

Written evidence

Agriculture, achieving net-zero emissions inquiry
launched

September 2019

Introduction

The Law Society of Scotland is the professional body for around 12,000 Scottish solicitors. With our overarching objective of leading legal excellence, we strive to excel and to be a world-class professional body, understanding and serving the needs of our members and the public. We set and uphold standards to ensure the provision of excellent legal services and ensure the public can have confidence in Scotland's solicitor profession.

We have a statutory duty to work in the public interest, a duty which we are strongly committed to achieving through our work to promote a strong, varied and effective solicitor profession working in the interests of the public and protecting and promoting the rule of law. We seek to influence the creation of a fairer and more just society through our active engagement with the Scottish and United Kingdom Governments, Parliaments, wider stakeholders and our membership.

Our Rural Affairs and Environmental Law sub-committees welcome the opportunity to consider and respond to the Environment, Food and Rural Affairs Committee's inquiry on *Agriculture, achieving net-zero emissions*¹. We have the following comments to put forward for consideration.

General comments

We consider that strong collaboration between the UK Government and devolved administrations is of considerable importance in achieving net-zero emissions. This is particularly significant given the transboundary effects of environmental impacts.

The Cabinet Office published in late 2017 a list of 111 points where EU law intersects with devolved matters. This has been supplemented by the publication of the *UK Government's Frameworks analysis: breakdown of areas of EU law that intersect with devolved competence in Scotland, Wales and Northern Ireland* on 9 March 2018. 24 of the policy areas in question were identified as being subject to more detailed discussion to explore whether legislative common framework arrangements might be needed, in whole or in part. The Cabinet Office published in April 2019 a *Revised Frameworks Analysis: Breakdown of areas of EU law that intersect with devolved competence in Scotland, Wales and Northern Ireland*². This revised analysis has reduced the number of policy areas where legislation common frameworks may be required to 21, and includes a number of matters relating to agricultural and the environment.

In order to add further information to the debate, we offer a survey of those policy areas relevant to agricultural matters (annexed to this paper) which includes details of the EU law concerned and the

implementing legislation for Scotland and, where appropriate, for the UK (occasionally on a GB basis) and for England and Wales.

We also note that the Scottish Government has consented to regulations on a variety of agricultural and environmental matters which have been, or are due to be, laid in Parliament in preparation for the UK's EU exit.³

While some measures have been taken to date in the agriculture sector, for example changes to regulation in respect of the burning of bale wrappers, we recognise that some parts of the sector would benefit from greater education and training in order to move towards net-zero emissions.

Consultation questions

5. What impacts would large-scale changes in land-use have on rural communities and how should the transition be managed to achieve sustainable and just economic, environmental and social outcomes?

We note that there are competing uses for, and interests in, rural land and as a result, we suggest that land-use needs to be considered 'in the round' in attempting to achieve the outcomes sought.

We consider that it may be difficult to have a UK-wide strategy on this matter. Areas of land in Scotland are commonly used for crofting, grazing (including common grazing) and hill farming. There has been some focus in discussions on climate change and net-zero emissions on the contribution of cattle and sheep farming to greenhouse gas emissions. There is potential for this to result in a disproportionate impact in a Scottish context if there are large-scale changes in land-use.

In addition, agricultural tenants must be carrying out agricultural work in order to comply with the terms of their lease and therefore, there may be an impact on such individuals if there are changes to land-use impacting on agriculture. We note that there may be an impact on land values as a result of changes in land use. Forestry and alternative land uses may be more valuable than agricultural land.

The Scottish Land Commission are undertaking work around the involvement of communities in decisions about land. This may be relevant to work on land-use, particularly in rural communities.

³ Further information about the Scottish Parliament's consideration of these instruments can be found here: <https://www.parliament.scot/parliamentarybusiness/CurrentCommittees/109366.aspx> and <https://www.parliament.scot/parliamentarybusiness/CurrentCommittees/110153.aspx>

DEFRA	Agriculture – GMO marketing and cultivation	x	x	x	<p>Standards for marketing and cultivation of genetically modified organisms.</p> <p><u>Law Society Scotland Comments</u></p> <p><u>EU Law</u> Directive 2001/18/EC (Deliberate Release) Directive (EU) 2015/412 (Deliberate Release-possibility to restrict cultivation of GMOs in Member State's territory) Directive 2009/41/EC (Contained Use) Regulation 1829/2003 (Food and Feed)</p>

