(NOTE: Some estimates that include access to paid sick leave benefits were corrected in the BLS database on December 7, 2017. For additional information about this correction, see www.bls.gov/bls/errata/ebs-errata-07212017.htm.)

EMPLOYEE BENEFITS IN THE UNITED STATES – MARCH 2010

Employer provided retirement plans were a common employee benefit in the United States, available to 74 percent of all full-time workers in private industry in March 2010, the Bureau of Labor Statistics reported today. By contrast, 39 percent of part-time private industry workers had access to a retirement plan. These data are from the National Compensation Survey (NCS), which provides comprehensive measures of occupation earnings, compensation cost trends, and incidence and provisions of employee benefit plans. Access to medical care benefits and paid sick leave benefits were provided to 86 and 74 percent of full-time private industry workers, respectively. Only 24 percent of part-time workers had access to medical care and 26 percent to paid sick leave benefits. (See chart 1.) A worker with access to a medical or retirement plan is defined as having an employer-provided plan available for use, regardless of the workers' decisions to enroll or participate in the plan.

Chart 1. Full- and part-time workers: Access to selected benefits, private industry, March 2010

In percent

Chart 2. High- and low-wage earners: Access to selected benefits, private industry, March 2010

In percent

NOTE

More information will be published in early fall, including March 2010 data for civilian, private industry, and state and local government workers on the incidence and provisions of health care benefits, retirement benefits, life insurance, short-term and long-term disability benefits, paid holidays and vacations, and other selected benefits.

In addition, new editions of *Program Perspectives* will be published featuring the latest benefits data. *Program Perspectives* brings together employee benefits information from various National Compensation Survey publications into one convenient and easy-to-read format. For the latest benefit publications, see: <http://www.bls.gov/ncs/ebs>.

The following are additional findings:

- Sixty-five percent of private industry employees had access to retirement benefits, compared with 90 percent of state and local government employees. Eighty-five percent of state and local government employees participated in a retirement plan, a significantly greater percentage than for private industry workers, at 50 percent. (See table 1.)
- Among full-time state and local government workers, virtually all (99 percent) had access to retirement and medical care benefits. Part-time workers' access to these benefits was more limited in both private industry and in state and local government. (See tables 1 and 2.)
- Medical care benefits were available to 71 percent of private industry workers, compared with 88 percent among state and local government workers. About half of private industry workers participated in a plan, less than the 73 percent of state and local government workers. (See table 2.)
- Employers paid 82 percent of the cost of premiums for single coverage and 70 percent of the cost for family coverage, for workers participating in employer sponsored medical plans. The employer share for single coverage was greater in state and local government (89 percent) than in private industry (80 percent). For family coverage, the employer share of premiums was similar for private industry and state and local government, 70 and 73 percent, respectively. (See tables 3 and 4.)

More information can be obtained by calling (202) 691-6199, sending e-mail to NCSinfo@bls.gov, or by visiting the BLS Internet site, <http://www.bls.gov/ncs/home.htm>. Also, BLS Regional Information offices, which are listed on the Internet site, <http://www.bls.gov/bls/regncon.htm>, are available to answer questions.

TECHNICAL NOTE

Data in this release are from the National Compensation Survey (NCS), conducted by the U.S. Department of Labor, Bureau of Labor Statistics (BLS). This release contains March 2010 data on civilian, private industry, and state and local government workers in the United States. Under the NCS program, information on the incidence and provision of benefits is published in several stages. This news release provides data on the incidence of (access to and participation in) selected benefits and the share of premiums paid by employers and employees for medical care. An extensive number of tables on the incidence of selected benefits will be available in the annual bulletin to be published in early fall, 2010. Data on detailed provisions of health insurance and retirement benefits in private industry for 2010 will be available in 2011. Previous publications containing information on employee benefits for private industry and state and local government workers are available on the BLS website <http://www.bls.gov/ncs/ebs>.

