| severable/non-severable - A contract that, if terminated, still provides a benefit from the amounts paid/obligated is considered to be severable. For example, an organization has a service contract to wash 1,000 windows during the next 6 months. If the contract is terminated after only 10 windows are washed, the organization has the benefit of 10 clean windows (and presumably would not have to pay for the windows that were not washed). This contract would be considered to be severable. If the contract is for a study, however, terminating the contract before the study is completed leaves nothing – so the contract would be considered to be non-severable. Some contracts may be severable in part. For example, if you sign a contract with a company which covers the purchase of 20 LAN servers and maintenance of the servers for 18 months, the portion of the contract relating to the purchase would be considered to be non-severable while the portion relating to maintenance would be severable. | USAID, ADS Glossary, CH 546, 603, May 18 |

| <p>special use airspace – Airspace of defined dimensions identified by an area on the surface of the earth wherein activities must be confined because of their nature and/or wherein limitations may be imposed upon aircraft operations that are not a part of those activities. Types of special use airspace are: a. Alert Area– Airspace which may contain a high volume of pilot training activities or an unusual type of aerial activity, neither of which is hazardous to aircraft. Alert Areas are depicted on aeronautical charts for the information of nonparticipating pilots. All activities within an Alert Area are conducted in accordance with Federal Aviation Regulations, and pilots of participating aircraft as well as pilots transiting the area are equally responsible for collision avoidance. b. Controlled Firing Area– Airspace wherein activities are conducted under conditions so controlled as to eliminate hazards to nonparticipating aircraft and to ensure the safety of persons and property on the ground. c. Military Operations Area (MOA)– A MOA is airspace established outside of Class A airspace area to separate or segregate certain nonhazardous military activities from IFR traffic and to identify for VFR traffic where these activities are conducted. d. Prohibited Area– Airspace designated under 14 CFR Part 73 within which no person may operate an aircraft without the permission of the using agency. e. Restricted Area– Airspace designated under 14 CFR Part 73, within which the flight of aircraft, while not wholly prohibited, is subject to restriction. Most restricted areas are designated joint use and IFR/VFR operations in the area may be authorized by the controlling ATC facility when it is not being utilized by the using agency. Restricted areas are depicted on en route charts. Where joint use is authorized, the name of the ATC controlling facility is also shown. f. Warning Area– A warning area is airspace of defined dimensions extending from 3 nautical miles outward from the coast of the United States, that contains activity that may be hazardous to nonparticipating aircraft. The purpose of such warning area is to warn nonparticipating pilots of the potential danger. A warning area may be located over domestic or international waters or both.</p> | <p>DOT/FAA, AIM, PCG, May 19</p> |

| Threshold Test-Ban Treaty - The Treaty between the United States of America and the Union of Soviet Socialist Republics on the Limitation of Underground Nuclear Weapon Tests, also known as the TTBT, was signed on July 3, 1974. It establishes a nuclear threshold, by prohibiting tests having a yield exceeding 150 kilotons. The protocol to the TTBT limits nuclear weapon testing to specific designated tests sites to assist verification. The United States and the Soviet Union began negotiations in November 1987 to reach agreement on additional verification provisions that would make it possible for the United States to ratify the treaty. The TTBT verification protocol provides for the use of the hydrodynamic yield measurement method with respect to all tests having a planned yield measurement method with respect to all tests having a planned yield exceeding 50 kilotons, as well as seismic monitoring and, with respect to all tests having a planned yield exceeding 35 kilotons, on-site inspections. The treaty entered into force December 11, 1990. The treaty remains in force for a period of 5 years from entry into force and is automatically extended for successive 5-year periods unless either party notifies the other of its termination or the parties achieve a solution to the problem of the cessation of all underground nuclear weapon tests. Also called TTBT. | DOS/USAID, FAM, 1 FAM 4413, Mar 17 |

| value engineering - a systematic process of reviewing and analyzing the requirements, functions and elements of systems, project, equipment, facilities, services, and supplies for the purpose of achieving the essential functions at the lowest life-cycle cost consistent with required levels of performance, reliability, quality, or safety. The process is generally performed in a workshop environment by a multidisciplinary team of contractor and/or in-house agency personnel (such as an IPT), which is facilitated by agency or contractor staff that is experienced, trained and/or certified in leading VE teams through the following phases: information phase where the team gathers information to understand the project and constraints that may be impeding performance; functional analysis phase where the team identifies basic project functions and goals and identifies any performance shortcomings or mismatches between identified functions and customer needs for further study; creative phase where the team conducts brainstorming to generate new ideas and alternatives for improvement in a project, product, or process, with particular focus on high cost variables, speed of execution, quality and performance; evaluation phase where the team ranks ideas to find the best to meet the project value objectives; development and presentation phase where the team develops best ideas into viable alternatives with net life-cycle cost savings and implementation details and presents them to stakeholders; and implementation phase where the agency incorporates selected alternatives into the project. Also called VE. | White House, OMB, Circular A-131, Mar 17 |
| value engineering - an analysis of the functions of a program, project, system, product, item of equipment, building, facility, service, or supply of an executive agency, performed by qualified agency or contractor personnel, directed at improving performance, reliability, quality, safety, and life-cycle costs. | GSA/DOD, FAR, VOL I CH A, Mar 17 |
| value engineering change proposal - (1) a proposal that - (i) Requires a change to the instant contract to implement; and (ii) Results in reducing the overall projected cost to the agency without impairing essential functions or characteristics, provided, that it does not involve a change - (A) In deliverable end item quantities only; (B) In research and development (R&D) items or R&D test quantities that are due solely to results of previous testing under the instant contract; or (C) To the contract type only. Also called VECP. | GSA/DOD, FAR, VOL I CH A, Mar 17 |
| value engineering change proposal - A proposal submitted by a contractor consistent with the VE clause(s) in the contract that, through a change in the contract, would lower the project's life-cycle cost to the Government without impairing essential functions, characteristics, or performance. The contract change requirement can be the addition of the VECP to the contract with attendant savings. VECPs are applicable to all contract types, including contracts with performance-based specifications. Also called VECP. | White House, OMB, Circular A-131, Mar 17 |
| value Engineering proposal - An in-house agency-developed proposal, or a proposal developed by a contractor under contract to provide VE services, to provide VE studies for a Government project/program. Also called VEP. | White House, OMB, Circular A-131, Mar 17 |
| value engineering study - the formal process of applying VE on an individual project or program. VE studies may be tailored to meet the individual needs of the project or program. For example, the level of effort for each phase of VE may be scaled (truncated, eliminated, etc.), as appropriate, based on factors such as the cost or complexity of the project, the stage of project planning or development, and project schedule. Also called VE study. | White House, OMB, Circular A-131, Mar 17 |
| value of statistical life - amount people are willing to pay to reduce risk so that on average one less person is expected to die from the risk. | DHS, DHS Lexicon, Terms, Mar 17 |

PART II - THEMATIC LISTS

The USG Compendium is separated into two parts (I - alphabetization of terms, and II - thematic lists.) The requirement is on the reader to analyze individual terms by viewing the original source placed in the document following each term and definition before comparing with similar terms or using in other documents. Part II's four thematic lists are categorized as follows to expose readers to terms and definitions related to foreign and domestic activities:

- 1) **Domestic Support - All-Hazard Emergency Management** which includes:
 - law enforcement; fire and medical health services related to preparedness, protection, mitigation, response, recovery and continuation of essential public and private services
- 2) **Domestic Support - Homeland Security** which includes:
 - terrorism, intelligence, cybersecurity, critical infrastructure protection, national all-hazard emergency planning and response to include civil-military coordination
- 3) **Foreign Support - Humanitarian and Sustainable Development Assistance** which includes
 - foreign disaster response and humanitarian relief, youth, resilience and climate change as well as sectoral: health, agriculture, education, et al.
- 4) **Foreign Support - Stabilization and Security Assistance** which includes:
 - fragility, defense and governance, counterterrorism, counter violent extremism, peace keeping operations, atrocity prevention, civil-military coordination and transition
- 5) **Administrative Terms** which includes:
 - those commonly used in interagency discussions

Thematic lists are accompanied by three coordination mechanisms figures that show arranged interaction and potential cooperation between workforces:

- 1) Domestic Coordination - National Response Framework and its Emergency Support Functions show the domestic mandated interaction between USG workforces for all hazards emergency management and homeland security:

| combatant command (command authority) - Nontransferable command authority, which cannot be delegated, of a combatant commander to perform those functions of command over assigned forces involving organizing and employing commands and forces; assigning tasks; designating objectives; and giving authoritative direction over all aspects of military operations, joint training, and logistics necessary to accomplish the missions assigned to the command. Also called COCOM. See also combatant command; combatant commander; operational control; tactical control. | DOD |
| command activating switch - switch that is activated by the individual in which the individual controls the device at the moment of initiation. | DHS |
| command center - facility from which a commander and his or her representatives direct operations and control forces organized to gather, process, analyze, display, and disseminate planning and operational data and perform other related tasks. | DHS |
| command projectile switch - small arms bullet used to close the circuit by penetrating two metal plates provides standoff between firing point and contact point. | DHS |
| command pull improvised explosive device - improvised explosive device (IED) initiated by an individual using a “command pull” action. | DHS |
| command relationships - The interrelated responsibilities between commanders, as well as the operational authority exercised by commanders in the chain of command; defined further as combatant command (command authority), operational control, tactical control, or support. See also chain of command; combatant command (command authority); command; operational control; support; tactical control. | DOD |
| command staff - An incident command component that consists of a Public Information Officer, Safety Officer, Liaison Officer, and other positions as required, who report directly to the Incident Commander. | DHS/ FEMA |
| command wire improvised explosive device - improvised explosive device (IED) where the firing point and contact point are separate but joined together by a length of wire. | DHS |
| commercial chemical, biological, radiological, or nuclear improvised explosive device enhancement - Chemical, Biological, Radiological, or Nuclear (CBRN) materials available for purchase on the open market for commercial purposes that is deliberately added as a component to an improvised explosive device (IED) | DHS |
| common operating picture - A continuously updated overview of an incident compiled throughout an incident's life cycle from data shared between integrated systems for communication, information management, and intelligence and information sharing. The common operating picture allows incident managers at all levels to make effective, consistent, and timely decisions. The common operating picture also helps ensure consistency at all levels of incident management across jurisdictions, as well as between various governmental jurisdictions and private-sector and nongovernmental entities that are engaged. | DHS/ FEMA |
| common operational picture - A single identical display of relevant information shared by more than one command that facilitates collaborative planning and assists all echelons to achieve situational awareness. Also called COP. | DOD |
| communicable disease - a disease that is ruled as subject to quarantine, and requires isolation or restriction of movement by the patient for a specified period, as prescribed by the health authorities having jurisdiction. | DOS/ USAID |
| complex catastrophe - Any natural or man-made incident, including cyberspace attack, power grid failure, and terrorism, which results in cascading failures of multiple, interdependent, critical, life-sustaining infrastructure sectors and caused extraordinary levels of mass casualties, damage, or disruption severely affecting the population, environment, economy, public health, national morale, response efforts, and/or government functions. | DOD |

| | |
|---|-----|
| concept of operations - A verbal or graphic statement that clearly and concisely expresses what the commander intends to accomplish and how it will be done using available resources. Also called CONOPS. | DOD |
| concept of operations - formal document of an analysis that describes how an asset, system, or capability will be employed and supported includes program's mission, goals and objectives; may also include roles and responsibilities of the program's key stakeholders and the high-level processes to achieve program goals and objectives. | DHS |
| confinement vessel - vessel commonly used to hold the main charge together may also be used to add fragmentation. | DHS |
| consequence - effect of an event, incident, or occurrence. | DHS |
| consequence assessment - product or process of identifying or evaluating the potential or actual effects of an event, incident, or occurrence. | DHS |
| conservation - the use of methods and procedures necessary or desirable to sustain healthy populations of wildlife, including all activities associated with scientific resources management such as research, census, monitoring of populations, acquisition, improvement and management of habitat, live trapping and transplation, wildlife damage management, and periodic or total protection of a species or population, as well as the taking of individuals within wildlife stock or population if permitted by applicable State and Federal law. | DOI |
| conservation - the use of methods and procedures necessary to bring a species of neotropical migratory bird to the point at which there are sufficient populations in the wild to ensure the long-term viability of the species, including - (A) protection and management of neotropical migratory bird populations; (B) maintenance, management, protection, and restoration of neotropical migratory bird habitat; (C) research and monitoring; (D) law enforcement; and (E) community outreach and education. | DOI |
| conservation - the use of methods and procedures necessary to preserve or sustain corals and associated species as diverse, viable, and self-perpetuating coral reef ecosystems, including all activities associated with resource management, such as assessment, conservation, protection, restoration, sustainable use, and management of habitat; mapping; habitat monitoring; assistance in the development of management strategies for marine protected areas and marine resources consistent with the National Marine Sanctuaries Act and the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.); law enforcement; conflict resolution initiatives; <i>community outreach and education; and that promote safe and ecologically sound navigation.</i> | DOI |
| conservation activities - conservation systems, practices, or management measures. | DOI |
| conservation activities - i) structural measures, vegetative measures, and land management measures, including agriculture drainage management systems, as determined by the Secretary; and (ii) planning needed to address a priority resource concern. | DOI |
| contamination - 1. The deposit, absorption, or adsorption of radioactive material or of biological or chemical agents on or by structures, areas, personnel, or objects. Also called fallout radiation. 2. Food and/or water made unfit for consumption by humans or animals because of the presence of environmental chemicals, radioactive elements, bacteria or organisms, the byproduct of the growth of bacteria or organisms, or the decomposing material or waste in the food or water. | DOD |
| contamination mitigation - The planning and actions taken to prepare for, respond to, and recover from contamination associated with all chemical, biological, radiological, and nuclear threats and hazards to continue military operations. | DOD |

| | |
|---|-----------|
| contingency/incident personnel - category of essential personnel that are employees who are in positions identified for possible activation, as needed, depending on the emergency includes: a. Personnel designated in positions that ensure three-deep backup to mission critical or emergency personnel b. Subject Matter Experts (SMEs) c. Personnel in positions pre-identified as part of a Crisis Action Team, and other operational teams established in response to a specific incident or situation d. Federal Emergency Response Officials e. Reconstitution Personnel in positions identified as Reconstitution Staff f. Personnel in positions identified as Devolution Staff g. Persons in positions identified in an order of succession. | DHS |
| coordinating authority - A commander or individual who has the authority to require consultation between the specific functions or activities involving forces of two or more Services, joint force components, or forces of the same Service or agencies, but does not have the authority to compel agreement. | DOD |
| corrective actions - Implementing procedures that are based on lessons learned from actual incidents or from training and exercises. | DHS/ FEMA |
| corrosive timing switch - timing switch using a corrosive chemical with a known decomposition rate that is designed to destroy a physical restraint on a triggering device to start the initiation train. | DHS |
| covert sensor - detecting device that are hidden from view. (e.g. buried sensors). | DHS |
| criminal improvised explosive device incident - improvised explosive device (IED) incident primarily intended to harass, disrupt, or extort as part of criminal activity. | DHS |
| critical action floodplain - area subject to inundation from a flood of a magnitude that occurs once every 500 years on the average a flood having a 0.2-percent chance of being equaled or exceeded in any given year. | DHS |
| critical electric infrastructure - a system or asset of the bulk-power system, whether physical or virtual, the incapacity or destruction of which would negatively affect national security, economic security, public health or safety, or any combination of such matters. | DOI |
| crush wire switch - switch where contact point(s) spanning a length of wire that function the IED when crushed. | DHS |
| daisy chain improvised explosive device - single improvised explosive device (IED) with one firing signal that can initiate multiple connected main charges. | DHS |
| declared event - a major disaster or emergency. | DHS |
| decontamination - The process of making any person, object, or area safe by absorbing, destroying, neutralizing, making harmless, or removing chemical or biological agents, or by removing radioactive material clinging to or around it. | DOD |
| Defense Coordinating Officer - Individual who serves as the Department of Defense (DOD)'s single point of contact at the Joint Field Office (JFO) for requesting assistance from DOD. With few exceptions, requests for Defense Support of Civil Authorities originating at the JFO are coordinated with and processed through the DCO. The DCO may have a Defense Coordinating Element consisting of a staff and military liaison officers to facilitate coordination and support to activated Emergency Support Functions. Also called DCO. | DHS/ FEMA |
| defense critical electric infrastructure - any electric infrastructure located in any of the 48 contiguous States or the District of Columbia that serves a facility designated by the Secretary but is not owned or operated by the owner or operator of such facility. | DOI |

| | |
|---|------------|
| defense support of civil authorities - civil support activities provided by U.S. military forces, Department of Defense (DOD) civilians, DOD contract personnel, and DOD agency and component assets, in response to requests for assistance from civilian federal, state, local, and tribal authorities under the auspices of the national response framework (for domestic emergencies). | DHS |
| defense support of civil authorities - Support provided by U.S. military forces (Regular, Reserve, and National Guard), Department of Defense (DOD) civilians, DOD contract personnel, and DOD agency and component assets, in response to requests for assistance from civilian Federal, State, local, and tribal authorities for domestic emergencies, designated law enforcement support, and other domestic activities. Also called DSCA. | DHS/ FEMA |
| demobilization - 1. The process of transitioning a conflict or wartime military establishment and defense-based civilian economy to a peacetime configuration while maintaining national security and economic vitality. 2. The process necessary to release from active duty, or federal service, units and Reserve Component members who were ordered to active duty or called to federal service. See also mobilization. | DOD |
| demobilization - The orderly, safe, and efficient return of a resource to its original location and status. | DHS/ FEMA |
| development unit - a part of a project which, for purposes of orderly engineering or reclamation development, is designated as a development unit by order of the Secretary. | DOI |
| directional effect charge - main charge configuration where the explosive effect is channeled to an intended area. | DHS |
| disaster - An unexpected occurrence, manmade or natural, that causes loss of life, health, property or livelihood, inflicting widespread destruction and distress and having long- term, adverse effects on Agency operations. It is distinguished from an accident by its magnitude and by its damage to the community infrastructure or the resources required for recovery. | USAID |
| disaster area - an area in which the President has declared a major disaster during the period of such declaration. | DHHS |
| disaster area - an area that has suffered or in which has occurred an emergency or disaster. | DOL |
| disaster assistance response team - A team deployed by the United States Agency for International Development, if a large-scale, urgent, and/or extended response is necessary, to provide specialists to assist the chief of mission and the United States Agency for International Development mission (where present) with the management of the United States Government response to a disaster. Also called DART. See also foreign disaster; foreign disaster relief. | DOD |
| disaster county - a county included in the geographic area covered by a qualifying natural disaster declaration. | USDA |
| disaster declaration - The written determination by a U.S. Ambassador or designee of the Secretary of State that a disaster situation exists, with lives at risk, which exceeds local capacity and for which it is in the U.S. Government's interest to respond. | USAID |
| disaster or emergency - a major disaster or emergency, as declared by the President, that results in severe adverse effects for a substantial number of employees (e.g., loss of life or property, serious injury, or mental illness as a result of a direct threat to life or health). | DOS/ USAID |
| disaster reconstruction - Longer term activities designed to augment critical infrastructure and promote development goals; of tertiary priority to Disaster Relief and Rehabilitation. | USAID |
| disaster recovery center - A facility established in a centralized location within or near the disaster area at which disaster victims (individuals, families, or businesses) apply for disaster aid. Also called DRC. | DHS/ FEMA |

| | |
|--|------------|
| disaster recovery plan - An overview of the requirements necessary to ensure that USAID’s critical business functions that are handled by its information systems are resumed and restored after a natural or man-made disaster occurs. Also called DRP. | USAID |
| disaster recovery plan - A written plan for recovering one or more information systems at an alternate facility in response to a major hardware or software failure or destruction of facilities. | DOS/ USAID |
| disaster recovery plan - The detailed plan for restoring operations in CGFS financial service centers is rendered inoperable because of fire, natural disaster, acts of war, or other violence. | DOS/ USAID |
| disaster rehabilitation - Intermediate term activities to assist disaster stricken populations to return to a state of viability. A secondary priority to life sustaining Disaster Relief. | USAID |
| disaster relief - Immediate, life sustaining assistance provided to disaster victims. | USAID |
| Disaster Response Registry - a voluntary registry of contractors who are willing to perform debris removal, distribution of supplies, reconstruction, and other disaster or emergency relief activities established in accordance with the Registry of Disaster Response Contractors. The Registry contains information on contractors who are willing to perform disaster or emergency relief activities within the United States and its outlying areas. The Registry is accessed via https://www.acquisition.gov and alternately through the FEMA website at http://www.fema.gov/business/index.shtm . | GSA/ DOD |
| displacement switch - switch that utilizes a jug or other container, with two contacts, one fixed and one floating substance dissipates or fills the container, meet and complete the circuit. | DHS |
| disruptive event - occurrence, caused by either human action or natural phenomena, that may cause harm and that may require action [incident]. | DHS |
| disturbance trigger - victim operated trigger that senses when objects or their wrappings are moved or disturbed, initiating a firing device sensitive mechanisms such as tilt, anti-lift, and trembler switches may be used. | DHS |
| domestic emergencies - Civil defense emergencies, civil disturbances, major disasters, or natural disasters affecting the public welfare and occurring within the United States and its territories. See also natural disaster. | DOD |
| dual tone multi frequency improvised explosive device - (See - dual tone multi frequency improvised explosive device) Also called dual tone multi frequency IED. | DHS |
| electric initiator - initiator whose functioning is started by an electrical impulse that creates heat or a spark. | DHS |
| electronic initiator - initiator controlled or operated by the controlled flow of electrons. | DHS |
| electronic timing switch - timing switch using a commercial or improvised electronic timer or integrated circuit to start the initiation train. | DHS |
| elevated improvised explosive device - improvised explosive device (IED) emplaced above the surface: hanging from an overpass, on a roof, etc. | DHS |
| emergency - a natural disaster affecting a wide area (such as a flood, hurricane, tidal wave, earthquake, severe storm, or landslide) or a catastrophic failure from any external cause, as a result of which: (A) the Governor of a State has declared an emergency and the Secretary has concurred; or(B) the President has declared a major disaster under the Robert T. Stafford Disaster Relief and Emergency Assistance Act. | DOT |
| emergency & evacuation network - A radio channel designated specifically for security of personnel at the U.S. Mission. An appropriation that is no longer available to incur new obligations, although it may still be available for recording and/or payment of obligations properly incurred before the period of availability expired. Also called E&E. | USAID |

