

Tips for Submitting Healthcare Personnel (HCP) Influenza Vaccination Summary Data *Reporting for the Centers for Medicare and Medicaid Services' (CMS) Hospital Inpatient Quality Reporting (IQR) Program*

Complete these Steps Prior to the CMS Reporting Deadline:

Verify your Facility's CMS Certification Number (CCN)

An accurate CCN is required for facilities participating in the CMS Reporting Program, as this is the ID that will be used to submit HCP influenza vaccination summary data to CMS on your behalf. To update the CCN, use the Facility > Facility Info option within NHSN. At the top of the Facility Information screen, verify and update, if necessary, the CCN in the appropriate data entry field. If any changes have been made, remember to click the "Update" button at the bottom of the screen. *Please be sure to double- and triple-check this number!*

Activate the Healthcare Personnel Safety (HPS) Component

Facilities report HCP influenza vaccination summary data through NHSN's HPS Component. This component must be activated before the facility can report any data. Instructions for activating this component can be found in the following training slide set at: [Healthcare Personnel Vaccination Module - Influenza Vaccination Summary - Comprehensive Training Slides \(cdc.gov\)](https://www.cdc.gov/nhsn/quality/hps/influenza-vaccination-summary-comprehensive-training-slides).

Enter HCP Influenza Vaccination Summary Data

The HCP influenza vaccination summary data form must be completed once by the reporting deadline for each influenza season. Each time a user enters updated data for an influenza season, all previously entered data for that season are overwritten.

Use NHSN Analysis Tools to Check Data Accuracy

The NHSN Analysis Output Option, "Line Listing – HCP Flu Vaccination Data for CMS IPPS" was created to allow facilities to review data that will be submitted to CMS on their behalf.

- a. These data will only be submitted for those facilities that are participating in the CMS Hospital Inpatient Quality Reporting (IQR) Program, as indicated by their CCN recorded in NHSN.
- b. This report will only include HCP influenza vaccination summary data for each influenza season, starting with the 2012/13 season.
- c. This output option represents a line listing for each hospital, not each CCN. If your hospital shares a CCN, this line listing will only represent the data that your hospital has contributed to the overall vaccination data for all hospitals that share the CCN. You may wish to use the Group feature in NHSN to view HCP influenza vaccination summary data for the hospitals that share a CCN. More information about the Group function can be found at: <http://www.cdc.gov/nhsn/group-users/index.html>.
- d. The data in this report will represent data current as of the last time you generated datasets. Please note that data in the Provider Participation Report found on Quality Net are not updated simultaneously with NHSN data. **Data for each**

Last reviewed September 2023

influenza season are frozen as of the final submission deadline date (May 15). Any changes made to these data in NHSN after the final submission deadline will not be reflected in later months of the Provider Participation Report. If you have specific questions about the data appearing on your APU dashboard, please contact your QIO or the QIOSC at: QRSupport@HCQIS.org.

