Table of Contents

List of Figures	11
List of Tables.....	20
1 Introduction to RTGS.....	35
2 Overview of the UHB	36
2.1 UHB Methodology	36
2.2 UHB Structure.....	36
3 Set-up and Login.....	38
3.1 Communication Network and Services.....	38
3.2 Technical Requirements.....	38
3.3 Security-Related Processes	40
3.4 User Administration	40
4 GUI Structure.....	41
4.1 Menu Structure	41
4.2 Screen Structure	42
4.2.1 Header.....	42
4.2.2 Sub-header.....	43
4.2.2.1 Breadcrumbs	45
4.2.2.2 Bookmark	46
4.2.2.2.1 New Bookmark.....	46
4.2.2.2.2 Bookmark Bar	48
4.2.2.2.3 Modify and Delete Bookmark.....	49
4.2.2.3 User Settings.....	51
4.2.3 Content Area	53
4.2.3.1 Notification Area.....	54
4.2.3.2 Business Content	56
4.2.3.3 Button Bar	57
4.3 Screen Types	57
4.4 Field Types and Properties	59
4.5 Common Buttons and Icons	73
4.6 Validations	77
4.7 Online Help.....	82
5 Screen Reference Guide – Description of Screens.....	85
5.1 Cash Transfers and Messages.....	87
5.1.1 Cash Transfers – Query Screen	87
5.1.2 Cash Transfers – List Screen.....	109
5.1.3 Cash Transfers – Details Screen	127

5.1.4 Cash Transfers – Modify Earliest Debit Timestamp – Pop-up	131
5.1.5 Cash Transfers – Modify Latest Debit Timestamp – Pop-up	134
5.1.6 Cash Transfers – Modify Priority – Pop-up	136
5.1.7 Cash Transfers – Manual Reversal Booking T2S – Pop-up	137
5.1.8 Cash Transfers – Manual Reversal Booking TIPS – Pop-up.....	140
5.1.9 Cash Transfers – Manual Reversal Booking CLM – Pop-up	143
5.1.10 Files – Query Screen.....	146
5.1.11 Files – List Screen.....	148
5.1.12 Files – Details Screen	150
5.1.13 Messages – Query Screen.....	153
5.1.14 Messages – List Screen	162
5.1.15 Messages – Details Screen.....	167
5.1.16 Messages – Simulate Receipt CLM – Pop-up	171
5.1.17 Business Cases – Query Screen	174
5.1.18 Business Cases – List Screen	177
5.1.19 Account Postings – Query Screen	180

5.4.13 AS Batch Liquidity Summary by Settlement Bank – Query Screen.....	538
5.4.14 AS Batch Liquidity Summary by Settlement Bank – Display Screen.....	542
5.4.15 Linked AS Technical Accounts Procedure D – Query Screen	545
5.4.16 Linked AS Technical Accounts Procedure D – List Screen	548
5.4.17 Liquidity Transfer to Technical Account Procedure D – New Screen	550
5.5 Reference Data	555
5.5.1 Party Reference Data – Query Screen	556
5.5.2 Party Reference Data – List Screen.....	559
5.5.3 Direct Debits – Query Screen.....	569
5.5.4 Direct Debits – List Screen.....	573
5.5.5 Cash Account Reference Data – Query Screen	575
5.5.6 Cash Account Reference Data – List Screen.....	580
5.5.7 BICs – Query Screen	583
5.5.8 BICs – List Screen.....	586
5.6 Administration	587
5.6.1 Task Queue – Query Screen.....	587
5.6.2 Task Queue – List Screen.....	592
5.6.3 Task Queue – Details Screen	593
5.6.4 Broadcasts – Query Screen	602
5.6.5 Broadcasts – List Screen	606
5.6.6 Broadcast – Details Screen.....	609
5.6.7 Broadcast – New Screen.....	611

5.6.8 Events – Query Screen	617
5.6.9 Events – List Screen	620
5.7 Monitoring	622
5.7.1 Cash Transfer Order Totals by Party – Query Screen	622
5.7.2 Cash Transfer Order Totals by Party – List Screen	626
5.7.3 Cash Transfer Order Totals by Account – List Screen	628
5.7.4 Cash Transfer Order Totals by Status – List Screen	630
5.7.5 Cash Transfer Order Subtotals by Status – List Screen	634
5.7.6 RTGS Liquidity by Party – Query Screen.....	636
5.7.7 RTGS Liquidity by Party – List Screen.....	638
5.7.8 RTGS Liquidity by Account – List Screen	640
5.7.9 Warehoused Cash Transfers – Query Screen	642
5.7.10 Warehoused Cash Transfers – List Screen	645
5.7.11 Reservations and Dedicated Liquidity – List Screen.....	648
5.7.12 Queued Cash Transfer Orders by Priority – Query Screen	650
5.7.13 Queued Cash Transfer Orders by Priority – List Screen	653
5.7.14 Status Overview for AS Batches – Query Screen.....	658
5.7.15 Status Overview for AS Batches – List Screen.....	661
6 Screen User Guide – Description of Use Cases.....	664
6.1 Cash Transfers and Messages.....	665
6.1.1 Query/List cash transfers	665
6.1.2 Display cash transfer (order)	666
6.1.3 Revocation of payment.....	667
6.1.4 Modify cash transfer order.....	667
6.1.4.1 Reorder payment in queue.....	668
6.1.4.2 Modify earliest debit timestamp.....	669
6.1.4.3 Modify latest debit timestamp.....	670
6.1.4.4 Modify priority	671
6.1.5 Release cash transfer order of blocked party	672
6.1.6 Manual reverse booking	672
6.1.7 Query files	674
6.1.8 Query messages	675
6.1.9 Display message	676
6.1.10 Simulate receipt.....	676
6.1.11 Simulate a positive receipt	677
6.1.12 List business life cycle events for cash transfers (orders)	678
6.1.13 Query/List account postings	679
6.1.14 Download statement of account.....	680
6.1.15 Enter payment order – pacs.008.....	681
6.1.16 Enter payment order – pacs.009.....	682
6.1.17 Enter payment order – pacs.004.....	683

6.1.18 Enter exceptional payment.....	684
6.1.19 Repeat sending	685
6.1.20 Upload A2A file or message via U2A	685
6.2 Liquidity.....	687
6.2.1 Display cash account liquidity (one service only).....	687
6.2.2 Display sub-account liquidity	688
6.2.3 Enter current liquidity transfer order	689
6.3 Liquidity Management Features	690
6.3.1 Query limits.....	690
6.3.2 Display limit	691
6.3.3 Query reservations	692
6.3.4 Display reservations	692
6.3.5 Modify current bilateral limit.....	693
6.3.6 Modify current multilateral limit.....	694
6.3.7 Set limits to zero	695
6.3.8 Enter current reservation.....	696
6.3.9 Modify current reservation.....	697
6.4 Ancillary System	698
6.4.1 Display AS transfer order	698
6.4.2 Modify AS transfer order	698
6.4.3 Query/List AS batches.....	699
6.4.4 AS batch processing log.....	700
6.4.5 Display liquidity on ancillary system level	701
6.4.6 Display AS batch liquidity summary for guarantee mechanism	702
6.4.7 Display queued AS transfer orders by batch.....	704
6.4.8 Modify end of settlement period	705
6.4.9 Start/stop cycle/procedure.....	705
6.4.9.1 Stop procedure.....	706
6.4.9.2 Start optional procedure	707
6.4.9.3 Start cycle.....	708
6.4.9.4 Stop cycle.....	709
6.4.10 Revoke AS transfer order.....	710
6.4.11 Revoke AS batch.....	711
6.4.12 Release AS batch / AS transfer order of blocked party	711
6.4.12.1 Release AS batch of blocked party	712
6.4.12.2 Release AS transfer order of blocked party	712
6.4.13 Display AS batch liquidity summary by settlement bank.....	713
6.4.14 Enter current liquidity transfer order to technical account – AS procedure D.....	715
6.5 Reference Data	716
6.5.1 Query/List party reference data.....	716
6.5.2 Query/List cash account reference data	717
6.5.3 Query used amounts for direct debits	718

6.5.4 Query BIC.....	720
6.5.5 Activate/deactivate access to exceptional payment entry.....	720
6.5.6 Activate/deactivate value day check	722
6.6 Administration	723
6.6.1 Query task queue	723
6.6.2 Confirmation/Withdrawal of 4-eyes task entries.....	724
6.6.3 Modify 4 eyes tasks.....	725
6.6.4 Query broadcasts	726
6.6.5 Display broadcast.....	727
6.6.6 Enter broadcast	728
6.6.7 Query events	728
6.7 Monitoring.....	729
6.7.1 Sum of cash transfer per account holder	729
6.7.2 Status overview for cash transfers	730
6.7.3 Warehoused cash transfers	731
6.7.4 RTGS liquidity per account holder	732
6.7.5 Status overview for AS batches	733
6.7.6 Pending payments by priority	734
6.7.7 Reservations and dedicated liquidity.....	734
7 Annex.....	736
7.1 References for Error Messages for GUI Screens.....	736
7.1.1 A2A File or Message – Upload Screen	736
7.1.2 Account Postings – Query Screen	738
7.1.3 Account Postings – List Screen	738
7.1.4 AS Batch Liquidity Summary by Settlement Bank – Query Screen.....	738

1 Introduction to RTGS

The Eurosystem provides market infrastructure services for payment and securities settlement called TARGET Services. To settle real-time interbank and customer payments and ancillary system (AS) transfers, the Eurosystem offers the T2 Service and, within this service, the Real-Time Gross Settlement (RTGS) component.

RTGS provides a wide range of features to settle real-time payment orders and AS transfer orders, e.g. reservation of liquidity, priorities, limits and optimisation algorithms. RTGS also features dedicated cash accounts (DCAs). These DCAs operate on a credit balance basis. As the central source of liquidity, main cash accounts (MCAs) are held in the central liquidity management (CLM) component of the T2 Service.

RTGS is a multi-currency system designed to carry out settlement in euro and non-euro central bank (CB) money.

Communication with RTGS occurs in an application-to-application (A2A) mode between RTGS actors and RTGS and on a user-to-application (U2A) basis via the graphical user interface (GUI).

RTGS interacts with the following other common T2 components:

- I The Eurosystem Single Market Infrastructure Gateway (ESMIG), featuring central authentication, authorisation and user management
- I Common Reference Data Management (CRDM), which allows authorised users to set up, maintain and query all reference data (RD) that T2 Services share for their processing activities
- I Data Warehouse (DWH), which either provides queries or reports the data for historical, statistical and regulatory reporting
- I Business Day Management (BDM), which shows the schedule and calendar for all components and currencies

2 Overview of the UHB

The RTGS User Handbook, hereinafter referred to as UHB, aims to facilitate the use of the RTGS GUI. It is intended for all GUI users, regardless of the focus of their activity and outlines the full range of functionalities available in U2A mode. The UHB provides detailed reference information on all GUI screens and step-by-step instructions for typical workflows, referred to as use cases.

Target audience

The target audience of this UHB consists mainly of central banks as well as payment banks and ancillary systems. By referring to the table of contents, each reader can identify the relevant parts.

There is a separate UHB describing the operator functionality. For this reason, those functions that are exclusively relevant for the operator are not described within this UHB. However, if a function is available for multiple audiences (e.g. for operators and central banks), this is still indicated.

The UHB is part of the functional documentation and complements the general, technical and detailed specification of the user detailed functional specifications (UDFS), which can be found on the ECB's website. Although the UDFS focuses mainly on the A2A, specific sections/chapters contain detailed descriptions of the business concepts used in RTGS, which are also relevant when using the GUI. In addition, the RTGS UHB provides helpful information on the design and implementation of the GUI.

2.1 UHB Methodology

Several symbols and methodological elements are used throughout the RTGS UHB to help readers keep an overview and find the desired information quickly. All pages of the main UHB chapters have a similar page layout. The reader can find four different elements:

- | The header, indicating the chapter and sub-chapter title
- | The margin column on the left side of each page, which is used for sub-headings and information signs
- | The text column, containing key information, tables and screenshots
- | The footer, displaying the document's name and version as well as the page number

2.2 UHB Structure

The UHB is divided into seven chapters:

Chapter 1

The chapter **Introduction to RTGS** provides the reader with a general overview of the RTGS design and features.

- Chapter 2** The chapter **Overview of the UHB** explains the content and approach of both the document and the GUI. While the first section explains the methodology of the UHB, the second section outlines its general structure.
- Chapter 3** The chapter **Set-up and Login** provides the reader with general guidance on the communication network and services, explaining the technical requirements, the security-related processes and the user administration required to use the RTGS GUI.
- Chapter 4** The chapter **GUI Structure** explains the basic elements of the RTGS GUI structure, i.e. menu and screen structure. It helps users navigate the system easily by using different screen types. This chapter of the UHB provides more details on the general structure of the GUI such as common buttons and icons. An online help facility can also be found within the chapter.
- Chapter 5** The chapter **Screen Reference Guide – Description of Screens** provides users with a complete overview of different possible screens on payments, liquidity, liquidity management features, ancillary system functionalities, reference data, administration-interaction, administration-monitoring and smart-select screens. Moreover, users will find all screen descriptions including information on context of usage, screen access, privileges, references and the descriptions of fields and buttons on the respective screens.
- Chapter 6** The chapter **Screen User Guide – Description of Use Cases** provides step-by-step instructions on how users can carry out actions in the GUI. It gives users valuable information on how to complete the use case successfully and helps them verify the results. In addition, users can obtain detailed information on how to query relevant information, execute payment orders, use liquidity management features, carry out ancillary system settlement and obtain more information on administration and central bank functions.
- Chapter 7** The chapter **Annex** provides users with information on:
- I Error messages and error codes in the context of using the GUI screens
 - I U2A privileges

3 Set-up and Login

3.1 Communication Network and Services

Refer to the Connectivity Guide specified in the ESMIG UDFS document, current version available, for details on the communication network and services.

3.2 Technical Requirements

Before entering the GUI, make sure to implement all necessary preparations described below.

Such preparations may be subject to periodical review/update to comply with changing technical/regulatory scenarios.

Supported

Please refer to the *“U2A Qualified Configuration”* annex of the ESMIG UDFS.

Web-browsers and Settings

The complete redefinition of the qualified browsers' set and their related versions and the full replacement of the applet technology will be, then, defined in the context of the Eurosystem Single Market Infrastructure Gateway (ESMIG).

JavaScript is used for validations on the client side therefore 'JavaScript' has to be set to 'enabled'.

Supported**Screen**

The required minimum screen resolution is 1366 x 768 pixel. Screen resolutions below this requirement are not supported and can lead to a deviating appearance and functionality of the GUI.

Resolution and Scaling

Even if the screen resolution fulfils the requirement defined above, it is important to note that scaling options provided by the operating system and the browser (e.g. 125% or 150%) may cause a deviating appearance and functionality of the GUI. If this is the case, the usage of scaling options is not supported.

GUI Access

Users are directed to an initial page named ESMIG portal that ensures proper routing to the web applications the user has been granted to enter.

During the maintenance window it is not possible to access the RTGS GUI.

During the end of day beginning with the close of service the access to RTGS GUI is not possible.

NRO Specific Requirements

Non-Repudiation of Origin (NRO) serves as a proof of the origin of actions. Via a digital signature, it provides legal evidence that a user effectively sent a message or, in the case of U2A, entered an instruction.

In order to perform a digital signature, the user needs a private key associated with a public certificate stored in a device accessible by entering a PIN code. For details on the devices see TARGET Services Connectivity Guide. The same PIN code is used for the signing of selected instructions initiated by the user.

The private key of the user is used to sign the instruction. This signed request is attached to the U2A action. On the server side, the application must verify the signature in order to process the request.

To use the token on a working station or laptop the most recent versions of the following software has to be installed in advance:

- I Ascertia Go>Sign Desktop

It may be necessary to remove other certificates like batches or tokens before plugging in the NRO token.

For details on the required configurations see ESMIG U2A Qualified Configurations document.

The user will be asked to enter the PIN code for signature purposes whenever an instruction is submitted on a screen that is subject to NRO (see chapter [Validations](#) [▶ 77], section 'Digital Signature – NRO').

In the context of the NRO implementation, T2 sends XAdES-C data to Legal Archiving instead of replicating the approach used in TARGET2.

3.3 Security-Related Processes

In order to guarantee a secure and safe handling of the information and to protect customer data provided via the GUI, various security elements have been put into place:

- I Each action requires system or human validation as described in the [validation chapter](#) [▶ 77]
- I The scope of available data and functions is controlled via the management of access rights
- I The security features provided by the network providers and described in their respective user documentation prevent unauthorised access

3.4 User Administration

Registration

Prior to the first GUI access, for each CB, PB and AS a system administrator has to be created. The respective system administrator creates the users which can subsequently access the GUI. Only registered users have access to the RTGS GUI. The Registration Guide provides information on how to fill in Registration Forms properly.

The system administrator can only assign predefined sets of access rights and roles to its users, single privileges cannot be assigned. For more information on access rights see the latest version of CRDM UDFS, chapter *'Access rights management'*.

4 GUI Structure

This chapter explains the basic elements of the RTGS GUI structure (i.e. structure of the menu and the screens), helping the user to navigate through the system and to use it quickly and efficiently.

The chapter 'Menu Structure' explains the menu structure where screens are grouped functionally. The chapter 'Screen Structure' explains the layout structure common to all screens. The following sub-sections provide details on the different screen types and on recurring elements, such as common field types or buttons and icons.

4.1 Menu Structure

The RTGS menu is accessible by clicking on the menu button. The menu is structured into main menu and sub-menu entries. By selecting one of the main menu entries, the corresponding sub-menu entries open to the right. By clicking on a sub-menu entry, a screen will open.

The RTGS menu provides access to all available business functionalities. The menu only displays those entries for which the user has the appropriate access rights.

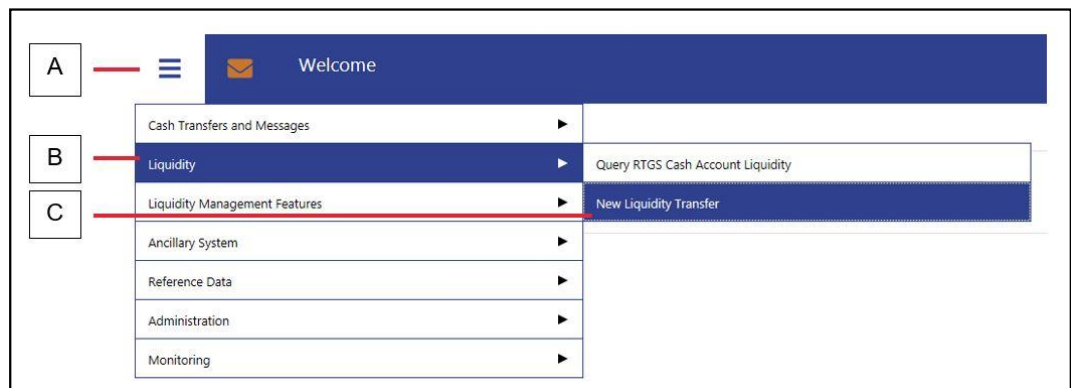

Figure 1 - RTGS Menu

Figure
Description

Label	Element
A	Menu button
B	Main menu entries
C	Sub-menu entries

Table 1 - Menu Structure

4.2 Screen Structure

All screens of the RTGS GUI follow a standard layout consisting of the following elements:

- I Header
- I Sub-header
- I Content area

Figure 2 - Screen Structure

**Figure
Description**

Label	Element
A	Header
B	Sub-header
C	Content area

Table 2 - Screen Structure

4.2.1 Header

The header appears at the top of every screen. The content and format of the header is common for all screens of the RTGS user interface. The header displays the following information to the user:

Figure 3 - Header

Figure Description

Label	Element	Description
A	TARGET Services T2 Logo	This area shows the TARGET Services T2 logo.
B	Service Component	This area shows the name of the used service (in this case RTGS).
C	Technical Environment	This area shows the stage in which the user is operating (e.g. production environment).
D	Business Day	This area shows the business day for which RTGS is operating. Format: YYYY-MM-DD
E	User	This area specifies the unique identifier of the RTGS user.
F	Release	This area shows the release number of the GUI which the user is logged into.
G	Logo	This area shows the logo of a CB if available.

Table 3 - Header Information

4.2.2 Sub-header

The sub-header appears below the header of every screen. The content and format of the sub-header are common for all screens of the RTGS GUI and display the following information:

Figure 4 - Sub-header

Figure
Description

Label	Element	Description
A	Menu button	This button provides access to the RTGS main menu and the GUI functions based on the privileges of the user.
B	Broadcast button	This button notifies the user about specific system events as well as operations-related and business-related information. This button is orange when a new broadcast is available and white when there is no new broadcast available. New broadcasts can be accessed by clicking on the broadcast button.
C	Name of current screen	This area shows the name of the current screen.
D	Breadcrumb	This area shows the navigation path of the current screen. Further details can be found in chapter Breadcrumbs [45].
E	Bookmark button	This button allows the user to save most frequently used screens and their settings. This button is only available for Query, List, Display and New Screens but not for Details Screens. Further details can be found in chapter Bookmark [46].

Label	Element	Description
F	Online help button	This button provides a context sensitive description of the current screen. Further details can be found in chapter Online Help [82].
G	User settings button	This button allows the user to select and change RTGS GUI preferences for the current session. Further details can be found in chapter User Settings [51].
H	Logout button	This button allows the user to log out of the RTGS GUI. When clicking on the button, a pop-up appears that requests the user to confirm or cancel the logout operation.

Table 4 - Sub-header Information

4.2.2.1 Breadcrumbs

The GUI uses breadcrumbs to visualize the window navigation path that the user has used. This navigation path provides an easy option to navigate to previously visited screens.

Figure 5 - Breadcrumb Navigation (with five entries)

The user can click on the listed entries in the navigation path below the screen name in order to return to the respective screen. The screen history (e.g. result set) remains stored.

If the entries of the breadcrumb navigation exceed the available display width, only the first and the last entries are shown, displaying ‘...’ in between representing the other available elements. The user can click on ‘...’ opening a menu which displays all available elements, including the first and the last entry.

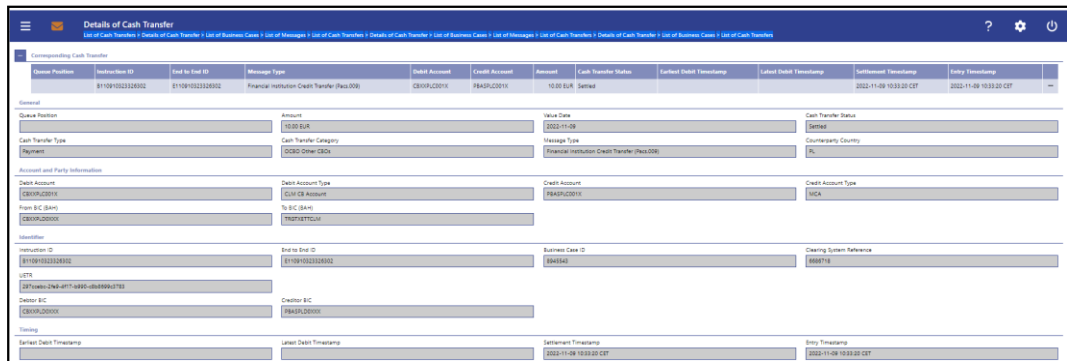

Figure 6 - Exceeded Breadcrumb Navigation

A maximum of 12 entries can be stored in the breadcrumb navigation. If this amount of entries is exceeded, the oldest entry on the left will be removed making space for the newest entry on the right.

When returning to a previously visited screen via breadcrumb navigation, all subsequent entries, following the entry the user navigated to, are cleared.

Each external navigation (e.g. a different entry point from the main menu) clears the breadcrumbs.

4.2.2.2 Bookmark

Bookmarks enable the user to save the currently opened screen including all previously entered data on the respective screen. The bookmark function includes adding new bookmarks, organising them in a bookmark bar, modifying and deleting bookmarks.

Detailed information on these functions can be found in the following chapters:

- I [New Bookmark](#) [▶ 46]
- I [Bookmark Bar](#) [▶ 48]
- I [Modify and Delete Bookmark](#) [▶ 49]

4.2.2.2.1 New Bookmark

Context of Usage

The user can click on the 'Bookmark Button' to open the 'Add Bookmark – Pop-up' allowing the user to customize a new bookmark for the currently opened screen.

This function is only available for Query/List, Query/Display and New Screens. Bookmarking a List or Display Screen that follows a Query Screen only saves the respective Query Screen.

Access

This pop-up can be reached in the following way:

- I Sub-header >> [Bookmark button]

Field Descriptions

ADD BOOKMARK – POP-UP	
Name*	<p>This field requires the user to enter a name for the bookmark which will appear in the bookmark bar. Multiple bookmarks with the same name can be in the same folder.</p> <p>Default value: name of currently opened screen</p> <p>Required format: up to 256 characters</p>
Folder	<p>This field offers the possibility to enter the name of the folder the new bookmark is placed in. The auto-complete functionality shows already existing folders in the bookmark bar.</p> <p>If the user enters a non-existing folder name, a new folder will appear in the bookmark bar after clicking on the 'Submit' button.</p> <p>The user can leave this field empty in order to add the new bookmark to the bookmark bar without adding it to a folder.</p> <p>Required format: up to 64 characters</p>
Bookmarked Screen	<p>This row shows the name of the current screen.</p>
Share with	<p>This section offers the possibility to share the bookmark.</p> <p>PB and AS users can share the bookmark with their own party</p>

ADD BOOKMARK – POP-UP	
	<p>(‘Access’, ‘Modify’), CB users and operators can additionally share the bookmark with their community (‘Access’).</p> <p>Clicking on the checkbox ‘Modify’ in the row ‘Party’ automatically activates the checkbox ‘Access’ in that same row. It further makes the checkbox ‘Access’ non-modifiable.</p> <p>Clicking on the checkbox ‘Access’ in the row ‘Community’ automatically activates the checkbox ‘Access’ in the row ‘Party’. It further makes the checkbox ‘Access’ non-modifiable.</p> <p>A shared bookmark which is modified by a user of a party will be updated for all users of this bookmark.</p>

Table 5 - Add Bookmark – Pop-up

Buttons

ADD BOOKMARK – POP-UP – BUTTONS	
Submit	<p>The user can click on this button to save the bookmark. After submitting, the new bookmark will be placed into the bookmark bar [▶ 48].</p> <p>Depending on the input in the field ‘Folder’, the new bookmark will either be placed into a folder or will be placed as a single entry into the bookmark bar.</p>
Cancel	<p>The user can click on this button to close the pop-up without adding any bookmarks.</p>

Table 6 - Add Bookmark – Pop-up – Buttons

4.2.2.2.2 Bookmark Bar

Context of Usage

The bookmark bar shows the current bookmarks as configured by the user. It shows all bookmarks and folders in alphabetical order, starting with folders.

As soon as the user adds a bookmark, the bookmark bar appears above the header in the GUI. The folders and entries remain saved across sessions in the GUI. If no bookmarks are available or all entries are deleted by the user, the bookmark bar is not displayed.

Screenshot

Figure 9 - Bookmark Bar (with one folder and two bookmarks)

Functionalities

The user can click on a bookmark in order to access the bookmarked screen with all entered data. Clicking on a folder opens a drop-down list with all bookmarks within this folder.

The user can hover over a bookmark to see the full name of the bookmark and the bookmarked screen. While hovering, he can also see the 'Modify' icon which appears to the right of the entry. Clicking on the 'Modify' icon opens the 'Modify Bookmark – Pop-up' which is described in chapter [Modify and Delete Bookmark](#) [▶ 49].

Figure 10 - Hover Functionality Bookmark Bar

A share icon in front of a bookmark entry indicates if a bookmark was shared with the user's party or community.

Figure 11 - Shared Bookmark

4.2.2.2.3 Modify and Delete Bookmark

Context of Usage

The 'Modify Bookmark – Pop-up' offers the possibility to modify or delete an existing bookmark which was selected on the [bookmark bar](#) [▶ 48].

If the user that created the bookmarks is deleted, the bookmarks are deleted as well.

The popup to display a bookmark is opened by clicking on the modify icon next to the bookmark. If the bookmark was shared with the user without the option to modify, the user can only select 'Display Bookmark'. The title of the popup is set to 'Display Bookmark'. The content area of the popup has almost the same content as the 'New Bookmark' pop-up content area, whereas the only change is the bookmark name that is displayed in a text area instead of a text field. All fields are disabled allowing the user to only read information. The button bar has no buttons and therefore is not visible.

