

**ADL**  
GLOBAL **100**™  
AN INDEX OF ANTI-SEMITISM

# ADL Global 100: A Survey of Attitudes Toward Jews in Over 100 Countries Around the World

Total population  
of countries surveyed:

**5,940,093,187 = 85.9%** of the world's population

Total adult population  
of countries surveyed:

**4,161,578,905 = 88.4%** of the world's adult population

Surveys conducted in  
countries which account for:

**96.9%**  
of the world's GDP

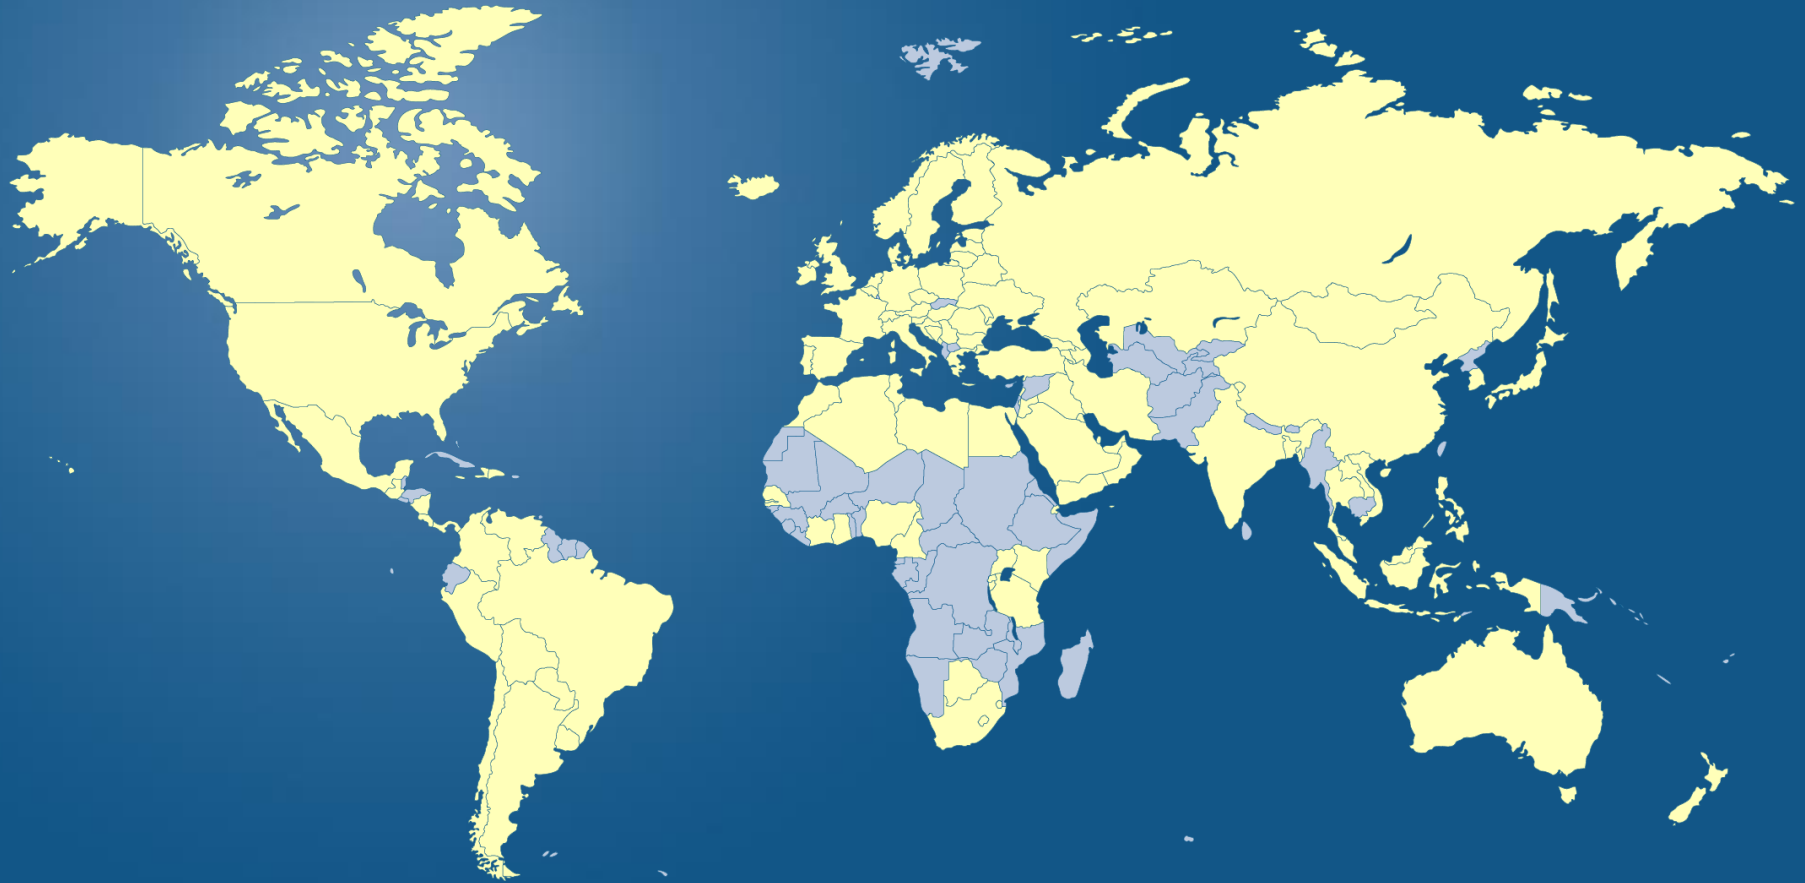

Surveys  
conducted in:

