

Lockheed Martin. Your Mission is Ours.®

Lockheed Martin (NYSE: LMT) solves the world's toughest technology challenges. More than 100 nations rely on Lockheed Martin employees, products and technologies to help them protect and connect their citizens and advance scientific discovery. In a time of growing uncertainty and unpredictable threats, we focus on innovation and performance to keep our customers at the center of everything we do.

All Data from 2020

People

114,000 Total Employees

8,100+ International Employees

60,000 Engineers, Scientists and Technologists

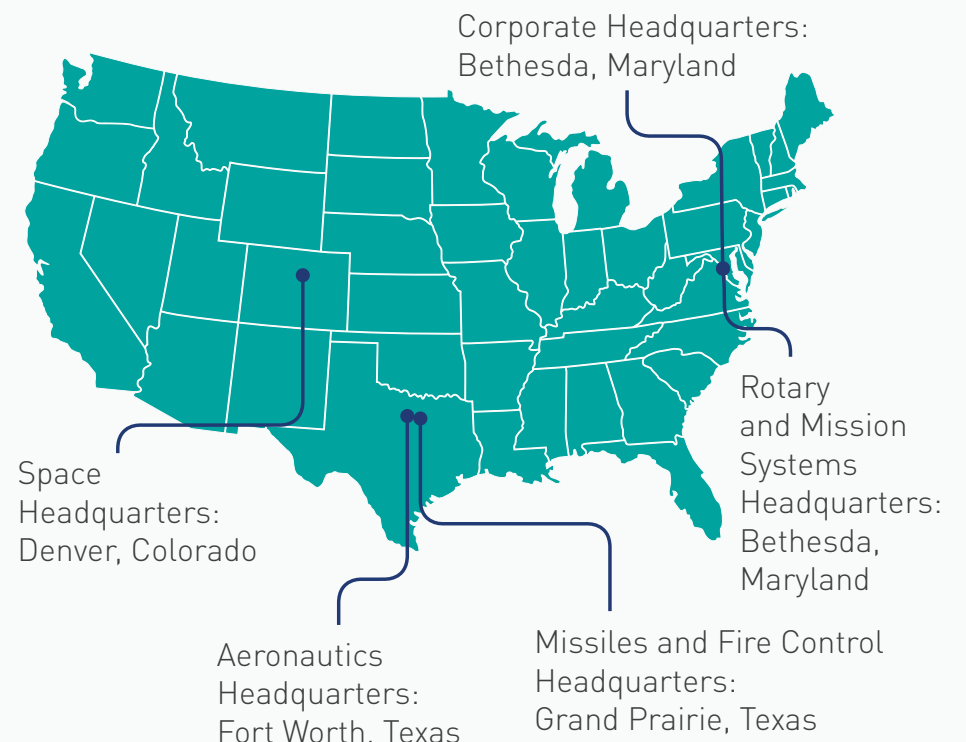

Nearly **one** in **five** employees is a veteran

Footprint

395+ Facilities Globally

Internationally: We have employees in **54** countries

Industry Leading Portfolio

AERONAUTICS

Aeronautics is committed to the design, production and sustainment of high-performance aircraft, including the world's only 5th Generation fighters, the F-35 Lightning II and F-22 Raptor, the most advanced 4th generation fighter, the F-16 Fighting Falcon and battle proven airlift with the C-130 Hercules. And the future of aviation is being developed today at its world renowned Skunk Works®.

MISSILES AND FIRE CONTROL

Missiles and Fire Control is the leading provider for superior weapon systems, sensors and services. We develop high-performance air and missile defense, air-to-air, precision fires, close combat, sustainment, sensors, strike systems and energy storage solutions. By delivering these vital capabilities globally, we provide our war fighting and civilian customers the products and services they need in their defining moments.

ROTARY AND MISSION SYSTEMS

Rotary and Mission Systems delivers mission first innovation across its portfolio of rotorcraft technology, sensors, radar systems, command and control, combat simulation and training, undersea systems and full-spectrum cyber capabilities. With a portfolio spanning 1000+ programs in more than 100 countries, we provide innovative, affordable and reliable solutions that enable our customers to create a more secure and prosperous world.

