Transmittal No. 23-16

**Poland – Integrated Air and Missile Defense (IAMD)  
Battle Command System (IBCS)**

WASHINGTON, June 28, 2023 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Poland of an Integrated Air and Missile Defense (IAMD) Battle Command System (IBCS) and related equipment for an estimated cost of \$15 billion. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of Poland has requested to buy phase two of a two-phase program for an Integrated Air and Missile Defense (IAMD) Battle Command System (IBCS) enabled PATRIOT Configuration-3+ with modernized sensors and components, including: forty-eight (48) PATRIOT M903 Launch Stations; up to six hundred forty-four (644) PATRIOT Advanced Capability (PAC) 3 Missile Segment Enhanced (MSE) missiles; forty-eight (48) Launcher Interface Network Kits (LINKs); twelve (12) Lower Tier Air and Missile Defense Sensors (LTAMDS); and twelve (12) Large Tactical Power Systems (LTPS) for the LTAMDS. Also included is communications equipment; tools and test equipment; support equipment; generators; spare parts; repair parts; Global Positioning System PPS (SAASM) receivers; modification kits; U.S. Government and contractor technical, engineering, and logistics support services for planning, execution, Systems Integration and Checkout (SICO), flight test activities, field office support and training; and other related elements of logistics and program support. The total estimated program cost is \$15 billion.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Poland's missile defense capability and contribute to Poland's military goals of updating capability while further enhancing interoperability with the United States and other allies. Poland will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors will be Raytheon Corporation, Andover, MA; Lockheed-Martin Missiles and Fire Control, Grand Prairie, TX; and another original equipment manufacturer to be selected to develop and produce generator sets for the LTPS. The purchaser has requested offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor(s).

Implementation of this proposed sale will require approximately forty (40) U.S. Government and/or forty-five (45) contractor representatives to travel to Poland for an extended period for equipment de-processing/fielding, system checkout, training, and technical and logistics support.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law. The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, [pm-cpa@state.gov](mailto:pm-cpa@state.gov).
