PROFILE OF TASAM

TASAM - Turkish Asian Center for Strategic Studies, which has been operating in the institutional body of a NGO as a private and independent think tank for ten years, has become **an international brand** with its activities and the capacity it has built via deeply penetrating the areas it affects.

There are 10 foreign policy fields that **TASAM** acts on. These are continentally **Africa, Asia, Europe, Latin America and Caribbean** and **North America**. The regional ones are **Balkans, Middle East, Black Sea - Caucasus** and **Mediterranean** which are - in every parameter- the security zone of these four continents in terms of Turkey. Also **Turkic World** and **Islamic World** are called as identical fields.

TASAM activities turn into concrete results by its **final reports, strategic reports, refereed journals, books, agreements, institutes, networks, platforms and Web Sites** within the extent of continuously increasing studies regarding these 10 foreign policy fields.

Combined with public diplomacy, these results develop bottom to top consciousness and interaction and give effective information, ideas and suggestions to the related decision makers; thus bring about strategic contributions to a **Turkey-and-its-allies-centered perspective on the basis of power and justice**.

TASAM, studying to reflect its experiences concerning **4 continents, 4 sub-regions** and **Turkic and Islamic World** to every parameter in Turkey by projects all around the country, has been carrying out many of its institutional processes, being in the first place the **Turkey's Strategic Vision 2023**, which has been performed in 81 provinces **under the auspices of the Presidency of Turkish Republic**.

TASAM activities, which are developed with the perspective to provide strategic contributions to Turkey's institutional capacity building, together with its institutional network have reached a level of global importance. Around hundreds of leading experts and academics contribute to **TASAM's** institutes, platforms, projects and other activities which **span nearly 100 countries**.

TASAM WORLD was founded by **TASAM** and is an umbrella organization that steers and coordinates the activities of a wide range of institutions, networks and platforms serving as a **centre for capacity building management and cooperation**.

Undoubtedly, the majority of the think tank organizations in developed and developing countries and especially in new regional/global power candidate countries have continued their work with the cooperation/social responsibility of public institutes, private institutes, universities and media. The capacity of Institutional think and network which rise with the efforts of think tanks, provides related country's public administration, civil society and private sector to be in boundless innovation.

The unique efforts that have been pursued pertinaciously by **TASAM**, which advances **in the axis of science towards universal values** via its institutional principles and which aims for peace and tranquillity of its country, its region and the whole earth, the boundless consequences these efforts have brought about are shortly presented in the **2004 - 2014 TASAM Activity Report**. We are sincerely grateful for the interest, understanding, trust and support that you have given us.
