TRADEWINDS

AcqBot

Automated acquisition at scale

Acqbot

WITH BUDGETS INCREASING, ACQUISITIONS GETTING MORE COMPLEX, AND DEMANDS FOR CAPABILITIES FASTER, DOD IS KEEPING PACE USING ACQBOT

AcqBot cuts acquisition time from months to hours by applying automation and artificial intelligence to the slowest and most painful parts of the acquisition process from requirements through contracting.

Purpose-Built Automation

The many cutting edge automation capabilities from Robotic Process Automation to Retrieval Augment Generation hold great promise for accelerating government processes, the key is to apply them to a clear use-case with use-centered workflows. AcqBot does all of this and more.

AcqBot is tailored to your workflows and integrates your data to accelerate your process and operationalize your knowledge.

Clear, consistent, and linear workflows enable novice and expert acquisition professionals to work **400% faster**.

AI and automation technologies built in to AcqBot eliminate the need for up-skilling workforces to **implement the power of AI**

Generative AI enables your technical staff to write more clearly and your writing staff to write more technically, all at **4x** the manual pace

Open to All

All government users with a **.mil** or **.gov** email address can register for a Tradewinds account and gain immediate access to AcqBot. Defense and Federal Civilian personnel are welcome to test the capabilities and see the possible applications of workflow-based, user-centric applications of AI.

Extensible and Secure

AcqBot is built on a modular extensible architecture and runs on secure **IL2, IL4**, and **IL5** infrastructure. The modular design enables **rapid reuse** and **application** to other Defense and Federal acquisition and process use-cases. With up to 80% code reuse, you can deploy AcqBot today!