Domestic Support – All Hazards Emergency Management

| | |
|--|------------|
| emergency action - action needed to respond to the immediate impacts of an emergency does not include long-term recovery actions. | DHS |
| emergency management - As subset of incident management, the coordination and integration of all activities necessary to build, sustain, and improve the capability to prepare for, protect against, respond to, recover from, or mitigate against threatened or actual natural disasters, acts of terrorism, or other manmade disasters. | DHS/ FEMA |
| emergency management - coordination and integration of all activities necessary to build, sustain and improve the capabilities to prepare for, respond to, recover from, or mitigate against threatened or actual disasters or emergencies, regardless of cause emergency management activities in response to an incident are a component of overall incident management and are aligned with parallel response processes associated with prevention and protection. | DHS |
| emergency management - Organized efforts to mitigate, prepare for, respond to, and recover from an emergency. | DOS/ USAID |
| emergency management - the governmental function that coordinates and integrates all activities necessary to build, sustain, and improve the capability to prepare for, protect against, respond to, recover from, or mitigate against threatened or actual natural disasters, acts of terrorism, or other man-made disasters. | DHS |
| emergency management assistance compact - A congressionally ratified organization that provides form and structure to interstate mutual aid. Through EMAC, a disaster-affected State can request and receive assistance from other member States quickly and efficiently, resolving two key issues up front - liability and reimbursement. Also called EMAC. | DHS/ FEMA |
| emergency management system - Coordination of systems and multidisciplinary personnel (e.g., police, fire, emergency managers) to address all phases of an incident. | DHHS |
| emergency manager - The person who has the day-to-day responsibility for emergency management programs and activities. The role is one of coordinating all aspects of a jurisdiction's mitigation, preparedness, response, and recovery capabilities. | DHS/ FEMA |
| emergency medical condition - a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in a condition. | DHHS |
| emergency medical services - A system of coordinated response involving private and public agencies and organizations that provides emergency medical care after an incident that causes serious illness or injury. Also called EMS. | DHHS |
| emergency medical services - resources used by a public or nonprofit entity to deliver medical care outside of a medical facility under emergency conditions that occur as a result of - (A) the condition of a patient; or (B) a natural disaster or related condition. | USDA |

| | |
|--|-------------------------------------|
| <p>emergency preparedness - all those activities and measures designed or undertaken to prepare for or minimize the effects of a hazard upon the civilian population, to deal with the immediate emergency conditions which would be created by the hazard, and to effectuate emergency repairs to, or the emergency restoration of, vital utilities and facilities destroyed or damaged by the hazard. Such term includes the following: (A) Measures to be undertaken in preparation for anticipated hazards (including the establishment of appropriate organizations, operational plans, and supporting agreements, the recruitment and training of personnel, the conduct of research, the procurement and stockpiling of necessary materials and supplies, the provision of suitable warning systems, the construction or preparation of shelters, shelter areas, and control centers, and, when appropriate, the non-military evacuation of the civilian population). (B) Measures to be undertaken during a hazard (including the enforcement of passive defense regulations prescribed by duly established military or civil authorities, the evacuation of personnel to shelter areas, the control of traffic and panic, and the control and use of lighting and civil communications). (C) Measures to be undertaken following a hazard (including activities for firefighting, rescue, emergency medical, health and sanitation services, monitoring for specific dangers of special weapons, unexploded bomb reconnaissance, essential debris clearance, emergency welfare measures, and immediately essential emergency repair or restoration of damaged vital facilities).</p> | <p>DHHS/ HUD/ EPA/ FEMA</p> |
| <p>emergency preparedness - Measures taken in advance of an emergency to reduce the loss of life and property and to protect a nation’s institutions from all types of hazards through a comprehensive emergency management program of preparedness, mitigation, response, and recovery. Also called EP.</p> | <p>DOD</p> |
| <p>emergency response providers - Federal, State, and local governmental and nongovernmental emergency public safety, fire, law enforcement, emergency response, emergency medical (including hospital emergency facilities), and related personnel, agencies, and authorities.</p> | <p>DHS</p> |
| <p>emergency services sector - A system of preparedness, response, and recovery elements that form the nation's first line of defense for preventing and mitigating the risk from physical and cyber attacks, and manmade and natural disasters. The sector consists of emergency services facilities and associated systems, trained and tested personnel, detailed plans and procedures, redundant systems, and mutual-aid agreements that provide life safety and security services across the Nation via a first-responder community comprised of federal, state, local, tribal, territorial and private sector partners.</p> | <p>DHHS</p> |
| <p>Emergency Support Function Annexes - Present the missions, policies, structures, and responsibilities of Federal agencies for coordinating resource and programmatic support to States, tribes, and other Federal agencies or other jurisdictions and entities when activated to provide coordinated Federal support during an incident. Also called ESF Annexes.</p> | <p>DHS/ FEMA</p> |
| <p>Emergency Support Function Coordinator - The entity with management oversight for that particular ESF. The coordinator has ongoing responsibilities throughout the preparedness, response, and recovery phases of incident management. Also called ESF Coordinator.</p> | <p>DHS/ FEMA</p> |
| <p>Emergency Support Function Primary Agency - A Federal agency with significant authorities, roles, resources, or capabilities for a particular function within an ESF. A Federal agency designated as an ESF primary agency serves as a Federal executive agent under the Federal Coordinating Officer (or Federal Resource Coordinator for non-Stafford Act incidents) to accomplish the ESF mission. Also called ESP Primary Agency.</p> | <p>DHS/ FEMA</p> |
| <p>Emergency Support Function Support Agency - An entity with specific capabilities or resources that support the primary agencies in executing the mission of the ESF. Also called ESP Support Agency.</p> | <p>DHS/ FEMA</p> |

| | |
|--|----------------------------|
| emergency support functions - Used by the Federal Government and many State governments as the primary mechanism at the operational level to organize and provide assistance. ESFs align categories of resources and provide strategic objectives for their use. ESFs utilize standardized resource management concepts such as typing, inventorying, and tracking to facilitate the dispatch, deployment, and recovery of resources before, during, and after an incident. Also called ESFs. | DHS/ FEMA |
| emergency support functions - Government and certain private-sector capabilities grouped into an organizational structure to provide the support, resources, program implementation, and services that are most likely to be needed to save lives, protect property and the environment, restore essential services and critical infrastructure, and help victims and communities return to normal, when feasible, following domestic incidents. Also called ESFs. | DOD |
| emergency work - clearance and removal of debris and wreckage and temporary restoration of essential public facilities and services. | DHHS/ HUD/ EPA/ FEMA |
| endemic - The constant presence and/or usual presence of a disease or condition found in a population within a geographic area. This may also be thought of as the baseline. | USAID |
| epidemic - The increase of cases of a disease, often occurring suddenly, than what would be expected for that population in that area or at that time. Even one or two cases of certain diseases (such as cholera) can be considered an epidemic. In other circumstances, an epidemic is defined by where the cases occur (e.g., West Nile virus in the United States) or when the cases occur (e.g., influenza in the summer). | USAID |
| estimated net explosives weight - reference to the estimated weight of the main charge derived from observations of the blast effects and crater characteristics. | DHS |
| evacuation - 1. Removal of a patient by any of a variety of transport means from a theater of military operation, or between health services capabilities, for the purpose of preventing further illness or injury, providing additional care, or providing disposition of patients from the military health care system. 2. The clearance of personnel, animals, or materiel from a given locality. 3. The controlled process of collecting, classifying, and shipping unserviceable or abandoned materiel, United States or foreign, to appropriate reclamation, maintenance, technical intelligence, or disposal facilities. 4. The ordered or authorized departure of noncombatant evacuees from a specific area to another in the same or different countries by Department of State, Department of Defense, or appropriate military commander. See also evacuee; noncombatant evacuation operation. | DOD |
| evacuation - An action taken that requires all persons in a Department facility to leave the facility and move to a safe area. Evacuations are generally ordered under emergency conditions and may occur with little or no warning. Evacuations may be local (e.g., evacuation of a building) or regional (e.g., evacuation of a city or an area). | DOS/ USAID |
| evacuation - organized and supervised withdrawal, dispersal, or removal of civilians from hazardous or potentially hazardous areas, and their reception and care in designated safe areas. | DHS |
| evacuation - Organized, phased, and supervised withdrawal, dispersal, or removal of civilians from dangerous or potentially dangerous areas, and their reception and care in safe areas. | DHS/ FEMA |
| evacuation, relocation, and internment period - that period beginning on December 7, 1941, and ending on June 30, 1946. | ODNI/ CIA/ DOD |
| evacuee - A civilian removed from a place of residence by military direction for reasons of personal security or the requirements of the military situation. See also displaced person; refugee. | DOD |

| | |
|---|----------------------------|
| evacuee - person subject to an organized and supervised withdrawal, dispersal, or removal from a hazardous or potentially hazardous area. | DHS |
| explosive train - succession of initiating and igniting elements arranged to cause a charge to function. | DHS |
| explosive weapon - reactive substance that contains a great amount of potential energy that can produce an explosion if released suddenly usually accompanied by the production of light, heat, sound, and pressure. | DHS |
| explosively formed projectile charge - specially designed main charge configuration incorporating an explosive charge with a machined or pressed concave metal plate which by the force of the charge reshapes the plate into a high temperature, high velocity metal slug capable of penetrating armored vehicles. | DHS |
| explosives detection canine team - a canine and a canine handler that are trained to detect explosives, radiological materials, chemical, nuclear or biological weapons, or other threats as defined by the Secretary. | DHS |
| extraordinary operation and maintenance work - major, nonrecurring maintenance to Reclamation-owned or operated facilities, or facility components, that is - (A) intended to ensure the continued safe, dependable, and reliable delivery of authorized project benefits; and (B) greater than 10 percent of the contractor's or the transferred works operating entity's annual operation and maintenance budget for the facility, or greater than \$100,000. | DOI |
| false improvised explosive device incident - improvised explosive device (IED) incident that is incorrectly identified though reported in good faith as an improvised explosive device, subsequently categorized as a false alarm after positive action. | DHS |
| Federal Coordinating Officer - The official appointed by the President to execute Stafford Act authorities, including the commitment of Federal Emergency Management Agency (FEMA) resources and mission assignment of other Federal departments or agencies. In all cases, the FCO represents the FEMA Administrator in the field to discharge all FEMA responsibilities for the response and recovery efforts underway. For Stafford Act events, the FCO is the primary Federal representative with whom the State Coordinating Officer and other State, tribal, and local response officials interface to determine the most urgent needs and set objectives for an effective response in collaboration with the Unified Coordination Group. Also called FCO. | DHS/ FEMA |
| Federal Resource Coordinator - Official who may be designated by the Department of Homeland Security in non-Stafford Act situations when a Federal department or agency acting under its own authority has requested the assistance of the Secretary of Homeland Security to obtain support from other Federal departments and agencies. In these situations, the FRC coordinates support through interagency agreements and memorandums of understanding. The FRC is responsible for coordinating timely delivery of resources to the requesting agency. Also called FRC. | DHS/ FEMA |
| federally declared disaster - major disaster declared by the President that warrants supplemental federal aid when the state or local governments clearly cannot handle them on their own. | DHS |
| find improvised explosive device incident - improvised explosive device (IED) related incident that involves the discovery and/or recovery of an IED not yet emplaced or employed, IED components, and/or IED paraphernalia. | DHS |
| finishing action - tactical operational action taken in direct response to an incident. | DHS |
| firing switch - component that initiates the explosive train. | DHS |
| first responder - a firefighter, law enforcement officer, paramedic, emergency medical technician, or other individual (including an employee of a legally organized and recognized volunteer organization, whether compensated or not), who, in the course of his or her professional duties, responds to fire, medical, hazardous material, or other similar emergencies. | DHHS/ HUD/ EPA/ FEMA |

Domestic Support – All Hazards Emergency Management

| | |
|---|-------------|
| first responder - Anyone who provides initial and immediate treatment to self or others. See also essential care; evacuation. | DOD |
| first responder - designation for an individual who, in the course of their professional duties of responding to emergencies, and in the early stages of an incident, is responsible for the protection and preservation of life, property, evidence, the environment, and for meeting basic human needs may be a member of a Federal, State or local emergency public safety, emergency response, emergency medical, law enforcement, fire and rescue, military, or other recognized agency and authority, including a volunteer or private organization, as well as other skilled support personnel (such as equipment operators, administrators, security personnel, etc.) who provide immediate support services during, response and protection operations. | DHS |
| flame fougasse improvised explosive device enhancement - mixture of petrol (gasoline) and oil in a 40/60 ratio (also known as Improvised Napalm) that is deliberately added as a component to an improvised explosive device (IED). | DHS |
| flood hazards - National Flood Insurance Program has prepared flood hazard data for approximately 18,000 communities. The primary information prepared for these communities is for the 1 percent annual chance (100-year) flood, and includes documentation of the boundaries and elevations of that flood. | White House |
| floodplain - lowland and relatively flat areas adjoining inland and coastal waters that is naturally subject to recurring flooding at a minimum, areas subject to a 1 percent or greater chance of flooding in any given year. | DHS |
| floodplain management - the operation of a community program of corrective and preventative measures for reducing flood damage. | DHS |
| food security - access by all people at all times to sufficient food and nutrition for a healthy and productive life. | USDA |
| force protection - preventive measures taken to mitigate hostile actions against Department of Defense personnel (to include family members), resources, facilities, and critical information. Also called FP. See also force; force protection condition; protection. | DOD |
| force protection - preventive measures taken to mitigate hostile actions against federal personnel (to include family members), resources, facilities, and critical information. | DHS |
| found/cleared improvised explosive device - improvised explosive device (IED) that has been identified by any method and removed from the battlefield before it can be used as intended. | DHS |
| fragmentation improvised explosive device enhancement - shrapnel and small objects designed to be accelerated by explosive forces that is deliberately added as a component to an improvised explosive device (IED) | DHS |
| frontline employee - an employee of a public transportation agency who is a transit vehicle driver or operator, dispatcher, maintenance and maintenance support employee, station attendant, customer service employee, security employee, or transit police, or any other employee who has direct contact with riders on a regular basis, and any other employee of a public transportation agency that the Secretary determines should receive security training. | DHS |
| fuel improvised explosive device enhancement - incendiary material designed to enhance the burning and visual effect of the device that is deliberately added as a component to an improvised explosive device (IED). | DHS |
| fuel oxidizer explosive mixture - explosive mixture of fuel and oxidizer that deflagrates (very rapid burning) or detonates creating a blast wave. | DHS |

| | |
|--|----------------------------|
| grid security emergency - the occurrence or imminent danger of - (A)(i) a malicious act using electronic communication or an electromagnetic pulse, or a geomagnetic storm event, that could disrupt the operation of those electronic devices or communications networks, including hardware, software, and data, that are essential to the reliability of critical electric infrastructure or of defense critical electric infrastructure; and (ii) disruption of the operation of such devices or networks, with significant adverse effects on the reliability of critical electric infrastructure or of defense critical electric infrastructure, as a result of such act or event; or (B)(i) a direct physical attack on critical electric infrastructure or on defense critical electric infrastructure; and (ii) significant adverse effects on the reliability of critical electric infrastructure or of defense critical electric infrastructure as a result of such physical attack. | DOI |
| hazard - A condition with the potential to cause injury, illness, or death of personnel; damage to or loss of equipment or property; or mission degradation. See also injury; risk. | DOD |
| hazard - an emergency or disaster resulting from- (A) a natural disaster; or(B) an accidental or man-caused event. | DHHS/ HUD/ EPA/ FEMA |
| hazard - Something that is potentially dangerous or harmful, often the root cause of an unwanted outcome. | DHS/ FEMA |
| hazard - source or cause of harm or difficulty may be natural, technological, or human-caused. | DHS |
| heat initiator - initiator that serves as an igniting element through the application of heat may include direct heat to a sensitive explosive. | DHS |
| high explosive - chemical compound or mixture that is capable of supporting or sustaining a detonation wave. | DHS |
| hoax improvised explosive device incident - improvised explosive device (IED) incident involving a device fabricated to look like an improvised explosive device, and is intended to purposely simulate one in order to elicit a response. | DHS |
| homemade explosive - non-standard explosive mixtures / compounds which have been formulated / synthesized from available ingredients most often utilized in the absence of commercial / military explosives. | DHS |
| human consequence - effect of an incident, event, or occurrence that results in injury, illness, or loss of life. | DHS |
| human environment - the physical, social, and economic components, conditions, and factors which interactively determine the state, condition, and quality of living conditions, employment, and health of those affected, directly or indirectly, by activities occurring on the outer Continental Shelf. | DOI |
| Hurricane Liaison Team - A small team designed to enhance hurricane disaster response by facilitating information exchange between the National Hurricane Center in Miami and other National Oceanic and Atmospheric Administration components, as well as Federal, State, tribal, and local government officials. Also called HLT. | DHS/ FEMA |
| hydrostatic switch - switch designed to complete a circuit or force a mechanical action with the change of fluid pressure. | DHS |
| ignitor - device designed to produce a flame or a spark to initiate an explosive train. | DHS |
| immediate response - Any form of immediate action taken in the United States and territories to save lives, prevent human suffering, or mitigate great property damage in response to a request for assistance from a civil authority, under imminently serious conditions when time does not permit approval from a higher authority. | DOD |
| imminent danger - the existence of any condition or practice in a coal or other mine which could reasonably be expected to cause death or serious physical harm before such condition or practice can be abated. | DOL |