Access

The pop-up can be reached in the following way:

- I Bookmark Bar >> hover over bookmark the user wants to modify >> [Modify Icon]

Screenshot

Figure 12 - Modify Bookmark – Pop-up

Field Descriptions

MODIFY BOOKMARK – POP-UP	
Name*	This field shows the current name of the bookmark which appears in the bookmark bar. This value can be overwritten. Default value: current bookmark name Required format: up to 256 characters
Folder	This field offers the possibility to enter the name of the folder the current bookmark will be placed in. The auto-complete functionality shows already existing folders in the bookmark bar. If the user enters a non-existing folder name, a new folder will appear in the bookmark bar after clicking on the 'Submit' button and the previously selected bookmark will be moved to this new folder. If the selected bookmark is currently placed in a folder, the user can delete the folder name from this field in order to remove this bookmark from the folder. The bookmark will appear as a single entry on the bookmark bar after clicking on the 'Submit' button. Required format: up to 64 characters
Bookmarked Screen	This row shows the name of the bookmarked screen.
Share with	This section offers the possibility to share the bookmark. PB and AS users can share the bookmark with their own party ('Access', 'Modify'), CB users and operators can additionally

MODIFY BOOKMARK – POP-UP	
	<p>share the bookmark with their community ('Access').</p> <p>Clicking on the checkbox 'Modify' in the row 'Party' automatically activates the checkbox 'Access' in that same row. It further makes the checkbox 'Access' non-modifiable.</p> <p>Clicking on the checkbox 'Access' in the row 'Community' automatically activates the checkbox 'Access' in the row 'Party'. It further makes the checkbox 'Access' non-modifiable.</p> <p>A shared bookmark which is modified by a user of a party will be updated for all users of this bookmark.</p>

Table 7 - Modify Bookmark – Pop-up

Buttons

MODIFY BOOKMARK – POP-UP – BUTTONS	
Submit	The user can click on this button to save the changes and update the bookmark. A shared bookmark is updated for all users of the bookmark.
Cancel	The user can click on this button to close the pop-up without modifying any bookmarks.
Delete	The user can click on this button to delete the selected bookmark. Clicking on this button closes the pop-up and deletes the respective entry from the bookmark bar.

Table 8 - Modify Bookmark – Pop-up – Buttons

4.2.2.3 User Settings

Context of Usage

The user can click on the 'User Settings Button' to open the 'Modify Settings – Pop-up' allowing the user to specify GUI settings for the current session.

The specified settings are not stored across sessions. After changing the user settings for the current session, the user is redirected to the 'Welcome Screen' of the RTGS GUI.

Access

The pop-up can be reached in the following way:

- I Sub-header >> [User settings button]

Screenshot

Figure 13 - User Settings Button

Figure 14 - Modify Settings – Pop-up – No ‘Act on Behalf’ Selected

Figure 15 - Modify Settings – Pop-up – ‘Act on Behalf’ Selected

Figure 16 - ‘Act on Behalf’ – Display in Sub-header

Field Descriptions

MODIFY SETTINGS – POP-UP	
‘Please ensure that you have saved your current work before you change these settings!’	A fixed notification displays the information ‘Please ensure that you have saved your current work before you change these settings!’. If the user submits changes to the GUI settings while entering data on a specific screen, the current input on a screen will be lost.
Act on Behalf	This field offers the possibility to enter a BIC for which the user works on behalf. The user can enter the BIC manually or search for it by clicking on the smart-select button and opening the Party Reference Data – Query Screen as a pop-up. While searching, the displayed values are restricted to the data scope of the user.

MODIFY SETTINGS – POP-UP	
	<p>Note: In case the user selects a BIC for which he works on behalf, the respective BIC will be displayed in the sub-header after clicking on the 'Submit' button.</p> <p>Required format: 8 or 11 characters</p>

Table 9 - Modify Settings – Pop-up

Buttons

MODIFY SETTINGS – POP-UP – BUTTONS	
Submit	<p>The user can click on this button to submit the modification of GUI settings.</p> <p>Clicking on this button stores the changes locally and closes the 'Modify Settings – Pop-up'. All following requests transmit the stored attributes to the back-end. Therefore, the submitted modifications (e.g. 'Act on Behalf') can restrict the data scope of the user.</p>
Cancel	<p>The user can click on this button to cancel the modification of GUI settings.</p> <p>Clicking on this button discards the current input and closes the 'Modify Settings – Pop-up'.</p>
Delete Act on Behalf	<p>The user can click on this button to delete the BIC for which he works on behalf.</p> <p>Clicking on this button automatically submits the deletion and closes the 'Modify Settings – Pop-up'.</p> <p>This button is only visible if the user has previously selected a BIC for which he works on behalf.</p>

Table 10 - Modify Settings – Pop-up – Buttons

4.2.3 Content Area

The content area is the section of the screen in which the GUI shows functional and business data, input elements or other application-related content. It consists of the notification area, the business content and the button bar. Scrolling is only possible in the content area. The notification area and the button bar always remain visible where they are required within a screen.

4.2.3.1 Notification Area

The notification area displays confirmation and error notifications related to the current screen. It can also inform the user about a change of search criteria.

Success notifications are displayed in green and error notifications are highlighted in red.

Figure 17 - Success Notification

Figure 18 - Error Notification

Notifications regarding the task queue are produced after data submission and show if the data submission was successful or if technical errors occurred inside the application.

In case the user adjusts the search criteria on a list screen after a query has been performed, the notification area indicates the change.

Figure 19 - Change of Search Criteria Notification

**Response
Notification
Box**

The response notification box can appear in the notification area showing functional requests with a table visualizing the list entries picked for an action.

The response notification box is also used to notify in case the liquidity information query for at least one account located in TIPS or T2S fails. In this case, the response notification box shows the error code and the error description returned by TIPS or T2S respectively and the service (TIPS or T2S) sending this response. The response notifications are included in a box, containing a table of response notifications and a headline at the top.

Figure 20 - Response Notification Box

Figure
Description

Label	Element	Description
A	Headline	<p>The headline of the response notification box can have three different status labels:</p> <ul style="list-style-type: none"> Operation Successful Operation Partially Successful Operation Failed <p>The headline also gives the user a summary of the error and success notifications contained in the response notification box (e.g. '1 of 2 Completed').</p>
B	Success notification	<p>For success notifications regarding a list entry, the second row (corresponding line) shows the task ID leading to the related item in the task queue.</p> <p>Clicking on the success icon to the left of the entry removes the entry.</p>

Label	Element	Description
C	Error notification	For error notifications regarding a list entry, the second row (plus more if required) shows the errors as corresponding lines containing the error code and the associated error description. Clicking on the error icon to the left of the entry removes the entry.
D	'Restore Notifications' button	The 'Restore Notifications' button restores the content of the complete response notification box and is available until the box is closed. Clicking on this button always restores the content of the response notification box to its initial state. It is not possible to step back iteratively.
E	'Discard' button	The 'Discard' button (represented by the 'x' icon) closes the response notification box.

Table 11 - Response Notification Box

4.2.3.2 Business Content

The business content is the part of the GUI where the user can trigger all business actions. Depending on the screen, it consists of one or multiple sections with different types of input, output or selection options.

A section can be opened by clicking on the expand button next to the section divider. A section can contain multiple sub-sections with further input options. All sections and sub-sections are separated by a divider or a headline.

Closed section The user can open the currently closed section under the divider by clicking on the open button (+) to the left of the section title.

Figure 21 - Closed Section

Open section The user can close the currently open section under the divider by clicking on the close button (-) to the left of the section title.

Figure 22 - Open Section

4.2.3.3 Button Bar

The button bar is a fixed element at the bottom of the content area that remains in place even when the screen has a scrollable content area. The fixed positioning of the button bar allows the user to execute the standard functions associated with the screen without the need to scroll to the bottom of a screen. The buttons in the button bar can vary depending on the selected screen.

Figure 23 - Button Bar

4.3 Screen Types

The RTGS GUI consists of different types of screens, each serving a specific function. The user can find all possible ways of accessing a screen in the respective screen description within the Screen Reference Guide.

Query Screen

Query screens allow the user to query a result set by applying query criteria that the user can define. The user can also specify the sorting order of the result list on this screen. After executing a query, the list screen or display screen corresponding to the query opens. Query screens can be accessed via the menu. The result set that the user can query is restricted to the data scope of the user. When there are no mandatory fields on the screen, the user can leave all fields empty to query his whole data scope. The data scope is a restriction definition to enforce limits in data exposure.

List Screen

List screens are displayed after executing a query via a query screen or after clicking on a context menu entry. List screens show a table of data records matching the query criteria. The table lists the total amount of data records in the footer and can show a maximum of 100 entries per result page.

To ensure proper load and response times for the GUI a limit of 2,000 records is available at most. For result sets smaller or equal to 2,000 the real amount of results the query has produced is shown. For result sets larger than 2,000 records, only the first 2,000 records are shown plus the information that the result set is larger than 2,000. With this information the user can determine whether he adjusts the filter criteria (in order to further reduce the result list) or takes a look into the result list produced (with the first 2,000 entries).

The shown data records can usually be right-clicked on which results in opening a context menu with further navigation options. The list of data records can also be exported by clicking on the export button. When using the export functionality, the complete result of the query will be exported regardless of whether the entries are shown in the result list or whether they are not shown because of the limitation to 2,000 records in the GUI.

On list screens, the user also has access to the section 'Search Criteria' in order to modify the values of the previously executed query and refresh the screen accordingly. If only a single data record matches the entered criteria on the query screen and a related details screen exists, the list screen is skipped and the details screen is shown immediately.

- List Screen – Bulk Actions** On certain list screens, bulk actions are possible. The user can click on the list checkboxes next to the respective data records in order to select multiple entries. By right-clicking on one of the selected data records, a context menu opens. This context menu entry only shows those options that can be executed for all selected entries. When the user clicks on a context menu option, the respective action will be performed for all data records individually. After the execution of a bulk action, the results for all selected data records are shown individually in the notification area.
- Details Screen** Details screens provide the user with in-depth information of a previously selected data record that appeared on a list screen. Details screens can be accessed via other screens, e.g. via a context menu on a list screen.
- Details screens can also be accessed if the user queries for a single data record on a query screen.
- Display Screen** Display screens show in-depth information on certain topics such as liquidity. Depending on the screen, they can either be accessed via a query screen, via a button on a related screen or be accessed directly via the menu.
- New Screen** New screens allow the user to enter new data in predefined fields, e.g. in order to enter a payment order or a liquidity transfer (LT) order. New screens can be accessed via the menu or via a button on certain related screens.
- Pop-Up Screen** There are different types of pop-up screens that can be opened by clicking on buttons or context menu entries on other screens. Some pop-up screens are used to modify or display certain values or attributes and some pop-up screens require the user to confirm an action.
- Smart-Select Screen** Smart-select screens can be opened as a pop-up by clicking on the smart-select button next to certain input fields. Smart-select screens usually open a combination of query and the subsequent list screen on which the user can specify search criteria to find the desired option in a result list, e.g. for the input of Business Identifier Codes (BICs). The displayed list allows the user to select and transmit a value to the input field of the screen from which the smart-select screen was opened.

Download and Upload Screen

Furthermore, there are upload and download screens that can be accessed via the menu. A download screen allows the user to define a set of search criteria, similar to a query screen, and immediately download the respective result set as a file. An upload screen allows the user to upload a file while specifying information related to this file.

4.4 Field Types and Properties

Fields appear on all types of screens and allow the user to enter or display information depending on the type of field. The following field types are used:

Input Field

In input fields, the user can enter alphanumeric values. The user has to make sure to comply with the format requirements of the fields which are listed in the Screen Reference Guide.

Figure 24 - Input Field

Input fields can be pre-filled with a default value. The default value can be overwritten.

Figure 25 - Input Field with Default Value

Input Field Error

When the validation of the screen content (e.g. format requirements) returns an error for an input field, the input field with the erroneous value is outlined in red colour. Additionally, a red error icon is shown to the left of the field (see [Common Buttons and Icons](#) [▶ 73]). The user has to make sure to make a valid entry in order to be able to proceed.

Figure 26 - Input Field Error

Read-only Field

Read-only fields are pre-filled and display non-modifiable values. Read-only fields are indicated by grey colour.

Figure 27 - Read-only Field

Inactive Field

The user cannot interact with an inactive field until it is activated by a selection made in a previous field. When the field is inactive, it is coloured in grey. As soon as it becomes active, it is coloured in white.

Figure 28 - Inactive Field

Figure 29 - Activated Field

Mutually Exclusive Fields

Some input fields are mutually exclusive. This means that as soon as one of the mutually exclusive fields is filled with a value, the other field becomes inactive and coloured in grey. As a result, no more input will be possible.

Figure 30 - Mutually Exclusive Fields

List Checkbox

The list checkbox can occur in the first column on a list or smart-select screen. The user can click on the checkbox in order to select or deselect entries from the list. The list checkbox is used when performing bulk actions (see chapter [Screen Types](#) [57], section 'List Screen – Bulk Actions').

Figure 31 - List Checkbox (example values)

Standard Drop-down List Field

A standard drop-down list allows the user to select one entry from a pre-defined list of possible values.

Figure 32 - Standard Drop-down List Field

Autocomplete List Field

In an autocomplete list, the user can enter characters that the field uses to filter among the available options in the list.

Figure 33 - Autocomplete List Field

Multi-Select List Field

A multi-select list allows the user to select multiple possible values for one field by clicking in the field and activating the checkbox next to the respective list entries. After finishing the selection, the field indicates how many items have been selected. It also offers the possibility to select or deselect all list items by clicking on the checkbox to the left of the

field. A multi-select list can be combined with other list types, e.g. the autocomplete list as shown in the figure below.

Figure 34 - Multi-Select List Field

Smart-Select Field

The user can enter a value directly into the input field, or click on the smart-select button on the right leading to a smart-select screen where one or more search criteria can be used to find the desired option.

Figure 35 - Smart-Select Field

Smart-Select Multi List Field

The smart-select multi list allows the user to select multiple values for one field by clicking on the smart-select button on the right leading to a search screen where one or more search criteria can be used to find one of the desired options.

Figure 36 - Smart-Select Multi List Field

Date and Time Picker

The user can enter a date and time manually or select a date and time using the pop-up which opens by clicking into the input field or clicking on the calendar button on the right side of the field. The time zone is shown on the right side within the field.

Figure 37 - Date and Time Picker

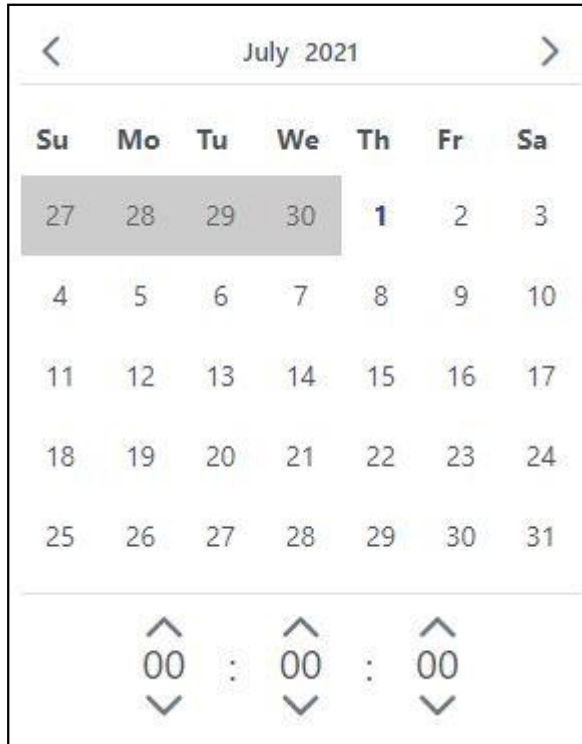

Figure 38 - Date and Time Picker – Pop-up

Date Picker

The user can enter a date manually or select a date using the pop-up which opens by clicking into the input field or clicking on the calendar button on the left side of the field. The pop-up only allows the selection of dates which are allowed for the respective field.

Figure 39 - Date Picker

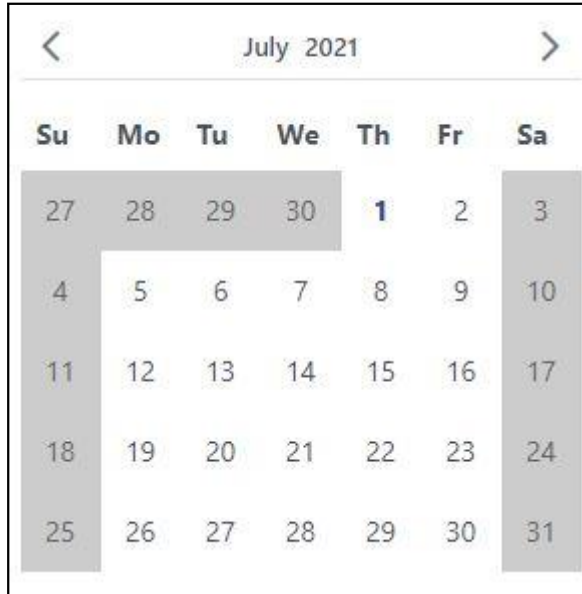

Figure 40 - Date Picker – Pop-up

Time Picker

The user can enter a time manually or select a time using the pop-up which opens by clicking into the input field or clicking on the clock button on the right side of the field. The time zone is shown on the right side within the field.

Figure 41 - Time Picker

Figure 42 - Time Picker – Pop-up

Field Properties

Data Scope of a User

The data scope of a user determines the set of data this user is allowed to inspect and to act on.

The data scope is depending on the hierarchy of parties (see chapter 'Data scope' and 'Configuration of users' in the CRDM UDFS) and the types of groups (see chapter 'Common Reference Data Objects' and 'Cash account data management ' in the CRDM UDFS and usage description in chapter 'Types of groups' in the RTGS UDFS).

Every user is assigned the data scope of the party the respective user is directly linked to.

When performing a query with certain search criteria, the result set the user can see on the subsequent list or details screen is determined as an overlap of the following two principles: the entered search criteria on the one hand and the data within his data scope on the other hand.

For queries of reference data, one or more specific values of a result set can be masked due to restrictions in the data scope. Fields that contain values to be masked are overlaid by a lock icon.

With regard to transaction data, the data scope of a user is derived from the data scope of the related reference data. For example a cash transfer is within the data scope of the user when the credit account or debit account included in the cash transfer is within the data scope of the user.

There can be restrictions placed on some actions for certain elements within the data scope of the user. For example a user is not allowed to increase the queue position of a payment order where the credit account is owned by this party and the debit account is owned by another party. If a context menu is only available for a subset of the elements within the data scope of the user then this is explicitly mentioned in the description of the respective context menu.

Characters

In the field description of the Screen Reference Guide, the required character format for input fields is listed.

RTGS operates in British English and uses the UTF-8 character set to enter data. Furthermore, there is a validation for input fields to make sure that the input is compliant with the FIN X extended character set. However, some input fields are limited to the FIN X restricted character set. For the relevant fields, this is validated during data input.

Fields with FIN X extended character set

Ensure a given maximum length

Only allow the special characters: / \ - ? : () . , ' + ! # \$ % & * = ^ _ ` { | } ~ " ; < > @ []

Do neither start nor end with a blank

Fields with FIN X restricted character set

Ensure a given maximum length

Only allow the special characters: / - ? : () . , ' +

Do neither start nor end with a blank

The following table lists the fields that are limited to the FIN X restricted character set. It also lists the screen on which the field appears. If the column 'Section' is filled it means that the restriction only applies to the field in this specific section of the respective screen.

FIN X restricted fields If the column is empty, the restriction applies to all occurrences of this field on the respective screen.

Table 12 - List of fields subject to FIN X restricted character set

BIC Validator The GUI uses a validator for fields that require the input of a BIC. The input can either be eight or eleven characters. In case the user enters eight characters, the entry will automatically be completed with three 'XXX' at the end (BIC8+XXX). Fields that use the BIC validator are indicated by the description 'Required format: 8 or 11 characters'.

IBAN Validator The GUI uses a validator for fields that require the input of an IBAN. The validator checks for the correct pattern of the characters in the input field. It also validates the checksum.

Amounts Amounts are displayed with a full stop as decimal separator and with a comma as thousands separator. While negative amounts are displayed in red and marked with a '-', the user can only type amounts that are greater than or equal to zero into input fields.

Case Sensitivity The GUI is case sensitive and differentiates between upper and lower case in terms of data input for input fields. Fields that are only filled with blanks are not processed by RTGS. When a field entry starts or ends with a blank, those blanks are deleted automatically.

Amount Entries When entering amounts into input fields, the GUI does not add fractional digits automatically. If the user wishes to enter fractional digits, he has to use a decimal point (.) to separate the digits in front of the decimal point from the fractional digits.
For better readability, the GUI does however automatically add thousands separators (,) when the user enters amounts.

Quick Input Entries To facilitate a quicker input, the user can enter the following characters in fields that require the input of amounts:

- | The character T represents thousands, thereby allowing the user to enter three zeros directly
- | The character M represents millions, thereby allowing the user to enter six zeros directly

- l The character B represents billions, thereby allowing the user to enter nine zeros directly

The input of the respective character immediately converts the entry into a value with the corresponding number of zeros.

For quick input entries the GUI is not case sensitive.

Country Codes Certain input fields require the entry of country codes by the user. Country codes have to be entered according to the alpha-2 code specified in ISO 3166-1.

Currency Codes Certain input fields require the entry of currency codes by the user. Currency codes have to be entered according to the 3-digit code specified in ISO 4217.

External Code Sets The ISO 20022 messages use external code sets that can be entered in certain input fields.

Unlike other ISO 20022 code sets, the codes listed in the external code sets are not included in the relevant message scheme. The purpose of externalising these codes is to be able to update the code sets (e.g. add new codes) without impacting the messages themselves and, hence, without requiring the development of a new version of the messages that use these code sets.

The external code sets can be downloaded from the following ISO 20022 page: https://www.iso20022.org/external_code_list.page

As the external code sets will be updated by the International Organization for Standardization (ISO) roughly every three months, the values of these sets are in general not included in the UHB. Please consider that in cases when the values are explicitly listed in the UHB, the current external code sets published by ISO will be leading.

Wildcards A wildcard is a placeholder for one or more characters that can be used to broaden a search and its results. The user can enter a wildcard character in specific input fields when searching for data.

When an input field allows the usage of wildcards, this is indicated by the suffix '(wildcards allowed)' in the label of the field.

There are two characters that can be used for a wildcard search:

- l The asterisk (*) – to specify any number of characters
- l The question mark (?) – to specify exactly one unknown character

The wildcard search requires the input of at least two characters prior to the asterisk and question mark. The wildcard characters can only be used at the end of the search expression, not in the beginning or in the middle.

In the GUI, mandatory fields are marked with an asterisk (*) in the label. On some screens, whole sections and not just single fields are marked as mandatory. This is because the sections have to include certain information that however can be provided by

Mandatory Content

different input fields. An asterisk next to the section divider indicates mandatory sections. All mandatory fields and sections have to be filled in before the user can proceed.

Keyboard Navigation

The user can navigate the GUI with the keyboard for a more effective workflow.

The following general principles apply to the keyboard navigation:

- | All interaction elements are reachable via keyboard. Interaction elements are elements that are used to trigger an action or modify data.
- | Elements that are currently in focus via keyboard navigation are visually highlighted.
- | When opening or reloading a screen or pop-up, the focused element is the first section divider. If the screen or pop-up does not have a divider, the focus is positioned on the first interaction element.
- | Each screen and interaction element is navigated from left to right and from top to bottom.

The user can utilise the following keys and shortcuts while navigating via keyboard:

- | The 'Tab' key navigates to the next interaction element.
- | The 'Shift + Tab' shortcut navigates to the previous interaction element.
- | The 'Up' and 'Down' arrow keys move the cursor within a scrollable or paging element (e.g. a list or a menu).
- | The 'Left' and 'Right' arrow keys navigate between the menu hierarchy.
- | The 'Enter' key triggers an action for the element in focus.
- | The 'Esc' key triggers an action to dismiss.
- | The 'Ctrl + M' shortcut opens the main menu.
- | The 'Ctrl + Y' shortcut opens the context menu related to the item in focus. The context menu can also be opened via the context menu button described in chapter [Common Buttons and Icons](#) [73] or the menu key on the keyboard.

Wording

For elements such as buttons, links or context menu entries the UHB uses the phrasing 'to click on', even though the user can also trigger these elements via keyboard navigation.

Mouse-over Function

For certain columns on list screens, there is a mouse-over function that allows the user to see additional information for specific list entries. In order to use this function, the user has to hover the mouse over the specific list entry for which the additional information is to be shown.

The respective field description in the Screen Reference Guide indicates if the mouse-over function is available for a specific column.

4.5 Common Buttons and Icons

While working with the RTGS GUI, the user will find that some buttons and icons appear regularly.

Open Button The user can click on this button to open a section of a screen. This button is positioned to the left of a divider of a section.

Figure 43 - Open Button

Close Button The user can click on this button to close a section of a screen. This button is positioned to the left of a divider of a section.

Figure 44 - Close Button

Page Number Button The page number button indicates the number of a page of a result list by showing a number. The user can click on the respective page number button in order to directly jump to that page of a list.

Figure 45 - Page Number Button

Active Page Number Button The active page number button is coloured in a darker blue and indicates on which page of a result list the user is currently located.

Figure 46 - Active Page Number Button

First Page Button The user can click on this button to return to the first page of a list.

Figure 47 - First Page Button

Preceding Page Button The user can click on this button to return to the previous page of a list.

Figure 48 - Preceding Page Button

Following Page Button The user can click on this button to go to the following page of a list.

Figure 49 - Following Page Button

Last Page Button

The user can click on this button to go to the last page of a list.

Figure 50 - Last Page Button

Refresh Button

The refresh button is positioned in the top right of the results divider on list screens. The user can click on this button to reload the content inside the results divider with the previously used search criteria.

Figure 51 - Refresh Button

The last refresh of the results set is indicated by a timestamp to the left of the refresh button.

Figure 52 - Refresh Button with Timestamp

Export Button

The user can click on this button to export all data that the executed query has delivered. The complete result set will be exported, not only the visible rows limited to 2,000 entries in the GUI. Upon clicking on this button, the download starts immediately.

The format of the downloaded file is CSV and the name of the file includes the component name, the screen name, the name of the table header and a timestamp.

The exported file is structured into a header and a body. The header is separated from the body by a double slash ('//').

The header of the exported file includes the component name, the screen name, the name of the table header, the name of the user and a timestamp. In the row below, the used search criteria are contained.

The body of the file includes the data of the query in a CSV file – using semicolons as field delimiters. For amounts displayed in the GUI, the corresponding currency will be contained in a separate column in the exported file.

Figure 53 - Export Button

The user can click on this button to open the available context menu options of the list entries. This button is equivalent to a right-click with the mouse while using a touchpad or

Context Menu Button keyboard navigation. The button is positioned at the very right of the respective list entries.

Figure 54 - Context Menu Button

Add Button The add button can appear to the right next to the divider of a section that contains reoccurring groups. The user can click on this button in order to add a new sub-section to the divider.

Figure 55 - Add Button

Delete Button The delete button can appear to the right next to the divider of a section that contains reoccurring groups. The user can click on this button in order to remove a sub-section from the divider.

Figure 56 - Delete Button

‘+’ Button This button can appear to the left of certain input fields. The user can click on this button in order to add new lines to an input field.

Figure 57 - ‘+’ Button

‘-’ Button This button can appear to the left of certain input fields. The user can click on this button in order to remove lines from an input field.

Figure 58 - ‘-’ Button

Smart-Select Button This button can appear within input fields that have a smart-select option. It opens a smart-select screen where one or more search criteria can be used to find the desired option.

Figure 59 - Smart-Select Button

Calendar Button This button can appear within input fields that allow the user to select a date. It opens a date picker as a pop-up.

Figure 60 - Calendar Button

Clock Button This button can appear within input fields that allow the user to select a time. It opens a time picker as a pop-up.

Figure 61 - Clock Button

Screen-Specific Buttons The button bar contains a certain set of screen-specific buttons such as the 'Submit' button or the 'Reset' button. The buttons in the button bar can vary depending on the screen and are described for each screen individually in the Screen Reference Guide. If the user enters data that does not pass the front-end validation, the 'Submit' button in the button bar is disabled.

'More than or equal to' Icon This icon can appear to the left of fields that require the input of a date, time or amount. When entering an amount, this icon indicates 'more than or equal to'. When entering a date/time, this icon indicates 'after or equal to'.

Figure 62 - 'More than or equal to' Icon

'Less than or equal to' Icon This icon can appear to the left of fields that require the input of a date, time or amount. When entering an amount, this icon indicates 'less than or equal to'. When entering a date/time, this icon indicates 'before or equal to'.

Figure 63 - 'Less than or equal to' Icon

'Less than' Icon This icon can appear to the left of fields that require the input of a date, time or amount. When entering an amount, this icon indicates 'less than'. When entering a date/time, this icon indicates 'before'.

Figure 64 - 'Less than' Icon

'Equal' Icon This icon can appear next to an input field that requires the input of a date, time or amount to be used as a filter criteria which needs to be matched exactly.

Figure 65 - 'Equal' Icon

Arrow Icon This icon can appear on specific screens. Upon clicking on this icon, the user is redirected to certain screens while transmitting the values of the current screen.

Figure 66 - Arrow Icon

Success Icon This icon indicates that an operation has been completed successfully.

Figure 67 - Success Icon

Error Icon This icon indicates that some type of error occurred. By hovering the mouse over the error icon, the user can get further information on the error.

Figure 68 - Error Icon

'x' Icon This icon can be used to close boxes or pop-ups.

Figure 69 - 'x' Icon

Loading Screen Icon This animated icon indicates that a screen is loading or being updated.

Figure 70 - Loading Screen Icon

Lock Icon This icon indicates that the user is not allowed to see a value of one or more specific fields in a result set due to restrictions in his data scope.

Figure 71 - Lock Icon

4.6 Validations

The data entered in the RTGS GUI undergoes a validation process consisting of up to three phases.

Front-end Validation

As a first phase of the validation process, the front-end validation takes place without communication with the back-end. This occurs while the user is entering data. The front-end validation may include field validations and cross-field validations. The field validation verifies that the entry complies with the required format. The cross-field validation checks the data consistency between two or more fields in relation to each other. In case of a front-end validation error, a red error icon will be shown next to the erroneous input field.

