Transmittal No. 23-64

Poland – Integrated Air and Missile Defense (IAMD) Battle Command System (IBCS)

WASHINGTON, September 11, 2023 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Poland of an Integrated Air and Missile Defense (IAMD) Battle Command System (IBCS) and related equipment for an estimated cost of \$4.0 billion. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of Poland has requested to buy phase two of a two-phase program for an Integrated Air and Missile Defense (IAMD) Battle Command System (IBCS) enabled PATRIOT Configuration-3+ with modernized sensors and components; the sale includes ninety-three (93) Integrated Air and Missile Defense (IAMD) Battle Command System (IBCS) Engagement Operation Centers (EOCs) and one hundred seventy-five (175) IBCS Integrated Fire Control Network (IFCN) relays. Also included are network encryptors; IBCS software development and component integration; U.S. Government and contractor technical support; System Integration Lab (SIL) infrastructure; SIL test tools and equipment; U.S. Government and contractor technical support for SIL; flight test infrastructure and equipment; flight test targets; flight test range costs and fees; U.S. Government and Original Equipment Manufacturer (OEM) flight test services and support; and other related elements of logistics and program support. The total estimated program cost is \$4.0 billion.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a North Atlantic Treaty Organization Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Poland's missile defense capability and contribute to Poland's goal of updating its military capability while further enhancing interoperability with the United States and other allies. Poland will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Northrup Grumman, Huntsville, AL. The purchaser has requested offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor(s).

Implementation of this proposed sale will require approximately forty (40) U.S. Government and/or forty-five (45) contractor representatives to travel to Poland for an extended period for equipment deprocessing and fielding, system checkout, training, and technical and logistics support.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law. The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