**9 of the 10**  
most populous countries in the world

# ADL Global 100 Countries by Region

The Americas	Western Europe	Eastern Europe	Middle East & North Africa (MENA)	Sub-Saharan Africa	Asia	Oceania

# The ADL Global 100: World Coverage

## Polled countries

Index Scores were created by asking whether the following negative stereotypes are “probably true” or “probably false.” Respondents who said at least 6 out of 11 statements are “probably true” are considered to harbor anti-Semitic attitudes.

## ANTI-SEMITIC STEREOTYPES

---

- 1) Jews are more loyal to Israel than to [this country/the countries they live in].
- 2) Jews have too much power in the business world.
- 3) Jews have too much power in international financial markets.
- 4) Jews don't care about what happens to anyone but their own kind.
- 5) Jews have too much control over global affairs.
- 6) People hate Jews because of the way Jews behave.
- 7) Jews think they are better than other people.
- 8) Jews have too much control over the United States government.
- 9) Jews have too much control over the global media.
- 10) Jews still talk too much about what happened to them in the Holocaust.
- 11) Jews are responsible for most of the world's wars.

# ADL Global 100

The overall  
ADL GLOBAL  
100 Index Score is:

**26% =**

Percentage of respondents  
who say that at least 6 of the 11  
negative stereotypes tested are  
“probably true.”

## Average Regional Index Scores:

Middle East & North Africa (MENA)	74%
Eastern Europe	34%
Western Europe	24%
Sub-Saharan Africa	23%
Asia	22%
Americas	19%
Oceania	14%

## Highest Index Score (Non-MENA):

Greece\* 69%

## Lowest Index Score in MENA:

Iran\*\* 56%

**13% =**

Combined Index Score for  
English-speaking countries

\* Tied for 17<sup>th</sup> highest.

\*\* A much lower Index Score than Iraq (92%) or the West Bank & Gaza (93%).

# Major Findings

**26%** Harbor Anti-Semitic Attitudes = **1.09 billion\*** people

**35%** Have never heard of the Holocaust

*\* This figure represents an estimate based on the total adult population of all the countries/territories surveyed and their respective Index Scores, weighted by the adult population. This figure is subject to the same margin of error outlined in the methodology report.*

# Major Findings

The most widely accepted anti-Semitic stereotype worldwide is:

*“Jews are more loyal to Israel than to this country/the countries they live in.”*

**41%**

Of those surveyed believe this statement to be “probably true.”

This is the most widely accepted stereotype in 5 of the 7 regions:

The second most widely accepted stereotype worldwide is:

*“Jews have too much power in the business world.”*

**35%**

Of those surveyed believe this statement to be “probably true.”

This is the most widely accepted stereotype in Eastern Europe:

**53%**

Among respondents in MENA, the two most widely accepted stereotypes are:

*“People hate Jews because of the way Jews behave.”*

**75%**

“probably true”

*“Jews are more loyal to Israel than to this country/the countries they live in.”*

**74%**

“probably true”

# Major Findings

Region tends to be a stronger factor than religion in determining the existence of anti-Semitic attitudes. Anti-Semitic attitudes are most prevalent in MENA with an average Index Score of:

**74%**

Among all the religious groups tested, Muslims have the highest average Index Score:

**49%**

Average Index Scores by region (Muslim respondents):

Average Index Scores by region (Christian respondents):

# Major Findings

## Factors that are predictors of anti-Semitic views:

### Age\*:

Average Index Scores overall by age:

Over 65  
**34%**

Under 65  
**25%**

*\* Older people are more likely to harbor anti-Semitic views.*

### Familiarity with Jews\*\*:

Average Index Scores overall by country:

Larger Jewish Population \*\*\*  
**22%**

Smaller Jewish Population  
**28%**

*\*\* More familiarity = lower Index Scores.*

*\*\*\* "Larger Jewish Population" refers to countries that have an estimated Jewish population greater than 10,000, or more than 0.1% of the overall population, or where ADL has surveyed in the past.*

### Education:

In the West (The Americas, Western Europe, and Oceania), more educated people are less likely to harbor anti-Semitic views.

In MENA, more educated people are more likely to hold anti-Semitic views.

### Overestimating the global Jewish population:

Average Index Scores:

Believe global Jewish pop. > 10%  
**38%**

Believe global Jewish pop. < 1%  
**28%**

# Major Findings

Respondents that have heard of the Holocaust: **54%**

Have heard and believe it has been accurately described by history: **33%**

Among those who have heard of the Holocaust:

**32%** Believe it is either a myth or has been greatly exaggerated

In MENA that figure is: **63%**

## Holocaust awareness (by region):

## Have heard of the Holocaust and believe the historical account (by region):

Under 35  
Younger people are less aware of the Holocaust : **48%**  
Aware

50 and older  
**61%**  
Aware

# Major Findings

Of the

**74%**

who have never met  
a Jewish person:

**25%**

Still harbor anti-Semitic  
attitudes.