By hovering the mouse over the error icon, the user can get further information on the error.

The front-end validation assists the user in detecting erroneous data as early as possible.

**Synchronous
Back-end
Validation**

After a successful front-end validation, the user can submit data by clicking on the relevant button.

Data submitted to query information is subject to consistency checks in the back-end (e.g. regarding mandatory information needed to execute the query). The user is informed in the notification area if a consistency check fails.

Data submitted for further processing is subject to immediate business validations in the backend. The user is informed about the result of these validations in the notification area. There are two different message types available, the error notification and the success notification.

The chapter References for Error Messages for GUI Screens contains the error codes that may appear in the notification area if the synchronous back-end validation fails.

After the successful synchronous back-end validation of a GUI instruction a task is created to asynchronously process the data entered or modified in the GUI. The processing of such a task encompasses the asynchronous back-end validation. In contrast to GUI instructions no tasks are created for GUI queries.

**Asynchronous
Back-end
Validation**

Due to the asynchronous processing of tasks in the task queue, the result of this validation phase will not be available immediately and it will not be displayed within the screen on which the data has been entered. The user can query the 'Task Queue – Query Screen' for further information.

The error messages resulting from the asynchronous back-end validation are not in the scope of the UHB. For details on these error messages see RTGS UDFS, chapter '*Index of validation rules and error codes*'.

**General
remarks**

With regard to

- | the creation of cash transfer orders in the GUI and
- | the contingency upload of A2A files and messages in U2A,

only a subset of business validations is included in the synchronous back-end validation. The remaining business validations are part of the subsequent asynchronous back-end validation.

For all other GUI instructions the whole set of business validations is part of the synchronous back-end validation.

The execution validations are irrespective of the kind of GUI instruction included in the asynchronous back-end validation.

The following table gives an overview of the validation process:

		U2A ACTIONS		
Type of validation	Check result shown in the GUI	Queries	Creation of cash transfer orders in the GUI, contingency upload of A2A files and messages	All other GUI instructions
Front-end validation	yes	Data consistency checks	Data consistency checks	Data consistency checks
Synchronous back-end validation	yes	Data consistency checks	Initial business validations, NRO validation	All business validations, NRO validation
Asynchronous back-end validation	no	n.a.	Subsequent business validations, execution	Execution validations

Table 13 - Validation process

4-Eyes Mode

Depending on the access rights setup, the user can operate the RTGS GUI in 2-eyes or in 4-eyes mode. The 2-eyes mode and the 4-eyes mode apply for the set-up, the modification and for any kind of deletion of data. If the 4-eyes mode is used, the actions have to be confirmed by a second user in order to be processed.

A party can decide via allocation of roles (i.e. a dedicated set of privileges including privileges in 2- and 4-eyes mode) whether a specific task can be done in 2-eyes or 4-eyes mode in U2A. This allocation is relevant for all users of the respective party. It is not possible to choose the same privilege in both modes.

Initial User

In 4-eyes mode the initial user enters, changes or deletes the data on a screen and afterwards submits the action by clicking on the submit button in the button bar. The success notification appearing after successful validation includes a task ID. The initial user can edit and withdraw his initial entry.{CR-143} For the final execution, a second user is needed to confirm the action in the ‘Task Queue – Details Screen’.

Second User

After the initial user has entered, changed or deleted the data, a second user (with the required privilege) has to confirm or withdraw the action in the ‘Task Queue – Details Screen’. ¹ As soon as the data changes are confirmed, RTGS marks them as confirmed and forwards them for further processing. If a task is altered, the original task is revoked

¹ In case of a modification, technically the original task is deleted and a new task with the modified values is created.

and the new task is waiting for approval, if the altering user also only has 4-eyes mode privileges.

**Digital
Signature –
NRO**

In order to ensure NRO for critical transactions, the use of a digital signature has been implemented for specific screens. The user will be asked to enter a PIN code for signature purposes whenever an instruction is initiated. With the entry of the PIN code, a digital signature is attached to the instruction.

After the user clicks on the relevant button, e.g. 'Submit' on the screen, the Ascertia Go>Sign Desktop client is called from the GUI opening a pop-up. This pop-up will handle the PIN code entry and validation against the signature stored on the device. The pop-up offers the possibility to confirm the PIN entry ('OK') or to cancel the PIN entry ('Cancel') and return to the previous screen.

Figure 72 - NRO – Enter PIN – Pop-up

The following principles apply to the digital signature:

- | The acceptance of the signature is not a confirmation of the execution of the GUI instruction in the back-end. The user signature is only used to confirm that the user authorised an entry. In case the back-end validation returns an error, the signature process has to be repeated after the correction of data.
- | Generally, only one instruction at a time can be signed. There are, however, specific use cases which can be processed via bulk action. This allows the user to initiate and therefore sign more than one instruction of the same use case at the same time.
- | In case of 4-eyes mode, the user who initiates the instruction and the user confirming the instruction both have to sign individually using their respective certificates.
- | The PIN is blocked when it is entered five times in a wrong way.

Use case	Bulk action possible
This table lists the use cases for which the NRO feature is implemented. It further shows if a processing via bulk action is possible.	
Activate/deactivate access to exceptional payment entry	
Activate/deactivate value day check	
Confirmation/Withdrawal of 4-eyes task entries	
Enter broadcast	

Use case	Bulk action possible
Enter current liquidity transfer order	
Enter current liquidity transfer order to technical account – AS procedure D	Yes
Enter current reservation	
Enter exceptional payment	
Enter payment order – pacs.004	
Enter payment order – pacs.008	
Enter payment order – pacs.009	
Manual reverse booking	Yes
Modify 4 eyes tasks	
Modify AS transfer order	Yes
Modify cash transfer order	Yes
Modify current bilateral limit	Yes
Modify current multilateral limit	Yes
Modify current reservation	
Modify end of settlement period	
Release AS batch / AS transfer order of blocked party	Yes
Release cash transfer order of blocked party	Yes
Reorder payment in queue	Yes
Repeat sending	Yes
Revocation of payment	Yes
Revoke AS batch	Yes
Revoke AS transfer order	
Set limits to zero	
Simulate a positive receipt	Yes

Use case	Bulk action possible
Simulate receipt	Yes
Start/stop cycle/procedure	
Upload A2A file or message via U2A	

Table 14 - Use Cases with NRO Validation

4.7 Online Help

The online help is a context sensitive display of the content of the UHB. It can be accessed from the RTGS GUI by clicking on the online help button which opens the screen description corresponding to the current screen in a new tab.

The table of contents on the left side offers the possibility to navigate to other parts of the online help.

Figure 73 - Online Help Button

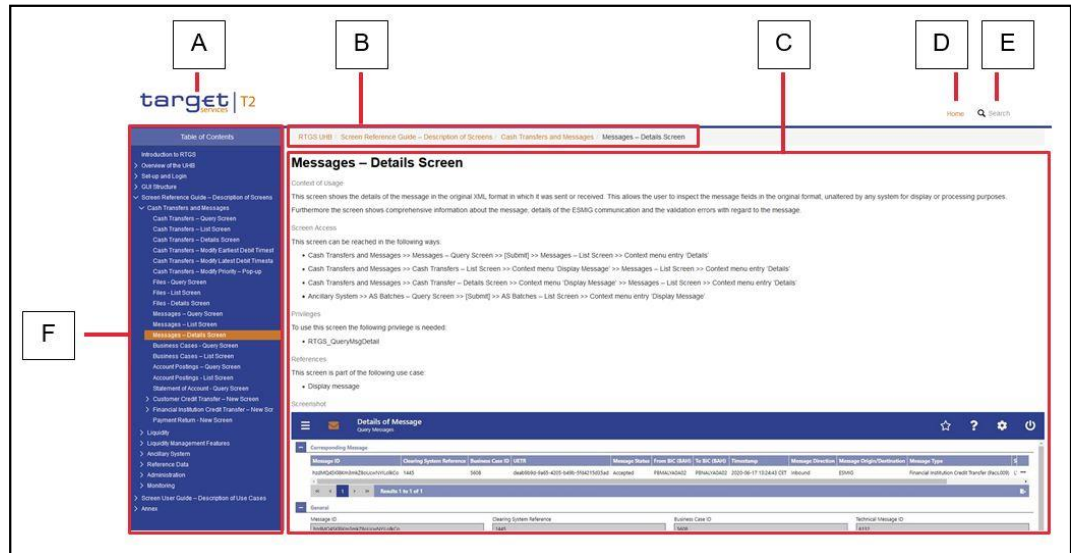

Figure 74 - Online Help

Figure
Description

Label	Element	Description
A	TARGET Services T2 Logo	This area shows the TARGET Services T2 logo. Clicking on the logo opens the welcome screen of the online help, providing information on the author, version number and publication date of the UHB.
B	Breadcrumb	This area shows the navigation hierarchy to the currently opened UHB chapter. It contains links to the higher-ranking chapters in the navigation structure of the online help.
C	Content area	This area is the main element of the online help displaying the content of the UHB.

Label	Element	Description
D	Home button	This button opens the welcome screen of the online help, providing information on the author, version number and publication date of the UHB.
E	Search field	This field allows the user to search for specific keywords. After executing the search, a result list with the relevant UHB chapters will be displayed.
F	Table of contents	The table of contents serves as a navigation element providing access to the content of the UHB by structuring it hierarchically into different chapters and sub-chapters. The currently opened chapter is highlighted in orange.

Table 15 - Online Help

5 Screen Reference Guide – Description of Screens

The screen reference guide offers an overview of all RTGS GUI screens that are available in U2A mode. Each screen description focuses on a specific screen and describes the elements (e.g. fields or buttons) that it contains. The structure for each screen description follows the same principle and contains the following elements.

Context of Usage The context of usage describes the content and functions of the screen and the possible actions that can be performed. It also describes special features or restrictions of the screen and the relations to other screens of the GUI.

Screen Access The screen access section lists every possible way to access a screen. This includes navigation via the menu, via other screens as well as navigation via context menus and buttons. Menu entries that have to be clicked on are indicated by '>>' in the respective order. Buttons that have to be clicked on are indicated by '[Button Name]' and context menu entries that have to be clicked on are referred to as shown in the example below. Context menu entries can be accessed by right-clicking on a list entry on a list or details screen.

Example

Navigation via the menu:

Cash Transfers and Messages >> Messages – Query Screen

Navigation via other screens:

Cash Transfers and Messages >> Messages – Query Screen >> [Submit]

Navigation via context menu:

Cash Transfers and Messages >> Messages – Query Screen >> [Submit] >> Context menu entry 'Details'

Privileges The privileges section lists all necessary privileges in order to access a screen and to use its main functions. Privileges that are only necessary to use a specific function of the screen are listed in the description of the respective button, context menu entry or field.

References The references section lists all use cases of the Screen User Guide that include the respective screen. The use cases are linked so that the user can jump to the necessary information in order to complete common workflows.

Screenshot A screenshot of the respective screen is provided in order to serve as orientation when working with the GUI. All screenshots are based on the maximum of access rights, so deviations are possible if the user does not own all privileges which are necessary to use the screen to its full extent. In addition, deviations between the screenshot and the field/button descriptions are possible in a case of mutually exclusive functions or based

on a specific selection the user has made. Values shown on the screenshot may also deviate from the default values indicated in the description.

Field Descriptions

The field descriptions section provides the relevant information related to a respective field such as field function, possible values, mandatory content (*) or required format for the input of data.

The field descriptions are structured in table format with a separate table for each section of the screen. The title cell of each table serves as a navigation element that contains the section of the screen in which the described fields appear. The following figure explains the structure of a field description.

Figure 75 - Structure of a Field Description

Label	Element	Description
A	Title cell	The title cell shows in which section of the screen the field appears and serves as navigation help for the user.
B	Field name	The field name is the name of each field on the screen. Mandatory fields are marked with an asterisk after the field name.
C	Field description	The field description indicates the function of the field and the required or possible activity by the user. It also contains information regarding the relationship to other fields, possible values or format requirements as well as additional field-specific information.

Table 16 - Structure of a Field Description

Buttons All buttons specific to the screen are listed and described in a table. The buttons of the button bar are listed at the end of each screen description. On some screens, buttons can appear in the business content part of the content area. In this case, they are listed and described at the position of the screen at which they appear. Therefore, tables that describe fields and tables that describe buttons can alternate. The word 'Buttons' in the title cell of a table indicates that a table describes a button.

Context Menu All context menu entries that are available on a specific screen are listed and described in a table at the position of the screen at which they appear. Therefore, tables that describe fields and tables that describe context menu entries can alternate. The word 'Context Menu' in the title cell of a table indicates that a table describes a context menu.

Wording

Screens involving a cash transfer do not differentiate between a cash transfer order and a cash transfer (settled cash transfer order). Accordingly, the UHB only differentiates between cash transfers and cash transfer orders if relevant for a specific function. In all other functions a cash transfer also means a cash transfer order.

5.1 Cash Transfers and Messages

5.1.1 Cash Transfers – Query Screen

Context of Usage This screen offers the possibility to query cash transfers in RTGS. It is possible to query intra-service and inter-service cash transfers that include an RTGS account.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Priority' in ascending order.

The cash transfers matching the data of the search fields are shown in the [Cash Transfers – List Screen](#) [▶ 109].

Screen Access This screen can be reached in the following way:

- | Cash Transfers and Messages >> Cash Transfers – Query Screen

Privileges To use this screen the following privilege is needed:

- | RTGS_QueryCashTrans

References This screen is part of the following use case:

- | [Query/List cash transfers](#) [▶ 665]

5.1.2 Cash Transfers – List Screen

Context of

This screen lists all cash transfers meeting a defined set of criteria.

Usage

These criteria were either defined on the [Cash Transfers – Query Screen](#) [▶ 87] or implicitly defined when opening this screen via a context menu.

Screen Access

This screen is selectable in screens displaying entries related to cash transfers (e.g. messages, account postings, AS batches) via context menu entry (e.g. ‘Display Cash Transfer’).

It can further be reached in the following way:

- | Cash Transfers and Messages >> Cash Transfers – Query Screen >> [Submit]

Privileges

To use this screen the following privilege is needed:

- | RTGS_QueryCashTrans

References

This screen is part of the following use cases:

- | [Query/List cash transfers](#) [▶ 665]
- | [Revocation of payment](#) [▶ 667]
- | [Reorder payment in queue](#) [▶ 668]
- | [Modify earliest debit timestamp](#) [▶ 669]

Descriptions

Note: For the description of the attributes and their respective values in the 'Search Criteria' section see chapter [Cash Transfers – Query Screen](#) [▶ 87]. The columns displayed in the result list depend on the values selected in the field 'Selection' on the 'Cash Transfers – Query Screen'.

CASH TRANSFERS – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS	
Queue Position	<p>This column shows the position of the cash transfer in the respective queue.</p> <p>This column only contains a value if the respective cash transfer is queued.</p>
Priority	This column shows the priority of the cash transfer.
Instruction ID	<p>This column shows the instruction identification of the cash transfer which can be assigned by an instructing party.</p> <p>The instruction identification is a point to point reference that can be used between the instructing party and the instructed party to refer to the individual instruction.</p>
End to End ID	<p>This column shows the end-to-end identification of a cash transfer which is assigned by the initiating party.</p> <p>This identification is passed on, unchanged, throughout the entire end-to-end chain. It can be used for reconciliation or to link tasks relating to the transaction.</p>
Message Type	This column shows the message type of the cash transfer.
Debit Account	<p>This column shows the account BIC or the account number of the debit account, depending on the cash transfer type.</p> <p>In case of a liquidity transfer or an AS transfer involving a sub-account, the account number is displayed. In case of a payment, the account BIC is displayed.</p> <p>For AS transfer orders, this column shows the first agent</p>

CASH TRANSFERS – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS	
	account BIC or the first agent account number.
Debit Account Type	This column shows the account type of the account that is debited by the cash transfer.
Credit Account	This column shows the account BIC or the account number of the credit account, depending on the cash transfer type. In case of a liquidity transfer or an AS transfer involving a sub-account, the account number is displayed. In case of a payment, the account BIC is displayed. For AS transfer orders, this column shows the final agent account BIC or the final agent account number.
Credit Account Type	This column shows the account type of the account that is credited by the cash transfer.
Amount	This column shows the amount and currency of the cash transfer. In case of a partial execution, the partially settled amount is shown.
Cash Transfer Status	This column shows the status of the cash transfer.
Earliest Debit Timestamp	This column shows the earliest debit timestamp of the payment order.
Latest Debit Timestamp	This column shows the latest debit timestamp of the payment order.
Settlement Timestamp	This column shows the settlement timestamp of the cash transfer. If the cash transfer order has not yet been settled, no value is displayed.
Cash Transfer Type	This column shows the type of the cash transfer.
Cash Transfer Category	This column shows the category of the cash transfer.
From BIC (BAH)	This column shows the sender BIC in the BAH.
To BIC (BAH)	This column shows the receiver BIC in the BAH.
Counterparty Country	This column shows the country code for the counterparty. Cross border AS business does not affect the counterparty country. The country related to the account, and not related to

CASH TRANSFERS – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS	
	the AS, is the relevant one.
AS - Debtor	This column shows the debtor BIC of an AS transfer order.
AS - Creditor	This column shows the creditor BIC of an AS transfer order.
AS - Party BIC	This column shows the party BIC of the AS from the element 'Initiating Party' of the AS Transfer Initiation if available or the 'From BIC' from the BAH.
AS - Counterparty	This column shows the counterparty of a cross-AS instruction. If the AS transfer order contains no AS counterparty, then no value is displayed.
AS Batch Message Reference	This column shows the group ID from the group header of the AS Transfer Initiation.
Debtor BIC	This column shows the debtor as specified in the underlying message or in the U2A liquidity transfer. Required format: 8 or 11 characters
Creditor BIC	This column shows the creditor as specified in the underlying message or in the U2A liquidity transfer. Required format: 8 or 11 characters
Business Case ID	This column shows the business case ID of the cash transfer.
Clearing System Reference	This column shows the RTGS booking reference for the cash transfer.
<u>Cash Transfer ID</u>	<u>This column shows the Cash Transfer ID of the cash transfer.</u> {CR-143}
UETR	This column shows the UETR for the cash transfer.
Original UETR	This column shows the original UETR for the cash transfer where applicable (e.g. pacs.004).

CASH TRANSFERS – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS	
Value Date	This column shows the value date of the cash transfer.
Entry Timestamp	This column shows the entry timestamp of the cash transfer.
AS Settlement Procedure	<p>This column shows the AS settlement procedure the cash transfer is dedicated to.</p> <p>Possible values:</p> <ul style="list-style-type: none"> Procedure A Procedure B Procedure C Procedure D Procedure E

Decrease	<p>This context menu entry opens a confirmation pop-up displaying the selected payment orders.</p>

CASH TRANSFERS – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS – CONTEXT MENU

By clicking the 'Yes' button for the selected payment orders, tasks to initiate the movement to the bottom of the queue are created and sent to the task queue. If more than one payment order is decreased via bulk action, the order of the decreased items can differ from their original order. The user returns to the 'Cash Transfers – List Screen'.

By clicking the 'No' button, the user returns to the 'Cash Transfers – List Screen' without decreasing the payment orders.

The user will be asked to enter the PIN for digital signature purposes (NRO). For details see chapter Validations, section 'Digital Signature – NRO'.

Decreasing is only possible for payment orders and AS transfer orders with the status 'Queued' and not visible when the debtor and/or creditor of the selected payment order is blocked.

This entry is only visible for:

- | Operator
- | CB
- | PB

Decreasing is for AS transfer orders only possible when AS settlement procedure 'E' or 'A' is used and only the CB of the debited settlement bank or the operator can decrease the respective AS transfer order.

Required privilege: RTGS_ModifyCasTraOrd

Table 29 - Cash Transfers – List Screen – Results – List of Cash Transfers – Context Menu

5.1.3 Cash Transfers – Details Screen

Context of Usage

This screen shows the details of a selected cash transfer.

Screen Access This screen is selectable in screens displaying entries related to cash transfers (e.g. messages, account postings, AS batches) via context menu entry (e.g. 'Display Cash Transfer').

It can further be reached in the following way:

- | Cash Transfers and Messages >> Cash Transfers – Query Screen >> [Submit] >> Cash Transfers – List Screen >> Context menu entry 'Details'

Privileges To use this screen the following privilege is needed:

- | RTGS_QueryCashTransDetails

References This screen is part of the following use case:

- | [Display cash transfer \(order\)](#) [▶ 666]

Screenshot

Figure 88 - Cash Transfers – Details Screen {CR-143}

Field Descriptions Note: For the description of the attributes and the available context menu entries in the 'Corresponding Cash Transfer' section see chapter [Cash Transfers – List Screen](#) [▶ 109].

CASH TRANSFERS – DETAILS SCREEN – GENERAL	
Queue Position	This field shows the position of the payment order in the respective queue.
Priority	This field shows the defined priority of the cash transfer.
Amount	This field shows the amount and currency of the cash transfer. In case of partial execution, the partially settled amount is shown.
Value Date	This field shows the value date of the cash transfer.
Cash Transfer Status	This field shows the status of the cash transfer.

CASH TRANSFERS – DETAILS SCREEN – GENERAL	
Cash Transfer Type	This field shows the type of the cash transfer.
Cash Transfer Category	This field shows the category of the cash transfer.
Message Type	This field shows the message type of the cash transfer.
Counterparty Country	This field shows the country code for the counterparty. Cross border AS business does not affect the counterparty country. The country related to the account, and not related to the AS, is the relevant one.

Table 30 - Cash Transfers – Details Screen – General

CASH TRANSFERS – DETAILS SCREEN – ACCOUNT AND PARTY INFORMATION	
Debit Account	This field shows the account BIC or the account number of the debit account, depending on the cash transfer type. In case of a liquidity transfer or an AS transfer involving a sub-account, the account number is displayed. In case of a payment, the account BIC is displayed. For AS transfer orders, this field shows the first agent account BIC or the first agent account number.
Debit Account Type	This field shows the account type of the debit account.
Credit Account	This field shows the account BIC or the account number of the credit account, depending on the cash transfer type. In case of a liquidity transfer or an AS transfer involving a sub-account, the account number is displayed. In case of a payment, the account BIC is displayed. For AS transfer orders, this field shows the final agent account BIC or the final agent account number.
Credit Account Type	This field shows the account type of the credit account.
From BIC (BAH)	This field shows the business sender BIC in the BAH.
To BIC (BAH)	This field shows the business receiver BIC in the BAH.

Field

Descriptions

The section 'Corresponding Cash Transfers' displays the payment orders listed on the previous screen that will be affected by the modification. For the detailed field descriptions of this table, see [Cash Transfers – List Screen](#) [▶ 109].

MODIFY EARLIEST DEBIT TIMESTAMP – POP-UP – MODIFY EARLIEST DEBIT TIMESTAMP	
New Earliest Debit Timestamp	<p>This field offers the possibility to enter a new earliest debit timestamp for the corresponding payment orders.</p> <p>The new earliest debit timestamp must be earlier than the latest debit timestamp and before the cut-off time. The new earliest debit timestamp must be later than the current system time.</p> <p>The user can enter the timestamp manually or specify it by clicking on the calendar button.</p> <p>Required format: YYYY-MM-DD HH:MM:SS</p> <p>Note: Setting a new earliest debit timestamp is only possible in case an earliest debit timestamp has been set in the original payment order. Moreover, the new earliest debit timestamp must be within the relevant RTGS settlement window related to the currency and the settlement date indicated in the originally sent payment order. The date element of the new earliest debit timestamp refers to a calendar day, which corresponds to the business day of the indicated settlement date of the original payment order. It is not possible to change the originally instructed settlement date via this functionality. For this purpose, the payment order needs to be revoked and a new one needs to be sent with the new settlement date.</p>

Table 35 - Modify Earliest Debit Timestamp – Pop-up – Modify Earliest Debit Timestamp

Buttons

MODIFY EARLIEST DEBIT TIMESTAMP – POP-UP – BUTTONS	
Submit	<p>The user can click on this button to initiate a change of the earliest debit timestamp of the selected payment orders.</p> <p>The user will be asked to enter the PIN for digital signature purposes (NRO). For details see chapter Validations, section ‘Digital Signature – NRO’.</p> <p>After clicking on this button, the notification area on the Cash Transfers - List Screen [109] shows whether the data submission and task creation was successful. In case of successful data submission, the notification area also shows a task ID.</p>
Delete Earliest Debit Timestamp	<p>The user can click on this button to delete the earliest debit timestamp. A confirmation pop-up opens, asking the user if he</p>

MODIFY EARLIEST DEBIT TIMESTAMP – POP-UP – BUTTONS

wants to proceed.

By clicking the 'Yes' button for the selected cash transfer, tasks to initiate the deletion of the earliest debit timestamp are created and sent to the task queue. The user returns to the previous screen.

The user will be asked to enter the PIN for digital signature purposes (NRO). For details see chapter Validations, section 'Digital Signature – NRO'.

By clicking the 'No' button, the user returns to the 'Modify Earliest Debit Timestamp' pop-up without any action.

Table 36 - Modify Earliest Debit Timestamp – Pop-up – Buttons

5.1.5 Cash Transfers – Modify Latest Debit Timestamp – Pop-up

Context of Usage This pop-up screen offers the possibility to modify the latest debit timestamp of a selected payment order.

Screen Access This pop-up screen can be reached in the following ways:

5.1.6 Cash Transfers – Modify Priority – Pop-up

- Context of Usage** This pop-up screen offers the possibility to modify the priority of a selected payment order. Modifying the priority is only possible for payment orders.
- Screen Access** This pop-up screen can be reached in the following ways:
 - | Cash Transfers List Screen >> Context menu entry 'Modify Priority'
 - | Cash Transfers Details Screen >> Context menu entry 'Modify Priority'
- Privileges** To use this screen the following privilege is needed:
 - | RTGS_ModifyCasTraOrd
- References** This screen is part of the following use case:
 - | [Modify priority](#) [▶ 671]

Screenshot

Figure 91 - Cash Transfers – Modify Priority – Pop-up

- Field Descriptions** The section 'Corresponding Cash Transfers' displays the payment orders listed on the previous screen that will be affected by the modification. With exception of the first two fields described below, the fields of the table correspond to the fields of the previous screen. For the detailed field descriptions of this table, see [Cash Transfers – List Screen](#) [▶ 109].

MODIFY PRIORITY – POP-UP – CORRESPONDING CASH TRANSFERS	
Defined Priority	This field indicates the defined priority of the payment order.
New Priority	This field indicates the new priority of the payment order.

5.1.10 Files – Query Screen

Context of

This screen offers the possibility to query inbound files in RTGS.

Usage

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'File ID' in ascending order.

The files matching the data of the search fields are shown in the [Files – List Screen](#) [▶ 148].

Screen Access

This screen can be reached in the following way:

- | Cash Transfers and Messages >> Files – Query Screen

Privileges

To use this screen the following privilege is needed:

- | RTGS_QueryFile

References

This screen is part of the following use case:

- | [Query files](#) [▶ 674]

Field Descriptions Note: For the description of the attributes and their respective values in the 'Corresponding File' section see chapter [Files – List Screen](#) [▶ 148].

FILES – DETAILS SCREEN – GENERAL	
File ID	This field shows the unique file identifier of the file.
File Status	This field shows the status of the file.
Entry Timestamp	This field shows the date and time at which the file was received.
File Header	This field shows the business file header.

Table 52 - Files – Details Screen – General

FILES – DETAILS SCREEN – VALIDATION ERRORS	
Error Code	This column shows the applicable error code.
Technical Message ID	This column shows the message identification in case the error was message related. This column is empty, if the error was file related.
Error Description	This column shows the related error description.

Table 53 - Files – Details Screen – Validation Errors

FILES – DETAILS SCREEN – ESMIG COMMUNICATION	
ESMIG Communication ID	This field displays the internal identifier of the ESMIG communication.
ESMIG Entry Timestamp	This field shows the entry timestamp of the ESMIG communication.
ESMIG Party Technical Address	This field shows the party technical address belonging to the sender of the file.
ESMIG Technical Service ID	The column shows the technical identification of the service contained in the ESMIG communication.
ESMIG Business Signature – Distinguished Name	The field shows the business signature related to the business sending user of the file.

Table 54 - Files – Details Screen – ESMIG Communication

FILES – DETAILS SCREEN – XML FILE	
XML File	This field shows the message in the original XML format in which it was received.

FILES – DETAILS SCREEN – XML FILE	
	This field is only filled for files with validation errors.

Table 55 - Files – Details Screen – XML File

5.1.13 Messages – Query Screen

Context of Usage

This screen offers the possibility to query messages which are sent to or from RTGS (i.e. inbound and outbound messages). The set of messages that can be queried is restricted to the data scope of the user.

Messages sent by one T2 component and received by another T2 component (e.g. camt.050 messages sent from RTGS to CLM) are not shown as neither the 'From BIC' nor the 'To BIC' is included in the data scope of the user.

This screen queries all messages irrespective of whether they were transferred via file or as a single message.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Business Case ID' in ascending order. The columns of the result list can be defined on this screen.

The messages matching the data of the search fields are shown in the [Messages – List Screen](#) [▶ 162].

Screen Access

This screen can be reached in the following way:

- | Cash Transfers and Messages >> Messages – Query Screen

Privileges

To use this screen the following privilege is needed:

- | RTGS_QueryMsg

References

This screen is part of the following use case:

- | [Query messages](#) [▶ 675]

Screenshot

5.1.14 Messages – List Screen

Context of

This screen lists all messages meeting a defined set of criteria.