| | |
|--|------|
| imminent danger to the health and safety of the public - the existence of any condition or practice, or any violation of a permit or other requirement of this chapter in a surface coal mining and reclamation operation, which condition, practice, or violation could reasonably be expected to cause substantial physical harm to persons outside the permit area before such condition, practice, or violation can be abated. A reasonable expectation of death or serious injury before abatement exists if a rational person, subjected to the same conditions or practices giving rise to the peril, would not expose himself or herself to the danger during the time necessary for abatement. | DOI |
| imminent hazard - a situation which exists when the continued use of a pesticide during the time required for cancellation proceeding would be likely to result in unreasonable adverse effects on the environment or will involve unreasonable hazard to the survival of a species declared endangered or threatened by the Secretary pursuant to the Endangered Species Act of 1973. | USDA |
| imminent hazard - the existence of a condition relating to hazardous material that presents a substantial likelihood that death, serious illness, severe personal injury, or a substantial endangerment to health, property, or the environment may occur before the reasonably foreseeable completion date of a formal proceeding begun to lessen the risk of that death, illness, injury, or endangerment. | DOT |
| improvised claymore - improvised weapon, military or homemade, designed to explosively propel a fan shaped pattern of ball bearings or other fragmentation in an aimed direction. | DHS |
| improvised explosive device - A weapon that is fabricated or emplaced in an unconventional manner incorporating destructive, lethal, noxious, pyrotechnic, or incendiary chemicals. Also called IED. | DOD |
| improvised explosive device - device placed or fabricated in an unconventional manner that incorporates in its design explosives or destructive, lethal, noxious, pyrotechnic, or incendiary chemicals generally consists of an explosive; power supply; switch or timer; and detonator or initiator; may incorporate military stores, but is normally devised from non-military components. | DHS |
| improvised explosive device associated components - components that are: 1) part of an improvised explosive device or improvised weapon system; 2) the tools required to produce the components; or 3) precursors to the manufacture of improvised explosive device components to include explosives. | DHS |
| improvised explosive device container - item or vessel that commonly houses the whole improvised explosive device (IED) or principle components of an improvised explosive device. | DHS |
| improvised explosive device enhancement - optional additional component deliberately added as opposed to a secondary hazard that modifies the effects of the improvised explosive device. | DHS |
| improvised explosive device explosion incident - improvised explosive device (IED) incident that results in a partial or complete functioning of an improvised explosive device occurs when gaseous products are rapidly produced from a single substance (high explosives or low explosives with a fuel and oxidant). | DHS |
| improvised explosive device incident atmospherics - description of the demeanor of the civilian population at an IED event to include mood, absence or presence, changes in previously experienced interactions, etc. | DHS |
| improvised explosive device incident geometry - description of how the improvised explosive device (IED) system was emplaced, including the angle of the device, the distance to target, line of sight (if necessary), etc. | DHS |
| improvised explosive device intended outcome - immediate and direct goal or objective of an enemy's improvised explosive device (IED) attack objectives include anti-armor, anti-vehicle, anti-infrastructure, anti-personnel, anti-aircraft, tactics - techniques - procedures (TTP) identification, and criminal. | DHS |

| | |
|---|------------|
| improvised explosive device main charge - bulk explosive component of an improvised explosive device (IED) capable of providing an explosion by its own energy when initiated. | DHS |
| improvised explosive device post blast analysis - process of systemic photographing and collecting forensic material involved in an improvised explosive device (IED) incident. | DHS |
| improvised explosive device power source - source of power – that either stores or releases electrical energy – for the initiation of an improvised explosive device (IED) or improvised weapon. | DHS |
| improvised explosive device related incident - occurrence that involves one or more of the following types of improvised explosive device-related actions/activities: Improvised Explosive Device, Explosion, Find, Cache, False, Hoax. | DHS |
| improvised explosive device sourcing - process of determining the origination point (such as a production facility or person, a geographic location, or a specific country of origin) for IED components. | DHS |
| improvised explosive device tactical characterization - description of how an improvised explosive device (IED) incident was conducted or planned (tactical design) to be conducted provides context for how a specific device is used/intended (purpose of device) to be used. | DHS |
| improvised explosive device tactical design - specific design of an improvised explosive device (IED) attack includes but not limited to: position of the IED, the type of IED, method of actuation, intended target, type of road segment used, concealment technique, use of secondary devices, the time of day, etc. | DHS |
| improvised explosive device technical categorization - description of an improvised explosive device (IED) using a hierarchical construct to identify its key components. | DHS |
| improvised grenade - improvised weapon, military or homemade, designed to explode when a restraint is removed (usually handheld, but can be projected). | DHS |
| improvised mortar - improvised weapon, military or homemade, designed to launch an explosive charge to the target. | DHS |
| improvised nuclear device - A device incorporating fissile materials designed or constructed outside of an official government agency that has, appears to have, or is claimed to be a nuclear weapon that is no longer in the control of a competent authority or custodian or has been modified from its designated firing sequence. Also call IND. | DOD |
| improvised nuclear device - A device incorporating fissile materials designed or constructed outside of an official government agency that has, appears to have, or is claimed to be a nuclear weapon that is no longer in the control of a competent authority or custodian or has been modified from its designated firing sequence. Also call IND.. | DOD |
| improvised rocket - improvised weapon, military or homemade, designed to propel an explosive charge to the target. | DHS |
| improvised weapons - weapons constructed in an improvised manner designed to destroy, incapacitate, harass or distract. | DHS |
| in/on improvised explosive device emplacement - improvised explosive device (IED) emplaced inside or directly on an item, vehicle, building, etc. | DHS |
| incendiary - chemical mixtures which are capable of causing fire. | DHS |
| incident - a crash, natural disaster, work zone activity, special event, or other emergency road user occurrence that adversely affects or impedes the normal flow of traffic. | DHS/ DOT |
| incident - A security-related incident or a visa incident. | DOS/ USAID |

Domestic Support – All Hazards Emergency Management

| | |
|---|-------------|
| incident - An occurrence or event, natural or manmade, that requires a response to protect life or property. Incidents can, for example, include major disasters, emergencies, terrorist attacks, terrorist threats, civil unrest, wildland and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, tsunamis, war-related disasters, public health and medical emergencies, and other occurrences requiring an emergency response. | DHS/ FEMA |
| incident - an occurrence that actually or imminently jeopardizes, without lawful authority, the confidentiality, integrity, or availability of information or an information system; or constitutes a violation or imminent threat of violation of law, security policies, security procedures, or acceptable use policies. | White House |
| incident - an occurrence that actually or imminently jeopardizes, without lawful authority, the integrity, confidentiality, or availability of information on an information system, or actually or imminently jeopardizes, without lawful authority, an information system; | DHS |
| incident - An occurrence, caused by either human action or natural phenomena, that requires action to prevent or minimize loss of life or damage to, loss of, or other risks to property, information, and/or natural resources. See also information operations. | DOD |
| incident - An occurrence, natural or human-caused, that requires a response to protect life or property. | DHHS |
| incident - An occurrence, natural or manmade, that requires a response to protect life or property. | DHHS |
| incident - An occurrence, other than an accident, associated with the operation of an aircraft which affects or could affect the safety of operation. | DOS/ USAID |
| incident - any occurrence or series of occurrences having the same origin, involving one or more vessels, facilities, or any combination thereof, resulting in the discharge or substantial threat of discharge of oil. | DHS |
| incident - either an accident or a deliberate act. | SPACE |
| incident - natural, technological, or human-caused occurrence that may cause harm and that may require action could expand into an emergency predicated upon occurrence, and/or a disaster based on the effectiveness of existing public safety resources. | DHS |
| Incident Action Plan - An oral or written plan containing general objectives reflecting the overall strategy for managing an incident. It may include the identification of operational resources and assignments. It may also include attachments that provide direction and important information for management of the incident during one or more operational periods. Also called IAP. | DHS/ FEMA |
| incident management - management and coordination of prevention, protection, and emergency management activities associated with a specific threat, or an actual occurrence includes, for example, major disasters, emergencies, terrorist attacks, specific threats of terrorist attacks, wildland and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, war-related disasters, public health and medical emergencies, cyber attacks, and any other occurrences. | DHS |
| Incident management - Refers to how incidents are managed across all homeland security activities, including prevention, protection, and response and recovery. | DHS/ FEMA |
| industrial development agency - any agency which is permitted to issue obligations the interest on which is excludable from gross income. | DOI |
| interagency coordination - Within the context of Department of Defense involvement, the coordination that occurs between elements of Department of Defense and participating United States Government departments and agencies for the purpose of achieving an objective. | DOD |

| | |
|--|----------------------------|
| interagency coordination - Within the context of DoD involvement, the coordination that occurs between elements of DoD, and engaged USG organizations for the purpose of achieving an objective. | DOS/ USAID |
| intervention - action performed to direct or influence behavior. | DHS |
| irrigation block - an area of arid or semiarid lands in a project in which, in the judgment of the Secretary, the irrigable lands should be reclaimed and put under irrigation at substantially the same time, and which is designated as an irrigation block by order of the Secretary. | DOI |
| irrigation water - water made available for agricultural purposes from the operation of reclamation project facilities pursuant to a contract with the Secretary. | DOI |
| landholding - total irrigable acreage of one or more tracts of land situated in one or more districts owned or operated under a lease which is served with irrigation water pursuant to a contract with the Secretary. In determining the extent of a landholding the Secretary shall add to any landholding held directly by a qualified or limited recipient that portion of any landholding held indirectly by such qualified or limited recipient which benefits that qualified or limited recipient in proportion to that landholding. | DOI |
| large vehicle-borne improvised explosive device - improvised explosive device (IED) built into any large ground-based vehicle (e.g., dump truck, panel truck, bongo truck, commercial bus, tanker, etc.) and/or serves as the concealment means for a large amount of explosives (2000 lbs.) | DHS |
| law enforcement [activity] - activity directed toward the preservation of public order and safety, including protection of persons and property (real and other) in accordance with a statutory authority includes efforts as authorized by law to engage in or supervise the prevention, detection, investigation, or prosecution of, or the incarceration of any person for any violation of law, and has statutory powers of arrest. | DHS |
| law enforcement agency - an agency of a State, a political subdivision of a State, or a Federally recognized tribe that is authorized by law to supervise the prevention, detection, investigation, or prosecution of any violation of criminal law. | DOT/ Maritime |
| law enforcement agency - an agency of the United States, a State, or a political subdivision of a State, authorized by law or by a government agency to engage in or supervise the prevention, detection, investigation, or prosecution of any violation of criminal law. | DHHS/ HUD/ EPA/ FEMA |
| law enforcement intelligence - information collected, received, processed, exploited, analyzed, produced, or disseminated under law enforcement or regulatory authorities that has tactical, operational, or strategic value. | DHS |
| law enforcement officer - any officer, agent, or employee of the United States, a State, or a political subdivision of a State, authorized by law or by a government agency to engage in or supervise the prevention, detection, investigation, or prosecution of any violation of criminal law. | DHHS/ HUD/ EPA/ FEMA |
| law enforcement officer - position occupied by an employee authorized by statute to enforce the laws of the United States, carry firearms, and make criminal arrests in the performance of their assigned duties includes designated U.S. Coast Guard and other military officers and members. | DHS |
| law enforcement officer position - position occupied by an employee whose primary duties are the investigation, apprehension, or detention of persons suspected or convicted of offenses against the criminal laws of the United States or the protection of officials of the United States against threats to personal safety includes an employee engaged in these activities who is transferred to a supervisory or administrative position; excludes an employee whose primary duties involve maintaining law and order, protecting life and property, guarding against or inspecting for violations of law, or investigating persons other than persons who are suspected or convicted of offenses against the criminal laws of the United States. | DHS |

| | |
|---|------------|
| law enforcement online - virtual private network accredited and approved by the Federal Bureau of Investigation (FBI) for sensitive but unclassified information used by all levels of the law enforcement, criminal justice, and public safety communities to support investigative operations, send notifications and alerts, and provide an avenue to remotely access other law enforcement and intelligence systems and resources. | DHS |
| leased - subjected to a grant of primary possession entered into for a gainful purpose with a determinable fee remaining in the hands of the grantor. With respect to a lease that conveys rights of exploration and development, the exemptions listed in paragraph (1) shall continue with respect to that portion of the leased tract that is used solely for the purposes of exploration. | DOI |
| legitimate law enforcement purpose - function falling within an agency or law enforcement official's sphere of lawful enforcement authority in preventing, detecting, investigating, or prosecuting an offense or a potential offense, or assisting that agency or law enforcement official in such prevention, detection, investigation, or prosecution does not include personal or collateral purposes not related to the official function of the Law Enforcement Official. | DHS |
| liaison officer - A member of the Command Staff responsible for coordinating with representatives from cooperating and assisting agencies or organizations. | DHS/ FEMA |
| liaison officer - A subject matter expert drawn from bureaus/offices already engaged in the Departments domestic emergency response effort but who need not be from the bureau/office leading the IMT. From their assigned national command structure element (e.g., FEMAs National Response Coordination Center (NRCC), the National Operations Center (NOC), etc.), LOFRs provide the Executive Secretary's Crisis Management Support unit (S/ES-O/CMS) with periodic situation reports for inclusion, as appropriate, in briefing materials for the Secretary and Department Principals; or for dissemination, as appropriate, to other bureaus/offices or to U.S. missions overseas. All LOFRs must be trained on the NRF and NIMS per FEMA standards and LOFRs assigned to the NOC must have Top Secret clearances. Also called LOFR. | DOS/ USAID |
| liaison officer - temporary detail of an employee to another agency to coordinate efforts of the parent organization. | DHS |
| light bulb/flash bulb initiator - device used as electric initiator that incorporates an improvised use of the bulb to initiate primary or low explosives. | DHS |
| light sensitive trigger - proximity trigger that senses changes in the amount of light in the environment near the sensor and causes a circuit to be completed, firing the device. | DHS |
| liquid explosive - explosive material in a liquid statenitric acid esters (e.g. nitroglycerin, nitroglycol) and EDGN. | DHS |
| magnetic attachment improvised explosive device employment - improvised explosive device (IED) employment in which the device is attached to the target using magnets. | DHS |
| magnetic contact - magnetically actuated switch and a magnet, typically used on doors and windows to detect opening by changing the position of the magnet. | DHS |
| magnetic trigger - proximity trigger that senses magnetic alterations in the area around the sensor and causes a circuit to be completed, firing the device. | DHS |

| | |
|--|-------------------------------------|
| <p>major disaster - any natural catastrophe (including any hurricane, tornado, storm, high water, wind driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought), or, regardless of cause, any fire, flood, or explosion, in any part of the United States, which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster assistance under this chapter to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.</p> | <p>DHHS/ HUD/ EPA/ FEMA</p> |
| <p>major disaster - natural catastrophe (including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought) or, regardless of cause, any fire, flood, or explosion, in any part of the United States, which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster assistance under the Robert T. Stafford Act to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.</p> | <p>DHS</p> |
| <p>major disaster - Under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, any natural catastrophe (including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought) or, regardless of cause, any fire, flood, or explosion in any part of the United States that, in the determination of the President, causes damage of sufficient severity and magnitude to warrant major disaster assistance under the Stafford Act to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.</p> | <p>DHS/ FEMA</p> |
| <p>major event - planned, non-emergency activity that draws national attention a significant or designated non-emergency activity requiring additional security, such as inaugurations, State of the Union addresses, the Olympics, and international summit conferences.</p> | <p>DHS</p> |
| <p>major hazard - natural or human-induced phenomenon that has the potential for significant and substantial harm to human health, property, activity, and/or animals or the environment.</p> | <p>DHS</p> |
| <p>man-made disaster - human-caused incident resulting in severe property damage, deaths, and/or multiple injuries includes such events as airplane accidents, nuclear disasters, oil spills, structural flaws or failures, war, genocide, terrorist attacks.</p> | <p>DHS</p> |
| <p>mechanical energy source - retained spring in an improvised explosive device (IED) or improved weapon that acts as the energy source.</p> | <p>DHS</p> |
| <p>mechanical timing switch - timing switch (e.g., clock, timer, drip timer) constructed or modified so that physical contact between two parts of the timing device complete an electrical circuit initiating the device.</p> | <p>DHS</p> |
| <p>medical facility - any facility or part thereof which is, or will be, under the jurisdiction of the Secretary for the provision of health-care services (including hospital, nursing home, or domiciliary care or medical services), including any necessary building and auxiliary structure, garage, parking facility, mechanical equipment, trackage facilities leading thereto, abutting sidewalks, accommodations for attending personnel, and recreation facilities associated therewith.</p> | <p>DVA</p> |

| | |
|---|------|
| medical services - medical examination, treatment, and rehabilitative services, plus:(A) Surgical services; (B) Dental services and appliances; ^[1] (C) Optometric and podiatric services; (D) Preventive health services; (E) Noninstitutional extended care services, including alternatives to institutional extended care that the Secretary may furnish directly, by contract, or through provision of case management by another provider or payer; (F) In the case of a person otherwise receiving care or services under this chapter: (i) wheelchairs, artificial limbs, trusses, and similar appliances; (ii) special clothing made necessary by the wearing of prosthetic appliances; and (iii) such other supplies or services as the Secretary determines to be reasonable and necessary; also (G) Travel and incidental expenses. | DVA |
| medical surge - The capability to rapidly expand the capacity of the existing health care system in order to provide triage and subsequent medical care. | DHHS |
| medical surge - The capability to rapidly expand the capacity of the existing healthcare system in order to provide triage and subsequent medical care with the goal of rapidly and appropriately extending care for the injured or ill stemming from the event and the maintenance of continuity of care for non-incident related illness or injury. | DHHS |
| membrane switch - switch incorporating two metal layers, separated by an insulator that functions the IED when perforated or when pressure is applied. | DHS |
| method of emplacement - description of where the device was delivered, used, or employed. | DHS |
| method of employment - description of how the device was delivered, used, or employed. | DHS |
| method of improvised explosive device identification - manner in which a unit located a device, components or improvised weapon via visual observation, working animal, sensor, or human tip. | DHS |
| military chemical, biological, radiological, or nuclear improvised explosive device enhancement - chemical, biological, radiological, or nuclear (CBRN) materials manufactured for military use that is deliberately added as a component to an improvised explosive device (IED). | DHS |
| military operations - those operations involving members of the armed forces assisting in United States Government sponsored training of military personnel of a foreign nation. | DOD |
| military treatment facility - a medical facility under the jurisdiction of the Secretary of a military department. ^[1] | DVA |
| mine - 1. In land mine warfare, a munition placed under, on or near the ground or other surface area and designed to be exploded by the presence, proximity or contact of a person or vehicle. 2. In naval mine warfare, an explosive device laid in the water with the intention of damaging or sinking ships or of deterring shipping from entering an area. See also mine warfare. | DOD |
| mine - explosive munition designed to be placed under, on or near the ground or other surface area and to be actuated by the presence, proximity or contact of an individual , land vehicle, aircraft or boat, including landing craft. | DHS |
| mine warfare - The strategic, operational, and tactical use of mines and mine countermeasures either by emplacing mines to degrade the enemy’s capabilities to wage land, air, and maritime warfare or by countering of enemy-emplaced mines to permit friendly maneuver or use of selected land or sea areas. Also called MIW. | DOD |
| mission command - The conduct of military operations through decentralized execution based upon mission-type orders. | DOD |

