

Mission

Aerial Work

Power Line Activities

Imagine new possibilities when helicopters allow you to access otherwise unreachable areas

- Maintain a low environmental impact
- Reduce your workload
- Remain safe & efficient
- Save time & money

Power Line Inspection

The fastest and most efficient way to keep your network 100% functional

Be reactive and get ahead of power line outages. With their long-range capabilities, helicopters allow you to get onsite at a moment's notice - even at large distances. Once there, you can precisely detect and evaluate any malfunctions in the lines to then anticipate immediate or long-term maintenance.

Maintenance and Repairs

A safe and efficient way to avoid black outs

Helicopters are the easiest way to get right to the root of the issue. Get instant access to the lines to be repaired 10-times faster than with trucks or cranes, and keep your crews safely out of harm's way.