				<p>Regulation 1830/2003 (Traceability and Labelling) Regulation 1946/2003 (Transboundary Movements) Genetically Modified Organisms (GMO) technology is strictly regulated and the EU has had a legal framework since the 1990s.</p> <p>EU legislation establishes the conditions for the development, use or marketing of a GMO or a food/feed product derived from GMOs. EU legislation on GMOs has two main objectives: To protect health and the environment: a GMO or a food product derived from a GMO can only be put on the market in the EU after it has been authorised on the basis of a detailed EU procedure based on a scientific assessment of the risks to health and the environment and to ensure the free movement of safe and healthy GM products in the EU. GM authorisation in Europe adopts a precautionary, case-by-case approach where the scale of release is related to the level of risk.</p> <p>There are the following levels of authorisation:</p> <p>Contained use – This is GM research carried out in a contained environment, under Directive 2009/41/EC.</p> <p>Research releases - this is the deliberate release to the environment authorised under the Deliberate Release into the Environment of GMOs Directive, 2001/18/EC. These are small scale releases carried out under tight control.</p> <p>Commercial releases – is the deliberate release to the environment authorised under Part C of the Deliberate Release into the Environment of GMOs Directive, 2001/18/EC, or under the Genetically Modified Food and Feed Regulation, 1829/2003. This type of authorisation covers import and use of a GMO for food or feed and non-food use and it can allow EU-wide commercial scale growing of a GM crop. The Food Standards Agency (FSA) is responsible for food safety issues whilst Defra and the devolved agriculture departments are responsible for assessing risks to the environment. All new crop varieties (GM and non GM) also have to be approved as suitable for agriculture via the National List trials route. The Traceability and Labelling Regulation 1830/2003/EC and Food and Feed Regulation 1830/2003/EC require the labelling of any intentional use of GM ingredients in food and feed. A GMO that has not been approved is not allowed in food and feed for sale in the EU.</p>
--	--	--	--	--

			<p><u>UK Law</u> Environmental Protection Act 1990 The Genetically Modified Organisms (Contained Use) Regulations 2014 The competent authority responsible for the Regulations consists of the Health and Safety Executive (HSE) and the Secretary of State for the Environment, Food and Rural Affairs (Defra) in England and Wales www.gov.uk/government/organisations/department-for-environment-food-rural-affairs</p> <p>In Scotland, the HSE and the Scottish Government are the joint competent authority. The HSE considers the risk to the operator and the Scottish Government considers the risk to the environment from any GMO release.</p> <p><u>Scottish Law</u> Enforcement in Scotland</p> <p>In Scotland there are four sets of regulations granting powers to authorised officers for enforcement, and creating penalties for non-compliance. Local authorities are responsible for the enforcement of traceability and labelling requirements and for sampling and testing food and feed for GMOs. The GM Inspectorate and Science and Advice for Scottish Agriculture (SASA) is responsible for ensuring compliance with the regulations governing the deliberate release into the environment of GMOs in Scotland.</p> <p>The Genetically Modified Organisms (Deliberate Release) (Scotland) Regulations 2002 Genetically Modified Food (Scotland) Regulations 2004 Genetically Modified Organisms (Traceability and Labelling) (Scotland) Regulations 2004 Genetically Modified Organisms (Transboundary Movements) (Scotland) Regulations 2005</p> <p><u>UK Government Technical Notices</u> Developing genetically modified organisms (GMOs) if there's no Brexit deal, 23 August 2018 https://www.gov.uk/government/publications/developing-genetically-modified-organisms-gmos-if-theres-no-brexit-deal</p> <p><u>European Commission Preparedness Notices</u> The European Commission Notice to Stakeholders: Withdrawal of the United Kingdom and EU Rules on Genetically Modified Food and Feed and the Deliberate Release of Genetically Modified Organisms into the Environment, 23 January 2018</p>

DEFRA	Agriculture – organic farming	x	x	x	<p>Regulations setting out standards for organic production certification.</p> <p><u>Law Society Scotland Comments</u></p> <p><u>EU Law</u> The Council Regulation 834/2007/EC sets out the principles, aims and overarching rules of organic production and defines how organic products are to be labelled.</p> <p>The regulation has the following aims:</p>