| | |
|--|-------------------|
| Mobile Emergency Response Support - Response capability whose primary function is to provide mobile telecommunications capabilities and life, logistics, operational and power generation support required for the on-site management of disaster response activities. MERS support falls into three broad categories - (1) operational support elements; (2) communications equipment and operators; and (3) logistics support. Also called MERS. | DHS/ FEMA |
| modular component health care facility - a health care facility that is constructed - (1) off-site using prefabricated component units for subsequent transport to the destination location; and (2) represents 1 a more economical method for provision of health care facility 2 than a traditionally constructed health care building. | DOI |
| mortar munition - complete munition, comprised of projectile and propellant system, to be fired from the mortar projectile normally comprises fuse, body filled with high explosives (HE) or other filling, obturator, and tail assembly. | DHS |
| multijurisdictional incident - An incident requiring action from multiple agencies that each have jurisdiction to manage certain aspects of the incident. In the Incident Command System, these incidents will be managed under Unified Command. | DHS/ FEMA |
| Munroe effect - focusing of blast energy caused by a hollow or void cut into the surface of an explosive. | DHS |
| National Disaster Medical System - A federally coordinated medical system, augmenting the United States' medical response capability to assist state, local, and tribal authorities in dealing with medical impacts during major peacetime disasters. Also called NDMS. | DOD |
| National Disaster Medical System - A federally coordinated system that augments the Nation's medical response capability. The overall purpose of the NDMS is to establish a single, integrated national medical response capability for assisting State and local authorities in dealing with the medical impacts of major peacetime disasters. NDMS, under Emergency Support Function #8 – Public Health and Medical Services, supports Federal agencies in the management and coordination of the Federal medical response to major emergencies and federally declared disasters. Also called NDMS. | DHS/ FEMA |
| national emergency - a general declaration of emergency with respect to the national defense made by the President or by the Congress. | ODNI/ CIA/ DOD |
| national emergency - A geographic area encompassing the District of Columbia and 11 local jurisdictions in the State of Maryland and the Commonwealth of Virginia. Also called NCR. | DOD |
| National Exercise Program - A Department of Homeland Security-coordinated exercise program based upon the National Planning Scenarios contained which are the National Preparedness Guidelines. This program coordinates and, where appropriate, integrates a 5-year homeland security exercise schedule across Federal agencies and incorporates exercises at the State and local levels. | DHS/ FEMA |
| National Exercise Program - Creates a framework to reinforce the importance of timely integrated planning, decision making, strategic coordination and operational awareness for both domestic and international crises. Coordinates the exercise requirements of HSPD-8 and multiple other Presidential Directives and strategies. Also called NEP. | DOS/ USAID |

| | |
|---|----------------------------|
| <p>National Response Framework - Guides how the Nation conducts all-hazards response. The Framework documents the key response principles, roles, and structures that organize national response. It describes how communities, States, the Federal Government, and private-sector and nongovernmental partners apply these principles for a coordinated, effective national response. And it describes special circumstances where the Federal Government exercises a larger role, including incidents where Federal interests are involved and catastrophic incidents where a State would require significant support. It allows first responders, decision-makers, and supporting entities to provide a unified national response. Also called NRF.</p> | DHS/ FEMA |
| <p>National Response Framework - The guiding principles enabling all levels of domestic response partners to prepare for and provide a unified response to disasters and emergencies. Building on the NIMS, as well as ICS standardization, the NRF's coordinating structures are always in effect for implementation at any level and at any time for local, State, and national emergency or disaster response. For additional information on this document, contact A/OEM. Also called NRF.</p> | DOS/ USAID |
| <p>National Urban Search and Rescue Response System - Specialized teams that locate, rescue (extricate), and provide initial medical stabilization of victims trapped in confined spaces. Also called SAR Response System.</p> | DHS/ FEMA |
| <p>National Voluntary Organizations Active in Disaster - A consortium of more than 30 recognized national organizations active in disaster relief. Their organizations provide capabilities to incident management and response efforts at all levels. During major incidents, National VOAD typically sends representatives to the National Response Coordination Center to represent the voluntary organizations and assist in response coordination. Also called National VOAD.</p> | DHS/ FEMA |
| <p>natural disaster - An emergency situation posing significant danger to life and property that results from a natural cause. See also domestic emergencies.</p> | DOD |
| <p>natural disaster - any hurricane, tornado, storm, flood, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, drought, fire, or other catastrophe in any part of the United States which causes, or which may cause, substantial damage or injury to civilian property or persons.</p> | DHHS/ HUD/ EPA/ FEMA |
| <p>natural disaster - any natural or weather-related event that results in flooding or damage, including earthquakes, hurricanes, volcanoes, tornadoes, and wildfires and fires in the primary residence of an employee.</p> | DOS/ USAID |
| <p>natural disaster - plant disease, insect infestation, drought, fire, freeze, flood, earthquake, lightning, or other occurrence, as determined by the Secretary.</p> | USDA |
| <p>natural disaster - plant disease, insect infestation, drought, fire, freeze, flood, earthquake, lightning, or other occurrence, as determined by the Secretary.</p> | DHS |
| <p>nondegradation standard - the level of measures required to adequately protect, and prevent degradation of, 1 or more natural resources, as determined by the Secretary in accordance with the quality criteria described in handbooks of the Natural Resources Conservation Service.</p> | DOI |
| <p>non-electric initiator - initiator whose functioning is started by non-electric means.</p> | DHS |
| <p>non-lethal weapon - weapon explicitly designed and primarily employed so as to incapacitate personnel or material, while minimizing fatalities, permanent injury to personnel, and undesired damage to property and the environment intended to have one, or both, of the following characteristics: (1) have relatively reversible effects on personnel or materiel. (2) affect objects differently within their area of influence.</p> | DHS |
| <p>non-magnetic attachment improvised explosive device employment - improvised explosive device (IED) employment in which the device is attached to the target using non-magnetic means.</p> | DHS |

| | |
|---|----------------------------|
| non-Service health care practitioner - a practitioner who is not - (A) an employee of the Service; or (B) an employee of an Indian tribe or tribal organization operating a contract or compact under the Indian Self-Determination and Education Assistance Act or an individual who provides health care services pursuant to a personal services contract with such Indian tribe or tribal organization. | DOI |
| non-suicide improvised explosive device employment - improvised explosive device (IED) employment in which the insurgent/terrorist does not intentionally kill himself/herself as part of the attack. | DHS |
| nuclear improvised explosive device enhancement - complete assembly, which in its intended ultimate configuration is capable of producing a nuclear reaction and release of energy that is deliberately added as a component to an improvised explosive device (IED). | DHS |
| nuclear incident - An unexpected incident involving a nuclear weapon, facility, or component, but not constituting a nuclear weapon(s) accident, resulting in any of the following: a. an increase in the possibility of explosion or radioactive contamination; b. errors committed in the assembly, testing, loading, or transportation of equipment, and/or the malfunctioning of equipment and materiel which could lead to an unintentional operation of all or part of the weapon arming and/or firing sequence, or which could lead to a substantial change in yield, or increased dud probability; and c. any act of God, unfavorable environment, or condition resulting in damage to the weapon, facility, or component. | DOD |
| obstacle creation improvised explosive device - improvised explosive device (IED) used to create an obstacle to impede movement or channel movement into a desired location, possibly as part of a complex attack or ambush. | DHS |
| offshore supply vessel - a class of vessel that is limited by tonnage and its employment in the mineral and oil industry and while so employed it is not a small passenger vessel. | DOT/ Maritime |
| omni-directional effect - aspect of main charge configuration where the explosion is omni-directional and expands in all directions. | DHS |
| operation - 1. A sequence of tactical actions with a common purpose or unifying theme. 2. A military action or the carrying out of a strategic, operational, tactical, service, training, or administrative military mission. | DOD |
| operation - any or all undertakings appropriate for management, operation, services, maintenance, security (including the cost of security personnel), or financing in connection with a low-income housing project. The term also means the financing of tenant programs and services for families residing in low-income housing projects, particularly where there is maximum feasible participation of the tenants in the development and operation of such tenant programs and services. | DOD/ DOJ |
| operation - any plant, equipment, facility, position, employment opportunity, production. | DHHS/ HUD/ EPA/ FEMA |
| operational area - An overarching term encompassing more descriptive terms (such as area of responsibility and joint operations area) for geographic areas in which military operations are conducted. Also called OA. See also amphibious objective area; area of operations; area of responsibility; joint operations area; joint special operations area; theater of operations; theater of war. | DOD |
| operational control - The authority to perform those functions of command over subordinate forces involving organizing and employing commands and forces, assigning tasks, designating objectives, and giving authoritative direction necessary to accomplish the mission. Also called OPCON. See also combatant command; combatant command (command authority); tactical control. | DOD |
| operational control - the prevention of all unlawful entries into the United States, including entries by terrorists, other unlawful aliens, instruments of terrorism, narcotics, and other contraband. | DHS |

| | |
|--|-----------|
| operational decontamination - Decontamination carried out by an individual and/or a unit, restricted to specific parts of operationally essential equipment, materiel, and/or working areas, to minimize contact and transfer hazards and to sustain operations. See also decontamination; immediate decontamination; thorough decontamination. | DOD |
| outbreak - same definition as epidemic but is often used for a more limited geographic area. | USAID |
| overhead improvised explosive device emplacement - improvised explosive device (IED) emplaced above the intended target, i.e., hanging from an overpass, on a roof, etc. | DHS |
| pandemic and all-hazards preparedness reauthorization act - Law signed in March 2013 to reauthorize certain programs under the Public Health Service Act and the Federal Food, Drug, and Cosmetic Act with respect to public health security and all-hazards and to amend those acts. Authorizes funding for certain public health and medical preparedness programs; amends the Public Health Service Act to enable the Secretary to authorize state health departments and tribes to temporarily reassign personnel funded under Public Health Service Act programs to respond to a federally declared public health emergency in their jurisdiction; authorizes funding for buying medical countermeasures under Project BioShield; increases the flexibility to support advanced research and development of medical countermeasures; increases flexibility to authorize emergency use of unapproved products and unapproved uses of approved products. | DHHS |
| passive infrared switch - switch that detects movement of a heat source when the change in ambient temperature is detected, the sensor acts as a trigger to initiate the improvised explosive device. | DHS |
| percussion initiator - device that serves as an igniting element usually initiated by mechanical means. | DHS |
| person-borne improvised explosive device - improvised explosive device (IED) worn by an individual, either willing or unwilling, such as a vest, belt, backpack, etc., in which the person houses the whole improvised explosive device (IED) or principle improvised explosive device (IED) components and/or serves as the delivery or concealment means for explosives with an initiating device. | DHS |
| planning section - (1) Incident Command - Section responsible for the collection, evaluation, and dissemination of operational information related to the incident, and for the preparation and documentation of the Incident Action Plan. This Section also maintains information on the current and forecasted situation and on the status of resources assigned to the incident. (2) Joint Field Office - Section that collects, evaluates, disseminates, and uses information regarding the threat or incident and the status of Federal resources. The Planning Section prepares and documents Federal support actions and develops unified action, contingency, long-term, and other plans. | DHS/ FEMA |
| plastic explosive - malleable or flexible explosive at room temperature. | DHS |
| platter charge - explosive used to propel a metal plate towards a target in a manner where the plate forms a type of penetrator. | DHS |
| plunger switch - switch utilizing a shaft where application of pressure on the head of the device will force the shaft downward, functioning the improvised explosive device. | DHS |
| postal improvised explosive device - improvised explosive device (IED) introduced or delivered through a postal system. | DHS |
| post-storm assessment - a scientific assessment produced and certified by the Administrator to determine the magnitude, timing, and spatial variations of winds, rainfall, and storm surges associated with a specific named storm to be used in the COASTAL Formula. | DHS |

| | |
|---|------------|
| powers of self-government - and includes all governmental powers possessed by an Indian tribe, executive, legislative, and judicial, and all offices, bodies, and tribunals by and through which they are executed, including courts of Indian offenses; and means the inherent power of Indian tribes, hereby recognized and affirmed, to exercise criminal jurisdiction over all Indians. | DOI |
| preparedness - Actions that involve a combination of planning, resources, training, exercising, and organizing to build, sustain, and improve operational capabilities. Preparedness is the process of identifying the personnel, training, and equipment needed for a wide range of potential incidents, and developing jurisdiction-specific plans for delivering capabilities when needed for an incident. | DHS/ FEMA |
| preparedness - activities necessary to build, sustain, and improve readiness capabilities to prevent, protect against, respond to, and recover from natural or man-made incidents activities and measures designed or undertaken to prepare for or minimize the effects of a natural or man-made hazard upon the civilian population, to deal with the immediate emergency conditions that would be created by the hazard, and to effectuate emergency repairs to, or the emergency restoration of, vital utilities and facilities destroyed or damaged by the hazard; is a continuous operationally focused process for establishing guidelines, protocols, and standards for planning, training and exercises, personnel qualification and certification, equipment certification, and publication management. | DHS |
| preparedness - the ability to serve Veterans and eligible beneficiaries in times of crisis and to serve as a national asset to the Nation. | DVA |
| pre-positioned resources - Resources moved to an area near the expected incident site in response to anticipated resource needs. | DHS/ FEMA |
| pre-scripted mission assignment - A mechanism used by the Federal Government to facilitate rapid Federal resource response. Pre-scripted mission assignments identify resources or capabilities that Federal departments and agencies, through various Emergency Support Functions (ESFs), are commonly called upon to provide during incident response. Pre-scripted mission assignments allow primary and supporting ESF agencies to organize resources that will be deployed during incident response. Also called PMSA. | DHS/ FEMA |
| pressure release switch - method for activating a device that occurs as a result of reductions in pressure such devices may employ mechanical, pneumatic, or hydraulic systems to signal a detonator that a vehicle or person has released pressure to a pressure plate or similar mechanism | DHS |
| pressure switch - method for activating a device that occurs when an object is used to complete a circuit when pressure is applied in a predetermined direction. | DHS |
| primacy of improvised explosive devices - identifying enemy use of improvised explosive devices as a primary, secondary or tertiary form of attack, independent of intended outcome. | DHS |
| primary fusion center - fusion center designated by a state's Governor as the primary fusion center within that state. | DHS |
| primary improvised explosive device - first of two or more improvised explosive devices (IED)s encountered or initiated. | DHS |
| private voluntary organization - a not-for-profit entity that- (A) engages in and supports activities of an economic or social development or humanitarian nature for citizens in foreign countries; and (B) is incorporated as such under the laws of the United States, including any of its states, territories or the District of Columbia, or of a foreign country. | DOS/ USAID |

| | |
|--|-------|
| private voluntary organization - a not-for-profit, nongovernmental organization (in the case of a United States organization, an organization that is exempt from Federal income taxes that receives funds from private sources, voluntary contributions of money, staff time, or in-kind support from the public, and that is engaged in or is planning to engage in voluntary, charitable, or development assistance activities (other than religious activities). | USDA |
| Private Voluntary Organization - See U.S. Private Voluntary Organization, International Private Voluntary Organization, and Local Private Voluntary Organization. Also called PVO. | USAID |
| projected improvised explosive device - improvised explosive device (IED) delivers the main charge through the air to its target. | DHS |
| projectile - object, projected by an applied exterior force and continuing in motion by virtue of its own inertia projectiles can have a variety of fillers including explosives or chemicals. | DHS |
| propellant - explosive material that normally functions by burning to produce a controlled release of gasses used for propulsion purposes. | DHS |
| protection - actions or measures taken to cover or shield from exposure, injury, or destruction includes such actions and measures needed to ensure protective reactions do not unnecessarily interfere with citizen's freedoms and liberties. | DHS |
| protective action - step taken before, during, or after an incident designed to prevent, minimize, or contain impact of incident methods for selecting the best actions within the time constraints of a fast-moving emergency; measures describe preparations taken before an emergency situation to ensure implementation is possible during an emergency; includes decision-making and implementation issues to rapidly reduce the effects of an emergency situation or contamination. | DHS |
| proxy bomber - person (unwitting or coerced) who acts as a means of delivery of an IED (suicide bomber). | DHS |
| psychological consequence - effect of an incident, event, or occurrence on the mental or emotional state of persons or groups resulting in a change in perception and/or behavior. | DHS |
| pull switch - switch that functions when an individual applies tension to a firing mechanism – such as pulling a spring. | DHS |
| purpose of improvised explosive device - immediate or direct tactical effect of the IED. | DHS |
| pyrotechnic delay - pyrotechnic device added to a firing system which transmits the ignition flame after a predetermined delay. | DHS |
| pyrotechnic timing switch - timing switch using a burning fuse with a known burn rate to start the initiation train. | DHS |
| radiation detection equipment - any technology that is capable of detecting or identifying nuclear and radiological material or nuclear and radiological explosive devices. | DHS |
| radiological dispersal device - An improvised assembly or process, other than a nuclear explosive device, designed to disseminate radioactive material to cause destruction, damage, or injury. Also called RDD. | DOD |
| radiological dispersal device - improvised assembly or process, other than a nuclear explosive device, designed to disseminate radioactive material in order to cause destruction, damage, or injury. | DHS |
| radiological exposure device - A radioactive source placed to cause injury or death. Also called RED. | DOD |
| radiological hazard - Ionizing radiation that can cause damage, injury, or destruction from either external irradiation or due to radiation from radioactive materials within the body. | DOD |

| | |
|--|-------------|
| radiological improvised explosive device enhancement - radioactive materials that cause casualties or restrict the use of terrain when dispersed by an explosive charge that is deliberately added as a component to an improvised explosive device (IED). | DHS |
| range condition - the quality of the land reflected in its ability in specific vegetative areas to support various levels of productivity in accordance with range management objectives and the land use planning process, and relates to soil quality, forage values (whether seasonal or year round), wildlife habitat, watershed and plant communities, the present state of vegetation of a range site in relation to the potential plant community for that site, and the relative degree to which the kinds, proportions, and amounts of vegetation in a plant community resemble that of the desired community for that site. | DOI |
| range improvement - any activity or program on or relating to rangelands which is designed to improve production of forage; change vegetative composition; control patterns of use; provide water; stabilize soil and water conditions; and provide habitat for livestock and wildlife. The term includes, but is not limited to, structures, treatment projects, and use of mechanical means to accomplish the desired results. | DOI |
| rangelands or public rangelands - lands administered by the Secretary of the Interior through the Bureau of Land Management or the Secretary of Agriculture through the Forest Service in the sixteen contiguous Western States on which there is domestic livestock grazing or which the Secretary concerned determines may be suitable for domestic livestock grazing. | DOI |
| readiness - condition of being prepared and capable to act or respond as required. | DHS |
| readiness - The ability of military forces to fight and meet the demands of assigned missions. See also national military strategy. | DOD |
| readiness - the ability to serve Veterans and eligible beneficiaries now and on a day-to-day routine basis. | DVA |
| recovery - 1. In air (aviation) operations, that phase of a mission that involves the return of an aircraft to a land base or platform afloat. 2. The retrieval of a mine from the location where emplaced. 3. In personnel recovery, actions taken to physically gain custody of isolated personnel and return them to friendly control. | DOD |
| recovery - The development, coordination, and execution of service- and site-restoration plans; the reconstitution of government operations and services; individual, private-sector, nongovernmental, and public-assistance programs to provide housing and to promote restoration; long-term care and treatment of affected persons; additional measures for social, political, environmental, and economic restoration; evaluation of the incident to identify lessons learned; postincident reporting; and development of initiatives to mitigate the effects of future incidents. | DHS/ FEMA |
| recovery - those capabilities necessary to assist communities affected by an incident to recover effectively, including, but not limited to, rebuilding infrastructure systems; providing adequate interim and long-term housing for survivors; restoring health, social, and community services; promoting economic development; and restoring natural and cultural resources. | White House |
| recovery - To restore USAID programs/activities from a contingency state to their usual state under normal operating conditions (the rebuilding phase). | USAID |
| recovery - development, coordination, and execution of service- and site-restoration plans. | DHS |
| request for assistance - A request based on mission requirements and expressed in terms of desired outcome formally asking the Department of Defense to provide assistance within the United States or United States territories to a local, state, tribal, or other federal agency. Also called RFA. | DOD |