Usage

These criteria were either defined on the [Messages – Query Screen](#) [▶ 153] or implicitly defined when opening this screen via a context menu.

Screen Access This screen can be reached in the following ways:

- | Cash Transfers and Messages >> Messages – Query Screen >> [Submit]
- | Cash Transfers and Messages >> Cash Transfers – Query Screen >> [Submit] >> Cash Transfers – List Screen >> Context menu entry ‘Display Message’
- | Cash Transfers and Messages >> Cash Transfers – Query Screen >> [Submit] >> Cash Transfers – List Screen >> Cash Transfers – Details Screen >> Context menu entry ‘Display Message’
- | Ancillary System >> AS Batches – Query Screen >> [Submit] >> AS Batches – List Screen >> Context menu entry ‘Display Message’

Privileges To use this screen the following privilege is needed:

- | RTGS_QueryMsg

References This screen is part of the following use case:

- | [Query messages](#) [▶ 675]

Table 61 - Messages – List Screen – List of Messages – Context Menu

5.1.15 Messages – Details Screen

Context of Usage

This screen shows the details of the message in the original XML format in which it was sent or received. This allows the user to inspect the message fields in the original format, unaltered by any system for display or processing purposes.

Furthermore the screen shows comprehensive information about the message, details of the ESMIG communication and the validation errors with regard to the message.

Screen Access

This screen can be reached in the following ways:

- | Cash Transfers and Messages >> Messages – Query Screen >> [Submit] >> Messages – List Screen >> Context menu entry 'Details'
- | Cash Transfers and Messages >> Cash Transfers – List Screen >> Context menu 'Display Message' >> Messages – List Screen >> Context menu entry 'Details'
- | Cash Transfers and Messages >> Cash Transfer – Details Screen >> Context menu 'Display Message' >> Messages – List Screen >> Context menu entry 'Details'

ESMIG Business Signature - Distinguished Name	This field shows the distinguished name of the signer of the business message. This field is only filled for inbound messages.

Table 65 - Messages – Details Screen – ESMIG Communication

5.1.16 Messages – Simulate Receipt CLM – Pop-up

Context of Usage

This pop-up screen offers the possibility to simulate a receipt (camt.025) for a pull liquidity transfer from RTGS to CLM. This can either be a positive or a negative camt.025. It can be used to finalise open business cases in case the camt.025 has not arrived in RTGS due to a disturbance situation.

This function is only available for the Transit Account Holder of the specific currency and the operator.

Screen Access

This screen can be reached in the following ways:

- | Cash Transfers and Messages >> Messages – Query Screen >> [Submit] >> Messages – List Screen >> Context menu entry ‘Simulate Receipt CLM’
- | Cash Transfers and Messages >> Messages – Query Screen >> [Submit] >> Messages – List Screen >> Context menu entry ‘Details’ >> Messages – Details Screen >> Context menu entry ‘Simulate Receipt CLM’

Privileges

To use this screen the following privilege is needed:

- | RTGS_SimReceipt

References

This screen is part of the following use case:

5.1.17 Business Cases – Query Screen

Context of Usage

This screen offers the possibility to query business cases in RTGS.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Entry Timestamp' in descending order.

The business cases matching the data of the search fields are shown in the [Business Cases – List Screen](#) [▶ 177].

This screen is only available for operators and central bank users.

Screen Access

This screen can be reached in the following way:

- | Cash Transfers and Messages >> Business Cases – Query Screen

Privileges

To use this screen the following privilege is needed:

- | RTGS_QueryBC

References

This screen is part of the following use case:

- | [List business life cycle events for cash transfers \(orders\)](#) [▶ 678]

5.1.19 Account Postings – Query Screen

- Context of Usage** This screen offers the possibility to query postings of an account in the order of their settlement to see the starting balance and the current balance of the account. It also offers the possibility to see the transactions of the account.
- The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Calendar Date' in ascending order.
- The account postings matching the data of the search fields are shown in the [Account Postings - List Screen](#) [▶ 183].
- Screen Access** This screen can be reached in the following way:
- | Cash Transfers and Messages >> Account Postings – Query Screen
- Privileges** To use this screen the following privilege is needed:
- | RTGS_QueryCashTrans
- References** This screen is part of the following use case:
- | [Query/List account postings](#) [▶ 679]

5.1.20 Account Postings - List Screen

Context of Usage

This screen lists all account postings meeting a defined set of criteria.

These criteria were defined on the [Account Postings - Query Screen](#) [▶ 180].

The result list shows the starting balance and the current balance of the account. The account postings are shown in the result list underneath.

By default, the postings are shown in the order of their settlement.

Screen Access

This screen can be reached in the following way:

- | Cash Transfers and Messages >> Account Postings – Query Screen >> [Submit]

Privileges To use this screen the following privilege is needed:

- | RTGS_QueryCashTrans

References This screen is part of the following use cases:

- | [Query/List account postings](#) [▶ 679]

Table 82 - Statement of Account – Download Screen – Buttons

5.1.22 Customer Credit Transfer – New Screen

Context of Usage

This screen offers the possibility to enter a new customer credit transfer (CCT) order.

This input screen is used to submit a credit transfer order when the debtor, the creditor or both are non-financial institutions.

The CCT may be entered by the following entities:

- | RTGS Account Holder
- | Multi-addressee
- | Central bank

The credited and debited RTGS Accounts must be denominated in the same currency.

This screen can also be used for A2A RTGS Account Holders to manually enter exceptional payments via the GUI, when the functionality is activated by their responsible central bank in advance.

Screen Access This screen can be reached in the following way:

- | Cash Transfers and Messages >> Customer Credit Transfer – New Screen

Privileges To use this screen the following privileges are needed:

- | RTGS_EnterCustCredTrans
- | RTGS_SenMandPay (This privilege is only required in order to be able to initiate a mandated payment.)
- | RTGS_EnterExceptCustCredTrans (The screen can be reached with this privilege if the payment bank decides to use the screen only in contingency situations for exceptional payments. If the exceptional case is not activated by the responsible central bank, the screen can be reached to save bookmarks. Only the submit button is deactivated in this case.)

References This screen is part of the following use cases:

- | [Enter Payment order - pacs.008](#) [▶ 681]
- | [Enter exceptional payment](#) [▶ 684]

Screenshot

Table 170 - CCT – New Screen – Buttons

5.1.23 Financial Institution Credit Transfer – New Screen

Context of Usage

This screen offers the possibility to enter a new financial institution credit transfer (FICT) order by generating a pacs.009 CORE message.

The FICT may be entered by the following entities:

- RTGS Account Holder
- Multi-addressee
- Central bank

This screen can also be used for exceptional payments (including ones using BACP code word) initiated manually in the system via the GUI, if the exceptional functionality for Financial Institution Credit Transfers is activated by the responsible central bank.

Furthermore it can be used for a liquidity transfer order from an RTGS account to an AS technical account (AS settlement procedure D).

The credited and debited RTGS accounts must be denominated in the same currency.

Screen Access

This screen can be reached in the following way:

- Cash Transfers and Messages >> Financial Institution Credit Transfer – New Screen

Privileges

To use this screen the following privileges are needed:

- RTGS_EnterFinInstCredTransfer

- I RTGS_EnterExceptFinInstCredTrans (The screen can be reached with this privilege if the payment bank decides to use the screen only in exceptional situations. If the exceptional case is not activated by the responsible central bank, the screen can be reached to save bookmarks. Only the 'Submit' button is deactivated in this case.)
- I RTGS_SenMandPay (This privilege is only required in order to be able to initiate a mandated payment.)
- I RTGS_LiquiAdjustment (This privilege is only required in order to be able to initiate a liquidity transfer order from an RTGS account to an AS technical account when using the code 'SBTI'.)

References

This screen is part of the following use cases:

- I [Enter Payment order - pacs.009](#) [▶ 682]
- I [Enter exceptional payment](#) [▶ 684]

Screenshot

Figure 161 - FICT – New Screen (all sections closed)

Field

Descriptions

This screen consists of several sections that contain fields the user can fill. By default, all sections are closed. The fields of the respective sections are described individually in the following sub-chapters:

- I [FICT – New Screen – Business Application Header](#) [▶ 305]
- I [FICT – New Screen – Instructing Agent](#) [▶ 308]
- I [FICT – New Screen – Debtor](#) [▶ 309]
- I [FICT – New Screen – Debtor Agent](#) [▶ 317]
- I [FICT – New Screen – Instructed Agent](#) [▶ 325]
- I [FICT – New Screen – Creditor](#) [▶ 326]
- I [FICT – New Screen – Creditor Agent](#) [▶ 334]
- I [FICT – New Screen – Interbank Settlement](#) [▶ 342]
- I [FICT – New Screen – Payment ID](#) [▶ 344]

- I [FICT – New Screen – Settlement Time Request](#) [▶ 346]
- I [FICT – New Screen – Payment Type Information](#) [▶ 348]
- I [FICT – New Screen – Remittance Information](#) [▶ 352]
- I [FICT – New Screen – Previous Instructing Agents](#) [▶ 353]
- I [FICT – New Screen – Intermediary Agents](#) [▶ 361]
- I [FICT – New Screen – Buttons](#) [▶ 370]

Note: On this screen, entire sections are marked as mandatory. The user can provide the mandatory information for a section via a number of different input fields. The GUI indicates which fields are mandatory when the user starts to enter information in a specific input field. An asterisk in the title cell indicates a mandatory section.

The user can enter up to 3 previous instructing agents with respective accounts. The previous instructing agent is the agent prior to the instructing agent in the payment chain. There is a separate sub-section for each previous instructing agent. The fields for all previous instructing agents are identical according to the field description below except for the field 'Address Line' in the section 'Postal Address' which is only available for previous instructing agent 1. It is impossible to enter an account without entering an agent. If the user enters data for previous instructing agents 2 and 3 respectively, the data for the prior agent has to be filled. Otherwise, the credit transfer order cannot be submitted.

Expand All	The user can click on this button to open all sections of the screen.

Table 217 - FICT – New Screen – Buttons

5.1.24 Payment Return – New Screen

Context of Usage

This screen offers the possibility to enter a new return payment order by generating a pacs.004 message.

This message type can be sent by an RTGS actor in order to reverse a previously settled payment order message (pacs.008 or pacs.009). The generated payment return message concerns only one payment.

The payment return may be entered by the following entities:

- I RTGS Account Holder
- I Multi-addressee
- I Central bank

The credited and debited RTGS Accounts must be denominated in the same currency.

Screen Access

This screen can be reached in the following way:

- I Cash Transfers and Messages >> Payment Return – New Screen

Privileges

To use this screen the following privilege is needed:

- I RTGS_IniPayReturn

References

This screen is part of the following use case:

- I [Enter Payment order – pacs.004](#) [▶ 683]

Screenshot

Figure 191 - Payment Return – New Screen (all sections closed)

Field

Descriptions

This screen consists of several sections that contain fields the user can fill. By default, all sections are closed. The fields of the respective sections are described individually in the following sub-chapters:

- I [Payment Return – New Screen - Business Application Header](#) [▶ 373]
- I [Payment Return – New Screen – Instructing Agent](#) [▶ 376]
- I [Payment Return – New Screen – Instructed Agent](#) [▶ 377]
- I [Payment Return – New Screen – Original Message Information](#) [▶ 378]
- I [Payment Return – New Screen – Original Interbank Settlement](#) [▶ 380]
- I [Payment Return – New Screen – Interbank Settlement](#) [▶ 381]
- I [Payment Return – New Screen – Compensation Amount](#) [▶ 383]
- I [Payment Return – New Screen – Return Reason Information](#) [▶ 384]
- I [Payment Return – New Screen – Charges](#) [▶ 392]
- I [Payment Return – New Screen – Returned Instructed Amount](#) [▶ 397]
- I [Payment Return – New Screen – Return ID](#) [▶ 399]
- I [Payment Return – New Screen – Return Chain](#) [▶ 400]
- I [Payment Return – New Screen – Buttons](#) [▶ 419]

Note: On this screen, entire sections are marked as mandatory. The user can provide the mandatory information for a section via a number of different input fields. The GUI indicates which fields are mandatory when the user starts to enter information in a specific input field. An asterisk in the title cell indicates a mandatory section.

PAYMENT RETURN – NEW SCREEN – PAYMENT RETURN – TRANSACTION INFORMATION – RETURN ID	
Return ID	<p>This field offers the possibility to enter a unique ID, as assigned by an instructing party for an instructed party, to unambiguously identify the returned transaction.</p> <p>Note: The instructing party is the party sending the return message and not the party that sent the original instruction that is being returned.</p> <p>This field can be filled, but is not relevant for the processing in RTGS. If provided, it is forwarded within the outbound message.</p>

Table 242 - Payment Return – New Screen – Return ID

5.1.24.12 Payment Return – New Screen – Return Chain

Screenshot

Figure 206 - Payment Return – New Screen – Return Chain (all sections closed)

Field

Descriptions

Note: The section ‘Return Chain’ offers the possibility to enter information for parties (agents and non-agents) that are involved in the return transaction. As the input fields for the different parties involved in the return chain are similar, their description is grouped together in the following tables with an indication for which involved parties they are relevant.

The sub-sections ‘Creditor’ and ‘Debtor’ in the ‘Return Chain’ are mandatory.

Furthermore, the following sub-sections are mutually exclusive:

- | ‘Debtor – Party’ and ‘Debtor – Agent’
- | ‘Creditor – Party’ and ‘Creditor – Agent’
- | ‘Initiating Party – Party’ and ‘Initiating Party – Agent’

Table 297 - Bilateral Limits – Query Screen – Buttons

5.3.2 Bilateral Limits – List Screen

Context of Usage

This screen lists all bilateral limits meeting a defined set of criteria.

These criteria were defined on the [Bilateral Limits – Query Screen](#) [▶ 464].

This screen also offers the possibility to modify bilateral limits. After executing a query, this screen is always shown even if only a single data record matches the entered criteria. This offers the possibility to modify the respective bilateral limit.

The amount of the bilateral limit is defined by a corresponding standing order and is updated at the beginning of each business day. Modifying a standing order is only possible in CRDM. Modifications done in RTGS are only valid for the current business day.

Screen Access This screen can be reached in the following way:

- | Liquidity Management Features >> Bilateral Limits – Query Screen >> [Submit]

Privileges To use this screen the following privilege is needed:

- | RTGS_QueryCurLimit

References This screen is part of the following use cases:

- | [Query Limits](#) [▶ 690]
- | [Modify current bilateral limit](#) [▶ 693]

5.3.7 Reservations – Query Screen

Context of Usage

This screen offers the possibility to query reservations in RTGS.

The reservations matching the data of the search fields are shown in the [Reservations – Display Screen](#) [485].

This screen can query existing reservations on a specific account or any RTGS DCA for which a reservation is to be entered for the current business day.

Screen Access This screen can be reached in the following way:

- | [Liquidity Management Features >> Reservations – Query Screen](#)

Privileges To use this screen the following privilege is needed:

- | [RTGS_QueryCurReservation](#)

References This screen is part of the following use case:

- | [Query reservations](#) [▶ 692]

Reset	The user can click on this button to reset all fields to their default values.

Table 314 - Reservations – Query Screen – Buttons

5.3.8 Reservations – Display Screen

Context of Usage

This screen displays current urgent and high reservations for a specific account.

The account whose reservations are displayed was defined on the [Reservations – Query Screen](#) [▶ 482].

This screen also offers the possibility to modify and enter reservations.

The amount of the reservation is defined by a corresponding standing order and is updated at the beginning of each business day. Modifying a standing order is only possible in CRDM. Modifications done in RTGS are only valid for the current business day.

Screen Access

This screen can be reached in the following way:

- | Liquidity Management Features >> Reservations – Query Screen >> [Submit]

Privileges

To use this screen the following privilege is needed:

- | RTGS_QueryCurReservation

RESERVATIONS – DISPLAY SCREEN – RESULTS – ACCOUNT INFORMATION	
Party BIC	This field shows the party BIC. Additionally, this field reveals the party short name via mouse-over function.
Account Number	This field shows the account number.
Account BIC	This field shows the BIC of the account.

Table 315 - Reservations – Display Screen – Results – Account Information

RESERVATIONS – DISPLAY SCREEN – RESULTS – URGENT RESERVATION	
Reservation Amount	This field shows the entered amount of the reservation for the settlement of payment orders with the priority 'urgent'. If there is no pending reservation, this value is equal to the defined value at the beginning of the business day. {CR-143}
Pending Reservation	This field shows the amount of the pending urgent reservation of the selected account. A pending reservation occurs if a reservation order could not (or not completely) be processed due to lack of liquidity of the selected account.
Defined Value	This field shows the current urgent reservation reduced by the payments with priority 'urgent' affecting the selected account. Only debits affect the defined value.
New Reservation Amount	This field offers the possibility to enter a new urgent reservation or to modify the reservation for the current business day. By submitting a new amount for the selected reservation, a task to initiate the update is created and sent to the task queue. As soon as the related task is successfully processed, the reservation is updated with immediate effect. Fixed value for setting the reservation to zero: 0.00 Required privilege: RTGS_ModifyCurReservation

Table 322 - AS Batches – Query Screen – Buttons

5.4.2 AS Batches – List Screen

Context of

This screen lists all AS batches meeting a defined set of criteria.

Usage

These criteria were either defined on the [AS Batches – Query Screen](#) [490] or implicitly defined when opening this screen via a context menu.

If the user acts in the name of an AS then the AS batches are considered where the party BIC of the AS corresponds to the 'From BIC' of the BAH, the BIC of the 'initiating party' or the BIC of the 'counterparty AS' in the ASTransferInitiation message.

If the user acts in the name of a central bank then the AS batches are considered where the party BIC of an AS belonging to the community of the central bank corresponds to one of the above mentioned fields.

After executing a query, this screen is always shown even if only a single data record matches the entered criteria or if it is accessed for a single data record via the context menu entry 'Display AS Batch(es)'.

Screen Access This screen can be reached in the following ways:

- | Ancillary System >> AS Batches – Query Screen >> [Submit]
- | Cash Transfers and Messages >> Cash Transfers – Query Screen >> [Submit] >> Cash Transfers – List Screen >> Context menu entry 'Display AS Batch'
- | Cash Transfers and Messages >> Cash Transfers – Query Screen >> [Submit] >> Cash Transfers – List Screen >> Context menu entry 'Details' >> Cash Transfers – Details Screen >> Context menu entry 'Display AS Batch'

Field Descriptions

Note: For the description of the attributes and their respective values in the ‘Search Criteria’ section see chapter [AS Batches – Query Screen](#) [▶ 490]. The columns displayed in the result list depend on the values selected in the field ‘Selection’ on the ‘AS Batches – Query Screen’

AS BATCHES – LIST SCREEN – RESULTS – LIST OF AS BATCHES	
AS Party BIC	This column shows the AS party BIC of the AS batch.
Business Case ID	This column shows the business case ID of the AS batch.
AS Batch Message Reference	This column shows the AS batch message reference of the AS Batch. This is the element ‘group identification’ within the group header of the AS batch message.
Timestamp	This column shows the entry timestamp of the AS batch.
Settlement Procedure	This column shows the settlement procedure of the AS batch.
Payment Scheme	This column shows the specific type of credit movement (payment scheme) of the AS batch.
Start of Settlement Period	This column shows the start of the settlement period of the AS batch. The value is taken from the element ‘scheduled time’ within the ATransferInitiation message.
End of Settlement Period	This column shows the end of the settlement period of the AS batch. The value is taken from the element ‘settlement period type’ within the ATransferInitiation message.
AS Batch Status	This column shows the processing status of the AS batch.
Group Status	This column shows the group status of the AS batch as communicated within the corresponding ASInitiationStatus

AS BATCHES – LIST SCREEN – RESULTS – LIST OF AS BATCHES	
	message.
Status Reason Code	This column shows the group status reason of the AS batch as communicated within the corresponding ASInitiationStatus message.
Number of Instructions	This column shows the number of instructions of the AS batch.
Control Sum	This column shows the control sum of the AS batch.
Counterparty AS	This column shows the BIC identifying the ancillary system which is the counterparty of the AS batch.
Error Code	This column shows the error code resulting from the validation and processing of the AS batch.

5.4.3 AS Batch Processing Log – Display – Pop-up

Context of Usage This pop-up screen offers the possibility to inspect the processing log of an AS Batch.

The processing log shows the evolution of the status of the AS batch.

Screen Access This pop-up screen can be reached in the following ways:

- | Ancillary System >> AS Batches – Query Screen >> [Submit] >> AS Batches – List Screen >> Context menu entry 'Display AS Batch Processing Log'

- | Cash Transfers and Messages >> Cash Transfers – Query Screen >> [Submit] >> Cash Transfers – List Screen >> Context menu entry ‘Display AS Batch Processing Log’
- | Cash Transfers and Messages >> Cash Transfers – Query Screen >> [Submit] >> Cash Transfers – List Screen >> Context menu entry ‘Details’ >> Cash Transfers – Details Screen >> Context menu entry ‘Display AS Batch Processing Log’

Privileges To use this screen the following privilege is needed:

- | RTGS_QueryASBatchProLog

References This screen is part of the following use case:

- | [AS batch processing log](#) [▶ 700]

5.4.4 Change End of Settlement Period – Pop-up

Context of Usage

This pop-up screen offers the possibility to modify the end of the settlement period of a selected AS batch.

This screen is only available for operators, central bank users and ancillary system users.

Screen Access

This pop-up screen can be reached in the following way:

- | Ancillary System >> AS Batches – Query Screen >> [Submit] >> AS Batches – List Screen >> Context menu entry 'Change End of Settlement Period'

Privileges

To use this screen the following privilege is needed:

- | RTGS_ModifyEoSPeriodASBatch

References

This screen is part of the following use case:

- | [Modify end of settlement period](#) [▶ 705]

Screenshot

5.4.5 AS Procedures and Cycles – Query Screen

Context of Usage

This screen offers the possibility to query AS procedures and cycles in RTGS. The set of AS procedures and cycles that can be queried is restricted to the data scope of the user.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by ‘AS Party BIC’ in ascending order.

The AS procedures and cycles matching the data of the search fields are shown in the [AS Procedures and Cycles – List Screen](#) [▶ 512].

Screen Access This screen can be reached in the following way:

- | Ancillary System >> AS Procedures and Cycles – Query Screen

Privileges To use this screen the following privilege is needed:

- | RTGS_QueryASProcCyc

References This screen is part of the following use case:

- | [Start/stop cycle/procedure](#) [▶ 705]

5.4.7 AS Liquidity Overview – Query Screen

Context of Usage

This screen offers the possibility to query aggregated liquidity information on accounts used by the ancillary system in a settlement procedure.

The result list for each account type can be sorted by the values of a selected output parameter. The default setting is sorting by 'Party BIC' in descending order.

The AS liquidity overview matching the data of the search fields is shown in the [AS Liquidity – Display Screen](#) [▶ 521].

This screen is only available for operators, central bank users and ancillary system users.

Screen Access

This screen can be reached in the following way:

- | Ancillary System >> AS Liquidity Overview – Query Screen

Privileges

To use this screen the following privilege is needed:

- | RTGS_QueryLiqofSuGuTeAcc

References

This screen is part of the following use case:

- | [Display liquidity on ancillary system level](#) [▶ 701]

Screenshot

Table 336 - AS Liquidity Overview – Query Screen – Buttons

5.4.8 AS Liquidity Overview – Display Screen

Context of Usage

This screen displays aggregated liquidity information on accounts linked to an ancillary system meeting a defined set of criteria. It is made up of three parts:

- | Liquidity on technical accounts linked to the selected AS / AS procedure through the ‘AS procedure’ configuration in CRDM.
- | If procedure C was not excluded from the selection criteria: liquidity on the RTGS sub-accounts belonging to a settlement bank account group defined for the selected AS and, optionally, owned by the selected parties.
- | Liquidity on guarantee funds accounts linked to the selected AS / AS procedure through the ‘AS procedure’ configuration in CRDM.

These criteria were defined on the [AS Liquidity Overview – Query Screen](#) [518].

This screen is only available for operators, central bank users and ancillary system users.

Screen Access

This screen can be reached in the following way:

- | Ancillary System >> AS Liquidity Overview – Query Screen >> [Submit]

Privileges

To use this screen the following privileges are needed:

- | RTGS_QueryLiqofSuGuTeAcc
- | RTGS_QueryCashTrans
- | RTGS_QueryCashTransDetails

Descriptions

Note: For the description of the attributes and their respective values in the 'Search Criteria' section see chapter [AS Liquidity Overview – Query Screen](#) [▶ 518].

AS LIQUIDITY OVERVIEW – DISPLAY SCREEN – RESULTS – LIST OF AS TECHNICAL ACCOUNT(S)	
Party BIC	This column shows the party BIC of the AS technical account.
Account Number	This column shows the account number of the AS technical account linked to the party BIC.
Starting Balance	This column shows the opening balance of the AS technical account. It contains a sum of all listed starting balances at the bottom of the column.
Settled Debits	This column shows the sum of all settled cash transfer debits on the AS technical account of the current business day. It contains a sum of all listed settled debits at the bottom of the column.
Settled Credits	This column shows the sum of all settled cash transfer credits on the AS technical account of the current business day. It contains a sum of all listed settled credits at the bottom of the column.
Current Balance	This column shows the current balance of the AS technical account. The current balance consists of the starting balance combined with the settled cash transfers.

AS LIQUIDITY OVERVIEW – DISPLAY SCREEN – RESULTS – LIST OF AS TECHNICAL ACCOUNT(S)	
	It contains a sum of all listed current balances at the bottom of the column.
Projected Debits	<p>This column shows the sum of all cash transfer orders that are planned to be debited on the AS technical account until the end of the current business day.</p> <p>Cash transfer orders that are already sent to RTGS and have the status 'queued' or 'earmarked' are taken into account.</p> <p>It contains a sum of all listed projected debits at the bottom of the column.</p>
Projected Credits	<p>This column shows the sum of all cash transfer orders that are planned to be credited on the AS technical account until the end of the current business day.</p> <p>Cash transfer orders that are already sent to RTGS and have the status 'queued' or 'earmarked' are taken into account.</p> <p>It contains a sum of all listed projected credits at the bottom of the column.</p>
Projected Liquidity	<p>This column shows the balance of the AS technical account that will be available as soon as all planned cash transfer orders will be settled.</p> <p>Cash transfer orders that are already sent to RTGS and have the status 'queued' or 'earmarked' are taken into account.</p> <p>The projected balance consists of the current balance combined with projected credits reduced by the projected debits.</p>

Table 337 - AS Liquidity Overview – Display Screen – Results – List of AS Technical Account(s)

AS LIQUIDITY OVERVIEW – DISPLAY SCREEN – RESULTS – LIST OF RTGS SUB-ACCOUNT(S)	
Party BIC	This column shows the party BIC of the AS settlement bank to which the RTGS sub-account belongs.

5.4.9 Queued AS Transfer Orders by Batch – Query Screen

Context of Usage

This screen offers the possibility to query information on queued AS transfer orders on the level of an AS batch.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'AS Party BIC' in ascending order.

The AS batches matching the data of the search fields are shown in the [Queued AS Transfers Orders by Batch – List Screen](#) [▶ 532].

This screen is only available for operators, central bank users and ancillary system users.

Screen Access This screen can be reached in the following way:

- | Ancillary System >> Queued AS Transfer Orders by Batch – Query Screen

Privileges To use this screen the following privileges are needed:

- | RTGS_QueryASBatches
- | RTGS_QueryCashTrans
- | RTGS_QueryCashTransDetails

References This screen is part of the following use case:

- | [Display queued AS transfer orders by batch](#) [▶ 704]

Field

Descriptions

AS BATCH LIQUIDITY SUMMARY BY SETTLEMENT BANK – DISPLAY SCREEN – RESULTS – DISPLAY AS BATCH LIQUIDITY SUMMARY BY SETTLEMENT BANK	
AS Party BIC	This column shows the party BIC of the AS initiating the AS batch.
Settlement Bank Account BIC	In case of settlement procedures A, B, D and E this column shows the account BIC of the DCA to be debited by the AS transfer orders of the AS batch. In case of settlement procedure C this column shows the account BIC of the DCA or RTGS CB Account which is

AS BATCH LIQUIDITY SUMMARY BY SETTLEMENT BANK – DISPLAY SCREEN – RESULTS – DISPLAY AS BATCH LIQUIDITY SUMMARY BY SETTLEMENT BANK	
	assigned to the sub-account to be debited.
Responsible CB	This column shows the country code of the CB responsible for the AS.
Settlement Procedure	This column shows the settlement procedure of the AS batch.
AS Batch Message Reference	This column shows the AS batch message reference of the AS batch. This is the element 'group identification' within the group header of the AS batch message.
Cash Transfer Status	This column shows the status of the sum of the cash transfers per settlement bank. Possible values: <ul style="list-style-type: none"> Earmarked Queued
Amount of Cash Transfers	This column shows the amount of the queued or earmarked cash transfers per settlement bank. It contains a sum of the amount of cash transfers of all listed AS batches at the bottom of the column.
Number of Cash Transfers	This column shows the number of the queued or earmarked cash transfers per settlement bank. It contains a sum of the number of cash transfers of all listed AS batches at the bottom of the column.
Insufficient Liquidity	This column shows whether the liquidity is insufficient to settle the AS transfer orders referred to in this line together with all cash transfer orders ahead of them in the respective queue. In case of insufficient liquidity, this column shows the value 'LACK'. Otherwise this column does not contain a value.
End of Settlement Period	This column shows the end of the settlement period of the AS batch.