Of the

**26%**

who believe a majority of  
the anti-Semitic stereotypes  
tested to be “probably true”...

**70%**

Have actually never  
met a Jewish person.

# Major Findings

Respondents consistently overestimate the world's Jewish population.

Think that Jews make up more than 1% of the world's population or roughly 70 million people:

**48%**

Actual number of Jewish people as a percentage of the world's population:

**0.19%**

Think that Jews make up more than 10% of the world's population or roughly 700 million people:

**18%**

Think that Jews make up 20% of the world's population or roughly 1.4 billion people:

**9%**

People who overestimate the Jewish population globally are more likely to harbor anti-Semitic views

Think that Jews make up >10% of the world's population:

Average Index Score:  
**38%**

Think that Jews make up <1% of the world's population:

Average Index Score:  
**28%**

# Major Findings

There are stark differences with regard to attitudes toward Israel in MENA versus the rest of the world's regions.

In MENA, attitudes toward Israel are overwhelmingly unfavorable: **9%** favorable / **84%** unfavorable

Outside MENA, attitudes toward Israel : **37%** favorable / **26%** unfavorable

---

The only region outside of MENA where Israel receives a net-unfavorable rating is Asia:

**26%** favorable / **30%** unfavorable

Among respondents in Asia: **44%** have no opinion either way

# Major Findings

There are significant differences in attitudes toward Palestine inside and outside of MENA as well.

Favorability toward Palestine is overwhelming in MENA : **84%** favorable / **11%** unfavorable

Like Israel, views of Palestine are mixed in Asia.

**28%** favorable / **25%** unfavorable

Palestine receives a higher favorable rating than Israel in:

Western Europe:

**+2 points**

---

Israel receives a higher favorable rating than Palestine in:

Eastern Europe:

**+15 points**

Sub-Saharan Afr.:

**+25 points**

The Americas:

**+21 points**

Oceania:

**+6 points**

The most commonly held stereotype about Jews is that they are more loyal to Israel than to the countries they live in. The next two most commonly held stereotypes are that Jews have too much power in business and finance.

STEREOTYPES	% responding “probably true” among all respondents
Jews are more loyal to Israel than to [this country/the countries they live in]	41
Jews have too much power in the business world	35
Jews have too much power in international financial markets	34
Jews think they are better than other people	34
Jews don't care about what happens to anyone but their own kind	33
People hate Jews because of the way Jews behave	32
Jews still talk too much about what happened to them in the Holocaust	30
Jews have too much control over global affairs	29
Jews have too much control over the United States government	25
Jews have too much control over the global media	25
Jews are responsible for most of the world's wars	23

# Muslims are more likely to harbor anti-Semitic views than members of other religions.

Nearly half of all Muslims surveyed said “probably true” to at least 6 of the 11 index stereotypes

Religion source: <https://www.cia.gov/library/publications/the-world-factbook/geos/xx.html>

# Christians in Eastern Orthodox and Catholic countries are more likely to harbor anti-Semitic views than those in Protestant countries.

This was true of non-Christians in these countries too, so there are likely larger factors at work

Index Score: % who believe 6+ statements were "probably true"

Among Christians

Among Non-Christians

Religion source: <https://www.cia.gov/library/publications/the-world-factbook/geos/xx.html>

# Region plays an even more important role than religion in anti-Semitic views.

Muslims in MENA have higher Index Scores than those in other parts of the world. MENA Christians also have higher levels of anti-Semitic views.

**Index Score: % who believe 6+ statements**

Please note that for Muslims in Oceania and those responding "no religion" in MENA, there was insufficient data to report results.