| | |
|---|-------------|
| reservations - national forests, tribal lands embraced within Indian reservations, military reservations, and other lands and interests in lands owned by the United States, and withdrawn, reserved, or withheld from private appropriation and disposal under the public land laws; also lands and interests in lands acquired and held for any public purposes; but shall not include national monuments or national parks. | DOI |
| response - Immediate actions to save lives, protect property and the environment, and meet basic human needs. Response also includes the execution of emergency plans and actions to support short-term recovery. | DHS/ FEMA |
| response - those capabilities necessary to save lives, protect property and the environment, and meet basic human needs after an incident has occurred. | White House |
| response - immediate actions to save lives, protect property and the environment, and meet basic human needs includes the execution of emergency plans and actions to support short-term recovery. | DHS |
| rules of engagement - Directives issued by competent military authority that delineate the circumstances and limitations under which United States forces will initiate and/or continue combat engagement with other forces encountered. Also called ROE. See also law of war. | DOD |
| safe-to-arm switch - device used to arm the improvised explosive device (IED) to ensure that the emplacer can safely plant the improvised explosive device (IED) and leave the location. | DHS |
| scenic easement - the right to control the use of land (including the air space above such land) within the authorized boundaries of a component of the wild and scenic rivers system, for the purpose of protecting the natural qualities of a designated wild, scenic or recreational river area, but such control shall not affect, without the owner's consent, any regular use exercised prior to the acquisition of the easement. For any designated wild and scenic river, the appropriate Secretary shall treat the acquisition of fee title with the reservation of regular existing uses to the owner as a scenic easement for purposes of this chapter. Such an acquisition shall not constitute fee title ownership. | DOI |
| sea mine - explosive device laid in the water with the intention of damaging or sinking ships or of deterring shipping from entering an area does not include devices attached to the bottom of ships or to harbor installations by personnel operating underwater. | DHS |
| secondary improvised explosive device - additional improvised explosive device (IED) emplaced in the target area to attack individuals or vehicles after the initial event. | DHS |
| shaped charge - main charge configuration incorporating explosives shaped so as to concentrate its explosive force utilizing the Munroe effect in a particular direction in order to cut or penetrate (i.e. a plasma jet). | DHS |
| shelter-in-place - An action taken to cause building occupants to move from their current location (e.g., their office) to previously designated locations within a building as a safety precaution, while a dangerous situation is impacting the outside perimeter of the building. A direction to SIP may occur with little or no warning. Also called SIP. | DOS/ USAID |
| shelter-in-place - Taking cover and remaining in the current location during a crisis (sometimes referred to as stand fast) until either receiving an all-clear signal, instructions to change locations, or making a decision to leave the current location based on training, experience, and/or threat analysis. Instructions on when/how to decide to remain sheltering in place or to leave for a different location is a post Emergency Action Committee (EAC) decision and can be added to the Emergency Action Plan (EAP). SIP can also apply to residences. Also called SIP. | DOS/ USAID |
| shelter-in-place - taking emergency refuge within the nearest designated safe area until notification or determination that the situation has been resolved a precaution intended to keep people safe while remaining indoors where the shelter area is preferably a small interior room with no windows and may require efforts of sealing all cracks or openings with tape or other materials | DHS |

| | |
|---|----------------------------|
| short-term recovery - A process of recovery that is immediate and overlaps with response. It includes such actions as providing essential public health and safety services, restoring interrupted utility and other essential services, reestablishing transportation routes, and providing food and shelter for those displaced by a disaster. Although called short term, some of these activities may last for weeks. | DHS/ FEMA |
| smallpox emergency response plan or plan - a response plan detailing actions to be taken in preparation for a possible smallpox-related emergency during the period prior to the identification of an active case of smallpox either within or outside the United States. | DHHS |
| squib/ignitor - item that causes the deflagration of low explosives, can be either electric or non-electric. | DHS |
| standard operating procedure - The specific references made in this subchapter to auxiliary and supplementary material that further details procedures and processes that apply to the FS assignment process. Also called SOP. | DOS/ USAID |
| standard operating procedure - A set of instructions applicable to those features of operations that lend themselves to a definite or standardized procedure without loss of effectiveness. Also called SOP; standing operating procedure. | DOD |
| standard operating procedure - Complete reference document or an operations manual that provides the purpose, authorities, duration, and details for the preferred method of performing a single function or a number of interrelated functions in a uniform manner. Also called SOP. | DHS/ FEMA |
| state utility - a State or any political subdivision of a State, or any agency, authority, or instrumentality of any one or more of the foregoing, or a corporation that is wholly owned, directly or indirectly, by any one or more of the foregoing, competent to carry on the business of developing, transmitting, utilizing, or distributing power. | DOI |
| submunition - munition that, to perform its task, separates from a parent munition. | DHS |
| substantially damaged structure - a structure covered by a contract for flood insurance that has incurred damage for which the cost of repair exceeds an amount specified in any regulation promulgated by the Administrator, or by a community ordinance, whichever is lower. | DHHS/ HUD/ EPA/ FEMA |
| subsurface improvised explosive device emplacement - improvised explosive device (IED) emplaced under the surface or below the intended target, i.e. buried, in a culvert, underwater. | DHS |
| suicide improvised explosive device employment - improvised explosive device (IED) initiated by an insurgent/terrorist at a time of his/her choosing in which the operator intentionally kills himself/herself as part of the attack, or to deny his/her capture. | DHS |
| suicide vehicle-borne improvised explosive device - improvised explosive device (IED) explosive intentionally initiated by the vehicle's occupant, or by secondary RC switch. | DHS |
| support agency - See Emergency Support Function (ESF) Support Agency. | DHS/ FEMA |
| support annexes - Describe how Federal departments and agencies, the private sector, volunteer organizations, and nongovernmental organizations coordinate and execute the common support processes and administrative tasks required during an incident. The actions described in the Support Annexes are not limited to particular types of events, but are overarching in nature and applicable to nearly every type of incident. | DHS/ FEMA |

| | |
|---|-----------|
| supported commander - 1. The commander having primary responsibility for all aspects of a task assigned by Chairman of the Joint Chiefs of Staff Instruction 3110.01J, (U) 2015 Joint Strategic Capabilities Plan (JSCP), or other joint planning authority. 2. In the context of joint planning, the commander who prepares operation plans or operation orders in response to requirements of the Chairman of the Joint Chiefs of Staff. 3. In the context of a support command relationship, the commander who receives assistance from another commander’s force or capabilities, and who is responsible for ensuring that the supporting commander understands the assistance required. See also support; supporting commander. | DOD |
| supporting commander - 1. A commander who provides augmentation forces or other support to a supported commander or who develops a supporting plan. 2. In the context of a support command relationship, the commander who aids, protects, complements, or sustains another commander’s force and who is responsible for providing the assistance required by the supported commander. See also support; supported commander. | DOD |
| surface improvised explosive device emplacement - improvised explosive device (IED) emplaced directly on the ground. | DHS |
| surge - a significant increase in imports over the trend for a recent representative base period. | DHS |
| surge - to increase the amount of or degree of | DHS |
| surge capacity - Space required to manage a sudden, unexpected increase in personnel that would otherwise severely challenge or exceed the current capacity of the existing office space. | USAID |
| surge capacity - the ability to rapidly and substantially increase the provision of search and rescue capabilities, food, water, medicine, shelter and housing, medical care, evacuation capacity, staffing (including disaster assistance employees), and other resources necessary to save lives and protect property during a catastrophic incident. | DHS |
| switch - device for making, breaking, or changing a connection. | DHS |
| tactical control - The authority over forces that is limited to the detailed direction and control of movements or maneuvers within the operational area necessary to accomplish missions or tasks assigned. Also called TACON. See also combatant command; combatant command (command authority); operational control. | DOD |
| tactical level - indication of scale of significance for actions or plans that involve deployment and use of assets to accomplish specific objectives. | DHS |
| tactics - Deploying and directing resources on an incident to accomplish the objectives designated by the strategy. | DHS/ FEMA |
| tactics - The employment and ordered arrangement of forces in relation to each other. See also procedures; techniques. | DOD |
| tactics, techniques, and procedures development - using the lessons learned from an IED attack to refine and improve the tools and methods used during all missions in which an IED may occur (e.g., convoys, tactical suppression efforts, ISR, C-IED missions, etc.) | DHS |
| tactics, techniques, and procedures identification - improvised explosive device (IED) incidents primarily intended to cause a reaction by forces in an effort to learn and understand employed tactics. | DHS |
| tension release trigger - victim operated trigger that, when tension is released – such as when a taut wire or cord is cut or broken – releases a spring-loaded firing pin or closes electrical contacts initiating the device. | DHS |
| tension/pull trigger - victim operated device that triggers an explosion when tension is applied to a firing mechanism – such as pulling a trip wire causing an action that releases a firing pin or activates an electrical or electronic switch. | DHS |

| | |
|---|-------------------|
| territorial instrumentality - any political subdivision, public agency, instrumentality - including any instrumentality that is also a bank - or public corporation of a territory, and this term should be broadly construed to effectuate the purposes of this chapter. | DOI |
| tertiary improvised explosive device - additional improvised explosive device (IED) emplaced in the target area to attack individuals or vehicles after the initial and secondary events. | DHS |
| thorough decontamination - Decontamination carried out by a unit to reduce contamination on personnel, equipment, materiel, and/or working areas equal to natural background or to the lowest possible levels, to permit the partial or total removal of individual protective equipment and to maintain operations with minimum degradation. See also immediate decontamination; operational decontamination. | DOD |
| tilt switch - device that allows voltage to flow to the output wires after a conductive material is moved enough (up/down, left/right) to flow onto the switch contacts, completing the circuit (mercury, ball bearing in a glass tube). | DHS |
| time fuse/safety fuse initiator - pyrotechnic contained in a flexible and weather-proof sheath burning at a timed and constant rate; used to transmit a flame to the detonator or a low explosive charge with a predetermined delay. | DHS |
| time mechanical switch - time switch constructed or modified so that physical contact between two parts of the timing mechanism complete an electrical circuit. | DHS |
| transition - A shift in the political situation at a critical juncture in a nation's history. Three kinds of transition situations (these are basic conceptual frameworks for defining transitions - to show basic differences in the environments in which we might work) that OTI works in: Transition to Democracy; Post-Conflict Transition; Transitional Political Crisis (potential backsliding countries) | DOS/ USAID |
| transition - assignment of ownership and operation/maintenance of a product or system transfer of responsibility for a product or system from a research and development organization to a receiving activity, with subsequent integration of the product or system into the receiving activity's operations. | DHS |
| trembler switch - device that allows voltage to flow to the output wires after two metal parts make contact, completing the circuit. | DHS |
| tribal organization - (A) the recognized governing body of an Indian tribe; and (B) any legally established organization of Indians that is controlled, sanctioned, or chartered by the governing body or democratically elected by the adult members of the Indian community to be served by the organization. | DOI |
| tribal organization - (i) the recognized governing body of any Indian tribe, band, nation, pueblo, or other organized community, including a Native village; or (ii) in connection with any personnel action, any local school board to which the governing body has delegated the authority to grant a waiver with respect to a personnel action. | DOI |
| tribe - any Indian or Alaska Native tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian tribe as defined in the Federally Recognized [Indian] Tribe List Act of 1994. | ODNI/ CIA/ DOD |
| under vehicle improvised explosive device employment - improvised explosive device (IED) employment that is placed on the underside of a vehicle (using string, tape, magnet, etc. as a form of attachment). | DHS |
| underbelly improvised explosive device employment - improvised explosive device (IED) employment in which the device targets the underside of a vehicle, using large amounts of explosives buried to deliberately defeat armor (can include conventional land mines). | DHS |

| | |
|---|------------|
| unexploded ordnance - explosive ordnance which has been primed, fused, armed or otherwise prepared for action, and remains unexploded either by malfunction or design or for any other cause, which has been fired, dropped, launched, projected, or placed in such a manner as to constitute a hazard to operations, installations, personnel, or material. | DHS |
| unexploded ordnance - military munitions that - (A) have been primed, fused, armed, or otherwise prepared for action; (B) have been fired, dropped, launched, projected, or placed in such a manner as to constitute a hazard to operations, installations, personnel, or material; and (C) remain unexploded, whether by malfunction, design, or any other cause. | DOD |
| unity of command - Principle of management stating that each individual involved in incident operations will be assigned to only one supervisor. | DHS/ FEMA |
| unity of command - The operation of all forces under a single responsible commander who has the requisite authority to direct and employ those forces in pursuit of a common purpose. | DOD |
| unity of command - The vesting of a single commander with the requisite authority to direct and coordinate the actions of all forces employed toward a common objective. Unity of command obtains the unity of effort that is essential to the decisive application of all available combat power. Subordinates are then focused on attaining the overall objectives as communicated from a single commander. In turn, this fosters freedom of action, decentralized control, and initiative. Hierarchical organization principle that no subordinate should report to more than one boss. | DOS/ USAID |
| unity of effort - 1. Coordination and cooperation toward common objectives, even if the participants are not necessarily part of the same command or organization - the product of successful unified action. (DOD) A cooperative concept, which refers to coordination and communication among USG organizations toward the same common goals for success; in order to achieve unity of effort, it is not necessary for all organizations to be controlled under the same command structure, but it is necessary for each agency's efforts to be in harmony with the short- and long-term goals of the mission. Unity of effort is based on four principles: Common understanding of the situation. Common vision or goals for the R&S mission. Coordination of efforts to ensure continued coherency. Common measures of progress and ability to change course if necessary. | DOS/ USAID |
| unity of effort - Coordination and cooperation toward common objectives, even if the participants are not necessarily part of the same command or organization, which is the product of successful unified action. | DOD |
| unity of effort - harmonizing of activities among multiple organizations involves working toward a similar objective while respecting the chain of command and authorities of each participating organization. | DHS |
| unity of purpose - 1. Coordination and cooperation among civilian and military actors from one or more nations toward mutually agreed, common objectives or outcomes. 2. Authorities, institutions, processes, and other means that can be used to direct all elements of national power in pursuit of a common understanding of the situation and common vision or goals for the mission. | DOS/ USAID |
| unknown bulk explosive - unidentified explosive found in the main charge of an improvised explosive device (IED) (after exploitation, it will be categorized). | DHS |
| VA health care facility - a facility under the jurisdiction of the Veterans Health Administration of the Department of Veterans Affairs. | DVA |
| vehicle-borne improvised explosive device - A device placed or fabricated in an improvised manner on a vehicle incorporating destructive, lethal, noxious, pyrotechnic, or incendiary chemicals and designed to destroy, incapacitate, harass, or distract. Also called VBIED. | DOD |

| | |
|--|-----|
| vehicle-borne improvised explosive device - improvised explosive device (IED) delivered by any small ground-based vehicle (e.g., passenger vehicle, motorcycle, moped, bicycle, etc.) and/or serves as the concealment means for explosives with an initiating device | DHS |
| victim operated switch - switch that is activated by the actions of an unsuspecting person relies on the target to carrying out some form of action that will cause the device to function. | DHS |
| water-borne improvised explosive device - improvised explosive device (IED) delivered by floating, drifting, anchored, or propelled on or below the water and/or serves as the concealment means for explosives with an initiating device. | DHS |

DOMESTIC SUPPORT – HOMELAND SECURITY

Terms and Definitions – Includes terms related to terrorism, intelligence, cybersecurity, critical infrastructure protection, national all-hazard emergency planning and response to include civil-military coordination.

| TERMS AND DEFINITIONS | SOURCE |
|---|------------------|
| act of piracy - any act of aggression, search, restraint, depredation, or seizure attempted against a vessel of the United States by an individual not authorized by the United States, a foreign government, or an international organization recognized by the United States to enforce law on the high seas. | DOT/ Maritime |
| act of terrorism - any act that the Secretary determines meets the requirements under subparagraph (B), as such requirements are further defined and specified by the Secretary. (B) An act meets the requirements of this subparagraph if the act - (i) is unlawful; ^{SEP} (ii) causes harm to a person, property, or entity, in the United States, or in the case of a domestic United States air carrier or a United States-flag vessel (or a vessel based principally in the United States on which United States income tax is paid and whose insurance coverage is subject to regulation in the United States), in or outside the United States; and (iii) uses or attempts to use instrumentalities, weapons or other methods designed or intended to cause mass destruction, injury or other loss to citizens or institutions of the United States. | DHS |
| acute radiation dose - Total ionizing radiation dose received at one time and over a period so short that biological recovery cannot occur. | DOD |
| adaptation strategy - a land use and management strategy that can be used - (A) to increase the sequestration capabilities of covered greenhouse gases of any ecosystem; or (B) to reduce the emissions of covered greenhouse gases from any ecosystem. | DOD/ DOJ |
| administrative control - Direction or exercise of authority over subordinate or other organizations in respect to administration and support. Also called ADCON. | DOD |
| administrative control - Special handling, transmission, mailing, safeguards, storage, and/or destruction provided to sensitive but unclassified (SBU) material. See the definition for SBU. | DOS/ USAID |
| adversary - A party acknowledged as potentially hostile to a friendly party and against which the use of force may be envisaged. | DOD |
| adversary - person, group, organization, or government that conducts or has the intent to conduct detrimental activities. | DHS |
| agent - a nuclear, biological, chemical, or radiological substance that causes agricultural disease or the adulteration of products regulated by the Secretary of Agriculture under any provision of law. | USDA |
| agent - any person charged with responsibility for the operation of all or a part of a coal or other mine or the supervision of the miners in a coal or other mine. | DOL |
| agricultural biosecurity - protection from an agent that poses a threat to - (A) plant or animal health; (B) public health as it relates to the adulteration of products regulated by the Secretary of Agriculture under any provision of law that is caused by exposure to an agent; or (C) the environment as it relates to agriculture facilities, farmland, and air and water within the immediate vicinity of an area associated with an agricultural disease or outbreak. | USDA |

| | |
|---|---------------|
| agroterrorist act - an act that - (A) causes or attempts to cause - (i) damage to agriculture; or (ii) injury to a person associated with agriculture; and (B) is committed or appears to be committed with the intent to - (i) intimidate or coerce a civilian population; or (ii) disrupt the agricultural industry in order to influence the policy of a government by intimidation or coercion. | USDA |
| alien - any person not a citizen or national of the United States. | DHS |
| alien - any person who is not a citizen or national of the United States. | DOJ |
| alien - person not a citizen or national of the United States. | DHS |
| all crimes - approach that incorporates terrorism and other high-risk threats into the existing crime-fighting framework to ensure that possible precursor crimes are screened and analyzed for linkages to larger-scale terrorist or other crimes recognizes that there is a nexus between types of criminal activity (for example; illegal drug operations, gangs, money laundering, fraud, identity theft, and terrorism). | DHS |
| all-source intelligence - 1. Intelligence products and/or organizations and activities that incorporate all sources of information in the production of finished intelligence. 2. In intelligence collection, a phrase that indicates that in the satisfaction of intelligence requirements, all collection, processing, exploitation, and reporting systems and resources are identified for possible use and those most capable are tasked. | DOD |
| American homeland - the United States. | DHS |
| annunciator - device that signals a change of protection zone status in a security system and provides status information about a circuit, condition, system, or location normally contains one or more indicator lamps, alphanumeric displays, computer monitors, or other equivalent means of identification. | DHS |
| antiterrorism - Defensive measures used to reduce the vulnerability of individuals and property to terrorist acts, to include rapid containment by local military and civilian forces. Also called AT. See also counterterrorism; terrorism. | DOD |
| area command - A command that is composed of elements of one or more of the Services, organized and placed under a single commander and designated to operate in a specific geographical area. See also command. | DOD |
| area command - An organization established to oversee the management of multiple incidents that are each being handled by a separate Incident Command System organization or to oversee the management of a very large or evolving incident that has multiple incident management teams engaged. An agency administrator/executive or other public official with jurisdictional responsibility for the incident usually makes the decision to establish an Area Command. An Area Command is activated only if necessary, depending on the complexity of the incident and incident management span-of-control considerations. | DHS/ FEMA |
| area of operations - An operational area defined by the joint force commander for land and maritime forces that should be large enough to accomplish their missions and protect their forces. Also called AO. See also area of responsibility; joint operations area; joint special operations area. | DOD |