				<p>a. sustainable cultivation systems b. a variety of high-quality products c. greater emphasis on environmental protection d. more attention to biodiversity e. higher standards of animal protection f. consumer confidence g. protecting consumer interests</p> <p>Synthetic resources may be permissible if there are no suitable alternatives. Such products, which must be scrutinised by the Commission and EU countries before authorisation, are listed in the annexes to the implementing regulation 889/2008/EC. 15</p> <p>Labelling organic foods Foods can be labelled "organic" if at least 95% of the agricultural ingredients meet the necessary standards. In non-organic foods, any ingredients which meet organic standards can be listed as organic. Organic production outlaws GMOs. However, the regulation on genetically modified food and feed sets a threshold (0.9%) under which a product's GMO content does not have to be indicated. Products with GMO content below this threshold can be labelled organic.</p> <p>Since 1 July 2010, EU producers of organic food have been required to use the EU organic logo.</p> <p><u>UK Law</u> The Organic Products Regulations 2009 The power of the Secretary of State, as a designated Minister, to make regulations which extend to Scotland, Wales and Northern Ireland remains exercisable by virtue of section 57(1) of the Scotland Act 1998 (c. 46); article 3(4) of the European Communities (Designation) (No. 3) Order 1999 (S.I.1999/2788), and article 3(2) of the European Communities (Designation) (No. 3) Order 2000(S.I. 2000/2812).</p> <p><u>UK Government Technical Notices</u> Producing and processing organic food if there's no Brexit deal, 23 August 2018 https://www.gov.uk/government/publications/producing-and-processing-organic-food-if-theres-no-brexit-deal</p>

DEFRA	Animal health and traceability	x	x	x	<p>EU rules and standards that aim to maintain animal health and allow their movement, including policies covering: prevention of disease (entering UK) control of disease (endemic and exotic, surveillance (for exotic disease) movement of livestock, pet passports and veterinary medicines.</p> <p><u>Law Society Scotland Comments</u></p> <p><u>EU Law</u> The Regulation on Transmissible Animal Diseases, the EU Animal Health Law provides:</p> <ul style="list-style-type: none"> a. Simpler rules to enable authorities to focus on preventing and eradicating disease b. Clearer responsibilities for farmers, vets and others dealing with animals c. Better surveillance of pathogens, electronic identification and registration of animals d. Earlier detection and control of animal diseases to reduce animal epidemics e. More flexibility to adjust rules to local circumstances <p>The Animal Health Law strengthens the enforcement of health and safety standards for the agri-food chain and is also a key output of the Animal Health Strategy 2007-2013 "Prevention is better than cure". Several delegated and implementing acts will be adopted by the EU until April 2019 to make the new rules applicable.</p>

			<p>Farmed Animals – Council Directive 98/58/EC concerning the protection of animals kept for farming purposes. Regulation 1/2005 on the Protection of Animals during Transport and related operations sets out minimum standards for the welfare of animals during transport. The Regulation applies to the transport of all live vertebrate animals for the purposes of economic activity, i.e. a business or trade.</p> <p><u>English Law</u> The Animal Welfare Act 2006 (AWA) contains the general laws relating to animal welfare. It is an offence to cause unnecessary suffering to any animal. The AWA contains a Duty of Care to animals - anyone responsible for an animal must take reasonable steps to make sure the animal's needs are met. The welfare of farmed animals is additionally protected by The Welfare of Farmed Animals (England) Regulations 2007, which are made under the AWA.</p> <p>The Welfare of Animals at Markets Order 1990 (WAMO) covers treatment of animals in markets to ensure they are not caused injury or unnecessary suffering. The order sets out arrangements for penning, food and water and the care of young animals. Responsibility for enforcing WAMO rests with local councils.</p> <p>The Welfare of Animals (Transport) (England) Order 2006 The welfare of farmed animals is additionally protected by the Welfare of Farmed Animals (England) Regulations 2007, which are made under the AWA. Welfare of Farmed Animals (England) Regulations 2007 Welfare of Farmed Animals (England) (Amendment) Regulations 2010 These regulations implement EU directives on the welfare of calves, pigs, laying hens, conventionally reared meat chickens and a general welfare framework directive, which sets down minimum standards for the protection of all farmed livestock. The regulations cover all farmed animals. Schedule 1 contains requirements for inspections, record keeping, freedom of movement, buildings, equipment and the feeding and watering of animals. Guidance has been prepared to accompany the regulations.</p> <p><u>Scottish Law</u> The Animal Health and Welfare (Scotland) Act 2006 The Welfare of Farmed Animals (Scotland) Regulations 2010</p>
--	--	--	---