# Men generally hold more anti-Semitic views than women.

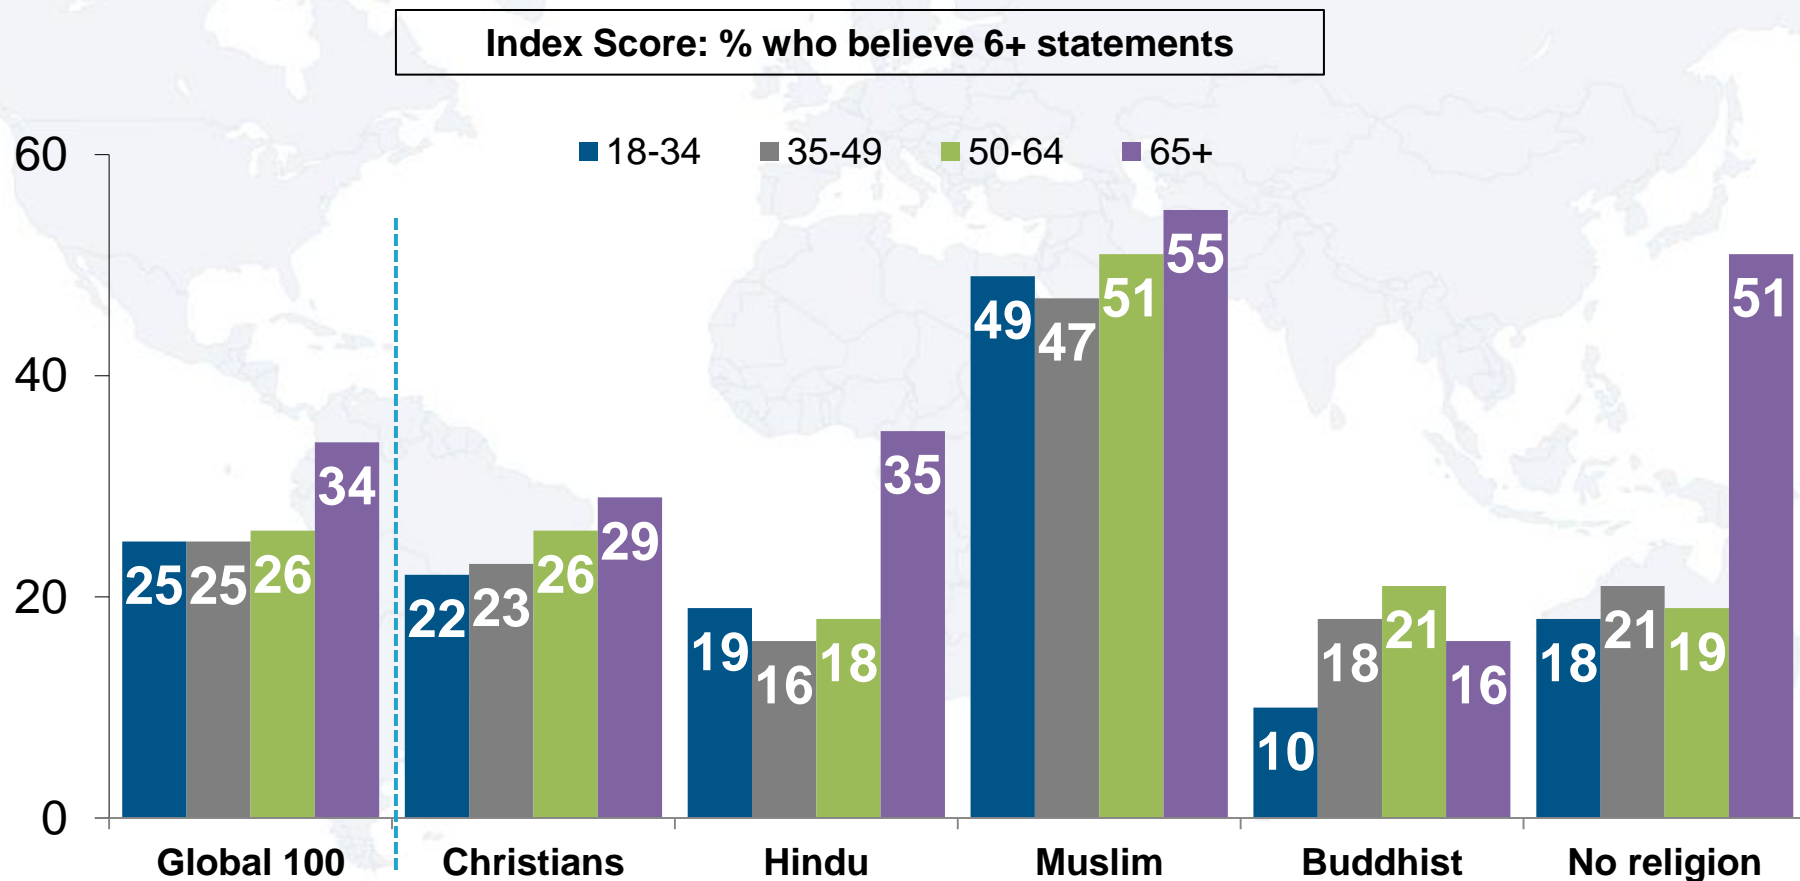

This is true for every religion except Buddhism

Index Score: % who believe 6+ statements

# Older people hold more anti-Semitic views.

With the exception of Buddhists, older people are more likely to harbor anti-Semitic views than younger people.

# Countries with more than 10,000 Jews (or where Jews are more than .1% of the population) tend to hold fewer anti-Semitic views.