SPACE

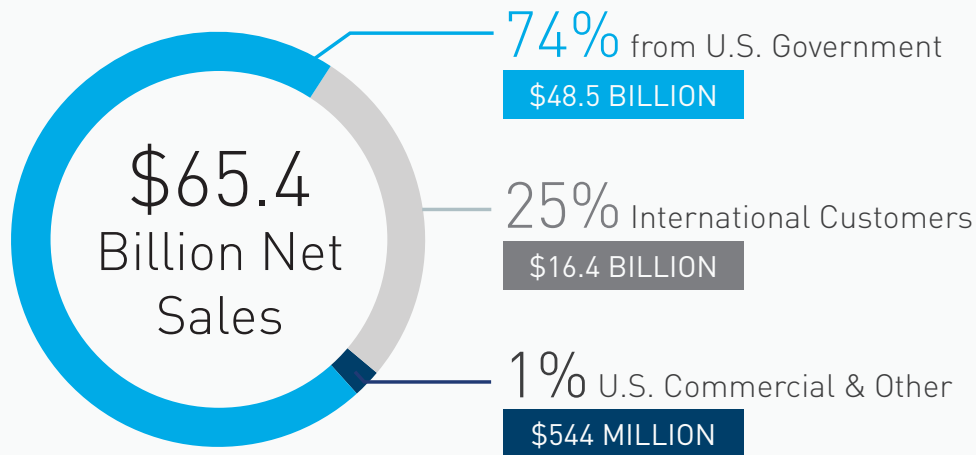

Whether it's underwater, on land, in the atmosphere or beyond, Lockheed Martin Space transforms our customers' most important missions to advance exploration, connectivity and defense of our nation from space. We digitally engineer major programs that include GPS III and protected communications, human and robotic exploration of deep space, strategic deterrence and missile defense, hypersonic strike and directed energy technology, weather and Earth science and commercial communications.

Financial Strength (2020 Results)

Total Stockholder Return 2016-2020:

86%

Increase to Annual Dividend:

9%

Net Earnings:

\$6.8 billion

Sustainability

At Lockheed Martin, we foster innovation, integrity and security to protect the environment, strengthen communities and propel responsible growth. We integrate environmental, social and governance practices throughout our business and our employees actively strengthen the quality of life where we live and work.

LOCKHEED MARTIN'S 2020 SOCIAL IMPACT CONTRIBUTIONS TOOK NEARLY **\$45 million** IN THREE MAIN AREAS

FUTURE STEM WORKFORCE

DONATED **\$22 M** IN COVID-19 RELIEF

THOSE WHO SERVE

Over **22,000** Employees Donated **\$8.4 M** to **4,951** Charities

COMMUNITY RESILIENCE

Our **Go Green initiative** promotes environmental stewardship through reductions in carbon emissions, energy and waste which yield operational efficiencies and cost avoidance. Since the inception of the program in 2007, we have reduced energy consumption by 19%, carbon emissions by 47% and waste to landfill by 51%. We are pursuing ambitious targets to reduce carbon emissions and increase renewable energy procurement enterprise-wide. To reach our newest goals we implement energy efficiency, water reduction and waste minimization projects at our facilities.

2030 GOALS

REDUCE CARBON EMISSIONS PER \$ GROSS PROFIT BY **70%** *2015 BASELINE

39%

2020 PERFORMANCE

2025 GOALS

REDUCE ENERGY PER OCCUPANT BY **14%** *2016 BASELINE

14%

REDUCE WASTE PER OCCUPANT BY **11%** *2016 BASELINE

9%

Economic Impact

Lockheed Martin has **17,200** suppliers – more than **16,000** across the United States and **1,200** suppliers around the globe.

The corporation committed **\$34.4 billion** to our suppliers in every U.S. state and **64** countries worldwide.

We awarded **\$6.2 billion** to more than **8,600** small businesses, which represented over **50%** of our supply base.

2021 Tech Priorities

For over 100 years, Lockheed Martin has worked side by side with our customers to help them deter threats by maintaining their technological superiority. Customers' needs have grown more urgent and complex as their adversaries have invested heavily in new technologies to erode military advantage. To enable Joint All-Domain Operation in a complex 21st-century threat environment, Lockheed Martin is implementing a bold vision to allow every customer to make all-domain decisions – land, sea, air, space and cyber – through advanced and resilient communications at a speed our adversaries can't match. To make this vision a reality, we are focusing our research and development investments and commercial relationships in areas that will give our customers a decisive advantage around the globe.

Artificial Intelligence and Autonomy

There's no doubt that on the battlefield and at home, autonomy and artificial intelligence (AI) are rapidly becoming part of our daily human experience. We are building AI systems that will keep people in control while enabling them to be safer and increase mission success in the toughest and most unpredictable of situations.

Hypersonics

Going Mach 5, or 60 miles per minute, creates a number of complex engineering and physics challenges which is why we leverage expertise and technology from across the corporation to tackle these challenges with speed, agility and ingenuity. As the Department of Defense's highest technical priority, our scientists and engineers are developing game-changing hypersonic solutions that can be produced at scale to ensure mission success.

Directed Energy

Directed Energy systems use highly-focused energy to disable targets with pinpoint accuracy. Our engineers are at the forefront of transforming high-power laser technology developed for factories into inventive and cost-effective defense capabilities for our customers.

Edge Computing

Computing at the edge is a foundational element across our systems enabling all advanced capabilities spanning air, land, sea and space. At Lockheed Martin we are collaborating with the commercial and defense industries to ensure our customers have access to secure, modular and intelligent computing across all domains.

Spectrum Dominance

Warfighters rely on the spectrum to sense and locate adversaries while communicating across allied forces. To maintain spectrum dominance we are developing open architecture spectrum solutions that enable synergistic operations across platforms.