			<p>The Welfare of Animals (Transport) (Scotland) Regulations 2006 The functions conferred upon the Minister of the Crown under section 2(2) of the European Communities Act 1972, insofar as within devolved competence, were transferred to the Scottish Ministers by virtue of section 53 of the Scotland Act 1998. http://www.gov.scot/Topics/farmingrural/Agriculture/animal-welfare/policies/Legislation http://www.gov.scot/Resource/0051/00512255.pdf</p> <p>The Animal Health and Welfare Framework has been introduced to recognise the importance of central and local government working together. It is a partnership between the Scottish Government, the Convention of Scottish Local Authorities (COSLA), the Society of Chief Officers of Trading Standards in Scotland (SCOTSS), the Society of the Chief Officers of Environmental Health in Scotland (SOCOEHs) and the Animal and Plant Health Agency (APHA). The Framework also helps to address the requirements of Regulation 882/2004/EC on Official Feed and Food Controls, in ensuring verification of compliance with animal health and welfare rules. This regulation aims to improve the consistency and effectiveness of official controls within Member States and across the EC.</p> <p>The Food Hygiene (Scotland) Regulations 2006 The Meat (Official Controls Charges) (Scotland) Regulations 2009 The Animal By-Products (Enforcement) (Scotland) Regulations 2013</p> <p><u>UK Government Technical Notices</u> Registration of veterinary medicines if there's no Brexit deal, 24 September 2018 https://www.gov.uk/government/publications/registration-of-veterinary-medicines-if-theres-no-brexit-deal</p> <p>Regulation of veterinary medicines if there's no Brexit deal, 24 September 2018 https://www.gov.uk/government/publications/regulation-of-veterinary-medicines-if-theres-no-brexit-deal</p> <p><u>European Commission Preparedness Notices</u> Notice to marketing authorisation holders of centrally authorised medicinal products for human and veterinary use, 23 January 2018 https://ec.europa.eu/health/sites/health/files/files/documents/ec_ema_notice_communication_brexit.pdf</p>

HSE and DERRA	Chemicals regulation (including pesticides)	*x	*x	*x	<p>EU regulations on the classification, labelling and packaging of substances and mixtures (CLP); the placing on the market and use of biocidal products (e.g. rodenticides); the export and import of hazardous chemicals; the registration, evaluation, authorisation and restriction of chemicals (REACH); and plant protection products (e.g. pesticides)</p> <p><u>Law Society Scotland Comments</u></p> <p><u>EU Law</u> The Sustainable Use of Pesticides Directive 2009/128/EC The European Commission is responsible for the approval of active substances for use in pesticides in Member States. Approval is given after a rigorous assessment process involving the European Food Safety Authority, Member States and scientific experts. The Directive includes provisions aimed at reducing risks and impacts on human health and the environment, and to improve controls on distribution and use:</p>

				<p>a. A National Action Plan b. compulsory testing of application equipment c. provision of training for and arrangements for the certification of operators, advisors and distributors d. a ban (subject to limited exceptions) on aerial spraying e. provisions to protect water, public spaces and conservation areas f. the minimisation of risks from handling, storage and disposal g. the promotion of low input regimes</p> <p><u>UK Law</u> The Food and Environmental Protection Act 1985 as amended by the Pesticides Act 1998.</p> <p>When an active substance is approved by the EU, companies can apply to the regulatory authority in each Member State for permission to place their product on the market. In the UK this is the Chemicals Regulation Division (CRD) of the Health and Safety Executive. The CRD publishes guidance on the Health and Safety Executive website.</p> <p>Code of Practice for Using Plant Protection Products in Scotland: http://www.gov.scot/resource/doc/161422/0043816.pdf</p> <p>The Code of Practice reflects the Scottish Government’s policy to reduce the effect of pesticide use on people and on the environment while controlling pests, diseases and weeds. The Plant Protection Products (Sustainable Use) Regulations 2012 are UK regulations which implement Directive 2009/128/EC.</p> <p>The power of the Secretary of State, as designated Minister, to make Regulations that extend to Scotland remains exercisable by virtue of section 57(1) of the Scotland Act 1998.</p> <p><u>European Commission Preparedness Notices</u> Questions and answers related to the United Kingdom’s withdrawal from the European Union with regards to plant protection products and pesticides residues, 2 October 2018 https://ec.europa.eu/info/sites/info/files/qa-plant-protection-products_en_0.pdf</p>