Index Score: % who believe 6+ statements

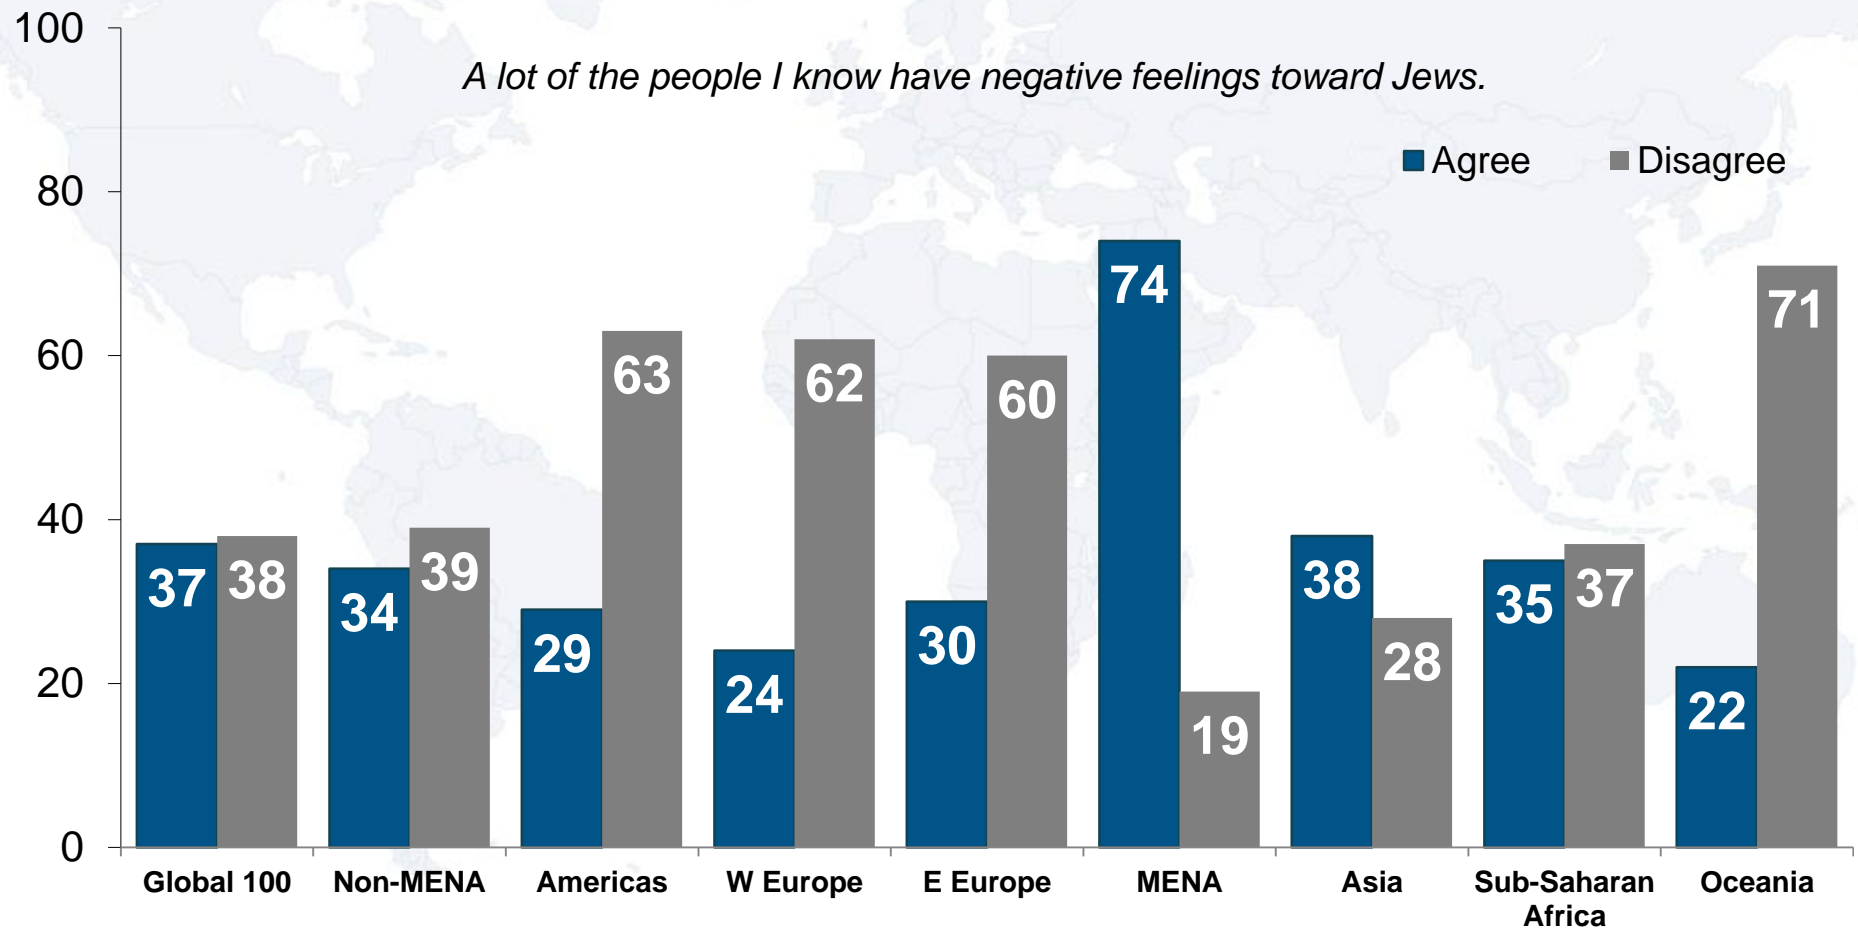

# Education levels affect overall adherence to anti-Semitic views differently in different parts of the world.

In the Americas, Western Europe, and Oceania, respondents with more education have lower Index Scores. Conversely, in MENA, those surveyed with more education have higher Index Scores.

# Many people around the world believe their neighbors have negative feelings about Jews.

Thirty-seven percent of those surveyed said their neighbors are negative toward Jews, including 74% in the Middle East/North Africa. This is often a strong proxy for people holding such views personally.