Display Cash Transfers

This context menu entry redirects the user to the 'Cash Transfers – List Screen' while transmitting the following values:

- | AS Party BIC
- | AS Batch Message Reference
- | Transaction type 'Debits'
- | Cash Transfer Status 'Earmarked'
- | Cash Transfer Status 'Queued'
- | Account Number

The 'Account Number' is the account number of the respective sub-account in case of AS settlement procedure C. It is not shown in the GUI but relevant for the determination of the relevant cash transfers regarding the respective sub-account.

Table 355 - AS Batch Liq. Sum. by SB – Display Screen – AS Batch Liq. Sum. by SB – Context Menu

5.4.15 Linked AS Technical Accounts Procedure D – Query Screen

Context of Usage

This screen offers the possibility to query all AS technical accounts that are linked to a specific DCA or RTGS CB Account.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Technical Account BIC' in ascending order.

The linked AS technical accounts matching the data of the search fields are shown in the [Linked AS Technical Accounts Procedure D – List Screen](#) [▶ 548].

Screen Access

This screen can be reached in the following way:

- | Ancillary System >> Linked AS Technical Accounts Procedure D – Query Screen

Privileges

To use this screen the following privilege is needed:

- | RTGS_LiquiAdjustment

References

This screen is part of the following use case:

5.4.16 Linked AS Technical Accounts Procedure D – List Screen

Context of Usage

This screen lists all AS technical accounts that are linked to a specific RTGS DCA or RTGS CB Account, meeting a defined set of criteria.

These criteria were defined on the [Linked AS Technical Accounts Procedure D – Query Screen](#) [▶ 545].

Furthermore, it offers the possibility to initiate a new liquidity transfer order to a technical account using procedure D.

Screen Access This screen can be reached in the following way:

- | Ancillary System >> Linked AS Technical Accounts Procedure D – Query Screen >> [Submit]

Privileges To use this screen the following privilege is needed:

- | RTGS_LiquiAdjustment

References This screen is part of the following use case:

5.4.17 Liquidity Transfer to Technical Account Procedure D – New Screen

Context of Usage

This screen offers the possibility to enter a new liquidity transfer order from a RTGS DCA or a RTGS CB account to an AS technical account. This facilitates a settlement bank transfer initiation (SBTI).

The account information of both the RTGS account and the AS technical account were transmitted by opening this screen via context menu from the [Linked AS Technical Accounts Procedure D – List Screen \[▶ 548\]](#).

The liquidity transfer order may be entered by the following entities:

- | RTGS Account Holder
- | RTGS CB Account Holder

Screen Access

This screen can be reached in the following way:

- | Ancillary System >> Linked AS Technical Accounts Procedure D – Query Screen >> [Submit] >> Linked AS Technical Accounts Procedure D – List Screen >> Context menu entry ‘New Liquidity Transfer’

Privileges

To use this screen the following privilege is needed:

5.5 Reference Data

Note: All reference data defined within CLM or RTGS is visible across both components. This means that reference data screens such as the [Party Reference Data – Query Screen](#) [▶ 556] or the [Cash Account Reference Data – Query Screen](#) [▶ 575] will display data of RTGS and CLM regardless in which component they are defined.

5.5.1 Party Reference Data – Query Screen

Context of Usage This screen offers the possibility to query parties that exist in the reference data of RTGS and CLM. The search is restricted to the data scope of the user.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Party BIC' in ascending order.

The parties matching the data of the search fields are shown in the [Party Reference Data – List Screen](#) [▶ 559].

Screen Access This screen can be reached in the following way:

- | Reference Data >> Party Reference Data – Query Screen

This screen can be reached by clicking on the smart-select button for fields that require the input of a party BIC in several screens throughout the RTGS GUI.

Privileges To use this screen the following privilege is needed:

- | RTGS_QueryLocRefData

References This screen is part of the following use case:

- | [Query/List party reference data](#) [▶ 716]

5.5.3 Direct Debits – Query Screen

Context of Usage

This screen offers the possibility to query direct debits belonging to a specific RTGS DCA. The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by ‘Counterparty BIC’ in ascending order.

The direct debits matching the data of the search fields are shown in the [Direct Debits – List Screen](#) [▶ 573].

Screen Access This screen can be reached in the following way:

- Reference Data >> Direct Debits – Query Screen

Privileges To use this screen the following privilege is needed:

- RTGS_QueryListDirectDebit

References This screen is part of the following use case:

- [Query used amounts for direct debits](#) [▶ 718]

5.6.4 Broadcasts – Query Screen

Context of Usage

This screen offers the possibility to query sent or received operations-related and system-generated broadcasts.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by ‘Send Timestamp’ in descending order.

The broadcasts matching the data of the search fields are shown in the [Broadcasts – List Screen](#) [▶ 606].

Screen Access

This screen can be reached in the following way:

| Administration >> Broadcasts – Query Screen

Privileges

To use this screen the following privilege is needed:

| RTGS_QueryBroadcast

References

This screen is part of the following use cases:

| [Query broadcast](#) [▶ 726]

| [Display broadcast](#) [▶ 727]

Screenshot

Field

Note: For the description of the attributes and their respective values in the 'Search Criteria' section see chapter [Broadcasts – Query Screen](#) [▶ 602].

Descriptions

BROADCASTS – LIST SCREEN – RESULTS – LIST OF BROADCASTS	
Send Timestamp	This column shows the send timestamp of the broadcast.
Subject	This column shows the subject of the broadcast.
Broadcast Category	This column shows the category of the broadcast.
Sender	This column shows the sender of the broadcast. A country code in this column indicates the relevant CB.
Status	This column shows the specific status of the broadcast. The status 'Delivered' is shown to the sender of the broadcast (CB or the operator) and does not change depending on whether specific receiver(s) read or received the broadcast. The status 'Read' and 'Received' are shown to the receiver of the broadcast depending on whether the specific user read or received the broadcast.
Party BIC	This column shows all recipients of a broadcast if the broadcast was sent via the definition of specific parties. If the broadcast was sent to multiple parties, all parties will be shown in one row separated by commas. When the field 'Party

5.7 Monitoring

5.7.1 Cash Transfer Order Totals by Party – Query Screen

Context of Usage

This screen offers the possibility to query the numbers and summarized amounts for all payments and liquidity transfers related to one account holder and his sub-accounts as well as the turnovers of the listed sub-accounts. It is also possible to query data for all participants belonging to the community of the central bank user.

This screen is only available for operators and central bank users.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Party BIC' in descending order.

The numbers and summarized amounts for all cash transfers matching the data of the search fields are shown in the [Cash Transfer Order Totals by Party – List Screen](#) [▶ 626].

Screen Access

This screen can be reached in the following way:

- | Monitoring >> Cash Transfer Order Totals by Party – Query Screen

Privileges

To use this screen the following privilege is needed:

- | RTGS_QuerySumCashTrans

References

This screen is part of the following use case:

5.7.6 RTGS Liquidity by Party – Query Screen

Context of Usage

This screen offers the possibility to query a list of liquidity relevant information related to a participant. It is also possible to query data for all participants belonging to the community of the user.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Party BIC' in ascending order.

The list of liquidity relevant information matching the data of the search fields is shown in the [RTGS Liquidity by Party – List Screen](#) [▶ 638].

This screen is only available for operators and central bank users.

Screen Access

This screen can be reached in the following way:

- | Monitoring >> RTGS Liquidity by Party – Query Screen

Privileges

To use this screen the following privilege is needed:

- | RTGS_QueryAvailLiqui

References

This screen is part of the following use case:

Table 428 - RTGS Liq. by Party – Query Screen – Buttons

5.7.7 RTGS Liquidity by Party – List Screen

Context of Usage

This screen lists liquidity relevant information related to a participant meeting a defined set of criteria.

These criteria were defined on the [RTGS Liquidity by Party - Query Screen](#) [636].

The result list shows the account balances, queued and earmarked cash transfer orders and as a result some projected balances related to the entered party BIC(s) or data related to all party BICs belonging to the community (including the CB itself) of the central bank user (no selection of party BIC).

The account type RTGS Dedicated Transit Account is generally not considered in the result list.

5.7.9 Warehoused Cash Transfers – Query Screen

Context of Usage

This screen offers the possibility to query warehoused payment orders related to one or more account holder(s). It is also possible to query data for all participants belonging to the community of the user.

This screen queries only warehoused payment orders for a given party BIC used either as debtor or as instructing agent within cash transfers.

The number and amount of warehoused payment orders per value date matching the data of the search fields are shown in the [Warehoused Cash Transfer – List Screen](#) [▶ 645].

This screen is only available for operators and central bank users.

Screen Access This screen can be reached in the following way:

- | Monitoring >> Warehoused Cash Transfers – Query Screen

Privileges To use this screen the following privilege is needed:

5.7.10 Warehoused Cash Transfers – List Screen

Context of Usage

This screen lists all warehoused payment orders (sent up to 10 calendar days in advance) data meeting a defined set of criteria.

These criteria were defined on the [Warehoused Cash Transfers – Query Screen](#) [▶ 642].

The result list shows the volume and amount of warehoused payment orders per value date related to the party BIC(s) or data related to all party BICs belonging to the community of the central bank user (in case no selection of party BIC was done).

Screen Access

This screen can be reached in the following way:

- | Monitoring >> Warehoused Cash Transfers – Query Screen >> [Submit]

Privileges

To use this screen the following privilege is needed:

- | RTGS_QueryWarehoused

References

5.7.14 Status Overview for AS Batches – Query Screen

Context of Usage

This screen offers the possibility to query the status of AS batches concerning ancillary systems belonging to the community of a central bank.

The set of AS batches that can be queried is restricted to the data scope of the user.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'AS Party BIC' in ascending order.

The information regarding the AS batches matching the data of the search fields is shown in the [Status Overview for AS Batches – List Screen](#) [▶ 661].

This screen is only available for operators and central bank users.

Screen Access

This screen can be reached in the following way:

- | Monitoring >> Query Status Overview for AS Batches

Privileges

To use this screen the following privilege is needed:

- | RTGS_QueryOverviewASBatches

References

This screen is part of the following use case:

- | [Status overview for AS batches](#) [▶ 733]

Screenshot

Figure 277 - Status Overview for AS Batches – Query Screen

Field Descriptions

STATUS OVERVIEW FOR AS BATCHES – QUERY SCREEN – GENERAL	
AS Party BIC	<p>This field offers the possibility to restrict the result list to AS batches of specific AS party BICs.</p> <p>The AS Party BIC corresponds to a specific element of the BAH or the ATransferInitiation message. This element can be the 'From' of the BAH, the 'initiating party' in the ATransferInitiation message or the 'counterparty AS' in the ATransferInitiation message.</p> <p>The user can enter the AS party BIC(s) manually or search for them by clicking on the smart-select button and opening the Party Reference Data – Query Screen [556] as a pop-up.</p> <p>Only party BICs of parties with the party type 'Ancillary System' are taken into account.</p> <p>While searching, the displayed values are restricted to the data scope of the user.</p> <p>Default value: 'No filter selected'</p> <p>Required format: 8 or 11 characters</p>
AS Procedure	<p>This field offers the possibility to restrict the result list to AS batches processed with regard to an AS using the specified settlement procedure.</p> <p>In case the AS uses several settlement procedures, all AS batches processed for this AS will be taken into account. The result list will then display all AS batches of the respective AS.</p> <p>Select one or more of the following values:</p>

STATUS OVERVIEW FOR AS BATCHES – QUERY SCREEN – GENERAL	
	<ul style="list-style-type: none"> Procedure A Procedure B Procedure C Procedure D Procedure E <p>Default value: 'No filter selected'</p>
Entry Timestamp From	<p>This field offers the possibility to restrict the result list to AS batches with an entry timestamp of the batch file in RTGS equal to or later than the date and time entered in this field.</p> <p>The value entered in this field has to be earlier than the value entered in the field 'Timestamp To'.</p> <p>The user can enter the timestamp manually or specify it by clicking on the calendar button.</p> <p>Required format: YYYY-MM-DD HH:MM:SS</p>
Entry Timestamp To	<p>This field offers the possibility to restrict the result list to AS batches with an entry timestamp of the batch file in RTGS earlier than the date and time entered in this field.</p> <p>The value entered in this field has to be later than the value entered in the field 'Timestamp From'.</p> <p>The user can enter the timestamp manually or specify it by clicking on the calendar button.</p> <p>Required format: YYYY-MM-DD HH:MM:SS</p>

6 Screen User Guide – Description of Use Cases

The Screen User Guide contains use cases adapted from typical user workflows. Each use case represents a single workflow and consists of single action steps, intermediate results and a final result. Some use cases serve as extensions for other use cases and can only be completed after a previous use case has been completed. This is indicated in the context of usage and instructions part. Each use case description follows the same structure and contains the following elements.

Context of Usage	The context of usage includes the goal of the use case and the relevant context information needed to reach the goal of the use case. The content of this part comprises the action steps described in the section 'Instructions' in the wider context, provides the user with valuable information and shows the relation to other use cases. It can also include usage restrictions or prerequisites depending on the use case.
Privileges	The privileges section lists all necessary privileges in order to complete the respective use case. This includes privileges that are needed to access the involved screens and privileges necessary to proceed with the use case. Privileges that are only necessary to use one specific or optional function of the use case are listed after the description of the respective action step.
References	The references section lists the screens involved in order of their appearance in the use case.
Instructions	Each workflow is described from start to end, beginning with the access to the starting screen. The instructions involve a number of separate steps which lead the user through a series of screens and actions. Each step is focused on one single action. Intermediate results are included and the instructions end with a final result. The instructions describe the main scenario which is the most common workflow.
Instructions – Example	<ol style="list-style-type: none">1. Step 12. Step 2<ul style="list-style-type: none">⇒ Intermediate result3. Step 3<ul style="list-style-type: none">➔ Final result
Additional Information	<p>Instead of including all information about possible situations in the main scenario, the use case description focuses on leading the user through the most common workflow first and then provides additional information about alterations and exceptional situations.</p> <p>Such additional information within a use case is highlighted by a notice sign and is described directly below the instructions for the main scenario. Additional information can, among others, include alternative branches, context menu functions, restrictions or screen-specific information.</p>

 **Alternative navigation**

The 'Cash Transfers – List Screen' can also be reached via context menu on screens that contain entries related to a cash transfer by clicking on the context menu entry 'Display Cash Transfer'.

 **Adjusting the search criteria**

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Figure 279 - Additional Information

Wording

Screens involving a cash transfer do not differentiate between a cash transfer order and a cash transfer (settled cash transfer order). Accordingly, the UHB only differentiates between cash transfers and cash transfer orders if relevant for a specific function. In all other functions a cash transfer also means a cash transfer order.

6.1 Cash Transfers and Messages

6.1.1 Query/List cash transfers

Context of Usage

This use case describes how to query cash transfers and view the result list of cash transfers based on the selected filter criteria.

Cash transfers can be queried by entering attribute values with regard to the relevant cash transfers.

This use case provides the basis for the execution of the following use cases:

- I [Display cash transfer \(order\)](#) [▶ 666]
- I [Revocation of payment](#) [▶ 667]
- I [Reorder payment in queue](#) [▶ 668]
- I [Modify earliest debit timestamp](#) [▶ 669]
- I [Modify latest debit timestamp](#) [▶ 670]
- I [Modify priority](#) [▶ 671]
- I [Release cash transfer order of blocked party](#) [▶ 672]

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryCashTrans

References Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – Query Screen](#) [▶ 87]
- I [Cash Transfers – List Screen](#) [▶ 109]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'Query Cash Transfers'.
3. Enter the relevant attribute values of the cash transfers that are to be displayed.
4. Optionally, specify the sorting criterion, the sorting order and the selection of columns for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Priority' in ascending order.
5. Click on the 'Submit' button.
 - ➔ The 'Cash Transfers – List Screen' opens. The list shows all cash transfers matching the entered search criteria.

Alternative navigation

The 'Cash Transfers – List Screen' can also be reached via context menu on screens that contain entries related to a cash transfer by clicking on the context menu entry 'Display Cash Transfer'.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.1.2 Display cash transfer (order)

Context of Usage

This use case describes how to query cash transfers and view detailed information on a specific cash transfer.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryCashTransDetails

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – Details Screen](#) [▶ 127]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 665].
2. In order to view details of a specific cash transfer, right-click on the cash transfer and select the context menu entry 'Details'.

- ➔ The 'Cash Transfers – Details Screen' opens. Detailed information with regard to the selected cash transfer is displayed.

Alternative navigation

The 'Cash Transfers – List Screen' can also be reached via context menu on screens that contain entries related to a cash transfer by clicking on the context menu entry 'Display Cash Transfer'.

6.1.3 Revocation of payment

Context of Usage

This use case describes how to revoke cash transfer orders selected in the [Cash Transfers – List Screen](#) [▶ 109] or in the [Cash Transfers – Details Screen](#) [▶ 127].

Revoking is only possible for payment orders with the status 'Warehoused', 'Earmarked' or 'Queued' and for AS transfer orders with AS settlement procedure 'E'.

For payment orders with the status 'Earmarked due to blocking', only the central bank of the sending payment bank or the operator is able to revoke the payment order.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_RevPaymentOrder

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 109]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 665].
2. Select one or more cash transfer order(s) that are to be revoked.
3. Right-click on the selected item(s) and select the context menu entry 'Revoke'.
 - ⇒ A confirmation pop-up opens showing details of the selected cash transfer order(s).
4. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the revocation of the cash transfer order(s).
 - ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

6.1.4 Modify cash transfer order

This use case includes four functions in order to modify a payment order. These four functions are reordering a payment order in the respective queue, modifying the earliest debit timestamp, modifying the latest debit timestamp and modify the priority.

Detailed information on these functions can be found in the following chapters:

- I [Reorder payment order in queue](#) [▶ 668]

- I [Modify earliest debit timestamp](#) [▶ 669]
- I [Modify latest debit timestamp](#) [▶ 670]
- I [Modify priority](#) [▶ 671]

6.1.4.1 Reorder payment in queue

Context of Usage

This use case describes how to increase or decrease the queue position of cash transfer orders selected in the [Cash Transfers – List Screen](#) [▶ 109] or in the [Cash Transfers – Details Screen](#) [▶ 127].

Reordering is only possible for payment orders and AS transfer orders with the status 'Queued'.

This function is only available for the payment bank, the central bank or an operator.

For AS transfer orders with AS settlement procedure 'A' or 'E', only the central bank of the debited settlement bank or an operator can reorder the payment order in the queue.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_ModifyCasTraOrd

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 109]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 665].
2. Select one or more cash transfer order(s) that are to be reordered.
3. Right-click on the selected item(s) and select the context menu entry 'Increase' or 'Decrease' respectively.
 - ⇒ A confirmation pop-up opens showing details of the selected cash transfer order(s).
4. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the reordering of the cash transfer order(s).
 - ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

Reordering multiple cash transfer orders

If more than one cash transfer order is increased/decreased via bulk action, the order of the increased/decreased items can differ from their original order.

6.1.4.2 Modify earliest debit timestamp

Context of Usage This use case describes how to modify the earliest debit timestamp of payment orders selected in the [Cash Transfers – List Screen](#) [▶ 109] or in the [Cash Transfers – Details Screen](#) [▶ 127].

Modifying the earliest debit timestamp is only possible for payment orders with the status 'Warehoused' or 'Earmarked' including an earliest debit timestamp.

This function is only available for the payment bank, the central bank or an operator.

Privileges To carry out this use case, the following privilege is needed:

- I RTGS_ModifyCasTraOrd

References Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 109]
- I [Cash Transfers – Modify Earliest Debit Timestamp – Pop-up](#) [▶ 131]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 665].
2. Select one or more payment order(s) whose earliest debit timestamp are to be modified.
3. Right-click on the selected item(s) and select the context menu entry 'Modify earliest debit timestamp'.
 - ⇒ The 'Cash Transfers – Modify Earliest Debit Timestamp – Pop-up' opens showing details of the selected payment order(s).
4. Fill in the field 'New Earliest Debit Timestamp' by entering a timestamp manually or by clicking on the calendar button. The new earliest debit timestamp must be earlier than the latest debit timestamp and before the cut-off time. The new earliest debit timestamp must be later than the current system time.
5. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➡ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

Alternative navigation

The 'Cash Transfers – Modify Earliest Debit Timestamp – Pop-up' can also be reached via context menu on the 'Cash Transfers – Details Screen' by clicking on the context menu entry 'Modify Earliest Debit Timestamp'.

Deleting the earliest debit timestamp

The 'Cash Transfers – Modify Earliest Debit Timestamp – Pop-up' offers the possibility

to delete the current earliest debit timestamp by clicking on the 'Delete Earliest Debit Timestamp' button.

6.1.4.3 Modify latest debit timestamp

Context of Usage

This use case describes how to modify the latest debit timestamp of payment orders selected in the [Cash Transfers – List Screen](#) [▶ 109] or in the [Cash Transfers – Details Screen](#) [▶ 127].

Modifying the latest debit timestamp is only possible for payment orders with the status 'Warehoused' or 'Earmarked' including a latest debit timestamp.

This function is only available for the payment bank, the central bank or an operator.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_ModifyCasTraOrd

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 109]
- I [Cash Transfers – Modify Latest Debit Timestamp – Pop-up](#) [▶ 134]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 665].
2. Select one or more payment order(s) whose latest debit timestamp are to be modified.
3. Right-click on the selected item(s) and select the context menu entry 'Modify latest debit timestamp'.
 - ⇒ The 'Cash Transfers – Modify Latest Debit Timestamp – Pop-up' opens showing details of the selected payment order(s).
4. Fill in the field 'New Latest Debit Timestamp' by entering a timestamp manually or by clicking on the calendar button. The new latest debit timestamp must be later than the earliest debit timestamp and before the cut-off time. The new latest debit timestamp must be later than the current system time.
5. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

Alternative navigation

The 'Cash Transfers – Modify Latest Debit Timestamp – Pop-up' can also be reached via context menu on the 'Cash Transfers – Details Screen' by clicking on the context menu entry 'Modify Latest Debit Timestamp'.

Deleting the latest debit timestamp

The 'Cash Transfers – Modify Latest Debit Timestamp – Pop-up' offers the possibility to delete the current latest debit timestamp by clicking on the 'Delete Latest Debit Timestamp' button.

6.1.4.4 Modify priority

Context of Usage

This use case describes how to modify the priority of payment orders selected in the [Cash Transfers – List Screen](#) [▶ 109].

Modifying the priority is only possible for payment orders with the status 'Warehoused', 'Earmarked' or 'Queued'. It is not possible for payment orders with the priority 'Urgent'.

This function is only available for users operating in the name of the payment bank to be debited, its central bank or an operator.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_ModifyCasTraOrd

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 109]
- I [Cash Transfers – Modify Priority – Pop-up](#) [▶ 136]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 665].
2. Select one or more payment order(s) whose priority are to be modified.
3. Right-click on the selected item(s) and select the context menu entry 'Modify Priority'.
 - ⇒ The 'Cash Transfers – Modify Priority – Pop-up' opens showing details of the selected payment order(s). The field 'New Priority' is automatically filled with a higher priority.
4. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO) to confirm the new priority.
 - ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

Alternative navigation

The 'Cash Transfers – Modify Priority – Pop-up' can also be reached via context menu on the 'Cash Transfers – Details Screen' by clicking on the context menu entry 'Modify Priority'.

6.1.5 Release cash transfer order of blocked party

Context of usage

This use case describes how to release blocked cash transfer orders.

Releasing cash transfer orders is only possible for cash transfer orders which are earmarked due to the blocking of a party or an account. Additionally, the value date of the cash transfer order has to be the current business day.

In case one of the settlement banks is blocked, the central bank has to agree on every single cash transfer order.

This function is only available for operators and central bank users (only central bank related to the blocked party or blocked account).

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_Ag/DisagCashTrans

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – Query Screen](#) [▶ 87]
- I [Cash Transfers – List Screen](#) [▶ 109]

Instructions

1. Complete the use case for [Query/List cash transfers](#). [▶ 665]
2. Select one or more cash transfer order(s) that are to be released.
3. Right-click on the selected item(s) and select the context menu entry 'Agree'.
 - ⇒ A confirmation pop-up opens showing details of the selected cash transfer order(s).
4. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the release of the cash transfer order(s).
 - ➡ A related task is shown in the notification area and the user returns to the 'Cash Transfers – List Screen'.

**Disagreement on cash transfer orders**

In order to disagree on cash transfer orders, complete this use case while selecting the context menu entry 'Disagree' in the third step.

6.1.6 Manual reverse booking

Context of Usage

This use case describes how to reverse one or more booking(s) manually.

This function is only available for liquidity transfer orders to T2S, TIPS and CLM with the status 'Settled' or 'Partially Settled'.

In order to reverse booking(s) to T2S, the credit account type has to be 'T2S DCA' or 'T2S CB account' for the selected liquidity transfer(s).

In order to reverse booking(s) to TIPS, the credit account type has to be 'TIPS Account' or 'TIPS AS Technical Account' for the selected liquidity transfer(s).

In order to reverse booking(s) to CLM, the credit account type has to be 'MCA', 'CLM CB account' or 'Overnight Deposit Account' ¹⁷ for the selected liquidity transfer(s).

When performing this function it is advisable to check the status of the business case in all services involved in the transaction, e.g. manual reversal booking TIPS to be checked also in CLM and TIPS.

This function is only available for operators and the Transit Account Holder of the specific currency.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_ManReversalBook

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 109]
- I [Cash Transfers – Manual Reversal Booking T2S – Pop-up](#) [▶ 137]
- I [Cash Transfers – Manual Reversal Booking TIPS – Pop-up](#) [▶ 140]
- I [Cash Transfers – Manual Reversal Booking CLM – Pop-up](#) [▶ 143]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 665].
2. Select one or more liquidity transfer(s) that are to be reversed manually.
3. Right-click on the selected item(s) and select the context menu entry 'Reverse Booking T2S'/'Reverse Booking TIPS'/'Reverse Booking CLM' depending on the type of account involved in the liquidity transfer(s).
 - ⇒ The 'Cash Transfers – Manual Reversal Booking T2S – Pop-up' or the 'Cash Transfers – Manual Reversal Booking TIPS – Pop-up' or the 'Cash Transfers – Manual Reversal Booking CLM – Pop-up' opens showing details of the selected liquidity transfer(s).
4. Specify if an error code is to be provided in the field 'Reversal Booking' by selecting 'With T2S Error Code'/'Without T2S Error Code' or 'With TIPS Error Code'/'Without TIPS Error Code' or 'With CLM Error Code'/'Without CLM Error Code' respectively.
5. In case an error code is to be provided, enter or select the respective error code in the field 'T2S Error Code'/'TIPS Error Code'/'CLM Error Code'.
6. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).

¹⁷ Account type only relevant for users with party operating in EUR

- ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

Alternative navigation

The 'Cash Transfers – Manual Reversal Booking T2S – Pop-up' or the 'Cash Transfers – Manual Reversal Booking TIPS – Pop-up' or the 'Cash Transfers – Manual Reversal Booking CLM – Pop-up' can also be reached via context menu on the 'Cash Transfers – Details Screen' by clicking on the context menu entry 'Reverse Booking T2S'/'Reverse Booking TIPS'/'Reverse Booking CLM' respectively.

6.1.7 Query files

Context of Usage

This use case describes how to query incoming files and view their content based on the selected filter criteria.

The user can enter the relevant attribute values of the files whose attributes are to be displayed.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryFile

References

Further information on screens involved can be found in the screen reference part:

- I [Files – Query Screen](#) [▶ 146]
- I [Files – List Screen](#) [▶ 148]
- I [Files – Details Screen](#) [▶ 150]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'Query Files'.
3. Enter all known attribute values of the files that are to be queried.
4. Click on the 'Submit' button.
 - ➔ The 'Files – List Screen' opens. The list shows all files matching the entered search criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Details of a file

The context menu entry 'Details' on the 'Files – List Screen' redirects the user to the 'Files – Details Screen' displaying detailed information related to the selected file.

6.1.8 Query messages

Context of Usage

This use case describes how to query incoming and outgoing messages and view the result list based on the selected filter criteria.

Querying messages gives profound information with regard to cash transfers, business cases and AS batches as messages are a constitutive element of these.

The user can enter the relevant attribute values of the payments whose attributes are to be displayed. Alternatively, the user can start the search for messages by selecting a relevant cash transfer, business case or AS batch.

This use case provides the basis for the execution of the following use case:

- I [Display message](#) [▶ 676]

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryMsg

References

Further information on screens involved can be found in the screen reference part:

- I [Messages – Query Screen](#) [▶ 153]
- I [Messages – List Screen](#) [▶ 162]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'Query Messages'.
3. Enter all known attribute values of the messages that are to be queried.
4. Optionally, specify the sorting criterion, the sorting order and the selection of columns for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Business Case ID' in ascending order with selection of all columns for the result list.
5. Click on the 'Submit' button.
 - ➡ The 'Messages – List Screen' opens. The list shows all messages matching the entered search criteria.

Alternative navigation

The 'Messages – List Screen' can also be reached via context menu on screens that contain entries related to messages by clicking on the context menu entry 'Display Mes-

sage'.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.1.9 Display message

Context of Usage

This use case describes how to query messages and view detailed information on a selected message.

Querying messages gives profound information with regard to cash transfers and business cases as messages are a constitutive element of these.

