Transmittal No. 24-16

Israel – 155mm Artillery Ammunition

WASHINGTON, December 29, 2023 - The Secretary of State has approved a possible Foreign Military Sale to the Government of Israel of M107 155mm projectiles and related equipment for an estimated cost of \$147.5 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of Israel has requested 155mm ancillaries (fuzes, primers, and charges) that will be added to previously implemented cases. This amendment will increase the total case value above notification thresholds and thus requires notification of the entire case. The original FMS cases, valued at \$96.51 million, included four thousand seven hundred ninety-two (4,792) rounds of M107 155mm artillery ammunition (MDE); fifty-two thousand two hundred twenty-nine (52,229) rounds of M795 155mm artillery ammunition (non-MDE); and thirty thousand (30,000) M4 propelling charges (non-MDE), along with publications; associated technical documentation; and logistics support services, which have subsequently been delivered. The new estimated total cost is \$147.5 million.

The Secretary of State has determined and provided detailed justification to Congress that an emergency exists that requires the immediate sale to the Government of Israel of the above defense articles and services in the national security interests of the United States, thereby waiving the Congressional review requirements under Section 36(b) of the Arms Export Control Act, as amended.

The United States is committed to the security of Israel, and it is vital to U.S. national interests to assist Israel to develop and maintain a strong and ready self-defense capability. This proposed sale is consistent with those objectives.

Israel will use the enhanced capability as a deterrent to regional threats and to strengthen its homeland defense. Israel will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region. It is incumbent on all countries to employ munitions consistent with international humanitarian law.

The 155mm artillery ammunition will be provided from U.S. Army stock. There are no offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Israel.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
