Transmittal No. 23-67

Poland – F-16 Sustainment

WASHINGTON, September 13, 2023 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Poland of F-16 Sustainment and related equipment for an estimated cost of \$389 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of Poland has requested to buy additional non-MDE articles and services, as indicated below, that will be added to a previously implemented case whose value was under the congressional notification threshold. The original FMS case, valued at \$82 million, included articles and services in support of F-16 aircraft sustainment. This notification is for the combined non-MDE F-16 sustainment articles and services, which includes Electronic Warfare database reprogramming support; classified and unclassified software delivery and support; classified and unclassified publications and technical documentation; spare parts, consumables, accessories, and repair and return support; computer program identification numbers; engine Component Improvement Program support; minor modifications; maintenance and maintenance support; studies and surveys; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$389 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a North Atlantic Treaty Organization Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Poland's capability to meet current and future threats by increasing the reliability of their F-16 fleet. Poland has purchased sustainment support for the F-16s in its inventory for many years, and will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin, Fort Worth, TX. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Poland.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law. The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