Messages can be queried by entering attribute values with regard to the relevant messages. Alternatively, the search for messages can be started by selecting a relevant cash transfer or business case.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryMsgDetail

References

Further information on screens involved can be found in the screen reference part:

- I [Messages – Details Screen](#) [▶ 167]

Instructions

1. Complete the use case for [Query messages](#) [▶ 675].
2. In order to view details of a specific message, right-click on the message and select the context menu entry 'Details'.
 - ➔ The 'Messages – Details Screen' opens. General information with regard to the selected message as well as validation errors, parameters of the ESMIG communication and the XML message in the original format are displayed.

Alternative navigation

The 'Messages – List Screen' can also be reached via context menu on screens that contain entries related to messages by clicking on the context menu entry 'Display Message'.

6.1.10 Simulate receipt

This use case describes how to simulate a receipt (camt.025) for a pull liquidity transfer from RTGS to CLM. This can either be a positive or a negative camt.025. It can be used

Context of Usage	<p>to finalise open business cases in case the camt.025 has not arrived in RTGS due to a disturbance situation.</p> <p>This function is only available for the Transit Account Holder of the specific currency and the operator.</p>
Privileges	<p>To carry out this use case, the following privilege is needed:</p> <ul style="list-style-type: none"> I RTGS_SimReceipt
References	<p>Further information on screen involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> I Messages – Simulate Receipt CLM – Pop-up [▶ 171]
Instructions	<ol style="list-style-type: none"> 1. Complete the use case for Query messages [▶ 675] or Display message [▶ 676]. 2. In order to simulate a receipt, right-click on the message and select the context menu entry 'Simulate Receipt CLM'. <ul style="list-style-type: none"> ⇒ The 'Messages – Simulate Receipt CLM – Pop-up' opens. 3. Select one option for the field 'Simulate Receipt'. 4. Depending on the used option, select one value either in field 'CLM Error Code' (negative receipt) or in 'Status Code' (positive receipt). 5. Click on the 'Submit' button. <ul style="list-style-type: none"> ⇒ A confirmation pop-up opens asking the user if he wants to proceed. 6. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to either create a task for simulation of a camt.025 (2-eyes mode) or create a task to be confirmed by another user (4-eyes mode). Moreover the user returns to the previous 'Messages – List Screen'/'Messages – Details Screen'. 7. By clicking on the 'No' button, the user returns to the 'Messages – Simulate Receipt – Pop-up' screen without creating any task.

6.1.11 Simulate a positive receipt

Context of Usage	<p>This use case describes how to simulate positive receipts (camt.025) in order to finalise open business cases. The action is only possible for liquidity transfers to T2S/TIPS/CLM with settlement status 'Settled' of 'Partially Settled' and with specific credit account types.</p> <p>This function is only available for the Transit Account Holder of the specific currency and the operators.</p>
Privileges	<p>To carry out this use case, the following privilege is needed:</p> <ul style="list-style-type: none"> I RTGS_SimReceipt
References	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> I Cash Transfers – List Screen [▶ 109] I Cash Transfers – Details Screen [▶ 127]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 665].
2. In order to simulate a positive receipt, right-click on the selected item(s) and select the context menu entry 'Simulate Positive Receipt T2S'/'Simulate Positive Receipt TIPS'/'Simulate Positive Receipt CLM' depending on the account type and settlement status of the selected liquidity transfer(s).
 - ⇒ A confirmation pop-up opens asking the user if he wants to proceed.
3. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to either create a task for a positive camt.025 (2-eyes mode) or create a task to be confirmed by another user (4-eyes mode). The user returns to the 'Cash Transfers – List Screen'.
4. By clicking on the 'No' button, the user returns to the 'Cash Transfers – List Screen' without creating any task.

6.1.12 List business life cycle events for cash transfers (orders)

Context of Usage

This use case describes how to query business cases and view the result list based on the selected filter criteria.

Business cases can be queried by entering attribute values with regard to the relevant business cases.

Privileges

To carry out this use case, the following privilege is needed:

- l RTGS_QueryBC

References

Further information on screens involved can be found in the screen reference part:

- l [Business Cases – Query Screen](#) [▶ 174]
- l [Business Cases – List Screen](#) [▶ 177]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'Query Business Cases'.
3. Enter the relevant attribute values of the business cases that are to be displayed.
4. Optionally, specify the sorting criterion and the sorting in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Entry Timestamp' in descending order.
5. Click on the 'Submit' button.
 - ➡ The 'Business Cases – List Screen' opens. The list shows all business cases matching the entered search criteria.

Alternative navigation

The 'Business Cases – List Screen' can also be reached via context menu on screens that contain entries related to business cases by clicking on the context menu entry 'Display Business Case'.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.1.13 Query/List account postings

Context of Usage

This use case describes how to query account postings and view the result list based on the selected filter criteria.

The result list shows the starting balance and the current balance along with all account postings of an account matching the defined criteria.

Privileges

To carry out this use case, the following privilege is needed:

- | RTGS_QueryCashTrans

References

Further information on screens involved can be found in the screen reference part:

- | [Account Postings – Query Screen](#) [▶ 180]
- | [Account Postings - List Screen](#) [▶ 183]
- | [Cash Transfers – List Screen](#) [▶ 109]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'Query Account Postings'.
3. If the current RTGS user has more than one account, select the account BIC and account number for which the account postings are to be queried. Otherwise, the respective fields are pre-filled.
4. Optionally, restrict the result list to account postings within a specific timeframe using the fields 'Timestamp From' and 'Timestamp To'.
5. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Calendar Date' in ascending order.
6. Click on the 'Submit' button.
 - ➔ The 'Account Postings – List Screen' opens. The list shows the starting balance and the current balance of the selected account in the section 'Balance' and a list of all

account postings matching the entered search criteria in the section 'List of Account Postings'.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Pre-filled account information

If the user only has one single account, the section 'Account Information' is pre-filled with the account information of the current user. However, if the user belongs to a group and wants to query other accounts of that group, the user can overwrite the pre-filled values.

Display cash transfer of account posting

By right-clicking on a specific account posting in the result list, the context menu entry 'Display Cash Transfers' can be selected. This opens the 'Cash Transfers – List Screen' showing the cash transfers of the selected account posting.

6.1.14 Download statement of account

Context of Usage

This use case describes how to query an account statement and download the result list based on the selected filter criteria.

U2A only parties are able to query statement of accounts for the previous ten business days while A2A parties are only able to query the statement of account for the last day.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryAccStat

References

Further information on screens involved can be found in the screen reference part:

- I [Statement of Account – Download Screen](#) [▶ 186]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'Download Statement of Account'.
3. Enter the relevant attribute values of the statement of account that is to be downloaded.
4. Click on the 'Download' button.
 - ⇒ A confirmation pop-up opens asking the user if he wants to proceed.

5. By clicking on the 'Yes' button, a download window appears and the statement of account is downloaded as a 'pdf' file. The user returns to the 'Statement of Account – Download Screen' with the original default settings.
6. By clicking on the 'No' button, the user returns to the 'Statement of Account – Download Screen' with the already entered information.

Pre-filled account and party information

If the user has only one single account, the sections 'Account Number' and 'Account BIC' are pre-filled with the account information of the current user. However, if the user is connected to more than one account both fields are not pre-filled. In this case, the user can enter an account number or account BIC manually or search for it by clicking on the smart-select button and opening the respective reference data screen as a pop-up.

If the user is associated with exactly one party, the field 'Party BIC' is pre-filled with the BIC of the respective party.

6.1.15 Enter payment order – pacs.008

Context of

This use case describes how to enter a new customer credit transfer order.

Usage

This input screen is used when the debtor, the creditor or both are non-financial institutions.

After completing this use case, a pacs.008 message for the credit transfer order is submitted.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_EnterCustCredTrans

References

Further information on screens involved can be found in the screen reference part:

- I [Customer Credit Transfer - New Screen](#) [▶ 188]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'New Customer Credit Transfer'.
3. Fill in the mandatory sub-sections of the section 'Business Application Header'.
4. Fill in the mandatory sub-sections of the section 'FI To FI Customer Credit Transfer'. These include 'Instructing Agent', 'Debtor', 'Debtor Agent', 'Instructed Agent', 'Creditor', 'Creditor Agent', 'Interbank Settlement' and 'Payment ID'. Further information on the fields and their requirements can be found in the screen reference part.
5. Optionally, fill in the additional sub-sections of the section 'FI To FI Customer Credit Transfer'. These include 'Settlement Time Request', 'Charges', 'Instructed Amount

and Exchange Rate', 'Payment Type Information', 'Purpose', 'Remittance Information', 'Regulatory Reporting', 'Instruction for Creditor Agent', 'Instruction for Next Agent', 'Ultimate Creditor', 'Ultimate Debtor', 'Initiating Party', 'Previous Instructing Agents', 'Intermediary Agents' and 'Related Remittance Information'. Further information on the fields and their requirements can be found in the screen reference part.

6. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).

- ➔ The notification area shows whether the submission of the credit transfer order has been completed.

6.1.16 Enter payment order – pacs.009

Context of Usage

This use case describes how to enter a new credit transfer order between financial institutions.

After completing this use case, a pacs.009 message for the credit transfer order is submitted.

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_EnterFinInstCredTransfer

References

Further information on screens involved can be found in the screen reference part:

- I [Financial Institution Credit Transfer – New Screen](#) [▶ 302]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'New Financial Institution Credit Transfer'.
3. Fill in the mandatory sub-sections of the section 'Business Application Header'.
4. Fill in the mandatory sub-sections of the section 'FinancialInstitution Credit Transfer'. These include 'Instructing Agent', 'Debtor', 'Instructed Agent', 'Creditor', 'Interbank Settlement' and 'Payment ID'. Further information on the fields and their requirements can be found in the screen reference part.
5. Optionally, fill in the additional sub-sections of the section 'FinancialInstitution Credit Transfer'. These include 'Debtor Agent', 'Creditor Agent', 'Settlement Time Request', 'Payment Type Information', 'Remittance Information', 'Previous Instructing Agents' and 'Intermediary Agents'. Further information on the fields and their requirements can be found in the screen reference part.
6. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The notification area shows whether the submission of the credit transfer order has been completed.

Entering a liquidity transfer order to AS technical account

It is possible to enter a liquidity transfer order to an AS technical account via the 'Financial Institution Credit Transfer – New Screen' by using the local instrument code 'SBTI' (required privilege: RTGS_LiquiAdjustment).

Alternatively, this can also be done via the [Liquidity Transfer to Technical Account Procedure D – New Screen](#) [▶ 550], see use case [Enter current liquidity transfer order to technical account – AS procedure D.](#) [▶ 715]

6.1.17 Enter payment order – pacs.004

Context of

This use case describes how to enter a new return payment order.

Usage

This input screen is used in order to reverse a previously settled payment order.

After completing this use case, a pacs.004 message for the return payment order is submitted.

Privileges

To carry out this use case, the following privilege is needed:

- RTGS_IniPayReturn

References

Further information on screens involved can be found in the screen reference part:

- [Payment Return – New Screen](#) [▶ 371]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'New Payment Return'.
3. Fill in the mandatory sub-sections of the section 'Business Application Header'.
4. Fill in the mandatory sub-sections of the section 'Payment Return'. These include 'Instructing Agent', 'Instructed Agent', 'Original Message Information', 'Interbank Settlement', 'Return Reason Information' and 'Return Chain'. Further information on the fields and their requirements can be found in the screen reference part.
5. Optionally, fill in the additional sub-sections of the section 'Payment Return'. These include 'Original Interbank Settlement', 'Compensation Amount', 'Charges', 'Returned Instructed Amount', 'Return ID'. Further information on the fields and their requirements can be found in the screen reference part.
6. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The notification area shows whether the submission of the return payment order has been completed.

6.1.18 Enter exceptional payment

Context of Usage

This use case describes how to enter a payment order as an A2A only RTGS Account Holder when the exceptional payment functionality is activated. It further describes how to enter a backup payment in a contingency situation.

The precondition for the execution of this use case is that the exceptional payment functionality is activated by the related central bank or the operator. For details, see use case [Activate/deactivate access to exceptional payment entry](#) [▶ 720].

Privileges

To carry out this use case, the following privileges are needed:

- | RTGS_EnterExceptCustCredTrans
- | RTGS_EnterExceptFinInstCredTrans

Users with the privileges listed above can only submit payment orders when the exceptional payment functionality is activated. The two listed privileges and the privileges 'RTGS_EnterCustCredTrans' and 'RTGS_EnterFinInstCredTransfer' are mutually exclusive.

References

Further information on screens involved can be found in the screen reference part:

- | [Customer Credit Transfer – New Screen](#) [▶ 188]
- | [Financial Institution Credit Transfer – New Screen](#) [▶ 302]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages'.
3. In order to enter an exceptional customer credit transfer (pacs.008), click on the sub-menu entry 'New Customer Credit Transfer'. In order to enter an exceptional financial institution credit transfer (pacs.009), click on the sub-menu entry 'New Financial Institution Credit Transfer'.
4. Fill in the mandatory sub-sections of the respective screen. Further information on the fields and their requirements can be found in the screen reference part.
5. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The notification area shows whether the submission of the credit transfer order has been completed.

**Backup payment**

In order to enter a backup payment, use the code 'BACP' in the section 'Payment Type Information' – 'Local Instrument' on the 'Financial Institution Credit Transfer – New Screen'. This is only allowed if the contingency situation is activated by the responsible central bank or the operator.

Verification of functionality

During the initial start of the application, it is one-time verified if the exceptional payment functionality is currently allowed. In case the status is changed in the meantime, the application has to be reloaded.

6.1.19 Repeat sending

Context of Usage

This use case describes how to resend outbound messages without any modification.

The resending function is only available for internal messages with 'Message Direction' 'Outbound', 'Message Destination' 'CLM' with 'Message Type' camt.050 and camt.025.

This function is only available for operators and Transit Account Holders.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_RepeatSending

References

Further information on screens involved can be found in the screen reference part:

- I [Messages – List Screen](#) [▶ 162]
- I [Messages – Details Screen](#) [▶ 167]

Instructions

1. Complete the use case for [Query messages](#) [▶ 675].
2. Right-click on one or more message(s) that are to be resent and select the context menu entry 'Repeat Sending'.
 - ⇒ A confirmation pop-up opens asking the user if he wants to proceed.
3. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to either resend the message(s) (2-eyes mode) or create task(s) to be confirmed by another user (4-eyes mode).
4. By clicking on the 'No' button, the user returns to the 'Messages – List Screen' without creating any task.

Investigating the result of the resending

To investigate the newly sent message(s) complete the use case 'Query messages' while filtering for the newly sent message(s).

6.1.20 Upload A2A file or message via U2A

Context of Usage

This use case describes how to upload A2A files or messages in a contingency situation.

The user can upload an uncompressed UTF-8 text format, within a '.txt' file or an '.xml' file.

This function can only be used in 4-eyes mode.

This function is only available for operators and central bank users.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_UploadFileinU2A

References

Further information on screens involved can be found in the screen reference part:

- I [A2A File or Message – Upload Screen](#) [▶ 420]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfer and Messages' and click on the sub-menu entry 'Upload A2A File or Message'.
3. Enter the mandatory attribute values of the file or message that is to be uploaded in the section 'ESMIG Information'.
4. Click on the '+ Choose' button.
 - ⇒ A browser window opens as a pop-up.
5. Select a '.txt' or '.xml' file.
6. Click on the 'Open' button in the browser pop-up.
 - ⇒ The respective file is shown in the section 'Upload of A2A File or Message'.
7. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The notification area shows whether the submission of the data has been completed. In case of successful data submission, the notification area also shows a task ID.

**Removing a selected file**

The user can remove a selected file by clicking on the 'X' button in the section 'Upload A2A file or message'.

**Confirmation of task**

This function can only be used in 4-eyes mode. In order to confirm the task created by the initial user, a second user has to re-upload the corresponding file on the [Task Queue – Details Screen](#) [▶ 593]. There is a check done by the system that the checksum of both files/messages are the same.

6.2 Liquidity

6.2.1 Display cash account liquidity (one service only)

Context of Usage	This use case describes how to display the liquidity of an account (intra-service) by considering posted cash transfers and pending cash transfer orders to provide a liquidity projection as well as the current balance of the account.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I RTGS_QueryAccBal
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I RTGS Cash Account Liquidity – Query Screen [▶ 424]I RTGS Cash Account Liquidity – Display Screen [▶ 426]I RTGS Sub-Account Liquidity – Display Screen [▶ 435]I Liquidity of AS Guarantee Funds Account – Display Screen [▶ 442]I Liquidity of AS Technical Account – Display Screen [▶ 449]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.2. Select the main menu entry 'Liquidity' and click on the sub-menu entry 'Query RTGS Cash Account Liquidity'.3. Enter the account number or the account BIC of the account whose liquidity is to be displayed.4. Click on the 'Submit' button.<ul style="list-style-type: none">➤ If the entered account information corresponds to an RTGS DCA, the 'RTGS Cash Account Liquidity – Display Screen' opens, displaying the liquidity of the account.➤ If the entered account information corresponds to a sub-account, the 'RTGS Sub-Account Liquidity – Display Screen' opens, displaying the liquidity of the account.➤ If the entered account information corresponds to an AS guarantee funds account, the 'Liquidity of AS Guarantee Funds Account – Display Screen' opens, displaying the liquidity of the account.➤ If the entered account information corresponds to an AS Technical Account, the 'Liquidity of AS Technical Account – Display Screen' opens, displaying the liquidity of the account.

Alternative navigation

The 'RTGS Cash Account Liquidity – Display Screen' can also be reached via opening the 'Liquidity Transfer – New Screen' and clicking on the button 'Display Liquidity', direct-

ly transmitting the account number of the debit or credit account from that screen.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Users with only one RTGS DCA without a sub-account

Even if a user is set up under a party BIC that holds only one RTGS DCA without a sub-account and chooses the 'RTGS Cash Account Liquidity – Query Screen' from the menu, the user has to enter the account information of the account manually.

6.2.2 Display sub-account liquidity

Context of Usage

This use case describes how to display the aggregated liquidity of all RTGS sub-accounts linked to a specific RTGS DCA.

Furthermore, this use case describes how to display the liquidity of an individual sub-account contributing to the aggregated liquidity.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryAccBal

References

Further information on screens involved can be found in the screen reference part:

- I [RTGS Cash Account Liquidity – Query Screen](#) [▶ 424]
- I [RTGS Cash Account Liquidity – Display Screen](#) [▶ 426]
- I [RTGS Sub-Account Liquidity – Display Screen](#) [▶ 435]
- I [Liquidity Transfer – New Screen](#) [▶ 456]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity' and click on the sub-menu entry 'Query RTGS Cash Account Liquidity', in order to display the aggregated liquidity of all linked sub-accounts.
3. Enter the account number or the account BIC of the RTGS DCA.
4. Click on the 'Submit' button.
 - ⇒ The 'RTGS Cash Account Liquidity – Display Screen' opens, displaying the liquidity of the RTGS DCA. The row 'Total Sub-Account Liquidity' in the section 'Total Liquidity' indicates the aggregated liquidity of all linked sub-accounts. The section

‘Sub-Account(s)’ lists all sub-accounts linked to the RTGS DCA. It also shows the balance of each individual sub-account.

5. In order to display liquidity information of an individual sub-account, right-click on the list entry corresponding to the respective account and select the context menu entry ‘Display Current Liquidity’.
 - ➔ The ‘RTGS Sub-Account Liquidity – Display Screen’ opens. The starting balance, current balance and a liquidity projection of the respective sub-account are displayed.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section ‘Search Criteria’ can be opened for editing by clicking on the open button in the top left of the screen.

Directly displaying the liquidity of a sub-account

In order to directly display the liquidity of an individual sub-account, enter the account number of the respective sub-account on the ‘RTGS Cash Account Liquidity – Query Screen’. This opens the ‘RTGS Sub-Account Liquidity – Display Screen’.

Initiating a liquidity transfer from a sub-account

In order to initiate a liquidity transfer from a sub-account, click on the button ‘New Liquidity Transfer Order’ on the ‘RTGS Sub-Account Liquidity – Display Screen’ or the context menu entry ‘New Liquidity Transfer Order’ on the RTGS Cash Account Liquidity – Display Screen’. This opens the ‘Liquidity Transfer – New Screen’ while directly transmitting the account number of the respective sub-account (required privilege: RTGS_InilmLiquiTransSubAcc).

6.2.3 Enter current liquidity transfer order

Context of Usage

This use case describes how to enter a liquidity transfer order that can either be intra-service or inter-service.

RTGS only allows the creation of a current liquidity transfer order. A standing order liquidity transfer can be created in CRDM.

This use case also describes how to display the amount of liquidity available on the debit or credit cash account respectively.

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_InilmLiquiTrans / RTGS_InilmLiquiTransSubAcc

References Further information on screens involved can be found in the screen reference part:

- I [Liquidity Transfer – New Screen](#) [▶ 456]
- I [RTGS Cash Account Liquidity – Display Screen](#) [▶ 426]
- I [RTGS Sub-Account Liquidity – Display Screen](#) [▶ 435]

Instructions

1. Click on the menu button.
2. Select the main menu entry ‘Liquidity’ and click on the sub-menu entry ‘New Liquidity Transfer’.
3. Enter the account number of the credit account and the debit account respectively.
4. Optionally, click on the button ‘Display Liquidity’ for the debit or credit account in order to display the amount of liquidity available for the respective account. This function is only available if the user has the rights to see the liquidity on the account (required privilege: RTGS_QueryAccBal).
 - ⇒ The ‘RTGS Cash Account Liquidity – Display Screen’ opens to query and show the liquidity of the corresponding account.
5. Enter the amount that is to be transferred and provide an end-to-end identification for the liquidity transfer order.
6. Click on the ‘Submit’ button and enter the PIN for digital signature purposes (NRO).
 - ➔ The notification area shows whether the submission of the data has been completed.

Alternative navigation

The ‘Liquidity Transfer – New Screen’ can also be reached via opening the ‘RTGS Cash Account Liquidity – Display Screen’ or the ‘RTGS Sub-Account Liquidity – Display Screen’ and clicking on the button ‘New Liquidity Transfer’, directly transmitting the account number of the respective account.

Liquidity of a sub-account

If the liquidity transfer order involves a sub-account, the ‘RTGS Sub-Account Liquidity – Display Screen’ opens after clicking on the button ‘Display Liquidity’.

6.3 Liquidity Management Features

6.3.1 Query limits

Context of Usage

This use case describes how to query limits in RTGS.

The bilateral and the related multilateral limits are displayed on separate screens. Since the steps to query a bilateral or a multilateral limit are identical this use case covers both options.

This use case provides the basis for the execution of the following use cases:

- I [Display limit](#) [▶ 691]
- I [Modify current bilateral limit](#) [▶ 693]
- I [Modify current multilateral limit](#) [▶ 694]

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryCurLimit

References

Further information on screens involved can be found in the screen reference part:

- I [Bilateral Limits – Query Screen](#) [▶ 464]
- I [Bilateral Limits – List Screen](#) [▶ 467]
- I [Multilateral Limits – Query Screen](#) [▶ 473]
- I [Multilateral Limits – List Screen](#) [▶ 477]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity Management Features' and click on the sub-menu entry 'Query Bilateral Limits' or 'Query Multilateral Limits'.
3. Enter the relevant attribute values of the respective limits that are to be displayed.
4. Optionally, specify the sorting criterion and the sorting order of the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ➔ The 'Bilateral Limits – List Screen' or the 'Multilateral Limits – List Screen' opens. The respective list shows all limits matching the entered criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.3.2 Display limit

Context of Usage

This use case describes how to display the details of a limit in RTGS.

The bilateral and the related multilateral limits are displayed on separate screens. Since the steps to display a bilateral or a multilateral limit are identical this use case covers both options.

Privileges To carry out this use case, the following privilege is needed:

- I RTGS_QueryCurLimit

References Further information on screens involved can be found in the screen reference part:

- I [Bilateral Limits – Details Screen](#) [▶ 471]
- I [Multilateral Limits – Details Screen](#) [▶ 480]

Instructions

1. Complete the use case for [Query Limits](#) [▶ 690].
2. In order to view details of a specific bilateral or multilateral limit, right-click on the limit and select the context menu entry 'Details'.
 - The 'Bilateral Limits – Details Screen' or the 'Multilateral Limits – Details Screen' opens. Detailed information with regard to the selected limit as well as lists of queued credits and queued debits which will affect the limit are displayed.

6.3.3 Query reservations

Context of Usage This use case describes how to query reservations of a specific RTGS DCA.

Querying reservations allows the user to see the amount of reserved liquidity which is currently available for certain payments.

Privileges To carry out this use case, the following privilege is needed:

- I RTGS_QueryCurReservation

References Further information on screens involved can be found in the screen reference part:

- I [Reservations – Query Screen](#) [▶ 482]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity Management Features' and click on the sub-menu entry 'Query Reservations'.
3. Enter the account number or the account BIC of the account whose reservations are to be displayed.
4. Click on the 'Submit' button.
 - The query is performed with the entered search criteria.

6.3.4 Display reservations

Context of Usage This use case describes how to display reservations of a specific RTGS DCA.

This use case provides the basis for the execution of the following use cases:

I [Enter current reservation](#) [▶ 696]

I [Modify current reservation](#) [▶ 697]

Privileges

To carry out this use case, the following privilege is needed:

I RTGS_QueryCurReservation

References

Further information on screens involved can be found in the screen reference part:

I [Reservations – Query Screen](#) [▶ 482]

I [Reservations – Display Screen](#) [▶ 485]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity Management Features' and click on the sub-menu entry 'Query Reservations'.
3. Enter the account number or the account BIC of the account whose reservations are to be displayed.
4. Click on the 'Submit' button.
 - The 'Reservations – Display Screen' opens. The current reservations for payments with the priorities 'urgent' and 'high' are displayed. The field 'New Reservation Amount' of the respective reservation offers the possibility to modify the current reservation or to enter a current reservation.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.3.5 Modify current bilateral limit

Context of Usage

This use case describes how to modify a bilateral limit with immediate effect. A bilateral limit can be increased, decreased or set to zero. A modified bilateral limit is only valid for the current business day.

The amount of the bilateral limit is defined by a corresponding standing order and is updated at the beginning of each business day. Modifying a standing order is only possible in CRDM. Modifications done in RTGS are only valid for the current business day.

Privileges

To carry out this use case, the following privilege is needed:

I RTGS_ModifyCurLimit

References

Further information on screens involved can be found in the screen reference part:

I [Bilateral Limits – List Screen](#) [▶ 467]

Instructions

1. Complete the bilateral limit option of the use case for [Query limits](#) [▶ 690].
2. Enter an amount that is supposed be the new bilateral limit in the field ‘New Value’ of the respective list entry. The entered amount can be higher than the defined bilateral limit in order to increase the limit or lower than the defined bilateral limit in order to decrease the limit. The new value has to be at least 1 M (for EUR and DKK). The entered amount can also be ‘0.00’ in order to set the defined bilateral limit to zero.
3. Click on the ‘Submit’ button.
 - ⇒ A confirmation pop-up opens displaying the information ‘Changes done in RTGS are only valid for today’.
4. Click on the ‘Ok’ button and enter the PIN for digital signature purposes (NRO).
 - ➔ The user returns to the ‘Bilateral Limits – List Screen’. The notification area shows whether the submission of the data has been completed. As soon as the related task is processed successfully the respective bilateral limit is updated immediately.

Increasing a deleted bilateral limit

Once a bilateral limit is set to zero it is not possible to increase it again on the same business day.

6.3.6 Modify current multilateral limit

Context of Usage

This use case describes how to modify a multilateral limit with immediate effect. A multilateral limit can be increased, decreased or set to zero. A modified multilateral limit is only valid for the current business day.

The amount of the multilateral limit is defined by a corresponding standing order and is updated at the beginning of each business day. Modifying a standing order is only possible in CRDM. Modifications done in RTGS are only valid for the current business day.

Privileges

To carry out this use case, the following privilege is needed:

- | RTGS_ModifyCurLimit

References

Further information on screens involved can be found in the screen reference part:

- | [Multilateral Limits – List Screen](#) [▶ 477]

Instructions

1. Complete the multilateral limit option of the use case for [Query limits](#) [▶ 690].
2. Enter an amount that is supposed be the new multilateral limit in the field ‘New Value’ of the respective list entry. The entered amount can be higher than the defined multilateral limit in order to increase the limit or lower than the defined multilateral limit in

order to decrease the limit. The new value has to be at least 1 M (for EUR).
The entered amount can also be '0.00' in order to set the defined multilateral limit to zero.

3. Click on the 'Submit' button.

⇒ A confirmation pop-up opens displaying the information 'Changes done in RTGS are only valid for today'.

4. Click on the 'Ok' button and enter the PIN for digital signature purposes (NRO).

➔ The user returns to the 'Multilateral Limits – List Screen'. The notification area shows whether the submission of the data has been completed. As soon as the related task is processed successfully the respective multilateral limit is updated immediately.

Increasing a deleted multilateral limit

Once a multilateral limit is set to zero it is not possible to increase it again on the same business day.

6.3.7 Set limits to zero

Context of Usage

This use case describes how to set all bilateral limits and the respective multilateral limits to zero via bulk reset with immediate effect. The reset is valid for the current business day.

The amounts of the bilateral and multilateral limit are defined by a corresponding standing order and are updated at the beginning of each business day. Modifying a standing order is only possible in CRDM. Modifications done in RTGS are only valid for the current business day.

