

Shoot for the Stars Activity Plan

Time: 3-5 minutes

Suggested Materials

- Star pattern
- Construction paper
- Pencils
- Markers
- Hole punch
- String

Instructions:

1. Trace star pattern.
2. Cut out your star.
3. Write/decorate your own dreams for the future.
4. Hole punch the top of the star.
5. Tie a string through the hole to create a loop.
6. Hang from your windows for everyone to see!

OR

1. Find images of constellations.
2. Cut out stars.
3. Decorate stars.
4. Recreate constellations with stars.

Extra Information:

- A star is a huge ball of gas made up of mostly hydrogen and helium.
- The Sun is the closest star to Earth.
 - The Sun heats and provides light to our planet.
- Groups of stars can form imaginary outlines of shapes, people, or animals that we call constellations.
 - Constellations help tell us the position of stars and our own position on Earth.
 - To see a certain constellation is dependent upon the time of day and year.
