

Tables

1.1	Definitions: skill-mix and its typologies	<i>page 8</i>
2.1	Skill-mix and outcomes: total number and characteristics of systematic reviews included	41
2.2	Skill-mix changes in primary and chronic care: professions involved and topics of skill-mix interventions	43
2.3	Major themes identified: skill-mix innovations	49
3.1	Number of systematic reviews covered on implementation of skill-mix	71
3.2	Topics and professions covered by the systematic reviews on implementation	72
4.1	Skill-mix interventions for health promotion and primary prevention across the life cycle	86
4.2	Skill-mix interventions for prevention targeting at-risk groups with cardiovascular risk factors	92
4.3	Skill-mix interventions for prevention targeting at-risk groups with body mass/nutrition-related risk factors	95
4.4	Skill-mix interventions for prevention targeting at risk groups with multiple risk factors	98
4.5	Skill-mix interventions with a focus on screening	102
5.1	Summary of reviews: skill-mix on transitional care and early discharge planning	120
5.2	Summary of reviews: skill-mix interventions and relocation of care from hospital settings to patients' homes	126
5.3	Summary of reviews: skill-mix interventions and new division of work for (minor) acute illnesses	129
6.1	Skill-mix interventions involving pharmacists for single chronic conditions	157
6.2	Nurse-delivered skill-mix interventions for single chronic conditions	164
6.3	Skill-mix interventions delivered by professions other than pharmacists and nurses for single chronic conditions	177

6.4	Multiprofessional team skill-mix interventions for single chronic conditions	185
6.5	Skill-mix interventions for patients with multimorbidity	190
7.1	Evidence for skill-mix interventions in long-term care from the overview of reviews	224
7.2	Evidence from the overview of reviews for skill-mix innovations in palliative care	233
8.1	Skill-mix innovations in rural and remote areas	265
8.2	Skill-mix innovations with a focus on vulnerable populations and socially deprived populations	268
9.1	Overview of evidence on interprofessional education from included systematic review	298
10.1	Characteristics of the seven systematic reviews on policy related to implementation	323
10.2	Overview of the evidence on policy implementation barriers and facilitators on skill-mix innovation	325
11.1	Characteristics of the 21 systematic reviews on implementation at organizational level	347
11.2	Overview of conclusions on factors related to skill-mix implementation at organizational level in systematic reviews included	351