# Younger people are less aware of the Holocaust.

While younger people are less likely to hold anti-Semitic views, they are also less likely to have heard of the Holocaust regardless of their religion.

*Have you heard about the Holocaust in Europe during World War Two?*

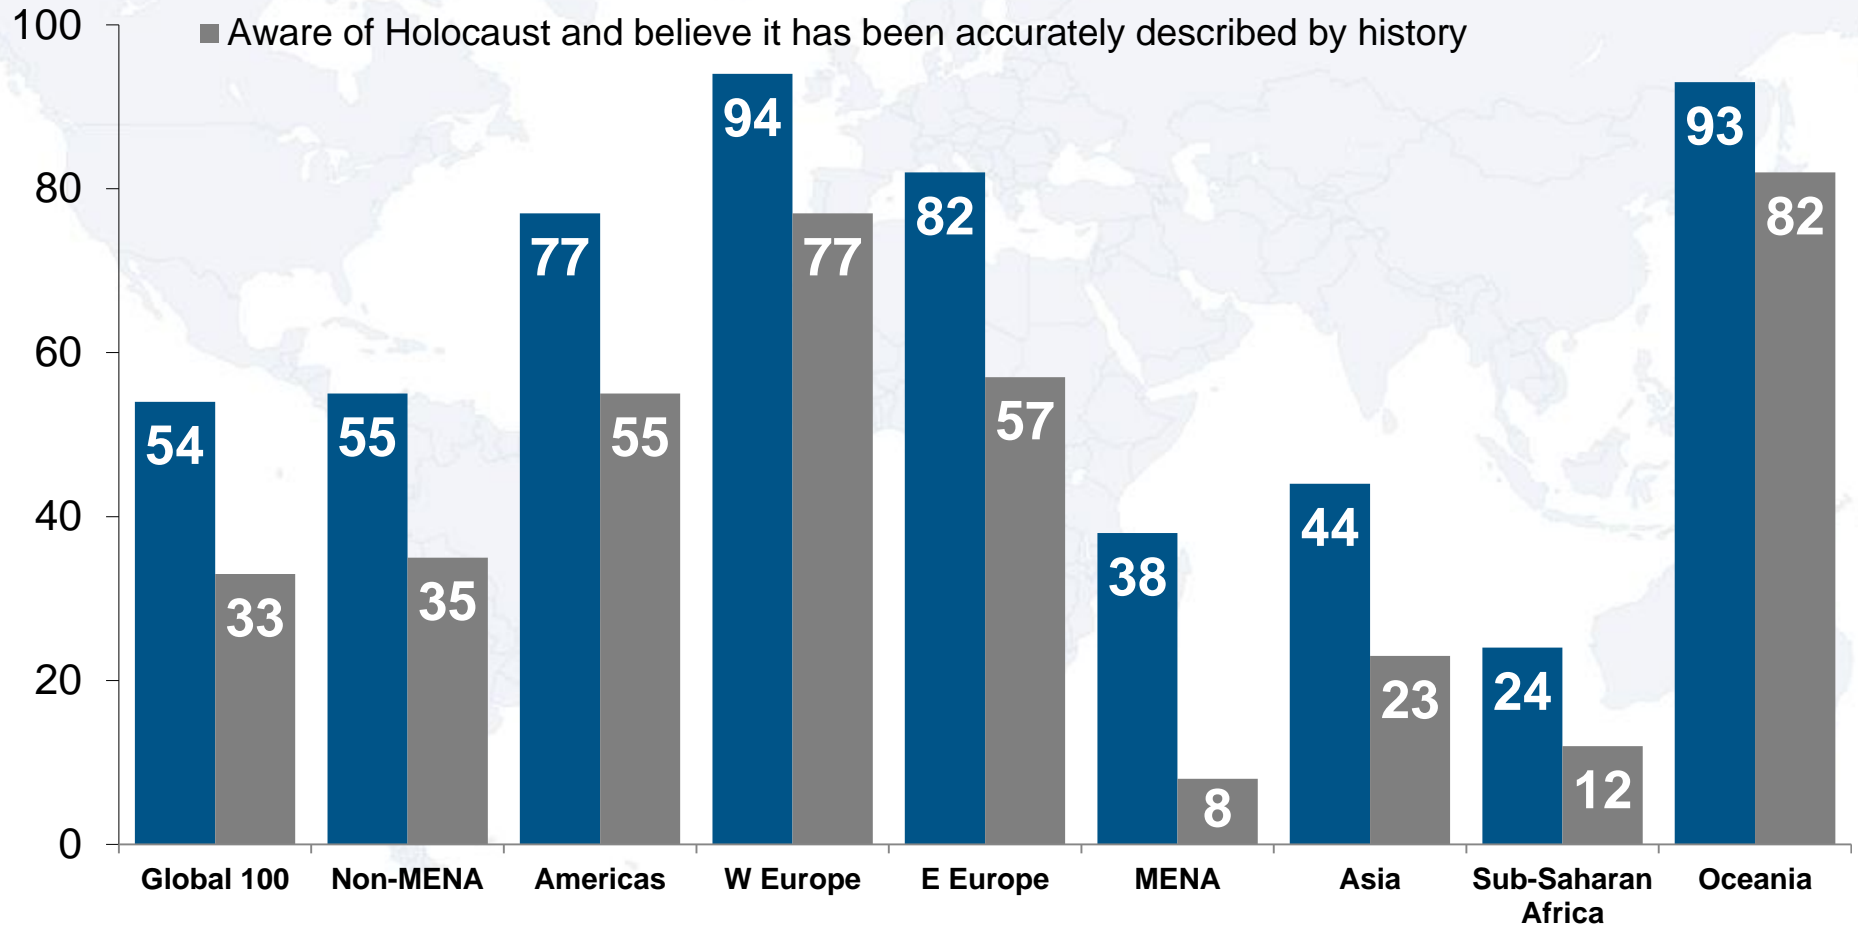

**% Responding Yes**

# Only 33% are aware of the Holocaust and believe it has been accurately described by history.

A majority of people surveyed overall have either not heard of the Holocaust or do not believe it happened as has been described by history.

■ Aware of Holocaust  
■ Aware of Holocaust and believe it has been accurately described by history

Nearly a third of respondents who have heard of the Holocaust, 32 percent, think it is either a myth or has been greatly exaggerated.

*Which of the following statements comes closest to your views about the Holocaust in Europe during World War Two?*

*[ASKED ONLY OF RESPONDENTS WHO HAVE HEARD OF THE HOLOCAUST]*

# Younger people are less likely to believe the historical accounts of the Holocaust.

Among most religious groups, younger people are less likely to believe its historical account, even though they hold fewer anti-Semitic views.

*Which of the following statements comes closest to your views about the Holocaust in Europe during World War Two?*

*[ASKED ONLY OF RESPONDENTS WHO HAVE HEARD OF THE HOLOCAUST]*

Overall, respondents vastly overestimate the world's Jewish population. In most regions, a majority think over 1% of the world's population is Jewish. Many even think it is over 10%.