| <p>imminent danger to the health and safety of the public - the existence of any condition or practice, or any violation of a permit or other requirement of this chapter in a surface coal mining and reclamation operation, which condition, practice, or violation could reasonably be expected to cause substantial physical harm to persons outside the permit area before such condition, practice, or violation can be abated. A reasonable expectation of death or serious injury before abatement exists if a rational person, subjected to the same conditions or practices giving rise to the peril, would not expose himself or herself to the danger during the time necessary for abatement.</p> | <p>DOI</p> |
| <p>inadmissible alien - alien that has not been inspected and admitted to the United States who is subject to the grounds of removal specified in the Immigration and Nationality Act.</p> | <p>DHS</p> |
| <p>incitement of terrorism - Incitement with intent to cause bodily harm renders an alien inadmissible under INA if he or she has incited terrorist activity under circumstances indicating an intention to cause death or serious bodily harm. Incited in the context of INA is speech that induces or otherwise moves another person to undertake terrorist activity. Normally speech will not rise to the level of inciting unless there is a clear link between the speech and an actual effort to undertake the terrorist activity. It connotes speech that is not merely an expression of views but that directs or induces action, typically in a volatile situation. The applicant may have incited terrorist activity even if a terrorist attack does not actually occur (e.g., because an attempt to commit such activity was thwarted). An applicant who has incited terrorist activity must also have acted in circumstances indicating an intention to cause death or serious bodily harm to be inadmissible under INA. In other words, the aliens speech must not only have induced others to undertake terrorist activity, but it must also have been made with the specific intent that such activity would result in death or serious bodily injury. Incitement and the requisite intent to cause bodily harm could be inferred in the following situations - (a) Widespread opposition to Country A's policies and actions lead to a series of protests, some violent, outside Country As embassy in Country B. The applicant goes to the embassy, stands on a box, and shouts to the crowd to join him in standing up to Country A and humiliating it. Shortly afterwards, when he sees an embassy vehicle approaching, he yells - Don't let them in! Make them pay for what they have done! The crowd blocks the car and removes occupants (including a diplomat working at Country As embassy), from the car, beating them severely and taking them hostage. Analysis - Diplomatic hostage-taking and violent attacks on diplomats are terrorist activities. Given the aliens urging the crowd to stop the embassy vehicle and make them pay, you would have reasonable ground to believe that the applicants speech incited terrorist activity. The aliens make them pay statement, when viewed against the backdrop of previous violent protests and his general comments about standing up to Country A and humiliating it, would provide you with reasonable ground to believe that the applicant intended to cause death or serious bodily harm. (b) The applicant is an ardent nationalist whose opinions voiced to a particular audience regularly blame foreigners for his country's problems and who argues that the only solution to these problems is that foreigners should be driven out of the country. Press reports say that some of those in the targeted audience have been purchasing weapons and seeking to obtain and manufacture explosives. Police notify the applicant or those associated with the applicant that they are investigating several of those in the targeted audience for weapons-related offenses. At the end of a week of particularly strong anti-foreign sentiment, the applicant gives a special speech entitled A Call to Action. With the knowledge that those under investigation are in the audience, the applicant begins his speech with - The time has come for action! He then reiterates throughout his speech that the only solution to the country's problems is to purge our great land of these foreigners once and for all through whatever means necessary. Shortly thereafter, some of those in the target audience detonate a truck bomb outside a restaurant frequented by foreign nationals, killing several foreign nationals and injuring many restaurant employees. Analysis - The use of any explosive with intent to endanger, directly or indirectly, the safety of one or more individuals or to cause substantial damage to property is a terrorist activity. In the example, the applicant helps foster anti-foreign sentiments and then, during a particularly tense period, urges students to act to drive foreigners from the country through whatever means necessary. Under these circumstances, you would have reasonable ground to believe that the applicants speech incited terrorist activity. The fact that the applicant knew that several students likely had access to weapons and/or explosives and that those students were in attendance at his special lecture would provide you with reasonable ground to believe that the applicant intended to cause death or serious bodily harm.</p> | <p>DOS/ USAID</p> |

| <p>interoperability - 1. The ability to act together coherently, effectively, and efficiently to achieve tactical, operational, and strategic objectives. 2. The condition achieved among communications-electronics systems or items of communications electronics equipment when information or services can be exchanged directly and satisfactorily between them and/or their users.</p> | <p>DOD</p> |
| <p>interoperability - a system that enables program benefits in the form of an electronic benefit transfer card to be redeemed in any State.</p> | <p>USDA</p> |
| <p>interoperability - ability of systems, personnel, and equipment to provide and receive functionality, data, information and/or services to and from other systems, personnel, and equipment, between both public and private agencies, departments, and other organizations, in a manner enabling them to operate effectively together in the realm of information technology, refers to the ability of computer different systems or databases to exchange data in a commonly understood format and the ability to act upon such data without manual intervention.</p> | <p>DHS</p> |
| <p>interoperability - The ability of emergency management/response personnel to interact and work well together. In the context of technology, interoperability also refers to having an emergency communications system that is the same or is linked to the same system that a jurisdiction uses for nonemergency procedures, and that effectively interfaces with national standards as they are developed. The system should allow the sharing of data with other jurisdictions and levels of government during planning and deployment.</p> | <p>DHS/ FEMA</p> |

| | |
|--|------------------------|
| <p>Interoperability - The ability of systems, units, or forces to provide services to and to accept services from other systems, units, or forces, and to enable the services to operate effectively together. As applied to the Department of Defense only, the condition achieved among communications-electronics systems or items of communications-electronics equipment when information or services can be exchanged directly and satisfactorily between them and/ or their users. The degree of interoperability should be defined when referring to specific cases.</p> | <p>DOS/ USAID</p> |
| <p>interoperability - the ability of the program to electronically share reported information, including each of the required report components, with another State if the information concerns either the dispensing of a controlled substance to an ultimate user who resides in such other State, or the dispensing of a controlled substance prescribed by a practitioner whose principal place of business is located in such other State.</p> | <p>DHHS</p> |
| <p>interoperability - the ability to communicate and exchange data accurately, effectively, securely, and consistently with different information technology systems, software applications, and networks in various settings, and exchange data such that clinical or operational purpose and meaning of the data are preserved and unaltered.</p> | <p>DHHS</p> |
| <p>interoperability - to the ability of two or more systems or components to exchange information and to use the information that has been exchanged.</p> | <p>White House</p> |
| <p>interoperable - the ability of civil U.S. and foreign space-based positioning, navigation, and timing services to be used together to provide better capabilities at the user level than would be achieved by relying solely on one service or signal.</p> | <p>White House</p> |
| <p>intrusion assessments - actions taken under the intrusion assessment plan to identify and remove intruders in agency information systems.</p> | <p>DHS</p> |
| <p>Joint Task Force - A group of joint warfighters that is designated by the secretary of defense, a combatant commander, a sub-unified commander, or an existing joint task force commander. Also called JTF.</p> | <p>DOS/ USAID</p> |
| <p>joint task force - A joint force that is constituted and so designated by the Secretary of Defense, a combatant commander, a subunified commander, or an existing joint task force commander. Also called JTF.</p> | <p>DOD</p> |
| <p>joint task force - Based on the complexity and type of incident, and the anticipated level of Department of Defense (DOD) resource involvement, DOD may elect to designate a JTF to command Federal (Title 10) military activities in support of the incident objectives. If a JTF is established, consistent with operational requirements, its command and control element will be co-located with the senior on-scene leadership at the Joint Field Office (JFO) to ensure coordination and unity of effort. The co-location of the JTF command and control element does not replace the requirement for a Defense Coordinating Officer (DCO)/Defense Coordinating Element as part of the JFO Unified Coordination Staff. The DCO remains the DOD single point of contact in the JFO for requesting assistance from DOD. Also called JTF.</p> | <p>DHS/ FEMA</p> |
| <p>joint worldwide intelligence communications system - The sensitive compartmented information portion of the Defense Information Systems Network, which incorporates advanced networking technologies that permit point-to-point or multipoint information exchange involving voice, text, graphics, data, and video teleconferencing. Also called JWICS.</p> | <p>DOD</p> |
| <p>joint worldwide intelligence communications system - network designed to meet the requirements for secure (TS/SCI) multimedia intelligence communications worldwide.</p> | <p>DHS</p> |
| <p>jurisdiction - A range or sphere of authority. Public agencies have jurisdiction at an incident related to their legal responsibilities and authority. Jurisdictional authority at an incident can be political or geographical (e.g., Federal, State, tribal, and local boundary lines) or functional (e.g., law enforcement, public health).</p> | <p>DHS/ FEMA</p> |

|--|----------------|
| preventive medicine - The anticipation, communication, prediction, identification, prevention, education, risk assessment, and control of communicable diseases; illnesses; and exposure to endemic, occupational, and environmental threats. Also called PVNTMED. | DOD |
| primary mission essential function - function that needs to be continuously performed during an event or resumed within 12 hours of an event, and that need to be maintained for up to 30 day after an event or until normal operations can be resumed. | DHS |
| primary mission essential functions - Those department and agency essential functions, validated by the NCC, which must be accomplished to support the performance of NEFs before, during, and after an emergency. PMEFs must be available within 12 hours of an emergency and sustainable for 30 days, or until operations can be resumed at either the original location or a new one. These activities include formulation and implementation of foreign policy; maintenance of diplomatic and consular relations, and essential consular functions; reporting and advising on relevant conditions overseas; and supporting other cabinet departments and agencies (e.g., Defense, Treasury, Commerce, and Justice). Also called PMEF. | DOS/ USAID |
| primary mission essential functions - those Government Functions that must be performed in order to support or implement the performance of NEFs before, during, and in the aftermath of an emergency. Also called PMEF. | White House |
| primary mission essential functions - those Government functions that must be performed in order to support or implement the performance of the national essential functions before, during, and in the aftermath of an emergency. | White House |
| priority intelligence requirement - An intelligence requirement that the commander and staff need to understand the threat and other aspects of the operational environment. Also called PIR. See also information requirements; intelligence; intelligence process; intelligence requirement. | DOD |
| priority intelligence requirement - organization’s stated intelligence need identifying its analytic, collection, and production priorities. | DHS |
| privacy act statement - statement required when federal departments and agencies collect personally identifiable information (PII) from members of the public, including from state and local partners, which are entered into a System of Records | DHS |
| privacy compliance documentation - document required by statute or by the Chief Privacy Officer that supports compliance with DHS privacy policy, procedures, or requirements includes but not limited to: Privacy Impact Assessments (PIAs), System of Records Notices (SORNs), Notices of Proposed Rulemaking for Exemption from certain aspects of the Privacy Act (NPRM), and Final Rules for Exemption from certain aspects of the Privacy Act. | DHS |
| privacy compliance review - DHS Privacy Office process to be followed and documentation designed to provide a constructive mechanism to improve a DHS program’s ability to comply with assurances made in existing Privacy Compliance Documentation includes: Privacy Impact Assessments (PIAs), System of Records Notices (SORNs), and/or formal agreements such as Memoranda of Understanding or Memoranda of Agreement. | DHS |
| privacy risk - risk associated with the vulnerability of information collected on persons or of vulnerability of proprietary information on businesses. | DHS |

| | |
|---|----------------|
| privacy threshold analysis - DHS Privacy Office process to be followed and the document used to identify information technology (IT) systems, technologies, rulemakings, programs, or pilot projects that involve PII and other activities that otherwise impact the privacy of persons as determined by the Chief Privacy Officer, and to assess whether there is a need for additional Privacy Compliance Documentation used to determine whether the degree to which a system handles or processes PII raises privacy concerns sufficient to warrant a full privacy impact assessment (PIA). | DHS |
| probabilistic risk assessment - type of quantitative risk assessment that considers possible combinations of occurrences with associated consequences, each with an associated probability or probability distribution. | DHS |
| probability [mathematical] - numerical value between 0 and 1 assigned to a random event (which is a subset of the sample space) in such a way that the assigned number obeys three axioms: (1) the probability of the random event “A” must be equal to, or lie between 0 and 1, (2) the probability that the outcome is within the sample space must equal 1, and (3) the probability that the random event “A” or “B” occurs must equal the probability of the random event “A” plus the probability of the random event “B” for any two mutually exclusive events. | DHS |
| probable - likely but not certain to be or become true or real. | DHS |
| proof of citizenship - Proof of citizenship as a Certificate of Naturalization or Citizenship, Consular Report of Birth of a U.S. Citizen Abroad, or a valid U.S. passport. | DOS/ USAID |
| prospective special access program - Department program or activity for which enhanced security measures have been proposed and approved to facilitate security protections prior to establishing the effort as a Department special access program. | DHS |
| prostitution - engaging in promiscuous sexual intercourse for hire. A conviction is not necessary for a finding that an applicant engaged in prostitution. However, a finding that someone has engaged in prostitution must be based a regular pattern of prostitution for financial gain not casual or isolated acts. An individual can be found inadmissible under INA for engaging in prostitution, in a jurisdiction where prostitution is not illegal, so long as it involves is a regular pattern of prostitution for financial gain. INA would not apply to a John or someone who hired a prostitute. | DOS/ USAID |
| protected area - premises, or area within a protected premise, that is provided with means to prevent an unwanted incident. | DHS |
| protection - 1. Preservation of the effectiveness and survivability of mission-related military and nonmilitary personnel, equipment, facilities, information, and infrastructure deployed or located within or outside the boundaries of a given operational area. 2. In space usage, active and passive defensive measures to ensure that United States and friendly space systems perform as designed by seeking to overcome an adversary’s attempts to negate them and to minimize damage if negation is attempted. See also mission-oriented protective posture; space control. | DOD |
| protection - actions or measures taken to cover or shield from exposure, injury, or destruction includes such actions and measures needed to ensure protective reactions do not unnecessarily interfere with citizen’s freedoms and liberties. | DHS |
| protection - those capabilities necessary to secure the homeland against acts of terrorism and manmade or natural disasters. Protection capabilities include, but are not limited to, defense against WMD threats; defense of agriculture and food; critical infrastructure protection; protection of key leadership and events; border security; maritime security; transportation security; immigration security; and cybersecurity. | White House |
| qualified agricultural countermeasure - an agricultural countermeasure that the Secretary, in consultation with the Secretary of Homeland Security, determines to be a priority in order to address an agricultural biosecurity threat. | USDA |

| | |
|--|-----|
| qualified anti-terrorism technology - any product, equipment, service (including support services), device, or technology (including information technology) designed, developed, modified, or procured for the specific purpose of preventing, detecting, identifying, or deterring acts of terrorism or limiting the harm such acts might otherwise cause, that is designated as such by the Secretary. | DHS |
| qualified countermeasure - (A) that is approved under the Federal Food, Drug, and Cosmetic Act or the Public Health Service Act, or that is approved of the Federal Food, Drug, and Cosmetic Act for use as such a countermeasure to a biological, chemical, radiological, or nuclear agent identified as a material threat ; or (B) with respect to which the Secretary of Health and Human Services makes a determination that sufficient and satisfactory clinical experience or research data (including data, if available, from preclinical and clinical trials) exists to support a reasonable conclusion that the product will qualify for such approval or licensing for use as such a countermeasure. | DOD |
| qualitative risk assessment methodology - set of methods, principles, or rules for assessing risk based on non-numerical categories or levels. | DHS |
| quarantine - prohibition or restriction on travel or passage, imposed to keep contagious diseases, or harmful chemicals/biologicals from spreading. | DHS |
| radicalization - process through which an individual changes from a non-violent belief system to a belief system that includes the willingness to actively advocate, facilitate, or use unlawful violence as a method to effect societal or political change. | DHS |
| radiological - emitting radiant energy in the form of particles or rays, as alpha, beta, and gamma rays, by the spontaneous disintegration of atomic nuclei usually used for peaceful purposes such as X-ray machines, but may be used in weaponry to cause harm. | DHS |
| railroad frontline employees - security personnel, dispatchers, locomotive engineers, conductors, trainmen, other onboard employees, maintenance and maintenance support personnel, bridge tenders, and any other employees of railroad carriers that the Secretary determines should receive security training under this subchapter. | DHS |
| readiness - condition of being prepared and capable to act or respond as required. | DHS |
| readiness - The ability of military forces to fight and meet the demands of assigned missions. See also national military strategy. | DOD |
| readiness - the ability to serve Veterans and eligible beneficiaries now and on a day-to-day routine basis. | DVA |
| real time crime center - analytic-driven center located in law enforcement agencies that utilize technological and analytical capabilities to provide real-time information to officers responding to service calls and developing situations. | DHS |
| request for assistance - A request based on mission requirements and expressed in terms of desired outcome formally asking the Department of Defense to provide assistance within the United States or United States territories to a local, state, tribal, or other federal agency. Also called RFA. | DOD |
| reservations - national forests, tribal lands embraced within Indian reservations, military reservations, and other lands and interests in lands owned by the United States, and withdrawn, reserved, or withheld from private appropriation and disposal under the public land laws; also lands and interests in lands acquired and held for any public purposes; but shall not include national monuments or national parks. | DOI |

| | |
|--|---------------|
| resilience - ability to adapt to changing conditions and withstand and rapidly recover from disruption1) ability of systems, infrastructures, government, business, and citizenry to resist, absorb, recover from, or adapt to an adverse occurrence that may cause harm, destruction, or loss of national significance 2) capacity of an organization to recognize threats and hazards and make adjustments that will improve future protection efforts and risk reduction measures 3) due to emergencies. | DHS |
| resilience - the ability of people, households, communities, countries, and systems to mitigate, adapt to, and recover from shocks and stresses to food security in a manner that reduces chronic vulnerability and facilitates inclusive growth. | DOS |
| resilience - the ability to adapt to changing conditions and withstand and rapidly recover from disruption due to emergencies. | White House |
| resilience - the ability to prepare for and adapt to changing conditions and withstand and recover rapidly from disruption. Resilience includes the ability to withstand and recover from deliberate attacks, accidents, or naturally occurring threats or incidents. | White House |
| resilience - the ability to prepare for and adapt to changing conditions and withstand and recover rapidly from disruptions. Resilience the ability to withstand and recover from deliberate attacks, accidents, or naturally occurring threats or incidents. | White House |
| rules of engagement - Directives issued by competent military authority that delineate the circumstances and limitations under which United States forces will initiate and/or continue combat engagement with other forces encountered. Also called ROE. See also law of war. | DOD |
| safe haven - 1. Designated area(s) to which noncombatant evacuees of the United States Government’s responsibility and commercial vehicles and materiel may be evacuated during a domestic or other valid emergency. 2. A protected body of water or the well deck of an amphibious ship used by small craft operating offshore for refuge from storms or heavy seas. | DOD |
| safe haven - The temporary storage of a posts valuable records in the Department or a nearby post deemed appropriate until hostilities subside. | DOS/ USAID |
| safety, health, environmental management system - part of an organization’s management system used to develop and implement its safety, health, environmental systems policy and manage its environmental aspects a set of interrelated elements (organizational structure, planning activities, responsibilities, practices, procedures, and resources) used to establish and achieve environmental performance objectives. | DHS |
| screening - a visual or automated review of information about goods, including manifest or entry documentation accompanying a shipment being imported into the United States, to determine the presence of misdeclared, restricted, or prohibited items and assess the level of threat posed by such cargo. | DHS |
| screening - In intelligence, the evaluation of an individual or a group of individuals to determine their potential to answer collection requirements or to identify individuals who match a predetermined source profile coupled with the process of identifying and assessing the areas of knowledge, cooperation, and possible approach techniques for an individual who has information of intelligence value. | DOD |
| screening - systematic examination or assessment, done especially to detect a potential threat or risk or any particular substance, attribute, person, or undesirable material includes methods that agencies use to investigate locations or geographic areas, or an applicant’s background to identify potential security risks and the degree/extent of the investigation may vary based on access/position requirements. | DHS |