Calculation details

Average wages for occupations within an establishment were used to produce estimates for worker groups averaging hourly pay within the six earnings categories: Lowest 10 percent, lowest 25 percent, second 25 percent, third 25 percent, highest 25 percent, and highest 10 percent. The categories are computed using earnings reported for individual workers in sampled establishment jobs and their scheduled hours of work. Establishments in the survey may report only individual worker earnings for each sampled job. For the calculation of these estimates, the individual worker hourly earnings are appropriately weighted and then arrayed from lowest to highest.

The published 10th, 25th, 50th, 75th, and 90th percentiles designate position in the earnings distribution within each published occupation and are used to determine the wage categories. At the 50th percentile, the median, half of the hours are paid the same as or more than the rate shown in the data tables, and half are paid the same as or less than the rate shown. At the 25th percentile, one-fourth of the hours are paid the same as or less than the rate shown. At the 75th percentile, one-fourth are paid the same as or more than the rate shown. The 10th and 90th percentiles follow the same logic. The percentile values are based on wages published in the bulletin *National Compensation Survey: Occupational Earnings in the United States, 2009* (Bulletin 2738). Values corresponding to the percentiles used in the tables are as follows:

Characteristics	Hourly wage percentiles				
	10	25	50 (median)	75	90
Civilian workers	\$8.40	\$11.11	\$16.55	\$25.97	\$38.60
Private industry workers	\$8.10	\$10.63	\$15.70	\$24.53	\$37.02
State and local government	\$11.64	\$15.35	\$22.04	\$32.53	\$44.48

The tables on employer and employee medical premiums (tables 3 and 4) include participants in all medical plans, with calculations for both single and family coverage. The calculations are not based on actual decisions regarding medical coverage made by employees within the occupations. Rather, the premium calculations are based on the assumption that all employees in the occupation have identical coverage.

Take-up rates

Take-up rates are the percentage of workers with access to a plan who participate in the plan. They are computed by using the number of workers participating in a plan divided by the number of workers with access to the plan, multiplied by 100, and rounded to the nearest one percent. Since the computation of take-up rates is based on the number of workers collected rather than rounded percentage estimates, the take-up rates in the tables may not equal the ratio of participation to access estimates.

Leave benefits for teachers

Primary, secondary, and special education teachers typically have a work schedule of 37 or 38 weeks per year. Because of this work schedule, they are generally not offered vacation or holidays. In many cases, the time off during winter and spring breaks during the school year is not considered vacation days for the purposes of this survey.

Survey scope

The March 2010 NCS benefits survey represented about 118 million civilian workers; of this number, about 99 million were private industry workers and 19 million were State and local government workers (see Appendix table 2).

Survey response

The March 2010 benefits survey included a sample of 18,174 establishments. The definitions in Appendix table 1 are as follows:

Responding. The establishment provided information on at least one usable occupation. An occupation is classified as usable if the following data are present: occupational characteristics (full- vs. part-time schedule, union vs. nonunion status, and time vs. incentive pay type), work schedule, and wage data.

Refused or unable to provide data. The establishment did not provide earnings, occupational classification, worker characteristics, and work schedule data for any occupation.

Out of business or not in survey scope. The establishment is no longer in operation, for example, following a bankruptcy. Establishments not in the survey scope include farm and private households, the self-employed, the federal government, and locations of an establishment out of the sampled area. Also excluded are establishments with no workers within the survey scope (if all employees are also owners, for example).

Obtaining information

For research articles on employee benefits, see the Monthly Labor Review or Compensation and Working Conditions Online at the BLS Web sites <http://www.bls.gov/opub/mlr/home.htm> and <http://www.bls.gov/opub/cwc/home.htm>. For further technical information, see Chapter 8, "National Compensation Measures," of the *BLS Handbook of Methods* at: <http://www.bls.gov/opub/hom/pdf/homch8.pdf> and http://www.bls.gov/opub/hom/homch8_a.htm.