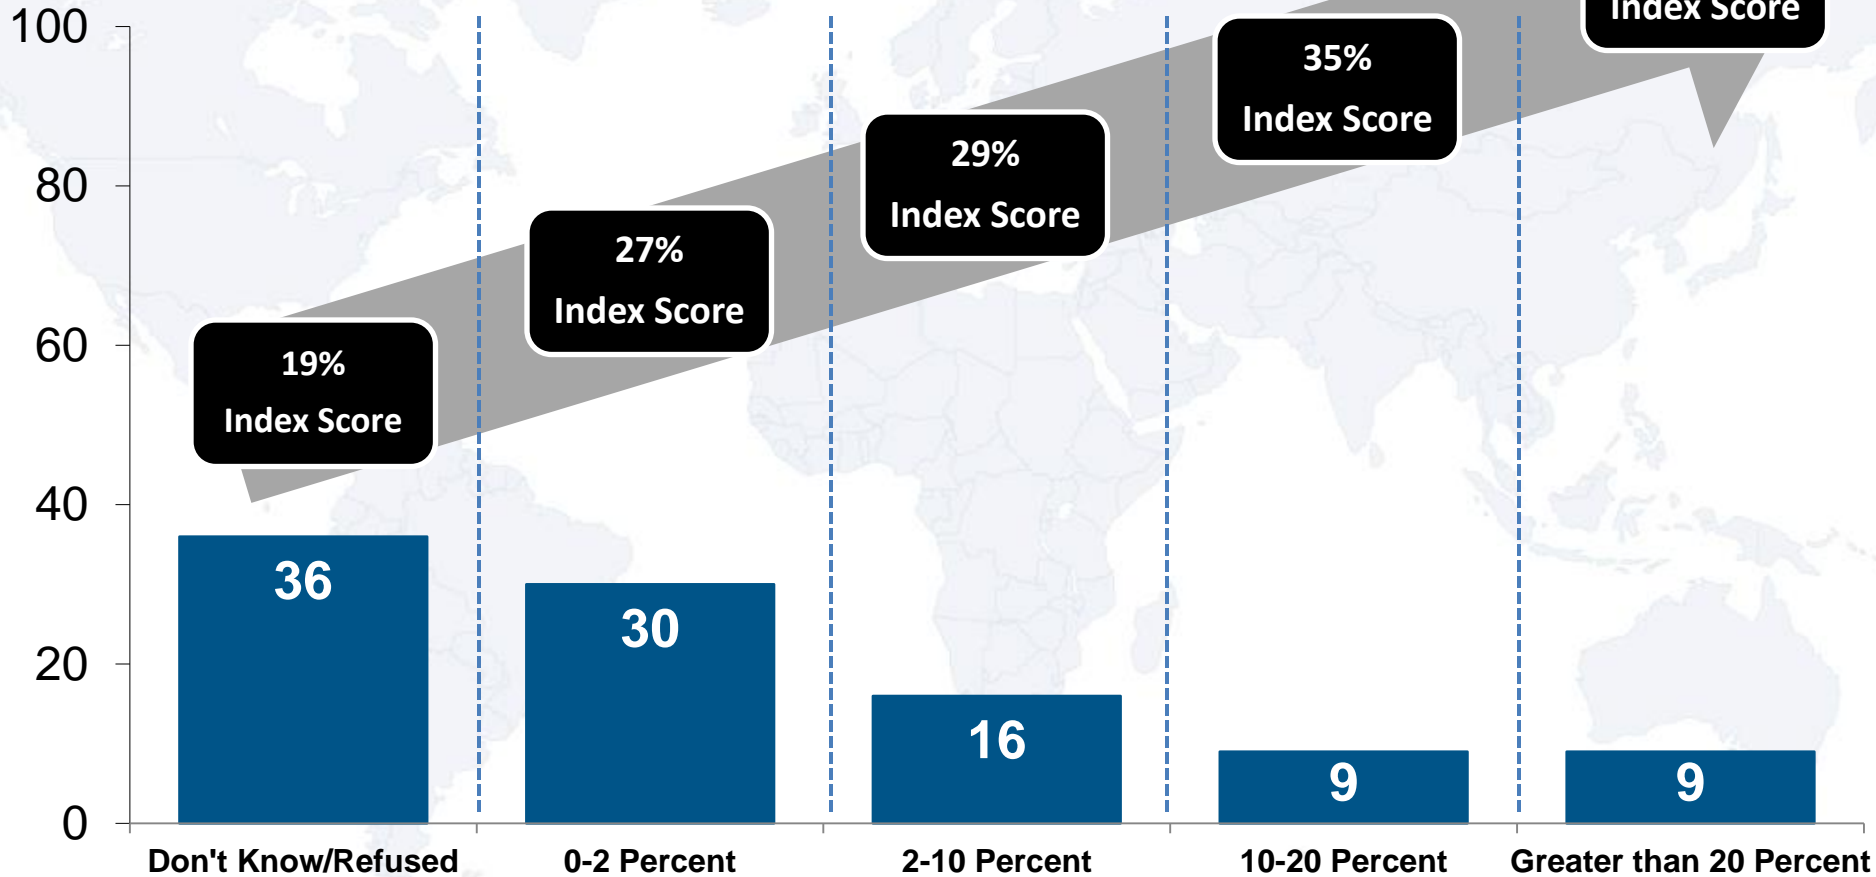

Regression analysis shows that people who overestimate the world's Jewish population are also more likely to harbor anti-Semitic attitudes.

*What percentage of the world's population do you think is Jewish? That is, out of every one hundred people in the world, how many do you think are Jewish?*

The more people overestimate the world's Jewish population, the more they tend to harbor anti-Semitic attitudes.

### Estimate of World Jewish Population X Index Score

*What percentage of the world's population do you think is Jewish? That is, out of every one hundred people in the world, how many do you think are Jewish?*

# Fewer than 10 percent of those surveyed say they interact with Jewish people very or somewhat often.

How often would you say you interact with Jewish people?

# Interaction with Jews by Region (continued)

*How often would you say you interact with Jewish people?*

# Most people get their information about Jews from television.

However, the Internet is an important second source of information for many.

*Where do you get most of your information about Jews?*

Muslims who get their information about Jews from the Internet are more likely to harbor anti-Semitic attitudes than those who receive their news from other sources.

*% agree with 6+ of 11 stereotypes, by information source*

# Methodology

# Methodology

The Anti-Defamation League commissioned First International Resources to research attitudes and opinions toward Jews in more than 100 countries around the world. Fieldwork and data collection for this global public opinion project were conducted and coordinated by Anzalone Liszt Grove Research. All interviews were conducted between July 2013 and February 2014.

The data is a result of 53,100 total interviews among citizens aged 18 and over, across 101 countries and the Palestinian Territories in the West Bank & Gaza. Expected margin of sampling error for the weighted global average is +/- 0.97%, for the countries/territories surveyed with n=500 interviews it is +/- 4.4% and for countries sampled with n=1,000 interviews it is +/- 3.2%. The margin of error is higher for sub-groups within each geography.

