GLOBAL COMMITTEE STRUCTURE

OWASP recognized the extraordinary contribution of our most active leaders by engaging them to lead seven committees that report progress to the OWASP Board of Directors.

Each democratically established committee will focus on a key function or geographic region, such as OWASP projects, conferences, local chapters, membership and industry outreach. Local Chapters, Project Leaders, questions about hosting a conference or starting a chapter should contact the appropriate committee for assistance, guidance or to suggest best practice. **Note that in a perfect world we would have your best regional representative on each committee from your country as a delegate.

Global Education Committee

| About the Committee | 2012 Goals | Major Initiatives | Committee Meetings | Committee Policies | Educational initiatives |

The Global Education Committee was created during the OWASP EU Summit in Portugal 2008.
The primary purpose of the Global Education Committee is: to work with the OWASP Education Project to provide educational materials for both internal and external users, develop liaisons with educational institutions worldwide.

Mission

Provide awareness, training and educational services to corporate, government and educational institutions on application security.

Vision

Make OWASP educational material globally available as a well known resource in easily consumable form mapped to a framework tied specifically to user roles and responsibilities

Committee Members

Chairs: Martin Knobloch (Netherlands)

- Eduardo Neves (Brazil)
- Cecil Su (Singapore)
- Fabio Cerullo (Ireland)
- Anthony Gottlieb (U.S.)
- Sebastien Gioria (France)
- Carlos Serrão (Prortugal)
- Kuai Hinjosa (U.S.)
- Luiz Otavio Duarte (Brazil)

Global Education Committee

1. OWASP Education Project OWASP project started by Seba

- This project is about creating and managing (enabling off creation) educational material from the OWASP knowlegde base.
  - You could see this as the factory to create educational material

2. OWASP Academies pushed by Dinis and resulted into the OWASP Academy Portal Project

- project target is about offering an educational material, specially targeted for Universities and Educational institutions
  - you could see this as the shop for Educational material created within the Education Project

3. OWASP Educational Supporters

- This is a membership program, especially for Educational institutions.
  - During (if I am not mistaken) the Summit 2008 there have been major changes in the membership categories.
  - A "Educational Supporter Membership" been created to enable easy commitment to OWASP for them!

4. OWASP Student Chapters

- This is a project, as it has not the means of competing with existing chapters
  - Different then regular chapters, we have a project as we need to keep them connected to OWASP. Say, they need more guidance / hand-holding.

5.OWASP Student Members (proposed by Martin)

- As part of the Student Chapters, this is what we hope to achieve for the students being actieve!
  - To lower the bar for students being committed to OWASP!

6. University Outreach

- as part of the summit, we started (or where trying to) the University Outreach.
- you could see the student chapters, Academy portal and student membership as actions to get universities and educational institutions committed to OWASP.

OWASP Training

The main goal of OWASP Training is to support Local Chapters' training activities in a way that allows OWASP to use a model that, despite specific and punctual adjustments, can be easily replicated and become the main frame for all Chapter-led training events.

To know more about the OWASP Training concept, please see the OWASP Training page.

OWASP Academies

The idea of the OWASP Academies is to conceive a frame under which work should be done with Universities, Polytechnic Institutes, IT Schools and other Academic institutions with a view to establish solid relationships and develop with these organisms ways to collaborate and participate in the design of courses focused on web application security.

OWASP has the knowledge and critical mass to give an invaluable input to any Academy focusing on this area by:

- contributing with its expertise in the definition of curricula and course contents that explore and study the web security field;
- making available to the Academy its pool of interested and willing security experts as trainers.

To know more about the OWASP Academies and the activities developed, please see the OWASP Academies page.

OWASP Training

OWASP Training - OWASP Projects and Resources you can use TODAY!

The main goal of **OWASP Training** is to support Local Chapters' training activities in a way that allows us to use a model that, despite specific and punctual adjustments, can be easily replicated and become the main frame for all Chapter-led training events.

Furthermore, we will use the concept "**OWASP projects and resources you can use TODAY!**"

In a nutshell, we are proposing a **Chapter's driven model with Local Chapter organization** in which:

- The courses are **free for OWASP members** - being that by the time of the training event anyone may become a member if they desire to do so;
- The contents are **OWASP projects focused** – to promote the awareness of our Projects and the understanding of how they fit into an Enterprise's security ecosystem or in its Web Application Development Life-cycle;
- The **costs** are **supported by a mix of funding** - local chapter budget, external sponsorship, trainers sponsorship (i.e. trip and/or accommodation paid by themselves) and local chapter members' sponsorship (i.e. taking trainers in as guests).

If you would like to organize a training event of this sort, please contact me after gathering the following information which will be our starting point:

- Date of the event;
- Venue and directions;
- Course's details - with regard to the contents, we would suggest that the focus falls into the OWASP Projects with the most quality and Projects being developed by members of your local Chapter.

The role of the Local Chapters in reinforcing visibility of OWASP Projects within the local corporate communities and, by that, in encouraging the use and understanding of our tools and documentation is absolutely invaluable – do get involved!

If you are interested in **being part of OWASP's pool of Trainers**, check our **CALL FOR TRAINERS tab** and add your name!

OWASP Academies

| OWASP Academies meeting - 5th, 6th January | Confirmed Participants & Supporters | Agenda | Conclusions of the Meeting |

Preparatory meeting for the Summit'11

Following the email sent in October regarding the OWASP Academies and the work OWASP is developing to implement and operationalize this concept, multiple feedback and contributions for the discussion have been received.

We thought that one way to turn the feedback and interest received into something positive and constructive would be to sit the people involved at a table and discuss experiences, views and ideas for the OWASP Academies' operational model. Knowing, for example, how the already established connections with Universities were started and how they are working, what would seem to these partners the most reasonable "next step" in terms of formalization or knowing what, from the Universities' point of view, would be an interesting model of relationship, could be of great use for our own definition and consolidation of the OWASP Academies concept.

In this context, **a meeting will be held on the 5th and 6th of January, in Lisbon,** with the following format:

- Two days (5th and 6th January) of **working sessions focused on the OWASP Academies** where the operational model will be discussed with the intent to prepare a draft that can be presented and debated in the Summit'11 to happen in February;
- Main objectives should be:
  - Definition of the concept behind the OWASP Academy model;
  - Discussion of Certification;
  - Identification of a "to do" list for the Summit'11.

The meetings will take place at ISCTE, Lisbon University Institute, in Lisbon. Address is Av.ª das Forças Armadas, 1649-026 LISBOA.

Unfortunately, due to budgetary constraints, it will not be possible for us to invite all who have contributed for the discussion and pay for their traveling and accommodation. We have therefore devised a criteria of selection for paid invitations that takes into account both the level of engagement in the discussion and the amount of work already done within the Academic community.

Having said that, if you find sponsorship to fund your trip and stay in Lisbon, you will be very welcome to join us – just drop me a line to let me know you are coming!

For information about the Venue and Hotel, please click **HERE**

OWASP Academy Portal Project

Main | Project About | Road map & progress | Meeting notes | Design

The **OWASP Academy Portal** is to be the single access point to the categorized OWASP educational Material.

On the OWASP Academy Portal, all OWASP internal and donated training material can be accessed.
Those training material is reviewed and approved by the OWASP Academy Portal Project members
in order to set and maintain an OWASP-worthy training quality.
The Global Education Committee is guiding and enabling the efforts of the Academy Portal.

OWASP Germany Day 2011 (November 17th, 2011)

Don't miss **OWASP Germany 2011** in Munich next Thursday November 17th, 2011! Learn more about the details of advanced web security plus profit from the social event (16.11.2011).

OWASP
4. German OWASP Day
17.11.2011

Announcement: Hacking-Lab provides FREE OWASP TOP 10

We are proud to announce the **free OWASP TOP 10 security lab** to the OWASP Academy Portal. The project will be introduced and explained next Thursday at OWASP Germany day by **Martin Knobloch**, head of GEC (Global Education Commitee). OWASP has it's own organizationUnit within Hacking-Lab and OWASP members can profit from the online security challenges.