¹ Includes defined benefit pension plans and defined contribution retirement plans. Workers are considered as having access or as participating if they have access to or participating in at least one of these plan types.

² The take-up rate is an estimate of the percentage of workers with access to a plan who participate in the plan, rounded for presentation. See Technical Note for more details.

³ Includes workers in the private nonfarm economy except those in private households, and workers in the public sector, except the federal government. See Technical Note for further explanation.

⁴ The categories are based on the average wage for each occupation surveyed, which may include workers both above and below the threshold. The average wages are based on the estimates published in the "National Compensation Survey: Occupational Earnings in the United States, 2009." See Technical Note for more details.

NOTE: Dash indicates no workers in this category or data did not meet publication criteria. For definitions of major plans, key provisions, and related terms, see the "Glossary of Employee Benefit Terms" at www.bls.gov/ncs/ebs/glossary20092010.htm.

¹ Includes workers in the private nonfarm economy except those in private households, and workers in the public sector, except the federal government. See Technical Note for further explanation.

² The categories are based on the average wage for each occupation surveyed, which may include workers both above and below the threshold. The average wages are based on the estimates published in the "National Compensation Survey: Occupational

Earnings in the United States, 2009." See Technical Note for more details.

NOTE: Dash indicates no workers in this category or data did not meet publication criteria. For definitions of major plans, key provisions, and related terms, see the "Glossary of Employee Benefit Terms" at www.bls.gov/ncs/ebs/glossary20092010.htm.

Appendix table 1. Survey establishment response, National Compensation Survey, March 2010

Establishments	Total	Private industry	State and local governments
Total in sampling frame ¹	5,224,243	5,008,241	216,002
Total in sample	18,174	16,151	2,023
Responding	10,791	9,018	1,773
Refused or unable to provide data	4,704	4,476	228
Out of business or not in survey scope	2,679	2,657	22

¹ The list of establishments from which the survey sample was selected (sampling frame) was developed from State unemployment insurance reports and is based on the 2007 North American Industry Classification System (NAICS). For private

industries, an establishment is usually a single physical location. For State and local governments, an establishment is defined as all locations of a government entity.

Appendix table 2. Number of workers¹ represented, National Compensation Survey, March 2010

Occupational group ²	Civilian workers	Private industry workers	State and local government workers
All workers	118,042,100	98,779,100	19,263,000
Management, professional, and related	34,559,900	23,948,400	10,611,500
Management, business, and financial ...	9,109,700	7,498,000	–
Professional and related	25,450,100	16,450,400	8,999,800
Teachers	6,361,600	–	4,971,400
Primary, secondary, and special education school teachers	4,273,900	–	3,671,500
Registered nurses	2,588,700	–	–
Service	25,604,400	21,495,200	4,109,200
Protective service	3,048,300	1,188,000	1,860,300
Sales and office	30,859,100	28,061,600	2,797,500
Sales and related	11,326,200	11,175,200	–
Office and administrative support	19,532,900	16,886,400	2,646,400
Natural resources, construction, and maintenance	9,664,200	8,691,200	972,900
Construction, extraction, farming, fishing, and forestry	4,865,200	4,327,200	–
Installation, maintenance, and repair	4,798,900	4,364,000	–
Production, transportation, and material moving	17,354,500	16,582,600	771,900
Production	8,479,200	8,352,300	–
Transportation and material moving	8,875,200	8,230,300	–

¹ The number of workers represented by the survey are rounded to the nearest 100. Estimates of the number of workers provide a description of the size and composition of the labor force included in the survey. Estimates are not intended, however, for comparison to other statistical series to measure employment trends or levels.

² The 2000 Standard Occupational Classification system is used to classify workers.

NOTE: Because of rounding, sums of individual items may not equal totals. Dashes indicate that no data were reported or that data did not meet publication criteria.