Interviews were conducted via landline telephones, mobile phones and face-to-face discussions in 96 languages (including many dialects and pidgin/creole versions).

All respondents were selected at random. Telephone respondents were selected using random-digit dial sampling; face-to-face respondents were selected using geographically stratified, randomly-selected sampling points in each country and at the household level, using a Kish grid.

# Methodology

Telephone interviewing was only conducted in countries where the combined mobile phone + landline penetration exceeded 90%. In all countries where telephone dialing was conducted, interviews were collected using a combination of landline and mobile phone dialing, in proportion to that particular country's coverage rate for each telephone type. Within each country, the data was weighted to be reflective of the national population on a number of demographic measures, including age, gender, religion, urban/rural location, ethnicity, and language spoken.

In an overwhelming majority of the countries/territories polled, the samples are fully nationally representative. However, in some countries (China, India, Ghana, Indonesia, Nigeria, Bangladesh, Laos, Malaysia, Mauritius, Uganda, and Vietnam), due to security concerns or extreme logistical challenges, national coverage was not complete. In those situations, sampling points were selected and the data was weighted to ensure the country's interviews were reflective of the national population on key demographic measures other than geography.

For regional and global averages, the data was weighted so that each country's interviews were represented proportionately to that country's adult population.

The source for population data was the UN Department of Social and Economic Affairs - Population Division.