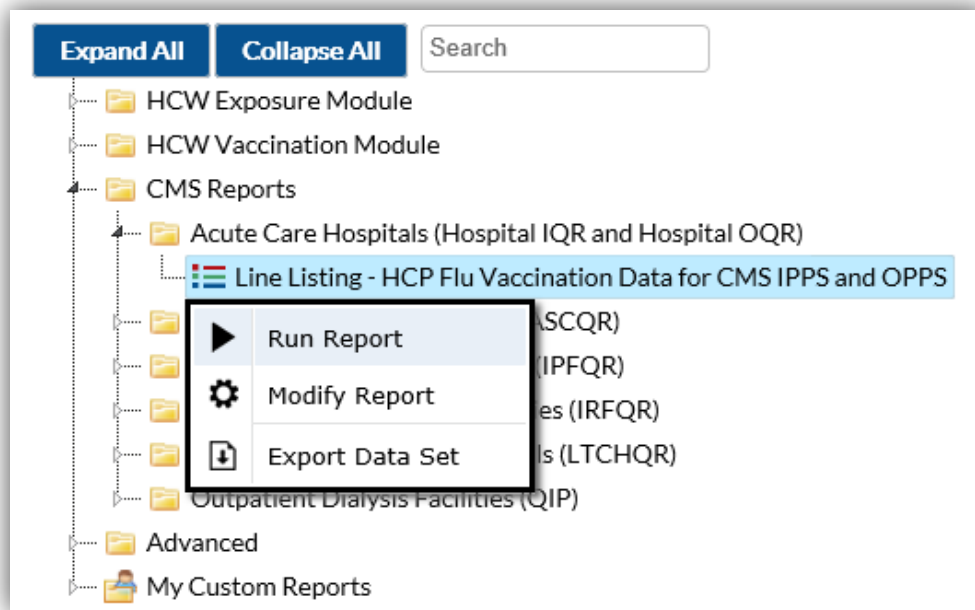

Example of the “Line Listing – HCP Flu Vaccination Data for CMS IPPS” Output Option:

1. On the NHSN Landing Page, select the HPS Component in the component dropdown menu.
2. Generate new datasets within the HPS Component to make sure you are analyzing the most up-to-date data reported to NHSN by your facility. To generate datasets, go to Analysis > Generate Data Sets. Select the beginning and ending dates for the influenza season you would like to view. (For example, to view data for the 2019-2020 influenza season, a facility could select October 2019 for a beginning date and December 2019 for an ending date, as shown below, since both dates fall within the 2019-2020 season.) Next, click on “Generate Reporting Data Sets.” If you generated datasets previously, click the “OK” button on the pop-up window that is displayed to create new datasets with your facility’s most recent data.

The screenshot shows a web interface titled "Reporting Data Sets". On the left is an icon of a server rack with a gear and a circular arrow. To the right, the text "Include data for the following time period:" is followed by two date pickers. The "Beginning" date is set to "10/2019" and the "Ending" date is set to "12/2019". Both date pickers have a small calendar icon and the number "1" next to them. To the right of the date pickers is a blue button labeled "Clear Time Period". Below the date pickers is a blue button labeled "Generate Reporting Data Sets". To the right of this button is a yellow box with the text "Last Generated: November 6, 2019 12:09 PM to include data beginning 10/2019 and ending 12/2019".

3. Go to Analysis > Reports and navigate through the following folders: CMS Reports > Acute Care Hospitals (Hospital IQR). Click on “Line Listing – HCP Flu Vaccination Data for CMS IPPS,” and then click on “Run Report,” as shown below:

4. The results will include data from all influenza seasons. By default, the results will appear in a separate HTML window. If a second window does not appear, please be sure to check your pop-up blocker and allow pop-ups from *.cdc.gov.
5. A single table titled “Line Listing for HCP Flu Vaccination Data for CMS IPPS” presents HCP influenza vaccination summary data by influenza season, stratified by HCP category (employees, licensed independent practitioners, adult students/trainees and volunteers), and all three categories combined.
6. Facilities have the option to report influenza vaccination status of other contract personnel. If your facility chooses to do so, these data will not be displayed in the line listing and will not be sent to CMS. Also, the numerator category of “unknown vaccination status” will not be displayed in the line listing and will not be sent to CMS.

Total Hospital Healthcare Personnel Influenza Vaccination summary data includes employees in both inpatient units and outpatient departments beginning in the 2014/2015 influenza season.

The first three rows of the table display HCP influenza vaccination summary data for each individual HCP category. The fourth row of the table displays HCP influenza vaccination summary data for all three required HCP categories combined.

From the fourth row of this output, we can conclude the following for the 2011/12 influenza season:

- 19 HCP declined influenza vaccine (*declinations*)
- 6 HCP reported a medical contraindication to influenza vaccine (*contraindications*)
- 35 HCP were vaccinated outside of the facility (*vaccEW*)
- 110 HCP were vaccinated at the facility (*vaccHere*)
- 180 HCP worked at the facility for at least 1 day during the reporting period (*working*)
- The HCP influenza vaccination percentage for all HCP who worked at the facility for at least 1 day during the reporting period was 81% (*pctVacc*)
- 145 HCP were vaccinated (*totVacc*)
- The 95% confidence interval around the HCP influenza vaccination percentage was (74%, 86%) (*pctVaccCI*)

7. If this table is not displayed when you click the “Run” button, be sure you entered HCP influenza vaccination summary data for that influenza season (Flu Summary > Find).

REMEMBER: When you make changes to your data, regenerate your datasets to review this output option with the most up-to-date data in NHSN.