Privileges

To carry out this use case, the following privilege is needed:

| RTGS_ModifyCurLimit

References

Further information on screens involved can be found in the screen reference part:

| [Bilateral Limits – Query Screen](#) [▶ 464]

| [Bilateral Limits – List Screen](#) [▶ 467]

Instructions

1. Click on the menu button.

2. Select the main menu entry 'Liquidity Management Features' and click on the sub-menu entry 'Query Bilateral Limits'.

3. Enter the account number or the account BIC of the bilateral limits that are to be deleted.

4. Click on the 'Submit' button.

⇒ The 'Bilateral Limits – List Screen' opens. The list shows all bilateral limits matching the entered account number or the entered account BIC. The 'Set all Limits to Zero' button appears at the end of the list.

5. Click on the 'Set all Limits to Zero' button.

⇒ A confirmation pop-up opens, asking if the user wants to proceed.

6. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO).

➔ The user returns to the 'Bilateral Limits – List Screen'. The notification area shows whether the submission of the data has been completed. As soon as the related tasks are processed successfully, the bilateral limits and the corresponding multilateral limits are immediately set to zero for the current business day.

Increasing a deleted bilateral limit

Once a bilateral limit is set to zero it is not possible to increase it again on the same business day.

Increasing a deleted multilateral limit

Once a multilateral limit is set to zero it is not possible to increase it again on the same business day.

6.3.8 Enter current reservation

Context of Usage

This use case describes how to enter urgent and high reservations with immediate effect as a one-time reservation.

The entered reservation is only valid for the current business day.

The amount of the reservations is defined by a corresponding standing order and is updated at the beginning of each business day. Modifying a standing order is only possible in CRDM. Modifications done in RTGS are only valid for the current business day.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_ModifyCurReservation

References

Further information on screens involved can be found in the screen reference part:

- I [Reservations – Display Screen](#) [▶ 485]

Instructions

1. Complete the use case for [Display reservations](#) [▶ 692].
2. In order to enter an urgent reservation, use the section 'Urgent Reservation'. In order to enter a high reservation, use the section 'High Reservation'.

3. Enter an amount that is supposed to be the reservation amount in the field 'New Reservation Amount' of the respective section.
4. Click on the 'Submit' button.
 - ⇒ A confirmation pop-up opens displaying the information 'Changes done in RTGS are only valid for today'.
5. Click on the 'Ok' button and enter the PIN for digital signature purposes (NRO).
 - The user returns to the 'Reservations – Display Screen'. The notification area shows whether the submission of the data has been completed. As soon as the task is processed successfully the respective reservation is updated immediately.

6.3.9 Modify current reservation

Context of Usage

This use case describes how to modify a current reservation. A reservation can be increased, decreased or set to zero. A modified reservation is only valid for the current business day.

The amount of the reservations is defined by a corresponding standing order and is updated at the beginning of each business day. Modifying a standing order is only possible in CRDM. Modifications done in RTGS are only valid for the current business day.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_ModifyCurReservation

References

Further information on screens involved can be found in the screen reference part:

- I [Reservations – Display Screen](#) [▶ 485]

Instructions

1. Complete the use case for [Display reservations](#) [▶ 692].
2. In order to modify an urgent reservation, use the section 'Urgent Reservation'. In order to modify a high reservation, use the section 'High Reservation'.
3. Enter an amount that is supposed to be the new reservation amount in the field 'New Reservation Amount' of the respective section. The entered amount can be higher than the defined reservation amount in order to increase the reservation or lower than the defined reservation amount in order to decrease the reservation. The entered amount can also be '0.00' in order to set the reservation amount to zero.
4. Click on the 'Submit' button.
 - ⇒ A confirmation pop-up opens displaying the information 'Changes done in RTGS are only valid for today'.
5. Click on the 'Ok' button and enter the PIN for digital signature purposes (NRO).

- The user returns to the 'Reservations – Display Screen'. The notification area shows whether the submission of the data has been completed. As soon as the task is processed successfully the respective reservation is updated immediately.

6.4 Ancillary System

6.4.1 Display AS transfer order

Context of Usage	This use case describes how to query AS transfers and view detailed information on a specific AS transfer.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I RTGS_QueryCashTransDetails
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I Cash Transfers – Details Screen [▶ 127]
Instructions	<ol style="list-style-type: none">1. Complete the use case for Query/List cash transfers [▶ 665].2. In order to view details of a specific AS transfer, right-click on the AS transfer and select the context menu entry 'Details'.<ul style="list-style-type: none">➤ The 'Cash Transfers – Details Screen' opens. Detailed information with regard to the selected AS transfer is displayed.

6.4.2 Modify AS transfer order

Context of Usage	<p>This use case describes how to increase or decrease the queue position of AS transfer orders selected in the Cash Transfers – List Screen [▶ 109] or in the Cash Transfers – Details Screen [▶ 127].</p> <p>Reordering AS transfer orders is only possible for AS transfer orders with the settlement procedure 'E' and the status 'Queued'.</p> <p>This function is only available for the central bank of the debited settlement bank and the operator.</p>
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I RTGS_ModifyCasTraOrd
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I Cash Transfers – List Screen [▶ 109]
Instructions	<ol style="list-style-type: none">1. Complete the use case for Query/List cash transfers [▶ 665].2. Select one or more AS transfer order(s) that are to be reordered.

3. Right-click on the selected item(s) and select the context menu entry 'Increase' or 'Decrease' respectively.
 - ⇒ A confirmation pop-up opens showing details of the selected AS transfer order(s).
4. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the reordering of the AS transfer order(s).
 - ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

Reordering multiple AS transfer orders

If the queue position of more than one AS transfer order is increased or decreased, the original order of the selected items remains the same.

6.4.3 Query/List AS batches

Context of Usage

This use case describes how to query AS batches and view the result list based on the selected filter criteria.

AS batches can be queried by entering attribute values with regard to the relevant AS batches.

This use case provides the basis for the execution of the following use cases:

- I [AS batch processing log](#) [▶ 700]
- I [Modify end of settlement period](#) [▶ 705]
- I [Revoke AS batch](#) [▶ 711]

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryASBatches

References

Further information on screens involved can be found in the screen reference part:

- I [AS Batches – Query Screen](#) [▶ 490]
- I [AS Batches – List Screen](#) [▶ 497]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Ancillary System' and click on the sub-menu entry 'Query AS Batches'.
 - ⇒ The 'AS Batches – Query Screen' opens.
3. Enter the relevant attribute values of the AS batches that are to be displayed.
4. Optionally, specify the sorting criterion, the sorting order and the selection of columns for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Timestamp' in ascending order.

5. Click on the 'Submit' button.

- ➔ The 'AS Batches – List Screen' opens. The list shows all AS batches matching the entered search criteria.

Alternative navigation

The 'AS Batches – List Screen' can also be reached via context menu on screens that contain entries related to an AS batch by clicking on the context menu entry 'Display AS Batch' or 'Display AS Batches' respectively.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Values of the field 'AS Party BIC'

If an ancillary system user is associated with only one ancillary system, the field 'AS Party BIC' is pre-filled with the BIC of the logged in user and cannot be modified. As an ancillary system user that is associated with multiple ancillary systems or as a central bank user, the user can enter a specific AS Party BIC.

6.4.4 AS batch processing log

Context of Usage

This use case describes how to query the processing log of an AS batch selected in the [AS Batches – List Screen](#) [▶ 497], the [Cash Transfers – List Screen](#) [▶ 109] or the [Cash Transfers – Details Screen](#) [▶ 127].

A payment bank user can access the 'AS Batch Processing Log – Display Pop-up' only via the 'Cash Transfers – List Screen' or the 'Cash Transfers – Details Screen'.

This function is available for the ancillary system, the payment bank, the central bank or an operator. If the function is called by a payment bank user from the 'Cash Transfers – List Screen' or the 'Cash Transfers – Details Screen' then a reduced set of columns is shown in the [AS Batch Processing Log – Display – Pop-up](#) [▶ 505].

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_QueryASBatches
- I RTGS_QueryCashTrans
- I RTGS_QueryASBatchProLog

References

Further information on screens involved can be found in the screen reference part:

- I [AS Batches – Query Screen](#) [▶ 490]
- I [AS Batches – List Screen](#) [▶ 497]
- I [AS Batch Processing Log – Display – Pop-up](#) [▶ 505]
- I [Cash Transfers – List Screen](#) [▶ 109]
- I [Cash Transfers – Details Screen](#) [▶ 127]

Instructions

1. Click on the menu button.
2. Select the main menu entry ‘Ancillary System’ and click on the sub-menu entry ‘Query AS Batches’.
 - ⇒ The ‘AS Batches – Query Screen’ opens.
3. Enter the relevant attribute values of the AS batch whose batch processing log is to be displayed.
4. Optionally, specify the sorting criterion, the sorting order and the selection of columns for the result list in the section ‘Output Parameters’. If no output parameters are specified, the result list will be sorted by ‘Timestamp’ in ascending order.
5. Click on the ‘Submit’ button.
 - ⇒ The ‘AS Batches – List Screen’ opens. The list shows all AS batches matching the entered search criteria.
6. Right-click on the AS batch whose processing log is to be displayed and select the context menu entry ‘Display AS Batch Processing Log’.
 - ➔ The ‘AS Batch Processing Log – Display – Pop-up’ opens showing the details of the selected AS batch and the processing log of this AS batch.

Alternative navigation

The ‘AS Batch Processing Log – Display – Pop-up’ can also be reached via context menu on the ‘Cash Transfer – List Screen’ by clicking on the context menu entry ‘Display AS Batch Processing Log’.

6.4.5 Display liquidity on ancillary system level

Context of Usage

This use case describes how to display aggregated information on the liquidity of accounts linked to an ancillary system.

This function is only available for ancillary system users, central bank users and the operator.

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_QueryLiqofSuGuTeAcc
- I RTGS_QueryCashTrans

I RTGS_QueryCashTransDetails

References

Further information on screens involved can be found in the screen reference part:

I [AS Liquidity Overview – Query Screen](#) [▶ 518]

I [AS Liquidity Overview – Display Screen](#) [▶ 521]

Instructions

1. Click on the menu button.
2. Select the main menu entry ‘Ancillary System’ and click on the sub-menu entry ‘AS Liquidity Overview – Query Screen’.
 - ⇒ The ‘AS Liquidity Overview – Query Screen’ opens.
3. Enter the relevant attribute values of the AS whose information on the linked accounts is to be displayed.
4. Optionally, specify the sorting criterion and the sorting order for the result lists in the section ‘Output Parameters’. If no output parameters are specified, the result lists will be sorted by ‘AS Party BIC’ in descending order.
5. Click on the ‘Submit’ button.
 - ➔ The ‘AS Liquidity Overview – Display Screen’ opens. Information on starting and current balance, settled cash transfers and projected balances for different types of accounts that are linked to the selected AS is displayed.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section ‘Search Criteria’ can be opened for editing by clicking on the open button in the top left of the screen.

Values of the field ‘AS Party BIC’

If an ancillary system user is associated with only one ancillary system, the field ‘AS Party BIC’ is pre-filled with the BIC of the logged in user and cannot be modified. As an ancillary system user that is associated with multiple ancillary systems or as a central bank user, the user can enter a specific AS Party BIC.

6.4.6 Display AS batch liquidity summary for guarantee mechanism

Context of Usage

This use case describes how to display a liquidity summary for every settlement procedure of an AS per guarantee funds account.

This function is only available for ancillary system users, central bank users and the operator.

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_QueryLiqofSuGuTeAcc
- I RTGS_QueryCashTrans
- I RTGS_QueryCashTransDetails

References

Further information on screens involved can be found in the screen reference part:

- I [AS Batch Liquidity Summary for Guarantee Fund Mechanism – Query Screen](#)
[▶ 534]
- I [AS Batch Liquidity Summary for Guarantee Fund Mechanism – Display Screen](#)
[▶ 536]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Ancillary System' and click on the sub-menu entry 'AS Batch Liquidity Summary for Guarantee Fund Mechanism'.
 - ⇒ The 'AS Batch Liquidity Summary for Guarantee Fund Mechanism – Query Screen' opens.
3. Enter the relevant attribute values of the AS whose liquidity summary is to be displayed.
4. Optionally, specify the sorting criterion and the sorting order for the result lists in the section 'Output Parameters'. If no output parameters are specified, the result lists will be sorted by 'AS Party BIC' in descending order.
5. Click on the 'Submit' button.
 - ➡ The 'AS Batch Liquidity Summary for Guarantee Fund Mechanism – Display Screen' opens. Information on queued AS transfer orders, information on the linked AS guarantee funds accounts and calculated liquidity gaps is displayed.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Values of the field 'AS Party BIC'

If an ancillary system user is associated with only one ancillary system, the field 'AS Party BIC' is pre-filled with the BIC of the logged in user and cannot be modified. As an ancillary system user that is associated with multiple ancillary systems or as a central bank user, the user can enter a specific AS Party BIC.

6.4.7 Display queued AS transfer orders by batch

Context of Usage This use case describes how to query information on queued AS transfer orders on the level of an AS batch.

This function is only available for ancillary systems, central bank users and the operator.

Privileges To carry out this use case, the following privileges are needed:

- I RTGS_QueryASBatches

References Further information on screens involved can be found in the screen reference part:

- I [Queued AS Transfer Orders by Batch – Query Screen](#) [▶ 528]
- I [Queued AS Transfer Orders by Batch – List Screen](#) [▶ 532]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Ancillary System' and click on the sub-menu entry 'Query Queued AS Transfer Orders by Batch'.
 - ⇒ The 'Queued AS Transfer Orders by Batch – Query Screen' opens.
3. Enter the relevant attribute values of the AS batches whose information on queued AS transfer orders is to be displayed.
4. Optionally, specify the sorting criterion and the sorting order for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'AS Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ➡ The 'Queued AS Transfer Orders by Batch – List Screen' opens. The list shows information on queued AS transfer orders on the level of single AS batches.

Alternative navigation

The 'Queued AS Transfer Orders by Batch – List Screen' can also be reached via opening the 'AS batch liquidity summary for guarantee mechanism – List Screen' and selecting the context menu entry 'Display Queued AS Transfer Orders by Batch'.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Values of the field 'AS Party BIC'

If an ancillary system user is associated with only one ancillary system, the field 'AS Party BIC' is pre-filled with the BIC of the logged in user and cannot be modified. As an ancillary system user that is associated with multiple ancillary systems or as a central bank user, the user can enter a specific AS Party BIC.

6.4.8 Modify end of settlement period

Context of Usage	<p>This use case describes how to change the end of settlement period of an AS batch selected in the AS Batches – List Screen [▶ 497].</p> <p>This function is only available for the ancillary system, the central bank or an operator.</p>
Privileges	<p>To carry out this use case, the following privilege is needed:</p> <ul style="list-style-type: none">I RTGS_ModifyEoSPeriodASBatch
References	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none">I AS Batches – List Screen [▶ 497]I Change End of Settlement Period – Pop-up [▶ 507]
Instructions	<ol style="list-style-type: none">1. Complete the use case for Query/List AS batches [▶ 699].2. Right-click on the AS batch whose end of settlement period is to be modified and select the context menu entry 'Change End of Settlement Period'.<ul style="list-style-type: none">⇒ The 'AS batches – Change End of Settlement Period – Pop-up' opens displaying information with regard to the selected AS batch.3. Fill in the field 'New End of Settlement Period' by entering a timestamp manually or by clicking on the calendar button. The new end of settlement period must be later than the start of settlement period. The new end of settlement period cannot be earlier than the current system time.4. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).<ul style="list-style-type: none">➤ The user returns to the 'AS Batches – List Screen'. The notification area shows whether the submission of the data has been completed.

6.4.9 Start/stop cycle/procedure

This use case includes functions for stopping and starting an AS settlement procedure and for starting and stopping an AS cycle.

Detailed information on these functions can be found in the following chapters:

- I [Stop procedure](#) [▶ 706]
- I [Start optional procedure](#) [▶ 707]
- I [Start cycle](#) [▶ 708]

I [Stop cycle](#) [▶ 709]

6.4.9.1 Stop procedure

Context of

This use case describes how to stop an AS settlement procedure.

Usage

The stopping of a procedure is only available for AS settlement procedure C and if a mandatory or optional procedure is open.

The stopping of a procedure is not possible if a cycle is already open for this AS.

In case of cross-AS transfers this function is not available for the counterparty AS.

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_QueryASProcCyc
- I RTGS_ASProCS-SoPEoProc

References

Further information on screens involved can be found in the screen reference part:

- I [AS Procedures and Cycles – Query Screen](#) [▶ 508]
- I [AS Procedures and Cycles – List Screen](#) [▶ 512]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Ancillary System' and click on the sub-menu entry 'Query AS Procedures and Cycles'.
 - ⇒ The 'AS Procedures and Cycles – Query Screen' opens.
3. Enter the relevant attribute values of the ancillary systems and AS settlement procedures for which an AS settlement procedure is to be stopped.
4. Optionally, specify the sorting criterion and the sorting order for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'AS Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ⇒ The 'AS Procedures and Cycles – List Screen' opens. The list shows all AS procedures and cycles matching the entered search criteria.
6. Right-click on an item for which the procedure is to be stopped and select the context menu entry 'Stop Procedure'.
 - ⇒ A confirmation pop-up opens showing details of the cycles and procedures of the respective AS.
7. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The user returns to the 'AS Procedures and Cycles – List Screen'. The notification area shows whether the submission of the data has been completed.

Values of the field 'AS Party BIC'

If an ancillary system user is associated with only one ancillary system, the field 'AS Party BIC' is pre-filled with the BIC of the logged in user and cannot be modified. As an ancillary system user that is associated with multiple ancillary systems or as a central bank user, the user can enter a specific AS Party BIC.

6.4.9.2 Start optional procedure

Context of Usage	<p>This use case describes how to start an optional AS settlement procedure.</p> <p>The starting of an optional procedure is only available for AS settlement procedure C and if no mandatory or optional procedure is open for this AS.</p> <p>In case of cross-AS transfers this function is not available for the counterparty AS.</p>
Privileges	<p>To carry out this use case, the following privileges are needed:</p> <ul style="list-style-type: none">I RTGS_QueryASProcCycI RTGS_ASProCS-SoPEoProc
References	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none">I AS Procedures and Cycles – Query Screen [▶ 508]I AS Procedures and Cycles – List Screen [▶ 512]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.2. Select the main menu entry 'Ancillary System' and click on the sub-menu entry 'Query AS Procedures and Cycles'.<ul style="list-style-type: none">⇒ The 'AS Procedures and Cycles – Query Screen' opens.3. Enter the relevant attribute values of the ancillary systems and AS settlement procedures for which an optional AS settlement procedure is to be started.4. Optionally, specify the sorting criterion and the sorting order for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'AS Party BIC' in ascending order.5. Click on the 'Submit' button.<ul style="list-style-type: none">⇒ The 'AS Procedures and Cycles – List Screen' opens. The list shows all AS procedures and cycles matching the entered search criteria.6. Right-click on an item for which the optional procedure is to be started and select the context menu entry 'Start Optional Procedure'.<ul style="list-style-type: none">⇒ A confirmation pop-up opens showing details of the cycles and procedures of the respective AS.7. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO).

- ➔ The user returns to the 'AS Procedures and Cycles – List Screen'. The notification area shows whether the submission of the data has been completed.

Values of the field 'AS Party BIC'

If an ancillary system user is associated with only one ancillary system, the field 'AS Party BIC' is pre-filled with the BIC of the logged in user and cannot be modified. As an ancillary system user that is associated with multiple ancillary systems or as a central bank user, the user can enter a specific AS Party BIC.

6.4.9.3 Start cycle

Context of Usage

This use case describes how to start an AS settlement cycle.

The starting of a cycle is only available for AS settlement procedure C and if the relevant procedure is open and the cycle is closed for this AS.

In case of cross-AS transfers this function is not available for the counterparty AS.

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_QueryASProcCyc
- I RTGS_ASProC-SoCEoCycle

References

Further information on screens involved can be found in the screen reference part:

- I [AS Procedures and Cycles – Query Screen](#) [▶ 508]
- I [AS Procedures and Cycles – List Screen](#) [▶ 512]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Ancillary System' and click on the sub-menu entry 'Query AS Procedures and Cycles'.
 - ⇒ The 'AS Procedures and Cycles – Query Screen' opens.
3. Enter the relevant attribute values of the ancillary systems and AS settlement procedures for which an AS settlement cycle is to be started.
4. Optionally, specify the sorting criterion and the sorting order for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'AS Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ⇒ The 'AS Procedures and Cycles – List Screen' opens. The list shows all AS procedures and cycles matching the entered search criteria.
6. Right-click on an item for which the cycle is to be started and select the context menu entry 'Start Cycle'.

⇒ A confirmation pop-up opens showing details of the cycles and procedures of the respective AS.

7. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO).

➔ The user returns to the 'AS Procedures and Cycles – List Screen'. The notification area shows whether the submission of the data has been completed.

Values of the field 'AS Party BIC'

If an ancillary system user is associated with only one ancillary system, the field 'AS Party BIC' is pre-filled with the BIC of the logged in user and cannot be modified. As an ancillary system user that is associated with multiple ancillary systems or as a central bank user, the user can enter a specific AS Party BIC.

6.4.9.4 Stop cycle

Context of Usage

This use case describes how to stop an AS settlement cycle.

The stopping of a cycle is only available for AS settlement procedure C and if a cycle is open for the relevant procedure of this AS.

In case of cross-AS transfers this function is not available for the counterparty AS.

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_QueryASProcCyc
- I RTGS_ASProC-SoCEoCycle

References

Further information on screens involved can be found in the screen reference part:

- I [AS Procedures and Cycles – Query Screen](#) [▶ 508]
- I [AS Procedures and Cycles – List Screen](#) [▶ 512]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Ancillary System' and click on the sub-menu entry 'Query AS Procedures and Cycles'.
 - ⇒ The 'AS Procedures and Cycles – Query Screen' opens.
3. Enter the relevant attribute values of the ancillary systems and AS settlement procedures for which an AS settlement cycle is to be stopped.
4. Optionally, specify the sorting criterion and the sorting order for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'AS Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ⇒ The 'AS Procedures and Cycles – List Screen' opens. The list shows all AS procedures and cycles matching the entered search criteria.

6. Right-click on an item for which the cycle is to be stopped and select the context menu entry 'Stop Cycle'.
 - ⇒ A confirmation pop-up opens showing details of the cycles and procedures of the respective AS.
7. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The user returns to the 'AS Procedures and Cycles – List Screen'. The notification area shows whether the submission of the data has been completed.

Values of the field 'AS Party BIC'

If an ancillary system user is associated with only one ancillary system, the field 'AS Party BIC' is pre-filled with the BIC of the logged in user and cannot be modified. As an ancillary system user that is associated with multiple ancillary systems or as a central bank user, the user can enter a specific AS Party BIC.

6.4.10 Revoke AS transfer order

Context of Usage

This use case describes how to revoke AS transfer orders selected in the [Cash Transfers – List Screen](#) [▶ 109] or in the [Cash Transfers – Details Screen](#) [▶ 127].

Revoking AS transfer orders is only possible for AS transfer orders with AS settlement procedure 'E' and status 'Earmarked' or 'Queued'.

This function is only available for the AS, the central bank of the AS and the operator.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_RevPaymentOrder

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 109]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 665].
2. Select one or more AS transfer order(s) that are to be revoked.
3. Right-click on the selected item(s) and select the context menu entry 'Revoke'.
 - ⇒ A confirmation pop-up opens showing details of the selected AS transfer order(s).
4. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the revocation of the AS transfer order(s).
 - ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

Revocation of AS transfer orders

This use case describes the revocation of AS transfer orders only. For the revocation of AS batches refer to the use case [Revoke AS batch](#) [▶ 711].

6.4.11 Revoke AS batch

Context of Usage	<p>This use case describes how to revoke an AS batch.</p> <p>Revoking AS batches is only possible for AS batches with AS settlements procedure 'A' or 'B'.</p> <p>AS batches with the status 'Rejected at Group Level' or 'Accounting Processed' cannot be revoked.</p> <p>Only the initiating AS, the responsible central bank of the initiating AS and the operator are allowed to revoke batches.</p>
Privileges	<p>To carry out this use case, the following privilege is needed:</p> <ul style="list-style-type: none">RTGS_RevokeASBatch
References	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none">AS Batches – Query Screen [▶ 490]AS Batches – List Screen [▶ 497]
Instructions	<ol style="list-style-type: none">Complete the use case for Query/List AS batches [▶ 699].Right-click on the AS batch that is to be revoked and select the context menu entry 'Revoke'.<ul style="list-style-type: none">⇒ A confirmation pop-up opens showing details of the selected AS batch.Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the revocation of the AS batch.<ul style="list-style-type: none">➡ The user returns to the 'AS Batches – List Screen'. The notification area shows whether the submission of the data has been completed.

Revocation of AS batches

This use case describes the revocation of AS batches only. For the revocation of AS transfer orders refer to the use case [Revoke AS transfer order](#) [▶ 710].

6.4.12 Release AS batch / AS transfer order of blocked party

Context of Usage	<p>This use case includes functions for releasing blocked AS batches and blocked AS transfer orders.</p> <p>Detailed information on these functions can be found in the following chapters:</p>
-------------------------	---

- I [Release AS batch of blocked party](#) [▶ 712]
- I [Release AS transfer order of blocked party](#) [▶ 712]

6.4.12.1 Release AS batch of blocked party

Context of Usage	<p>This use case describes how to release blocked AS batches.</p> <p>Releasing AS batches is only possible for AS batches with the 'AS Batch Status' 'Stopped due to Blocking'.</p> <p>This function is only available for the operator and the central bank of the excluded AS.</p>
Privileges	<p>To carry out this use case, the following privilege is needed:</p> <ul style="list-style-type: none">I RTGS_Ag/DisagCashTrans
References	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none">I AS Batches – Query Screen [▶ 490]I AS Batches – List Screen [▶ 497]
Instructions	<ol style="list-style-type: none">1. Complete the use case for Query/List AS batches [▶ 699].2. Right-click on the AS batch(es) that are to be released and select the context menu entry 'Agree'.<ul style="list-style-type: none">⇒ A confirmation pop-up opens showing details of the selected AS batch(es).3. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the release of the AS batch(es).<ul style="list-style-type: none">➔ A related task is created and the user returns to the 'AS Batches – List Screen'.

Disagreement on AS batches

In order to disagree on AS batches, complete this use case with context menu entry 'Disagree' in the third step.

Releasing AS transfer orders

This use case describes the agreement and disagreement on AS batches only. For the agreement and disagreement on AS transfer orders refer to the use case [Release AS transfer order of blocked party](#) [▶ 712].

6.4.12.2 Release AS transfer order of blocked party

Context of Usage	<p>This use case describes how to release blocked AS transfer orders.</p> <p>Releasing AS transfer orders is only possible for AS transfer orders which are earmarked due to the blocking of a party or an account.</p>
-------------------------	---

In case the AS of the AS transfer order is blocked the responsible central bank of the AS has the option to agree on the AS Batch via the use case [Release AS batch of blocked party](#) [▶ 712] for batches in all settlement procedures.

In case one of the settlement banks or the AS technical account is blocked, the central bank has to agree on every single AS transfer order.

This function is only available for the operator and the central bank of the excluded AS, the central bank of the excluded AS technical account and the central bank of the excluded settlement bank.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_Ag/DisagCashTrans

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – Query Screen](#) [▶ 87]
- I [Cash Transfers – List Screen](#) [▶ 109]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 665].
2. Right-click on the AS transfer order(s) that are to be released and select the context menu entry 'Agree'.
 - ⇒ A confirmation pop-up opens showing details of the selected AS transfer order(s).
3. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the release of the AS transfer order(s).
 - ➔ A related task is created and the user returns to the 'Cash Transfers – List Screen'.

**Disagreement on AS transfer orders**

In order to disagree on AS transfer orders, complete this use case with context menu entry 'Disagree' in the third step.

For the disagreement on AS transfer orders select the context menu entry 'Disagree'.

**Releasing AS batches**

This use case describes the agreement and disagreement on AS transfer orders only. For the agreement and disagreement on AS batches please refer to the use case [Release AS batch of blocked party](#) [▶ 712].

6.4.13 Display AS batch liquidity summary by settlement bank

Context of Usage

This use case describes how to display a liquidity summary for AS batches with a breakdown by settlement bank and queued and earmarked AS transfer orders.

This function is only available for ancillary system users, central bank users and the operator.

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_QueryLiqofSuGuTeAcc
- I RTGS_QueryCashTrans
- I RTGS_QueryCashTransDetails

References

Further information on screens involved can be found in the screen reference part:

- I [AS Batch Liquidity Summary by Settlement Bank – Query Screen](#) [▶ 538]
- I [AS Batch Liquidity Summary by Settlement Bank – Display Screen](#) [▶ 542]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Ancillary System' and click on the sub-menu entry 'Query AS Batch Liquidity Summary by Settlement Bank'.
 - ⇒ The 'AS Batch Liquidity Summary by Settlement Bank – Query Screen' opens.
3. Optionally, enter the relevant attribute values of the AS batches whose liquidity summary is to be displayed.
4. Optionally, specify the sorting criterion and the sorting order for the result lists in the section 'Output Parameters'. If no output parameters are specified, the result lists will be sorted by 'AS Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ➔ The 'AS Batch Liquidity Summary by Settlement Bank – Display Screen' opens. Information on the linked settlement banks and corresponding cash transfer orders is displayed.

