Issuer Identifier Number (IIN) Registration (TSB Circular 35 of 22 June 2017)

1 ITU-T Study Group 2 has developed Recommendation [ITU-T E.118 “The international telecommunication charge card”](#). This recommendation specifies the structure of the visible card number (primary account number) and the Issuer Identifier Number (IIN) assignment and registration procedure. The Issuer Identifier Number is a part of the visible card number with a maximum length of 19 characters. The IIN follows the Major Industry Identifier (MII) “89” for telecommunication purpose and then the E.164 Country Code. The structure is as follows:

2 The IIN is used to distinguish among multiple Operating Agencies (OAs) who issue cards within a given country; or to distinguish individual countries sharing the same country code, or to distinguish both countries and issuers. One of the typical uses is to identify an issuer of SIM (Subscriber Identity Module) cards.

3 The IIN register is maintained by the ITU-TSB. Under point 4.2 d) of Recommendation ITU-T E.118, the TSB shall collect a one-time fee for the assignment and registration of each new IIN. This fee has been 80 Swiss Francs since 1993 (ITU Operational Bulletin No. 542 (18.III.1993)).

4 At its 2017 session, ITU Council decided to continue collecting fees for IIN Registration and to establish the registration fee at 150 Swiss francs per number issued, and for non ITU-T and ITU-R Sector Members implement an annual maintenance fee at 100 Swiss francs per number starting from 1 January 2018 (Decision 601, ITU Council, 2017 session).

5 The annual fee will be collected based on the status of IINs and the membership of the assignees at 00h00 (Geneva time) of 1 January of each year from 2018. The newly assigned and registered IINs during the year 2018 and afterwards will also be charged an annual maintenance fee for that year. In case of cancellation, there will be no refund.

6 For further information on IIN, please see: <http://www.itu.int/en/ITU-T/inr/forms/Pages/iin.aspx>. For issues relevant to membership status, please see: <http://www.itu.int/online/mm/scripts/gensel8>. A Sector Member is marked with an “X” under columns “ITU-T” and/or “ITU-R”.

Universal International Freephone Number (UIFN) Registration (TSB Circular 36 of 22 June 2017)

1 ITU-T Study Group 2 has developed Recommendation [ITU-T E.169.1 "Application of Recommendation E.164 numbering plan for universal international freephone numbers for international freephone service"](#) and Recommendation [ITU-T E.152 "International freephone service"](#). A Universal International Freephone Number (UIFN) enables an International Freephone Service (IFS) customer to be allocated a unique freephone number(s) that is the same throughout the world and all service and call-related charges are paid by the IFS customer. One of the typical uses of a UIFN is to reach customer services via, for example, a call center for a company's global customers or potential customers.

2 A UIFN is composed of a three-digit country code for global service application, i.e. 800, followed by an 8-digit Global Subscriber Number (GSN), resulting in an 11-digit fixed format. (An IFS caller must dial an international prefix prior to the UIFN.)

3 The ITU-TSB has been requested to perform the task of Registrar for UIFNs, responsible for processing registration requests and assignment of the GSN portion of the UIFN in accordance with Recommendation ITU-T E.169.1 and Recommendation ITU-T E.152, "International Freephone Service". At its June 1996 session, ITU Council established the UIFN application fee at 200 Swiss francs per UIFN number issued (Decision 464, ITU Council, 1996 session).

4 At its 2017 session, ITU Council decided to continue collecting fees for Universal International Freephone Number (UIFN) Registration and to establish the registration fee at 300 Swiss francs per number issued, and for non ITU-T and ITU-R Sector Members implement an annual maintenance fee at 100 Swiss francs per number starting from 1 January 2018 (Decision 600, ITU Council, 2017 session).

5 The annual fee will be collected based on the status of UIFNs and the membership of the primary service providers at 00h00 (Geneva time) of 1 January of each year from 2018. The newly reserved UIFNs during the year 2018 and afterwards will also be charged an annual maintenance fee for that year. In case of cancellation, there will be no refund.

