

CONTENTS

Preface.....	viii
1 Air Handling and Psychrometrics	
Air Friction Chart	1
Velocities vs. Velocity Pressures	2
Noncircular Ducts.....	2
Fittings and Flexible Ducts	2
Duct Leakage.....	3-4
Fitting Losses.....	5
Circular Equivalents of Rectangular Ducts.....	6-7
Flat Oval Duct Equivalents.....	8
Velocities for HVAC Components	9
Fan Laws.....	10-11
Types of Fans	12-13
Fan System Effect.....	14
Psychrometric Chart.....	15
Air-Conditioning Processes.....	16-17
Enthalpy of Air.....	18
Standard Atmospheric Data	19
Moist Air Data.....	19
Space Air Diffusion.....	20-21
Principles of Jet Behavior.....	22-24
Airflow Patterns of Different Diffusers	25
Mixed-Air Systems	26
Fully Stratified Systems.....	31-32
Partially Mixed Systems	33-34
Return Air Design.....	35
2 Air Contaminants and Control	
Air Quality Standards	36
Electronic Air Cleaners.....	37
Bioaerosols	37
Filter Installations	37
MERV Parameters	38
Filter Application Guidelines.....	39
Indoor Contaminant Sources	40-42
Gaseous Contaminants by Building Materials	43-44
Ultraviolet Lamp Systems	45-46
Hood Capture Velocities	47
Exhaust Duct Design and Construction	47-50
Contaminant Transport Velocities	49
Hood Entry Loss.....	50
Kitchen Ventilation	51-53
Laboratory Hoods.....	54
Clean Spaces.....	55
Airborne Particle Concentration Limits.....	56
3 Water	
Pump Terms and Formulas.....	57
Pump Affinity Laws.....	57
Application of Affinity Laws	58
Net Positive Suction Characteristics	59-60
Typical Pump Curves	61
General Information on Water.....	62
Mass Flow and Specific Heat of Water	63
Freezing Points of Glycols	63
Vertical Cylindrical Tank Capacity.....	64

Horizontal Cylindrical Tank Capacity	64
Volume of Water in Pipe and Tube	65
Water Pipe Friction Chart, Copper	66
Water Pipe Friction Chart, Plastic	67
Water Pipe Friction Chart, Steel	68
Friction Losses in Pipe Fittings	69–74
4 Steam	
Steam Table	75
Steam Chart	76
Steam Pipe Flow Rate	77
Steam Pipe Capacities	78–79
Steam Pipe Capacities—Return Mains and Risers	80
5 Piping	
Steel Pipe Data	81–83
Copper Tube Data	84–86
Properties of Plastic Pipe Materials	87–88
Pipe, Fitting, and Valve Applications	89–90
Thermal Expansion of Metal Pipe	91
Hanger Spacing and Rod Sizes	92
6 Service Water Heating	
Service Water Heating System Elements	93
<i>Legionella pneumophila</i>	93
Load Diversity	94–95
Hot-Water Demand for Buildings	96
Hot-Water Demand per Fixture	97–99
Hot-Water Flow Rate	100
7 Solar Energy Use	
Solar Irradiation	101–102
Solar Collector Data	103
Solar Heating Systems	104–105
8 Refrigeration Cycles	
Coefficient of Performance (COP)	106
Vapor Compression Cycle	107–108
Absorption Refrigeration	109
Lithium Bromide Chiller Characteristics	110
9 Refrigerants	
Refrigerant Data	111
Pressure-Enthalpy Chart—R-22	112
Property Tables—R-22	113–14
Pressure-Enthalpy Chart—R-123	115
Property Table—R-123	116
Pressure-Enthalpy Chart—R-134a	117
Property Tables—R-134a	118–19
Pressure-Enthalpy Chart—R-717 (Ammonia)	120
Property Tables—R-717 (Ammonia)	121
Pressure Enthalpy Chart—R-404A	122
Property Table—R-404A	123
Pressure Enthalpy Chart—R-407C	124
Property Table—R-407C	125
Pressure Enthalpy Chart—R-410A	126
Property Table—R-410A	127
Pressure Enthalpy Chart—R-507A	128
Property Table—R-507A	129
Pressure Enthalpy Chart—R-1234yf	130