**Alternative navigation**

The 'AS Batch Liquidity Summary by Settlement Bank – Display Screen' can also be reached via context menu on the 'AS Batch Liquidity Summary for Guarantee Fund Mechanism – Display Screen' by clicking on the context menu entry 'Display AS Batch Liquidity Summary by Settlement Bank'.

**Adjusting the search criteria**

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

**Values of the field 'AS Party BIC'**

If an ancillary system user is associated with only one ancillary system, the field 'AS Party BIC' is pre-filled with the BIC of the logged in user and cannot be modified. As an ancillary system user that is associated with multiple ancillary systems or as a central bank user, the user can enter a specific AS Party BIC.

6.4.14 Enter current liquidity transfer order to technical account – AS procedure D

Context of Usage	This use case describes how to enter a current liquidity transfer order from a RTGS DCA or a RTGS CB Account to an AS technical account.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I RTGS_LiquiAdjustment
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I Linked AS Technical Accounts Procedure D – Query Screen [▶ 545]I Linked AS Technical Accounts Procedure D – List Screen [▶ 548]I Liquidity Transfer to Technical Account Procedure D – New Screen [▶ 550]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.2. Select the main menu entry 'Ancillary System' and click on the sub-menu entry 'Query AS Technical Accounts Procedure D'.<ul style="list-style-type: none">⇒ The 'Linked AS Technical Accounts Procedure D – Query Screen' opens.3. Enter the relevant attribute values of the RTGS account whose linked AS technical accounts are to be displayed.4. Optionally, specify the sorting criterion and the sorting order for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Technical Account BIC' in ascending order.5. Click on the 'Submit' button.<ul style="list-style-type: none">⇒ The 'Linked AS Technical Accounts Procedure D – List Screen' opens. The list shows all AS technical accounts that are linked to the selected RTGS account.6. Right-click on the technical account to which the liquidity transfer order is to be initiated and select the context menu entry 'New Liquidity Transfer'.<ul style="list-style-type: none">⇒ The 'Liquidity Transfer to Technical Account Procedure D – New Screen' opens. The section 'Liquidity Transfer Account Information' is pre-filled with the RTGS DCA/RTGS CB Account information (instructing agent) and the technical account information (instructed agent) of the previously selected item.7. Enter the BIC of the debited settlement agent in the ancillary system and the BIC of the credited settlement agent respectively.

8. Optionally, enter an IBAN or another identification of the creditor account.
9. Enter the amount that is to be transferred and provide an end-to-end identification for the liquidity transfer order.
10. Optionally, fill in the 'Unstructured Remittance Information'.
11. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The notification area shows whether the submission of the data has been completed.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the list screen.

Alternative way to enter liquidity transfer order to AS technical account

It is also possible to enter a current liquidity transfer order to technical account – AS procedure D via the [Financial Institution Credit Transfer – New Screen](#) [▶ 302] by using the local instrument code 'SBTI'.

6.5 Reference Data

6.5.1 Query/List party reference data

Context of Usage

This use case describes how to query party reference data and view the result list based on the selected filter criteria.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryLocRefData

References

Further information on screens involved can be found in the screen reference part:

- I [Party Reference Data – Query Screen](#) [▶ 556]
- I [Party Reference Data – List Screen](#) [▶ 559]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Reference Data' and click on the sub-menu entry 'Query Party Reference Data'.
3. Enter the relevant attribute values of the parties whose reference data is to be displayed.

4. Optionally, specify the sorting criterion and the sorting order of the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - The [Party Reference Data – List Screen](#) [▶ 559] opens. The list shows the reference data of all parties matching the entered search criteria.

Smart-select function

The 'Party Reference Data – Query Screen' can also occur as a smart-select screen in order to search for cash accounts. By clicking on the smart-select button, the 'Party Reference Data – Query Screen' is opened as a pop-up.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Parties shown in the result list

Only those parties are shown that are within the data scope of the user.

6.5.2 Query/List cash account reference data

Context of Usage

This use case describes how to query cash account reference data and view the result list based on the selected filter criteria.

Starting from the queried reference data of a cash account, linked sub-accounts, linked RTGS DCAs and linked RTGS CB Accounts can be displayed.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryLocPartyCashAccRefData

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Account Reference Data – Query Screen](#) [▶ 575]
- I [Cash Account Reference Data – List Screen](#) [▶ 580]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Reference Data' and click on the sub-menu entry 'Query Cash Account Reference Data'.

3. Enter the relevant attribute values of the cash accounts whose reference data is to be displayed.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ➔ The [Cash Account Reference Data – List Screen](#) [▶ 580] opens. The list shows the reference data of all cash accounts matching the entered search criteria.

Smart-select function

The 'Cash Account Reference Data – Query Screen' can also occur as a smart-select screen in order to search for cash accounts. By clicking on the smart-select button, the 'Cash Account Reference Data – Query Screen' is opened as a pop-up.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

List RTGS DCA, RTGS CB Account or RTGS sub-accounts

The 'Cash Account Reference Data – List Screen' can be updated to show the linked RTGS sub-accounts for RTGS DCAs and RTGS CB Accounts or the linked RTGS DCAs and linked RTGS CB Accounts for RTGS sub-accounts. This can be achieved by clicking on the context menu entries 'Display Sub-Accounts' or 'Display RTGS Accounts' respectively. The context menu entries will only be displayed if the action is possible for the user and the listed cash account.

6.5.3 Query used amounts for direct debits

Context of Usage

This use case describes how to query direct debits of a specific RTGS DCA and view the result list based on the selected filter criteria.

The result list shows the direct debit information per counterparty and allows the user to retrieve information on the predefined amounts for direct debits for the current business day and per individual payment.

It also allows the user to retrieve information on the amount that has already been debited and the amount that is still available for the current business day.

Privileges

To carry out this use case, the following privilege is needed:

I RTGS_QueryListDirectDebit

References

Further information on screens involved can be found in the screen reference part:

I [Direct Debits – Query Screen](#) [▶ 569]

I [Direct Debits – List Screen](#) [▶ 573]

I [Cash Transfers – List Screen](#) [▶ 109]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Reference Data' and click on the sub-menu entry 'Query Direct Debits'.
3. Enter the account information of the RTGS DCA whose direct debits are to be displayed.
4. Optionally, select one or more counterparty BIC(s) in the section 'Counterparty Information' to restrict the result list to direct debits of specific counterparty(ies).
5. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Counterparty BIC' in ascending order.
6. Click on the 'Submit' button.
 - ▶ The 'Direct Debits – List Screen' opens. The list shows the direct debits of the account matching the entered search criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Pre-filled account information

If the user only has one single account, the field 'Account Number' is pre-filled with the account information of the current user.

Display cash transfer of direct debit

By right-clicking on a specific direct debit in the result list, the context menu entry 'Display Cash Transfer' can be selected. This opens the 'Cash Transfers – List Screen' showing the corresponding cash transfer(s) (required privilege: RTGS_CashTransQuery).

6.5.4 Query BIC

Context of Usage	This use case describes how to search for an account BIC when the user only knows parts of the account BIC or the respective financial institution name.
Privileges	To carry out this use case, there is no specific privilege needed.
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I BICs – Query Screen [▶ 583]I BICs – List Screen [▶ 586]
Instructions	<ol style="list-style-type: none">1. Click on the smart-select button for a field that requires the input of a BIC.<ul style="list-style-type: none">⇒ The 'BICs – Query Screen' opens as a pop-up.2. Enter the relevant attribute values of the BIC(s) which are to be queried.3. Optionally, specify the sorting criterion and the sorting order of the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Financial Institution Name' in ascending order.4. Click on the 'Submit' button.<ul style="list-style-type: none">⇒ The 'BICs – List Screen' opens. The list shows data of all BICs matching the entered search criteria.5. Select one or more entries in the list by clicking on the checkbox next to the respective entry.6. Click on the 'Select' Button.<ul style="list-style-type: none">➡ The field that requires the input of a BIC is filled with the selected account BIC(s).

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.5.5 Activate/deactivate access to exceptional payment entry

Context of Usage	This use case describes how to immediately activate/deactivate the possibility for an RTGS Account Holder to enter exceptional payment orders in a contingency situation. This function is only available for operators and central bank users.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I RTGS_ActDeactExcepCredTrans
References	Further information on screens involved can be found in the screen reference part:

I [Party Reference Data – Query Screen](#) [▶ 556]

I [Party Reference Data – List Screen](#) [▶ 559]

Instructions

1. Complete the use case for [Query/List party reference data](#) [▶ 716] while querying for related parties.
2. Right-click on the party for which the exceptional payment functionality is to be activated or deactivated. The current setting is shown in the column 'Exceptional Customer Credit Transfer Payments(pacs.008) Allowed' or 'Exceptional Financial Institution Credit Transfer Payments(pacs.009) Allowed' respectively.
3. Depending on the type of payment order that is to be entered and depending on whether the functionality is currently activated for the respective party, select one of the following context menu entries:
 - I 'Activate Exceptional Customer Credit Transfer'
 - I 'Deactivate Exceptional Customer Credit Transfer'
 - I 'Activate Exceptional Financial Institution Credit Transfer'
 - I 'Deactivate Exceptional Financial Institution Credit Transfer'
4. A confirmation pop-up opens showing details of the selected party and asking the user if he wants to proceed.
2. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to activate/deactivate the exceptional payment functionality.
 - ➔ A related task is created and the user returns to the 'Party Reference Data – List Screen'.

Verification of functionality

During the initial start of the application, it is one-time verified if the exceptional payment functionality is currently allowed. In case the status is changed in the meantime, the application has to be reloaded.

Activation of functionality

The activation of this functionality is only possible if the respective party is not a U2A only party.

Availability of context menu entries

The context menu entry 'Activate Exceptional Customer Credit Transfer' is only available if the column 'Exceptional Customer Credit Transfer Payments(pacs.008) Allowed' is filled with 'No' and if the service party type is 'RTGS Account Holder'.

The context menu entry 'Deactivate Exceptional Customer Credit Transfer' is only available if the column 'Exceptional Customer Credit Transfer Payments(pacs.008) Allowed' is filled with 'Yes' and if the service party type is 'RTGS Account Holder'.

The context menu entry 'Activate Exceptional Financial Institution Credit Transfer' is only available if the column 'Exceptional Financial Institution Credit Transfer Payments(pacs.009) Allowed' is filled with 'No' and if the service party type is 'RTGS Account Holder'.

The context menu entry 'Deactivate Exceptional Financial Institution Credit Transfer' is only available if the column 'Exceptional Financial Institution Credit Transfer Payments(pacs.009) Allowed' is filled with 'Yes' and if the service party type is 'RTGS Account Holder'.

6.5.6 Activate/deactivate value day check

Context of Usage	<p>This use case describes how to activate/deactivate the value day check for payment banks using exceptional payments in a contingency situation.</p> <p>This function is only available for operators and central bank users.</p>
Privileges	<p>To carry out this use case, the following privilege is needed:</p> <ul style="list-style-type: none"> RTGS_ActDeactValueDate
References	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> Party Reference Data – Query Screen [▶ 556] Party Reference Data – List Screen [▶ 559]
Instructions	<ol style="list-style-type: none"> 1. Complete the use case for Query/List party reference data [▶ 716] while querying for related parties. 2. Right-click on the party for which the value day check is to be activated or deactivated and select the context menu entry 'Activate Value Date Check' or 'Deactivate Value Date Check' respectively. The current setting is shown in the column 'Value Date Check Deactivated' <ul style="list-style-type: none"> ⇒ A confirmation pop-up opens showing details of the selected party and asking the user if he wants to proceed. 3. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to activate/deactivate the value day check. <ul style="list-style-type: none"> ➔ A related task is created and the user returns to the 'Party Reference Data – List Screen'.

Restriction of functionality

The activation of this functionality is only possible if the respective party is not a U2A only party.

Availability of context menu entries

The context menu entry 'Activate Value Date Check' is only available if the column 'Value Date Check Deactivated' is filled with 'Yes' and if the service party type is 'RTGS Account Holder'.

The context menu entry 'Deactivate Value Date Check' is only available if the column 'Value Date Check Deactivated' is filled with 'No' and if the service party type is 'RTGS Account Holder'.

6.6 Administration

6.6.1 Query task queue

Context of Usage

This use case describes how to query tasks and view the result list of tasks based on the selected filter criteria.

This use case provides the basis for the execution of the following use cases:

- I [Confirmation/Withdrawal of 4-eyes task entries](#) [▶ 724]
- I [Modify 4 eyes tasks](#) [▶ 725]

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_QueryTaskQueue
- I RTGS_QueryTaskQueueDetail

References

Further information on screens involved can be found in the screen reference part:

- I [Task Queue – Query Screen](#) [▶ 587]
- I [Task Queue – List Screen](#) [▶ 592]
- I [Task Queue – Details Screen](#) [▶ 593]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Administration' and click on the sub-menu entry 'Query Task Queue'.
3. Enter the relevant attribute values of the respective task to be displayed.
4. Optionally, specify the sorting criterion and the sorting order of the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Entry Timestamp' in descending order.

5. Click on the 'Submit' button.
 - ⇒ The 'Task Queue – List Screen' opens. The list shows all tasks matching the entered criteria.
6. Right-click on a task and select the context menu entry 'Details'.
 - ➔ The 'Task Queue – Details Screen' opens. Detailed information with regard to the selected task is displayed.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the list screen.

6.6.2 Confirmation/Withdrawal of 4-eyes task entries

Context of Usage	This use case describes how to confirm or withdraw task entries in 4-eyes mode. The confirmation/withdrawal of a task entry is only possible if the corresponding task has the status 'To Confirm'. <u>For a confirmation, the second user must be different from the first user. The initial and second user is able to withdraw and edit the corresponding task.</u> {CR-143}
Privileges	To carry out this use case various privileges can be required, depending on the affected task type. The required privileges are linked to the corresponding screens and the selected 'Task Type' in the 'Task Queue – List Screen'.
References	Further information on screens and required privileges involved can be found in the screen reference part: <ul style="list-style-type: none">I Reservations – Display Screen [▶ 485]I Multilateral Limits – Details Screen [▶ 480]I Bilateral Limits – Details Screen [▶ 471]I Cash Transfers – Details Screen [▶ 127]I Messages – Details Screen [▶ 167]I Task Queue – Details Screen [▶ 593]
Instructions	<ol style="list-style-type: none">1. Complete the use case for Query task queue [▶ 723].2. In order to confirm the corresponding task, click on the 'Confirm' button. In order to withdraw the corresponding task, click on the 'Withdraw' button.<ul style="list-style-type: none">⇒ A confirmation pop-up opens displaying the information 'Confirm/Withdraw the Task with ID : #####'.3. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO).

- ➔ The notification area displays the confirmation/withdrawal with the information 'Task ##### successfully confirmed/withdrawn'. The status of the 'Corresponding Task' changes to 'Confirmed'/'Withdrawn'.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the list screen.

Task ID

The placeholder '#####' used within the instructions stands for a variable task ID that is shown.

6.6.3 Modify 4 eyes tasks

Context of Usage

This use case describes how to modify task entries in 4-eyes mode. The modification of a task entry is only possible if the corresponding task has been created by an initial user and if the corresponding task has the status 'To Confirm'.

In case of a modification, technically the original task is withdrawn and a new task with the modified values is created.

Privileges

To carry out this use case, the following privileges are needed:

- I RTGS_QueryTaskQueue
- I RTGS_QueryTaskQueueDetail

In order to edit a certain task, the user additionally needs the privilege corresponding to the task type that is to be modified.

References

Further information on screens involved can be found in the screen reference part:

- I [Task Queue – Query Screen](#) [▶ 587]
- I [Task Queue – List Screen](#) [▶ 592]
- I [Task Queue – Details Screen](#) [▶ 593]

Instructions

1. Complete the use case for [Query task queue](#) [▶ 723] while selecting a task that is to be modified.
2. In order to modify the corresponding task, click on the 'Edit' button.
 - ⇒ A confirmation pop-up opens displaying the information 'Withdraw the Task with ID : ##### to create a new task'.
3. Click on the 'Yes' button.

⇒ The original task is withdrawn and the screen corresponding to the task that is to be modified is opened as a pop-up. The fields of this screen are pre-filled with the values of the original task.

4. Change the values of the original task that is to be modified.

5. Click on the relevant button that the screen corresponding to the task offers in order to submit the modification and enter the PIN for digital signature purposes (NRO).

⇒ The user returns to the 'Task Queue – Details Screen'. The notification area shows whether the submission of the data has been completed.

Task ID

The placeholder '#####' used within the instructions stands for a variable task ID that is shown.

'Edit' button

The screen description of the 'Task Queue – Details Screen' lists which screen will be shown as a pop-up depending on the task type after clicking on the 'Edit' button.

6.6.4 Query broadcasts

Context of Usage

This use case describes how to query sent or received operations-related and system-triggered broadcasts.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryBroadcast

References

Further information on screens involved can be found in the screen reference part:

- I [Broadcasts – Query Screen](#) [▶ 602]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Administration' and click on the sub-menu entry 'Query Broadcasts'.
3. Enter the relevant attribute values of the respective broadcasts that are to be displayed.
4. Click on the 'Submit' Button.
 - ➡ The query is performed with the entered search criteria.

6.6.5 Display broadcast

Context of Usage This use case describes how to query sent or received operations-related and system-triggered broadcasts and view detailed information on a selected broadcast. It also describes how to retrieve detailed information of a selected broadcast and how to clone a broadcast.

Privileges To carry out this use case, the following privilege is needed:

- I RTGS_QueryBroadcast

References Further information on screens involved can be found in the screen reference part:

- I [Broadcasts – Query Screen](#) [▶ 602]
- I [Broadcasts – List Screen](#) [▶ 606]
- I [Broadcast – Details Screen](#) [▶ 609]
- I [Broadcast – New Screen](#) [▶ 611]

- Instructions**
1. Click on the menu button.
 2. Select the main menu entry 'Administration' and click on the sub-menu entry 'Query Broadcasts'.
 3. Enter the relevant attribute values of the respective broadcasts that are to be displayed.
 4. Click on the 'Submit' Button.
 - ⇒ The 'Broadcasts – List Screen' opens. A list of broadcasts matching the entered search criteria is displayed.
 5. In order to view details of a specific broadcast, right-click on the broadcast and select the context menu entry 'Details'.
 - ➔ The 'Broadcast – Details Screen' opens. Detailed information with regard to the selected broadcast is displayed.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the list screen.

Cloning a broadcast

It is possible for a central bank user to clone a broadcast by right-clicking on a specific broadcast and clicking on the context menu entry 'Clone'. This opens the 'Broadcast – New Screen' while directly transmitting the values of the selected broadcast to the respective input fields (required privilege: RTGS_NewBroadcast).

6.6.6 Enter broadcast

Context of Usage	This use case describes how to enter and send a broadcast.
Privileges	This function is only available for operators and central bank users.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I RTGS_NewBroadcast
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I Broadcasts – List Screen [▶ 606]I Broadcast – Details Screen [▶ 609]I Broadcast – New Screen [▶ 611]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.2. Select the main menu entry 'Administration' and click on the sub-menu entry 'New Broadcast'.3. Fill in the mandatory fields in the section 'Broadcast Information' and 'Date-Time Information'.4. Select one or more specific receiver(s) of the broadcast in the section 'Receiver Information'.5. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).<ul style="list-style-type: none">➔ The notification area shows whether the submission of the data has been completed.

Alternative navigation

The 'Broadcast – New Screen' can also be reached via context menu on the 'Broadcasts – List Screen' or the 'Broadcast – Details Screen'. This can be achieved by selecting a list item and clicking on the context menu entry 'Clone'. This navigation option directly transmits the values of the selected broadcast to the respective input fields in the 'Broadcast – New Screen'. The context menu entry for cloning a broadcast is only visible for central bank users.

6.6.7 Query events

Context of Usage	This use case describes how to query events concerning the current business day and view the result list of events based on the selected filter criteria.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I RTGS_QueryListEvents
References	Further information on screens involved can be found in the screen reference part:

I [Events – Query Screen](#) [▶ 617]

I [Events – List Screen](#) [▶ 620]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Administration' and click on the sub-menu entry 'Query Events'.
3. Enter the relevant attribute values of the respective event(s) that are to be displayed.
4. Optionally, specify the sorting criterion and the sorting order of the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Planned Event Day / Time' in ascending order.
5. Click on the 'Submit' button.
 - ⇒ The 'Events – List Screen' opens. The respective list shows all events matching the entered criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.7 Monitoring

6.7.1 Sum of cash transfer per account holder

Content of Usage

This use case describes how to query the numbers and summarized amounts for all payments and liquidity transfers related to one account holder. It is also possible to query data for all participants belonging to the community of the user.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QuerySumCashTrans

References

Further information on screens involved can be found in the screen reference part:

I [Cash Transfer Order Totals by Party – Query Screen](#) [▶ 622]

I [Cash Transfer Order Totals by Party – List Screen](#) [▶ 626]

I [Cash Transfer Order Totals by Account – List Screen](#) [▶ 628]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Query Cash Transfer Totals per Party'.

3. Enter the relevant party BIC(s) of the aggregated account holder information that is to be displayed or leave the field empty in order to display all aggregated account holder information of the parties belonging to the community of the central bank user.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ➔ The 'Cash Transfer Totals by Party – List Screen' opens. The list shows all aggregated account holder information of all party BICs matching the entered search criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Display List of Cash Transfer Totals per Account

The context menu entry 'Displaying List of Cash Transfer Totals per Account' redirects the user to the 'Cash Transfer Totals by Account – List Screen' displaying the aggregated account holder information per account of the selected party.

6.7.2 Status overview for cash transfers

Context of Usage

This use case describes how to query aggregated information about the status of cash transfer orders related to participants belonging to the banking community of a central bank user.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryOverviewCashTrans

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfer Order Totals by Status – List Screen](#) [▶ 630]
- I [Cash Transfer Order Subtotals by Status – List Screen](#) [▶ 634]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'List of Cash Transfer Totals by Status'.
 - ➔ The 'Cash Transfer Order Totals by Status – List Screen' opens. The list shows aggregated information for all cash transfer orders of the current business day grouped

by cash transfer status related to participants belonging to the banking community of the central bank user.

Display Cash Transfer Orders Subtotals

The context menu entry 'Display Cash Transfer Orders Subtotals' redirects the user to the 'Cash Transfers Order Subtotals by Status – List Screen' displaying aggregated information for all cash transfer orders of the current business day. The information is grouped by message type related to participants belonging to the banking community of the central bank user.

Display Cash Transfers

The context menu entry 'Display Cash Transfers' redirects the user to the 'Cash Transfers – List Screen' displaying detailed information on each related cash transfer order.

6.7.3 Warehoused cash transfers

Context of Usage

This use case describes how to query information related to warehoused payment orders for one or more specific party BIC(s) or all parties belonging to the central bank of a central bank user.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryWarehoused

References

Further information on screens involved can be found in the screen reference part:

- I [Warehoused Cash Transfers – Query Screen](#) [▶ 642]
- I [Warehoused Cash Transfers – List Screen](#) [▶ 645]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Query Warehoused Cash Transfers'.
3. Select the relevant 'Debtor/Instructing Agent*' option and relevant party BIC(s) of the warehoused payment order information that is to be displayed or leave the field empty in order to display all payment order information of the parties belonging to the community of the central bank user.
4. Click on the 'Submit' button.
 - ➡ The 'Warehoused Cash Transfers – List Screen' opens. The list shows all warehoused payment order information of all party BICs matching the entered search criteria.

**Context menu entry 'Details'**

The context menu entry 'Details' redirects the user to the 'Cash Transfers – List Screen' displaying the warehoused payment orders per account of the selected party.

6.7.4 RTGS liquidity per account holder

Context of Usage

This use case describes how to query a list of liquidity relevant information related to a participant. It is also possible to query data for all participants belonging to the community of the user.

The account type RTGS Dedicated Transit Account is generally not considered in the result list.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryAvailLiqui

References

Further information on screens involved can be found in the screen reference part:

- I [RTGS Liquidity by Party – Query Screen](#) [▶ 636]
- I [RTGS Liquidity by Party – List Screen](#) [▶ 638]
- I [RTGS Liquidity by Account – List Screen](#) [▶ 640]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Query RTGS Liquidity by Party'.
3. Enter the relevant party BIC(s) for displaying liquidity relevant information or leave the field empty in order to display all liquidity relevant information of the parties belonging to the community of the central bank user.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in descending order.
5. Click on the 'Submit' button.
 - ➔ The 'RTGS Liquidity by Party – List Screen' opens. The list shows all liquidity relevant information of all party BICs matching the entered search criteria.

**Adjusting the search criteria**

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

List of RTGS Liquidity by Accounts

The context menu entry 'Display List of RTGS Liquidity by Accounts' on the 'RTGS Liquidity by Party – List Screen' redirects the user to the 'RTGS Liquidity by Account – List Screen' displaying the liquidity relevant information on account level related to the selected party.

6.7.5 Status overview for AS batches

Context of Usage

This use case describes how to query aggregated information about the status of AS batches related to ancillary systems belonging to the community of a central bank.

This function is only available for central bank users.

Privileges

To carry out this use case, the following privilege is needed:

- I RTGS_QueryOverviewASBatches

References

Further information on screens involved can be found in the screen reference part:

- I [Status Overview for AS Batches – Query Screen](#) [▶ 658]
- I [Status Overview for AS Batches – List Screen](#) [▶ 661]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Query Status Overview for AS Batches'.
 - ⇒ The 'Status Overview for AS Batches – Query Screen' opens.
3. Enter the relevant attribute values of the AS batches whose status overview is to be displayed.
4. Optionally, specify the sorting criterion, the sorting order and the selection of columns for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'AS Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ➔ The 'Status Overview for AS Batches – List Screen' opens. The list shows aggregated information for all AS batches related to AS belonging to the community of the central bank user (restricted by the selection criteria in the 'Status Overview for AS Batches – Query Screen').

Display AS Batches

The context menu entry 'Display AS Batches' redirects the user to the 'AS Batches – List Screen' displaying detailed information on each related AS Batch.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.7.6 Pending payments by priority

Context of Usage	This use case describes how to query queued cash transfer order information by their priority related to one or more selected parties or related to all parties belonging to the community of a central bank user.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I RTGS_QueryPendPayment
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I Queued Cash Transfer Orders by Priority – Query Screen [▶ 650]I Queued Cash Transfer Orders by Priority – List Screen [▶ 653]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Query Queued Cash Transfer Orders by Priority'.3. Enter one or more relevant party BIC(s) for displaying liquidity relevant information or leave the field empty in order to display liquidity relevant information of all parties belonging to the community as central bank user.4. Click on the 'Submit' button.<ul style="list-style-type: none">➔ The 'Queued Cash Transfer Orders by Priority – List Screen' opens. The list shows all queued cash transfer order information by their priority of all party BICs matching the entered search criteria.

6.7.7 Reservations and dedicated liquidity

Context of Usage	This use case describes how to query different types of reservations related to RTGS DCAs and provides information related to the dedicated liquidity of sub-accounts. It shows an aggregated view related to all RTGS accounts belonging to participants of the central bank user's community.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I RTGS_QueryReservationDedLiqui
References	Further information on screens involved can be found in the screen reference part:

I [Reservations and Dedicated Liquidity – List Screen](#) [▶ 648]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'List of Reservations and Dedicated Liquidity'.
 - ▶ The 'Reservations and Dedicated Liquidity – List Screen' opens. The list shows aggregated information for reservations, standing orders and dedicated liquidity related to RTGS accounts belonging to participants of the central bank user's community.

7 Annex

7.1 References for Error Messages for GUI Screens

This section includes a list of references for error messages for individual screens which are organised in alphabetical order and specify the respective error codes applicable for each screen. Each error code table entry includes the error text, the description as well as the field or button which can trigger the respective error.

7.1.1 A2A File or Message – Upload Screen

For screen description see [A2A File or Message – Upload Screen](#) [▶ 420].

7.2 Technical HTTP Error Codes

The following list contains the technical hypertext transfer protocol (HTTP) errors which may occur. With the help of the provided error codes, the user can determine which instructions he has to carry out in case of an error.

Angular Error

The Angular application may experience an internal error.

This error is in most cases solved by reloading the application.

A reloading of the application has to occur via the browser and not via refreshing the application as this does only refresh the data.

General Error

The following general error may occur:

Error Code	Title	Instruction
0	General Error	Reload the application and check the connection to the network service provider. If this error persists, contact the T2 service provider.

Table 470 - General Error

Client Errors The following client errors may occur:

Error Code	Title	Instruction
400	Bad Request	The server cannot process the request. Please check your entries and try again.
403	Forbidden	Access denied. Please contact your local user administrator.
404	Not Found	The requested resource could not be found. Please check your previous entry.
405	Method Not Allowed	Method not Allowed. The indicated request handler could not be found.
406	Not Acceptable	Not Acceptable. The Requests Content Type is not supported.
408	Request Timeout	Received an incomplete request. Please check your connection or contact your local IT administration.
412	Precondition Failed	A check for a precondition failed. Details on why this happened seem missing in retrieved response.

Table 471 - Client Errors

Server Errors The following server errors may occur:

Error Code	Title	Instruction
500	Internal Server Error	Unhandled Server Exception. If this reoccurs, please contact the T2 service provider.
501	Not Implemented	The requested action is currently not implemented by the server.

Error Code	Title	Instruction
502	Bad Gateway	Network Error. Error received from an intermediate Proxy. Please check your network connection.
503	Service Unavailable	If this error persists, contact the T2 service provider. Service is currently not available. Please try again later.
504	Gateway Timeout	Timeout. No response received in an acceptable time frame.