| | |
|--|-------------|
| screening [medical] - medical assessment to detect a disease or serious health condition when signs or symptoms may not be visible examples include; osteoporosis bone density scans, skin cancer checks, blood sugar/diabetes checks, or blood pressure readings. | DHS |
| search - A systematic reconnaissance of a defined area, so that all parts of the area have passed within visibility. | DOD |
| search - an intrusive examination in which a container is opened and its contents are devanned and visually inspected for the presence of misdeclared, restricted, or prohibited items. | DHS |
| search - manual examination with or without assisting detection technologies, to resolve anomalies, to confirm adherence to standards or compliance with laws, or to detect threats for passengers and cargo, includes cavity search on passenger, pat-down, visual inspection, devanning of containers, etc. | DHS |
| search and detect sensor - sensor which detects, measures, may indicate and/or record objects and activities by means of energy or particles emitted, reflected, or modified by objects for the purpose of identifying IED activity. | DHS |
| search and rescue center facility - a Coast Guard shore facility that maintains a search and rescue mission coordination and communications watch. | DHS/ USCG |
| Sector-Specific Agency - in the Presidential Policy Directive entitled 'Critical Infrastructure Security and Resilience', numbered 21, and dated February 12, 2013. | DHS |
| secure - to gain possession of and/or to ensure protection from unauthorized use, harm, loss or risk to reduce risk and protect information and/or critical infrastructure from a terrorist attack, natural disaster, or other type of incident, either malicious or unintentional. | DHS |
| secure area [information security] - area, room, group of rooms, building, or installation where classified information may be stored, used, discussed, and/or electronically processed so designated as such by the appropriate authority. | DHS |
| Secure Internet Protocol Router Network - U.S. Department of Defense network for the exchange of classified information and messages at the Secret level. | DHS |
| secure/security - reducing the risk to critical infrastructure by physical means or defense cyber measures to intrusions, attacks, or the effects of natural or manmade disasters. | White House |
| security - 1. Measures taken by a military unit, activity, or installation to protect itself against all acts designed to, or which may, impair its effectiveness. 2. A condition that results from the establishment and maintenance of protective measures that ensure a state of inviolability from hostile acts or influences. 3. With respect to classified matter, the condition that prevents unauthorized persons from having access to official information that is safeguarded in the interests of national security. See also national security. | DOD |
| security - any note, stock, treasury stock, security future, security-based swap, bond, debenture, evidence of indebtedness, certificate of interest or participation in any profit-sharing agreement, collateral-trust certificate, preorganization certificate or subscription, transferable share, investment contract, voting-trust certificate, certificate of deposit for a security, fractional undivided interest in oil, gas, or other mineral rights, any put, call, straddle, option, or privilege on any security, certificate of deposit, or group or index of securities (including any interest therein or based on the value thereof), or any put, call, straddle, option, or privilege entered into on a national securities exchange relating to foreign currency, or, in general, any interest or instrument commonly known as a security, or any certificate of interest or participation in, temporary or interim certificate for, receipt for, guarantee of, or warrant or right to subscribe to or purchase, any of the foregoing. | DOC |

| | |
|--|---------------|
| security - condition that results from the establishment and maintenance of protective measures that ensure a state of inviolability from hostile acts or influences. | DHS |
| security - the protection of the Nation and its people, vital interests, and way of life. | White House |
| security control - management, operational, and technical controls (i.e., safeguards or countermeasures) prescribed for an information system to protect the confidentiality, integrity, and availability of the system and its information. | DHS |
| security control - the management, operational, and technical controls used to protect against an unauthorized effort to adversely affect the confidentiality, integrity, and availability of an information system or its information. | DHS |
| security control - the safeguards or countermeasures prescribed for an information system or an organization to protect the confidentiality, integrity, and availability of the system and its information. | White House |
| security domain - The environment of systems for which a unique security policy is applicable. | DOS/ USAID |
| security risk - risk associated with the security/vulnerability of systems, web sites, information and networks includes; risk of intrusions and connectivity to other (vulnerable) systems; risk associated with the evolution of credible threats; risk associated with the misuse (criminal/fraudulent) of information; level of risk (high, medium, basic) and what aspect of security determines the level of risk (e.g., need for confidentiality of information associated with the project/system, availability of the information or system, or reliability of the information or system). | DHS |
| security violation - A failure to properly safeguard confidential or secret classified material that results in the actual or probable compromise of the material, or any security incident involving the mishandling of Top Secret, Special Access Program, and Special Compartmented Information, regardless of location or probability of compromise. (Most security violations occur outside a controlled access area.) | USAID |
| security violation - knowing, willful, or negligent action: (1) that could reasonably be expected to result in an unauthorized disclosure of classified information; (2) to classify or continue the classification of information contrary to the requirements of Executive Order 12958, as amended, and its implementing directives; and/or (3) to create or continue a special access program contrary to the requirements of Executive Order 12958, as amended. | DHS |
| security vulnerability - any attribute of hardware, software, process, or procedure that could enable or facilitate the defeat of a security control. | DHS |
| security-related technology - any technology that assists the Administration in the prevention of, or defense against, threats to United States transportation systems, including threats to people, property, and information. | DHS |
| semi-quantitative risk assessment methodology - set of methods, principles, or rules to assess risk that uses bins, scales, or representative numbers whose values and meanings are not maintained in other contexts. | DHS |
| sensitive initiative - highly visible or sensitive system, such as Presidential Priority initiatives, for which DHS is the managing partner; collaborative technology; changes to the DHS security architecture; web-enabled services that extend beyond a single Component, etc., that may be raised to a higher investment level. | DHS |
| sensitive location [immigration] - locations specified in INA, where if an enforcement action leading to a removal proceeding was taken against an alien at any of the locations specified in the Notice to Appear (NTA) includes a statement that the provisions have been complied with. specified locations include: domestic violence shelter, rape crisis center, supervised visitation center, family justice center, a victim services, or victim services provider, or a community-based organization. | DHS |

| | |
|--|-------------|
| sensitivity analysis - process to determine how outputs of a methodology differ in response to variation of the inputs or conditions. | DHS |
| sensor classification - categories for various types of sensors includes: a) Passive: Sensors that detect some type of energy that is emitted by the target of interest or the change of a natural field caused by the target; b) Active: Sensors that transmit some type of energy and detect a change in the received energy created by the presence of motion of the target; c) Covert: Sensors that are hidden from view. (e.g. buried sensors); d) Visible: Sensors that are in plain view of an intruder; e) Line-of-sight: Sensors that perform acceptably only when installed on flat ground with a clear line-of-sight in the detection space; f) Terrain Following: Sensors that detect equally well on flat or irregular terrain with uniform detection throughout the detection zone; g) Volumetric: Sensors that detect intrusion in a volume of space. The detection zone of these types of sensors is usually difficult to identify; h) Line Detection: Sensors that detect along a line. The detection zone of these types of sensors is usually easy to identify; and i) Application: Sensors that are grouped by application in a physical detection space. | DHS |
| sensor defeat - methods and technologies incorporated into the device construction and employment for the purpose of defeating detection or identification methods and friendly TTPs. | DHS |
| short-term detention - detention in a U.S. Customs and Border Protection processing center for 72 hours or less, before repatriation to a country of nationality or last habitual residence. | DHS |
| significant cyber incident - A cyber incident that is (or group of related cyber incidents that together are) likely to result in demonstrable harm to the national security interests, foreign relations, or economy of the United States or to the public confidence, civil liberties, or public health and safety of the American people. | White House |
| significant cyber incident - incident related to computer security whose impact on a mission or on a critical asset constitutes a meaningful threat to the mission and requires immediate notification of leadership meets one or more of the following criteria: 1. The incident has impacts on the confidentiality, integrity, or availability of a critical system or sensitive data. 2. There is a high probability of public disclosure of the incident and consequent embarrassment. 3. The impact of the incident results in users losing access to a critical service (for example, email, network access, Internet access). | DHS |
| significant environmental event - noteworthy environmental occurrence (positive or negative) that may be of interest to or require a “timely and appropriate” response from the affected facility or Component. | DHS |
| site exploitation - A series of activities to recognize, collect, process, preserve, and analyze information, personnel, and/or materiel found during the conduct of operations. Also called SE. | DOD |
| sovereign citizen extremist - group or person who facilitate or engage in acts of unlawful violence directed at public officials, financial institutions, and government facilities in support of their belief that the legitimacy of US citizenship should be rejected; almost all forms of established government, authority, and institutions are illegitimate; and that they are immune from federal, state, and local laws. | DHS |
| span of control - The number of resources for which a supervisor is responsible, usually expressed as the ratio of supervisors to individuals. (Under the National Incident Management System, an appropriate span of control is between 1:3 and 1:7, with optimal being 1:5). | DHS/ FEMA |
| special interest alien - foreign national originating from a country (determined by individual Components) identified as having possible or established links to terrorism. | DHS |

| | |
|--|---------------|
| special needs populations - Populations whose members may have additional needs before, during, and after an incident in functional areas, including but not limited to - maintaining independence, communication, transportation, supervision, and medical care. Individuals in need of additional response assistance may include those who have disabilities; who live in institutionalized settings; who are elderly; who are children; who are from diverse cultures; who have limited English proficiency or are non-English speaking; or who are transportation disadvantaged. | DHS/ FEMA |
| specified terrorist attack - any terrorist activity conducted against the Government or people of the United States on September 11, 2001. This includes the attacks on the World Trade Center area and the Pentagon, as well as the crash of Flight 93 in Pennsylvania. It does not include the subsequent anthrax attacks or other previous or subsequent terrorist activities. | DOS/ USAID |
| spill of national significance - a discharge of oil or a hazardous substance that is declared by the Commandant to be a spill of national significance. | DHS/ USCG |
| spill prevention, control and countermeasure plan - plan prepared in accordance with good engineering practices that establishes, for a specific facility, procedures to prevent oil discharges or to minimize the potential for oil discharges and that has the full approval of management at the level authorized to commit the necessary resources to support the plan. | DHS |
| spillage [cyber security] - IT security incident that results in the transfer of classified or sensitive but unclassified information onto an information system or to a medium, person, or location not accredited (i.e., authorized) for the appropriate security level. | DHS |
| spyware - Software secretly or surreptitiously installed into an information system to gather information on individuals or organizations without their knowledge; a type of malicious code. | DOS/ USAID |
| Stafford Act - The Robert T. Stafford Disaster Relief and Emergency Assistance Act. This Act describes the programs and processes by which the Federal Government provides disaster and emergency assistance to State and local governments, tribal nations, eligible private nonprofit organizations, and individuals affected by a declared major disaster or emergency. The Stafford Act covers all hazards, including natural disasters and terrorist events. | DHS/ FEMA |
| standard operating procedure - The specific references made in this subchapter to auxiliary and supplementary material that further details procedures and processes that apply to the FS assignment process. Also called SOP. | DOS/ USAID |
| standard operating procedure - A set of instructions applicable to those features of operations that lend themselves to a definite or standardized procedure without loss of effectiveness. Also called SOP; standing operating procedure. | DOD |
| standard operating procedure - Complete reference document or an operations manual that provides the purpose, authorities, duration, and details for the preferred method of performing a single function or a number of interrelated functions in a uniform manner. Also called SOP. | DHS/ FEMA |
| state sponsor of international terrorism - any country the government of which has been determined by the Secretary of State under any of the laws specified in paragraph (2) to have repeatedly provided support for acts of international terrorism. | DHS |
| state utility - a State or any political subdivision of a State, or any agency, authority, or instrumentality of any one or more of the foregoing, or a corporation that is wholly owned, directly or indirectly, by any one or more of the foregoing, competent to carry on the business of developing, transmitting, utilizing, or distributing power. | DOI |
| steady state - routine, day-to-day operations. | DHS |

| | |
|---|---------------|
| stowaway - any alien who obtains transportation without the consent of the owner, charterer, master or person in command of any vessel or aircraft through concealment aboard such vessel or aircraft. A passenger who boards with a valid ticket is not to be considered a stowaway. | DHS |
| stowaway - any alien who obtains transportation without the consent of the owner, charterer, master or person in command of any vessel or aircraft through concealment aboard such vessel or aircraft. A passenger who boards with a valid ticket is not to be considered as a stowaway. | DOS/ USAID |
| strategic foresight - range of activities associated with longer range planning and alternative futures analysis. | DHS |
| subjective probability - interpretation or estimate of probability as an individual al judgment or “degree of belief” about how likely a particular event is to occur, based on the state of knowledge and available evidence. | DHS |
| supported commander - 1. The commander having primary responsibility for all aspects of a task assigned by Chairman of the Joint Chiefs of Staff Instruction 3110.01J, (U) 2015 Joint Strategic Capabilities Plan (JSCP), or other joint planning authority. 2. In the context of joint planning, the commander who prepares operation plans or operation orders in response to requirements of the Chairman of the Joint Chiefs of Staff. 3. In the context of a support command relationship, the commander who receives assistance from another commander’s force or capabilities, and who is responsible for ensuring that the supporting commander understands the assistance required. See also support; supporting commander. | DOD |
| supporting commander - 1. A commander who provides augmentation forces or other support to a supported commander or who develops a supporting plan. 2. In the context of a support command relationship, the commander who aids, protects, complements, or sustains another commander’s force and who is responsible for providing the assistance required by the supported commander. See also support; supported commander. | DOD |
| surety consideration [risk] - risk associated with the loss/misuse of data or information includes; risk of technical problems/failures with applications; risk associated with the security/vulnerability of systems. | DHS |
| surface transportation modes - mass transit, commuter and long-distance passenger rail, freight rail, commercial vehicles (including intercity buses), and pipelines, and related infrastructure (including roads and highways), that are within the territory of the United States, but does not include electric grids. | DHS |
| surveillance - process of observing something or someone includes the systematic observation or monitoring of areas, places, persons, or things, by visual, aural, electronic, photographic, or other means. | DHS |
| survivability [system] - capability of a system or organization to withstand a disaster or hostile environment, without significant impairment of its normal operations includes those efforts that, to the maximum feasible extent, minimize personnel and equipment exposure to potential dangerous natural, hostile or non-hostile actions through consideration and evaluation of each achievable approach, option and/or mitigation. | DHS |
| suspected device [surveillance] - device that appears to be, but has not yet been shown to be, a technical surveillance device. | DHS |
| suspected terrorist organization - organization that is reasonably suspected to be, or has been engaged in conduct constituting, in preparation for, in aid of, or related to terrorism or terrorist activity based on articulable and reasonable suspicion. | DHS |
| suspected terrorist - person that is reasonably suspected to be, or has been engaged in conduct constituting, in preparation for, in aid of, or related to terrorism or terrorist activity based on articulable and reasonable suspicion. | DHS |

| | |
|--|----------------------------|
| suspension of security clearance - temporary action in which an individual who had access to classified information is rendered ineligible to continue such access is not considered an adverse action, and it is not appealable. | DHS |
| suspicious activity reporting - official documentation of observed behavior reasonably indicative of pre-operational planning related to terrorism or other criminal activity. | DHS |
| sustainable energy infrastructure - (A) facilities for production of energy from renewable energy sources, thermal energy sources, or highly efficient technologies, including combined heat and power or other waste heat use; and (B) district energy systems. | DHHS/ HUD/ EPA/ FEMA |
| sustainment - The provision of logistics and personnel services required to maintain and prolong operations until successful mission accomplishment. | DOD |
| sustainment [system] - program design characteristic that consists of those planned support resources, system design characteristics' capabilities and activities required to maintain fielded systems at intended levels of performance and meet contingency usage requirements is a function of providing for and maintaining those levels of ready forces and materiel necessary to support the mission and encompasses efforts to field, in a cost effective manner, a support program meeting operational support performance requirements by sustaining the system to a level consistent with operational tempo and duration; may include such items as supply chain management, sustaining engineering, data management, anti-tamper provisions and interoperability functions. | DHS |
| sustainment, restoration, and modernization - The fuels asset sustainment program within Defense Logistics Agency Energy that provides a long-term process to cost-effectively sustain, restore, and modernize fuel facilities. Also called SRM. | DOD |
| systems reliability [risk] - risk associated with vulnerability/integrity of systems. | DHS |
| T Visa - Visa for nonimmigrant status granted to those who are or have been victims of human trafficking allowing them to remain in the United States to assist in an investigation or prosecution of human trafficking allows victims of human trafficking to remain in the United States for up to four years (or longer if a limited exception applies), receive work authorization, and, if certain conditions are met, apply for adjustment of status to that of an lawful permanent resident (LPR) . | DHS |
| tactical control - The authority over forces that is limited to the detailed direction and control of movements or maneuvers within the operational area necessary to accomplish missions or tasks assigned. Also called TACON. See also combatant command; combatant command (command authority); operational control. | DOD |
| target capabilities list - Defines specific capabilities that all levels of government should possess in order to respond effectively to incidents. | DHS/ FEMA |
| targeting - process based on intelligence of establishing various parameters to identify particular types of products, individuals, groups of people, or other entities for a specific purpose focus of identification is based upon particular intelligence and characteristics, models, or patterns. | DHS |
| targeting - The process of selecting and prioritizing targets and matching the appropriate response to them, considering operational requirements and capabilities. See also joint targeting coordination board; target. | DOD |
| technical hazard [information security] - technical or physical condition that exists in a secure or sensitive area which unintentionally transmits classified information, restricted data, and/or unclassified information requiring protection outside of the area and could allow for the technical exploitation of that information. | DHS |

| | |
|---|-----------|
| technical intelligence - Intelligence derived from the collection, processing, analysis, and exploitation of data and information pertaining to foreign equipment and materiel for the purposes of preventing technological surprise, assessing foreign scientific and technical capabilities, and developing countermeasures designed to neutralize an adversary’s technological advantages. Also called TECHINT. See also exploitation; intelligence. | DOD |
| technical penetration [information security] - deliberate attempt to obtain classified national security information, restricted data, and/or for official use only information from a facility through technical exploitation. | DHS |
| technical risk - risk associated with immaturity of commercially available technology and reliance on a small number of vendors. | DHS |
| technical security - security measures taken to prevent the installation of technical surveillance devices and the exploitation of security vulnerabilities. | DHS |
| technical surveillance countermeasure - technique or measure to detect and neutralize a wide variety of hostile surveillance technologies used to obtain unauthorized access to classified and sensitive information. | DHS |
| technical surveillance countermeasure investigation - highly evolved, technically sophisticated, and sensitive investigation subject to U.S. IC requirements service is conducted by qualified technical surveillance countermeasure technicians to detect the presence of technical surveillance devices or hazards; identifies technical security vulnerabilities and items of security interest, which could facilitate the technical penetration of the investigated facility. | DHS |
| technical surveillance penetration - device installed to clandestinely monitor or record activities in a target area. | DHS |
| technical vulnerability - technical or physical condition that could permit the introduction of technical devices or undetected access into a secure or sensitive area. | DHS |
| technology risk - risk associated with technical problems/failures with applications and their ability to provide planned and desired technical functionality. | DHS |
| technology transfer - process by which existing knowledge, facilities, or capabilities developed under federal R&D funding are shared in order to enhance innovation and fulfill public and private technology needs includes research, invention, intellectual property, licensing, and commercialization. | DHS |

