a decline in operating profit at Space Transportation partially was offset by increases at Satellites and S&DMS. In Space Transportation, the decrease mainly was attributable to lower equity earnings on the United Launch Alliance joint venture and the absence in 2009 of a benefit recognized in 2008 from the successful negotiations of a terminated commercial launch vehicle contract. In Satellites, the increase mainly was due to higher volume and improved performance on government satellite activities. The increase in S&DMS primarily was attributable to improved performance on defensive missile programs.

Consistent with the manner in which the Corporation's business segment operating performance is evaluated by senior management, certain items are excluded from the business segment results and included in "Unallocated corporate (expense) income, net." See the Corporation's 2008 Form 10-K for a description of "Unallocated corporate income (expense), net," including the FAS/CAS pension adjustment.

The FAS/CAS pension adjustment (calculated as the difference between FAS 87 expense and the CAS cost amounts) resulted in an expense in 2009 compared to income in 2008 due to the negative actual return on plan assets in 2008 and a lower discount rate at December 31, 2008. This change is consistent with the Corporation's previously disclosed assumptions used to compute these amounts.

For purposes of segment reporting, unusual items are included in "Unallocated corporate income (expense), net":

2009 –

• There were no unusual items in the first quarter of 2009.

2008 -

A gain, net of state income taxes, of \$16 million representing the recognition of a portion of the deferred net gain from the 2006 sale of the Corporation's ownership interest in Lockheed Khrunichev Energia International, Inc. (LKEI) and International Launch Services, Inc. (ILS). At the time of the sale, the Corporation deferred recognition of the gain pending the expiration of its responsibility to refund advances for future launch services. This item increased net earnings by \$10 million (\$0.02 per share) during the first quarter of 2008.

Income Taxes

Our effective income tax rates for the first quarters of 2009 and 2008 were 31.9% and 32.7%. These rates were lower than the statutory rate of 35% for both periods due to tax benefits for U.S. manufacturing activities and dividends related to our employee stock ownership plans. The effective tax rate for the first quarter of 2009 is lower than the comparable period in 2008 primarily due to the extension of the research and development (R&D) credit as a result of the enactment of the Emergency Economic Stabilization Act (EESA) of 2008. The EESA was signed by the President on October 3, 2008, and retroactively extends the R&D credit for two years from January 1, 2008 to December 31, 2009. While the R&D credit extension was retroactive to January 1, 2008, we did not recognize the benefit until EESA became law in the fourth quarter of 2008.

FORWARD-LOOKING STATEMENTS

Statements in this release that are "forward-looking statements" are based on Lockheed Martin's current expectations and assumptions. Forward-looking statements in this release include estimates of future sales, earnings and cash flow. These statements are not guarantees of future performance and are subject to risks and uncertainties. Actual results could differ materially due to factors such as: the availability of government funding for our products and services both domestically and internationally; changes in government and customer priorities and requirements (including changes to respond to the priorities of the new U.S. Administration and Congress, Department of Defense reviews, budgetary constraints, and cost-cutting initiatives); the impact of economic recovery and stimulus plans and continued military operations in Iraq and Afghanistan on funding for existing defense programs; the award or termination of contracts; actual returns (or losses) on pension plan assets, interest and discount rates and other changes that may impact pension plan assumptions; changes in counter-party credit risk exposure; difficulties in developing and producing operationally advanced technology systems; the timing and customer acceptance of product deliveries; materials availability and performance by key suppliers, subcontractors and customers; charges from any future impairment reviews that may result in the recognition of losses and a reduction in the book value of goodwill or other long-term assets; the future impact of legislation, rulemaking, and changes in accounting, tax, defense procurement, or export policies; the future impact of acquisitions or divestitures, joint ventures or teaming arrangements; the outcome of legal proceedings and other contingencies (including lawsuits, government investigations or audits, and environmental remediation efforts); the competitive environment for the Corporation's products and services; and economic, business and political conditions domestically and internationally.

It is the Corporation's policy to only update or reconfirm its financial projections by issuing a press release. The Corporation generally plans to provide a forward-looking outlook as part of its quarterly earnings release but reserves the right to provide an outlook at different intervals or to revise its practice in future periods. All information in this release is as of April 20, 2009. Lockheed Martin undertakes no duty to update any forward-looking statement to reflect subsequent events, actual results or changes in the Corporation's expectations. We also disclaim any duty to comment upon or correct information that may be contained in reports published by investment analysts or others.

NON-GAAP PERFORMANCE MEASURES

The Corporation believes that reporting ROIC provides investors with greater visibility into how effectively Lockheed Martin uses the capital invested in its operations. The Corporation uses ROIC to evaluate multi-year investment decisions and as a long-term performance measure, and also uses ROIC as a factor in evaluating management performance for incentive compensation purposes. ROIC is not a measure of financial performance under generally accepted accounting principles, and may not be defined and calculated by other companies in the same manner. ROIC should not be considered in isolation or as an alternative to net earnings as an indicator of performance.

Represents after-tax interest expense utilizing the federal statutory rate of 35%. Debt consists of long-term debt, including current maturities, and short-term borrowings (if any). Equity includes non-cash adjustments, primarily for unrecognized benefit plan actuarial losses and prior service costs, the adjustment for the adoption of FAS 158 in 2006 and the additional minimum pension liability in years prior to 2007. Average Benefit Plan Adjustments reflect the cumulative value of entries identified in our Statement of Stockholders' Equity discussed in Note