6 For further information on UIFNs reserved or assigned, please see: <http://www.itu.int/en/ITU-T/inr/unum/Pages/uifndb.aspx>. In addition, for general information on UIFN, please see: <http://www.itu.int/en/ITU-T/inr/unum/Pages/uifn.aspx>. For issues relevant to membership status, please see: <http://www.itu.int/online/mm/scripts/gensel8>. A Sector Member is marked with an "X" under columns "ITU-T" and/or "ITU-R".

Other communications

Austria

Communication of 1.VI.2017:

On the occasion of the FIVB Beach Volleyball World Championships 2017 in Vienna, the Austrian Administration authorizes an Austrian amateur station to use the special call sign **OE17BEACH** from 28 July to 6 August 2017.

Republic of Azerbaijan

Communication of 29.V.2017:

The Republic of Azerbaijan expresses its grave concern over the activities of the so-called “Karabakh Telecom” (“K-Telecom”) company, which has been illegally established in the Nagorno-Karabakh region and other occupied territories of Azerbaijan. In particular, the above-mentioned company is provided with roaming services using Azerbaijan’s radio frequencies without prior legal authorization of the Government of Azerbaijan, and has been using the national country code (+374), which is not the Azerbaijan’s national country code, in the occupied territories of Azerbaijan for fixed and mobile networks.

The Republic of Azerbaijan considers that the above-mentioned on-going illegal practices carried out in the occupied territories of Azerbaijan also gravely violate the provisions of the ITU Constitution and Convention (Geneva 1992), as amended by the Plenipotentiary Conferences (Kyoto 1994, Minneapolis 1998, Marrakesh 2002, Antalya 2006, Guadalajara 2010), as well as ITU Recommendation E.164 on the international public telecommunication numbering plan.

These actions also create significant obstacles to the implementation by Azerbaijan of its exclusive sovereign right to regulate its telecommunications and to use its numbering resource within its entire internationally recognized territory, to ensure the integrity of its telecommunication infrastructure, and to use radio frequencies in its territory in accordance with the provisions of the legal instruments of ITU.

In this regards it is necessary to recall that the UN Security Council Resolutions 822, 853, 874 and 884 of 1993 have reaffirmed sovereignty and territorial integrity of Azerbaijan and demanded immediate, complete and unconditional withdrawal of the Armenian occupying forces from the Nagorno-Karabakh region and other occupied territories of Azerbaijan, and that the UN General Assembly Resolution 62/243 of 2008 has called on the UN Member States not to recognize as lawful the situation resulting from the occupation of the territories of the Republic of Azerbaijan, nor render aid or assistance in maintaining this situation. The ITU as a specialized Agency of the UN and its Member States have to take the above-mentioned UN documents into account.

Secretary-General of ITU

ITU is a Specialized Agency of the United Nations whose priority objectives include, through the development of telecommunications, to preserve peace and foster economic and social development of all its Member States.

Having considered the above communication of the Republic of Azerbaijan, I wish to express my serious concern about the situation described in the above communication.

In that respect, I wish to reaffirm that all Member States in accordance with their relevant obligations have to respect the fundamental principles set forth in the legal instruments of the Union, in particular the sovereign right of each Member State to regulate its telecommunications within its internationally recognized borders.

Finally, as a Specialized Agency of the United Nations, the Union is mindful of the relevant UN General Assembly Resolutions and is fully taking into account the relevant UN Security Council Resolutions.

National Numbering Plan (According to Recommendation ITU-T E.129 (01/2013))

Web: www.itu.int/itu-t/inr/nnp/index.html

Administrations are requested to notify ITU about their national numbering plan changes, or to give an explanation on their webpage concerning the national numbering plan as well as their contact points, so that the information, which will be made available freely to all administrations/ROAs and service providers, can be posted on the ITU-T website.

For their numbering website, or when sending their information to ITU/TSB (e-mail: tsbtson@itu.int), administrations are kindly requested to use the format as explained in Recommendation ITU-T E.129. They are reminded that they will be responsible for the timely update of this information.

From 1.VI.2017 the following countries/geographical areas have updated their national numbering plan on our site:
