# West Virginia Department of Education

2021 STRATEGIC PLAN

May 2022 Update to the West Virginia Board of Education

State Board Goal 2 | Objective 1
Offer technical support to counties on data-driven, evidence-based best practices to improve student performance

Executive Summary

The West Virginia Board of Education's (WVBE) May Strategic Plan Update will target Goal 2/Objective 1 of the Strategic Plan. Specifically, Goal 2/Objective 1 focuses on how the West Virginia Department of Education (WVDE) improves student achievement and accountability by "offering technical support to counties on data-driven, evidenced-based best practices to improve student performance." This document illustrates the types of technical support that each office offers to the local school districts, schools, and other entities within the state.

The following evidence outlines the technical support/assistance that has been offered to counties/schools to improve student performance from August 1, 2021, to April 30, 2022, by the WVDE. These activities may have been requested by the counties/schools or provided by the WVDE, but all include WVDE's best ideas/best practices to improve student performance.

Some of the listed technical support/assistance activities directly affects student performance while other technical support/assistance affects it indirectly. For example, the Office of Teaching and Learning technical support/assistance may address best ideas/best practices to improve content knowledge/expertise, instructional delivery expertise, classroom management, differentiated instruction, student engagement, school-level and classroom-level assessment analysis, teacher recruitment/retention strategies, and ways to improve lesson plans/pedagogy.

Other offices provide more indirect technical support/assistance:
1. The Office of Federal Programs and Support provides nutritional technical support that allows students to be provided breakfast and lunch in West Virginia public schools. The current national research base asserts that proper nutrition is fundamental to improving student performance in the classroom.
2. The Office of School Operations and Finance ensures state and federal funding flows through to counties, so they can provide the necessary services to improve student performance to include building safety or providing buses to transport students to school to ensure the students are present and available to learn.

The May Strategic Plan Update is organized around the technical support/assistance work conducted by the following seven offices within the WVDE:
1. Office of Technical and Adult Education
2. Office of Federal Programs and Support
3. Office of Teaching and Learning
4. Office of Support and Accountability
5. Office of Data Management and Information Systems
6. Office of School Operations and Finance
7. Certification Services

The following seven Evidence Charts showcase the major technical support/assistance activities, type of participants, number of participants, and if the training was Online or Face-to-Face (FTF) for each office/service area. Chart 8 summarizes the totals of all the technical assistance/support provided by the WVDE from August 1, 2021 to April 30, 2022.

Table of Contents

Chart 1 – Office of Technical & Adult Education