Property Table—R1234yf.....	131
Pressure Enthalpy Chart—R-1234ze(E).....	132
Property Table—R-1234ze(E).....	133
Comparative Refrigerant Performance	134–35
Refrigerant Line Capacities—R-404A	136–37
Refrigerant Line Capacities—R-507A	138–39
Refrigerant Line Capacities—R-410A	140–41
Refrigerant Line Capacities—R-407C.....	142–43
Refrigerant Line Capacities—R-22	144–45
Refrigerant Line Capacities—R-134a	146–47
Oil Entrained in Suction Risers—R-22 and R-134a	148–49
Oil Entrained in Hot-Gas Risers—R-22 and R-134a.....	150–51
Refrigerant Line Capacities—Ammonia (R-717).....	152
Liquid Ammonia Line Capacities	153
Lubricants in Refrigerant Systems	154
Secondary Coolants.....	154
Relative Pumping Energy.....	154
10 Refrigerant Safety	
Safety Group Classification.....	155
Data and Safety Classifications for Refrigerants and Blends.....	156–57
ASHRAE Standard 15-2010.....	158–64
11 Refrigeration Load	
Transmission Load.....	165
Product Load.....	166
Internal Load	167
Infiltration Air Load	167
Equipment-Related Load	168
Safety Factor.....	168
Forced-Circulation Air Coolers	169
12 Air-Conditioning Load Data	
Cooling and Heating Loads.....	170–71
Cooling Load Check Values.....	172
Cooling Load Computation Procedure.....	173
Heat Flow Through Building Materials	174
Thermal Resistance of Plane Air Spaces.....	175
Surface Conductances and Resistances	176
Emissivity	177
Thermal Resistance of Ventilated Attics	178
Thermal Properties of Materials	179–84
CLTDs for Flat Roofs	185–86
CLTDs for Sunlit Walls	187–88
Solar Cooling Load for Sunlit Glass	189
Shading Coefficients for Glass.....	190
Heat Gain from People.....	191
Heat Gain from Lighting and LPDs	192–95
Heat Gain from Motors.....	196–97
Heat Gain from Restaurant Equipment.....	198–202
Heat Gain from Hospital and Laboratory Equipment	203–204
Heat Gain from Office Equipment	205–209
Display Fixtures Refrigerating Effect.....	210
13 Ventilation	
ASHRAE Standard 62.2-2010.....	211
ASHRAE Standard 62.1-2010.....	212–14
Procedures from ASHRAE Standard 62.1-2010	214–23
Normative Appendix A from ASHRAE Standard 62.1-2010.....	224–27

Design Parameters for Health Care Facilities	228–29
Operation and Maintenance	230
14 Energy-Conserving Design	
Sustainability	231
Energy Efficiency Standards	232
Climate Zones for United States Locations	233
15 Electrical	
Characteristics of AC Motors	234
Motor Full-Load Amperes	235
Useful Electrical Formulas	235
Motor Controllers	236
Variable-Speed Drives (VSDs)	236
Photovoltaic Systems	237
16 Sorbents and Desiccants	
Desiccant Cycle	238
Desiccant Equipment	239
Desiccant Dehumidification	240
Rotary Solid Desiccant Dehumidifier Model	241–43
17 Combined Heat and Power Systems	
CHP Cycles	244
Engine Sizing Tables	245
Recommended Engine Maintenance	246
Gas Engine Chiller Performance	246
Engine Heat Balance	247
Energy Boundary Diagram	248
Heating Application Temperatures	248
Mass Flows and Temperatures for Various Engines	248
Steam Rates for Steam Turbines	249
Combustion Turbines	250
Fuel Cells	251–52
18 Fuels and Combustion	
Gas Pipe Sizing Table	253
Viscosity and Heating Values of Fuels	253–54
Liquid Fuels for Engines	255–56
Fuel Oil Pipe Sizing Tables	256
19 Owning and Operating	
Maintenance Costs	257–58
Owning and Operating Cost Data	259
Economic Analysis	260–61
20 Sound	
Sound Pressure and Sound Pressure Levels	262
Combining Sound Levels	263
Sound Power and Sound Power Level	263
A- and C- Weighting	263
Octave bands and 1/3 Octave Bands	264
Design Guidance for HVAC System Noise	265
Sound Rating Methods	266–67
Sound Paths in HVAC Systems	267
Silencers	268
Outlet Configurations	268
Mechanical Equipment Noise Levels	269
Mechanical Equipment Sound Isolation	269–70

21	Vibration	
	Single-Degree-of-Freedom Systems.....	271
	Two-Degree-of-Freedom Systems.....	271
	Isolator Selection.....	272–82
22	Evaporative Cooling	
	Direct Evaporative Air Coolers.....	283
	Indirect Evaporative Air Coolers.....	284–85
	Multistage Evaporative Coolers.....	286
	Effective Temperature Chart.....	287
23	Automatic Controls	
	HVAC System Components.....	288–94
	HVAC Systems.....	295–96
24	Occupant Comfort	
	ASHRAE Standard 55-2010.....	297
	Graphic Comfort Zone Method.....	297
	Operative and Effective Temperature.....	297
	Predicted Mean Vote.....	297
	Air Speed to Offset Temperature.....	298
	Clothing Insulation Values.....	299
	Local Discomfort.....	299–300
	Thermal Comfort in Naturally Ventilated Buildings.....	300
25	Geothermal Systems	
	Ground-Source Heat Pumps.....	301–303
	Thermal Properties of Soils and Rocks.....	303–304
	Ground Piping.....	304–306
	Surface Water Piping.....	307
26	General	
	System Design Criteria.....	308–309
	SI Units and Air-Conditioning Formulas.....	312
	Sizing Formulas for Heating/Cooling.....	313
	Cooling Tower Performance.....	314
	Thermal Storage.....	315–16
	Cold-Air Distribution.....	317
	Mechanical Dehumidifiers.....	317
	Heat Pipes.....	318–19
	Air-to-Air Energy Recovery.....	320–22
	Panel Heating and Cooling.....	323–24
	Variable Refrigerant Flow.....	325–27
	Units and Conversions.....	328–29
	Index.....	330–31