|--|------------|
| <p>incitement of terrorism - Incitement with intent to cause bodily harm renders an alien inadmissible under INA if he or she has incited terrorist activity under circumstances indicating an intention to cause death or serious bodily harm. Incited in the context of INA is speech that induces or otherwise moves another person to undertake terrorist activity. Normally speech will not rise to the level of inciting unless there is a clear link between the speech and an actual effort to undertake the terrorist activity. It connotes speech that is not merely an expression of views but that directs or induces action, typically in a volatile situation. The applicant may have incited terrorist activity even if a terrorist attack does not actually occur (e.g., because an attempt to commit such activity was thwarted). An applicant who has incited terrorist activity must also have acted in circumstances indicating an intention to cause death or serious bodily harm to be inadmissible under INA. In other words, the aliens speech must not only have induced others to undertake terrorist activity, but it must also have been made with the specific intent that such activity would result in death or serious bodily injury. Incitement and the requisite intent to cause bodily harm could be inferred in the following situations - (a) Widespread opposition to Country A's policies and actions lead to a series of protests, some violent, outside Country As embassy in Country B. The applicant goes to the embassy, stands on a box, and shouts to the crowd to join him in standing up to Country A and humiliating it. Shortly afterwards, when he sees an embassy vehicle approaching, he yells - Don't let them in! Make them pay for what they have done! The crowd blocks the car and removes occupants (including a diplomat working at Country As embassy), from the car, beating them severely and taking them hostage. Analysis - Diplomatic hostage-taking and violent attacks on diplomats are terrorist activities. Given the aliens urging the crowd to stop the embassy vehicle and make them pay, you would have reasonable ground to believe that the applicants speech incited terrorist activity. The aliens make them pay statement, when viewed against the backdrop of previous violent protests and his general comments about standing up to Country A and humiliating it, would provide you with reasonable ground to believe that the applicant intended to cause death or serious bodily harm. (b) The applicant is an ardent nationalist whose opinions voiced to a particular audience regularly blame foreigners for his country's problems and who argues that the only solution to these problems is that foreigners should be driven out of the country. Press reports say that some of those in the targeted audience have been purchasing weapons and seeking to obtain and manufacture explosives. Police notify the applicant or those associated with the applicant that they are investigating several of those in the targeted audience for weapons-related offenses. At the end of a week of particularly strong anti-foreign sentiment, the applicant gives a special speech entitled A Call to Action. With the knowledge that those under investigation are in the audience, the applicant begins his speech with - The time has come for action! He then reiterates throughout his speech that the only solution to the country's problems is to purge our great land of these foreigners once and for all through whatever means necessary. Shortly thereafter, some of those in the target audience detonate a truck bomb outside a restaurant frequented by foreign nationals, killing several foreign nationals and injuring many restaurant employees. Analysis - The use of any explosive with intent to endanger, directly or indirectly, the safety of one or more individuals or to cause substantial damage to property is a terrorist activity. In the example, the applicant helps foster anti-foreign sentiments and then, during a particularly tense period, urges students to act to drive foreigners from the country through whatever means necessary. Under these circumstances, you would have reasonable ground to believe that the applicants speech incited terrorist activity. The fact that the applicant knew that several students likely had access to weapons and/or explosives and that those students were in attendance at his special lecture would provide you with reasonable ground to believe that the applicant intended to cause death or serious bodily harm.</p> | <p>DOD</p> |
| <p>indigenous populations and institutions - The societal framework of an operational environment including citizens; legal and illegal immigrants; dislocated civilians; and governmental, tribal, ethnic, religious, commercial, and private organizations and entities. | interoperability - 1. The ability to act together coherently, effectively, and efficiently to achieve tactical, operational, and strategic objectives. 2. The condition achieved among communications-electronics systems or items of communications electronics equipment when information or services can be exchanged directly and satisfactorily between them and/or their users. | USDA |
| interoperability - a system that enables program benefits in the form of an electronic benefit transfer card to be redeemed in any State. | DHS |
| interoperability - ability of systems, personnel, and equipment to provide and receive functionality, data, information and/or services to and from other systems, personnel, and equipment, between both public and private agencies, departments, and other organizations, in a manner enabling them to operate effectively together in the realm of information technology, refers to the ability of computer different systems or databases to exchange data in a commonly understood format and the ability to act upon such data without manual intervention. | DHS/ FEMA |
| interoperability - The ability of emergency management/response personnel to interact and work well together. In the context of technology, interoperability also refers to having an emergency communications system that is the same or is linked to the same system that a jurisdiction uses for nonemergency procedures, and that effectively interfaces with national standards as they are developed. The system should allow the sharing of data with other jurisdictions and levels of government during planning and deployment. | DOS/ USAID |
| Interoperability - The ability of systems, units, or forces to provide services to and to accept services from other systems, units, or forces, and to enable the services to operate effectively together. As applied to the Department of Defense only, the condition achieved among communications-electronics systems or items of communications-electronics equipment when information or services can be exchanged directly and satisfactorily between them and/ or their users. The degree of interoperability should be defined when referring to specific cases. | DHHS |
| interoperability - the ability of the program to electronically share reported information, including each of the required report components, with another State if the information concerns either the dispensing of a controlled substance to an ultimate user who resides in such other State, or the dispensing of a controlled substance prescribed by a practitioner whose principal place of business is located in such other State. | DHHS |
| interoperability - the ability to communicate and exchange data accurately, effectively, securely, and consistently with different information technology systems, software applications, and networks in various settings, and exchange data such that clinical or operational purpose and meaning of the data are preserved and unaltered. | White House |
| interoperability - to the ability of two or more systems or components to exchange information and to use the information that has been exchanged. | White House |
| interoperable - the ability of civil U.S. and foreign space-based positioning, navigation, and timing services to be used together to provide better capabilities at the user level than would be achieved by relying solely on one service or signal. | DHS |
| intervention - action performed to direct or influence behavior. | DOD |
| irregular warfare - A violent struggle among state and non-state actors for legitimacy and influence over the relevant population(s). Also called IW. | DOI |
| ivory producing country - any African country within which is located any part of the range of a population of African elephants. | DOS/ USAID |

|---|------------|
| joint regional strategies - An integrated strategic plan developed jointly between the State and USAID Regional Bureaus that involves the equities of both agencies, and involves both non-regional bureaus and interagency partners with a stake in the region. The JRS is used to inform budget decisions, advise integrated country strategies, and shape performance reviews. Also called JRS. | DOS/ USAID |
| Joint Task Force - A group of joint warfighters that is designated by the secretary of defense, a combatant commander, a sub-unified commander, or an existing joint task force commander. Also called JTF. | DOD |
| joint task force - A joint force that is constituted and so designated by the Secretary of Defense, a combatant commander, a subunified commander, or an existing joint task force commander. Also called JTF. | DHS/ FEMA |
| joint task force - Based on the complexity and type of incident, and the anticipated level of Department of Defense (DOD) resource involvement, DOD may elect to designate a JTF to command Federal (Title 10) military activities in support of the incident objectives. If a JTF is established, consistent with operational requirements, its command and control element will be co-located with the senior on-scene leadership at the Joint Field Office (JFO) to ensure coordination and unity of effort. The co-location of the JTF command and control element does not replace the requirement for a Defense Coordinating Officer (DCO)/Defense Coordinating Element as part of the JFO Unified Coordination Staff. The DCO remains the DOD single point of contact in the JFO for requesting assistance from DOD. Also called JTF. | DOS/ USAID |
| joint training - Military instruction that is based on joint doctrine or tactics, techniques, and procedures, and that prepares joint forces and/or staffs to respond to the strategic and operational mission requirements of combatant commanders. The forces of two or more military departments interact with a combatant commander or subordinate joint force commander, as well as with joint forces and/or staffs. The exercise is conducted using joint doctrine or joint tactics, techniques, and procedures. | DOD |

| medical countermeasures - Medical countermeasures include both pharmaceutical interventions (e.g., vaccines, antimicrobials, antidotes, and antitoxins) and non-pharmaceutical medical countermeasure interventions (e.g., ventilators, diagnostics, personal protective equipment, and patient decontamination methods) that may be used to prevent, mitigate, or treat the adverse health effects of a public health emergency”. | DOD |
| medical surveillance - The ongoing, systematic collection, analysis, and interpretation of data derived from instances of medical care or medical evaluation, and the reporting of population-based information for characterizing and countering threats to a population’s health, well-being and performance. See also surveillance. | DOS/ USAID |
| member of a terrorist organization - Aliens who are members of designated FTOs or entities on the Terrorism Exclusion List are inadmissible. The INA does not require the alien to know that the organization has been designated. Members of undesignated terrorist organizations are inadmissible, but there is a narrow exception based on lack of knowledge (see 9 FAM 302.6-2(B)(3) paragraph i). Evidence of membership in a terrorist organization might include the individuals taking of an oath or performance of some act that is a prerequisite of membership. A formal induction is not necessary for a finding of membership. Membership must be determined in light of all relevant facts, including, but not limited to, the following - Acknowledgment of membership; Frequent association with other members; Participation in the organizations activities, even if lawful; Actively working to further the organizations aims and methods in a way suggesting close affiliation constituting membership; Occupying a position of trust in the organization, past or present; Receiving financial support from the organization, e.g., scholarships, pensions, salary; Contributing money to the organization; Determination of membership by a competent court; Voluntarily displaying symbols of the organization; or Receiving honors and awards given by the organization. No single factor necessarily determines that an alien was a member of an organization. Note that former members will still be inadmissible if they have previously provided material support (such as membership fees), raised money, or solicited members for the organization. | DOD |
| military engagement - Routine contact and interaction between individuals or elements of the Armed Forces of the United States and those of another nation’s armed forces, or foreign and domestic civilian authorities or agencies to build trust and confidence, share information, coordinate mutual activities, and maintain influence. | DHS |

| TERMS AND DEFINITIONS | SOURCE |
|---|------------|
| absolute risk - level of risk expressed with real-world units of measurement that allows for independent interpretation without comparison to estimates of other risks. | DHS |
| absolute risk [unmitigated] - level of risk that exists without risk controls hypothetical condition that would exist if risk mitigation measures were absent. | DHS |
| acceptable risk - level of risk at which, given costs and benefits associated with reduction measures, no action is deemed to be warranted at a given point in time. | DHS |
| adaptive risk - category of risk that includes threats intentionally caused by humans. | DHS |
| administrative control - Direction or exercise of authority over subordinate or other organizations in respect to administration and support. Also called ADCON. | DOD |
| administrative control - Special handling, transmission, mailing, safeguards, storage, and/or destruction provided to sensitive but unclassified (SBU) material. See the definition for SBU. | DOS/ USAID |
| after-action review - 1. A process that provides commanders with direct feedback regarding the accomplishment of selected joint mission-essential tasks, conditions, and standards, stated in terms of training objectives, for the evaluation of training proficiency. 2. An analytical assessment of training events that enables the training audience, through a facilitated professional discussion, to examine actions and results during a training event. | DOS/ USAID |
| area command - A command that is composed of elements of one or more of the Services, organized and placed under a single commander and designated to operate in a specific geographical area. See also command. | DOD |
| area command - An organization established to oversee the management of multiple incidents that are each being handled by a separate Incident Command System organization or to oversee the management of a very large or evolving incident that has multiple incident management teams engaged. An agency administrator/executive or other public official with jurisdictional responsibility for the incident usually makes the decision to establish an Area Command. An Area Command is activated only if necessary, depending on the complexity of the incident and incident management span-of-control considerations. | DHS/ FEMA |
| area of operations - An operational area defined by the joint force commander for land and maritime forces that should be large enough to accomplish their missions and protect their forces. Also called AO. See also area of responsibility; joint operations area; joint special operations area. | DOD |

Administrative Terms

| | |
|--|------------|
| area of responsibility - geographical area associated with a command within which the commander has the authority to plan and conduct operations - in addition to geographic delineation, an area of responsibility may also be relative to subject, mission, or other factors. | DHS |
| area of responsibility - The geographical area associated with a combatant command within which a geographic combatant commander has authority to plan and conduct operations. Also called AOR. See also combatant command. | DOD |
| assessment - 1. A continuous process that measures the overall effectiveness of employing capabilities during military operations. 2. Determination of the progress toward accomplishing a task, creating a condition, or achieving an objective. 3. Analysis of the security, effectiveness, and potential of an existing or planned intelligence activity. 4. Judgment of the motives, qualifications, and characteristics of present or prospective employees or “agents.” | DOD |
| assessment - A forward-looking process that may be designed to examine country or sector context to inform project design, or an informal review of projects. It is distinct from evaluation. | USAID |
| assessment - product and process of evaluating information based on a set of criteria for the purpose of informing priorities, developing or comparing courses of action, and informing decision-making criteria determines the type of assessment. | DHS |
| assessment - the analysis and critical evaluation of pre-existing environmental, political, sociological, cultural or other conditions or situations which would have an effect upon or influence the success of a program or achievement of a Development Objective. | DOS/ USAID |
| assessment - The evaluation and interpretation of measurements and other information to provide a basis for decision-making. | DHS/ FEMA |
| assessment [message] - message supplying the evaluation and interpretation of measurements and other information to provide a basis for decision-making provides credible but non-specific threats, or provides in-depth analysis on a specific topic, trend, or development for decision-making and policy support. | DHS |
| assignment - A task given to a resource to perform within a given operational period that is based on operational objectives defined in the Incident Action Plan. | DHS/ FEMA |
| assignment - A tour of duty to a FS position that exceeds six months. An assignment overseas will only be considered as completed for the purposes of this subchapter if it satisfies such minimum period of continuous service overseas as may be specified herein. | DOS/ USAID |

| | |
|--|--------------------|
| <p>assured access - a requirement for critical national security, homeland security, and civil missions and is defined as a sufficiently robust, responsive, and resilient capability to allow continued space operations, consistent with risk management and affordability. The Secretary of Defense and the Administrator of the National Aeronautics and Space Administration, as appropriate, are responsible for assuring access to space.</p> | <p>White House</p> |
| <p>chain of command - A series of command, control, executive, or management positions in hierarchical order of authority.</p> | <p>DHS/ FEMA</p> |
| <p>chain of command - The succession of commanding officers from a superior to a subordinate through which command is exercised. Also called command channel.</p> | <p>DOD</p> |
| <p>combatant command - a unified combatant command or a specified combatant command.</p> | <p>DOD</p> |
| <p>combatant command - A unified or specified command with a broad continuing mission under a single commander established and so designated by the President, through the Secretary of Defense and with the advice and assistance of the Chairman of the Joint Chiefs of Staff. Also called CCMD. See also specified combatant command; unified command.</p> | <p>DOD</p> |
| <p>combatant command (command authority) - Nontransferable command authority, which cannot be delegated, of a combatant commander to perform those functions of command over assigned forces involving organizing and employing commands and forces; assigning tasks; designating objectives; and giving authoritative direction over all aspects of military operations, joint training, and logistics necessary to accomplish the missions assigned to the command. Also called COCOM. See also combatant command; combatant commander; operational control; tactical control.</p> | <p>DOD</p> |
| <p>command relationships - The interrelated responsibilities between commanders, as well as the operational authority exercised by commanders in the chain of command; defined further as combatant command (command authority), operational control, tactical control, or support. See also chain of command; combatant command (command authority); command; operational control; support; tactical control.</p> | <p>DOD</p> |
| <p>common operating picture - A continuously updated overview of an incident compiled throughout an incident's life cycle from data shared between integrated systems for communication, information management, and intelligence and information sharing. The common operating picture allows incident managers at all levels to make effective, consistent, and timely decisions. The common operating picture also helps ensure consistency at all levels of incident management across jurisdictions, as well as between various governmental jurisdictions and private-sector and nongovernmental entities that are engaged.</p> | <p>DHS/ FEMA</p> |

Administrative Terms

| <p>operational area - An overarching term encompassing more descriptive terms (such as area of responsibility and joint operations area) for geographic areas in which military operations are conducted. Also called OA. See also amphibious objective area; area of operations; area of responsibility; joint operations area; joint special operations area; theater of operations; theater of war.</p> | DOD |

Administrative Terms

| | |
|--|-----------|
| operational control - The authority to perform those functions of command over subordinate forces involving organizing and employing commands and forces, assigning tasks, designating objectives, and giving authoritative direction necessary to accomplish the mission. Also called OPCON. See also combatant command; combatant command (command authority); tactical control. | DOD |
| operational control - the prevention of all unlawful entries into the United States, including entries by terrorists, other unlawful aliens, instruments of terrorism, narcotics, and other contraband. | DHS |
| operational readiness - The capability of a unit/formation, ship, weapon system, or equipment to perform the missions or functions for which it is organized or designed. Also called OR. | DOD |
| operational readiness - the capability of an organization, an asset, a system, or equipment to perform the missions or functions for which it is organized or designed. | DHS |
| operational risk - risk that has the potential to impede the successful execution of operations. | DHS |
| operational test and evaluation - (A) the testing of a capability or asset and the subsystems of the capability or asset, under conditions similar to those in which the capability or asset and subsystems will actually be deployed, for the purpose of determining the effectiveness and suitability of the capability or asset and subsystems for use by typical Coast Guard users to conduct those missions for which the capability or asset and subsystems are intended to be used; and (B) the evaluation of the results of such testing. | DHS/ USCG |
| operational test and evaluation - field test, performed under realistic conditions with operational users against realistic threats in order to determine the operational effectiveness and suitability of a system, and the corresponding evaluation of the data resulting from such test. | DHS |
| ready reserve - The Selected Reserve and Individual Ready Reserve liable for active duty as prescribed by law. See also active duty; Individual Ready Reserve; Selected Reserve. | DOD |
| residual radiation - Nuclear radiation caused by fallout, artificial dispersion of radioactive material, or irradiation that results from a nuclear explosion and persists longer than one minute after burst. See also contamination; initial radiation. | DOD |
| residual risk - risk that remains after risk management measures have been implemented. | DHS |
| risk - A combination of the likelihood that a threat will occur, the likelihood that a threat occurrence will result in an adverse impact, and the severity of the resulting impact. | USAID |

| | |
|---|-------------|
| risk - A measure of the extent to which an entity is threatened by a potential circumstance or event, and is typically a function of - (i) the adverse impacts that would arise if the circumstance or event occurs; and (ii) the likelihood of occurrence. | DOS/ USAID |
| risk - a measure of the extent to which an entity is threatened by a potential circumstance or event, and typically is a function of: (i) the adverse impact, or magnitude of harm, that would arise if the circumstance or event occurs; and (ii) the likelihood of occurrence. | White House |
| risk - a measure of the probability and severity of undesirable consequences. | DHS |
| risk - As it pertains to source selection, is the potential for unsuccessful contract performance. The consideration of risk assesses the degree to which an offerors proposed approach to achieving the technical factor or subfactor may involve risk of disruption of schedule, increased cost or degradation of performance, the need for increased U.S. Government oversight, and the likelihood of unsuccessful contract performance. For firm fixed-price contracts, the reference to increased cost may be removed from the risk definition. | DOS/ USAID |
| risk - potential for an unwanted outcome as determined by its likelihood and the consequences potential for an adverse outcome assessed as a function of hazard/threats, assets and their vulnerabilities, and consequences. | DHS |
| risk - Probability and severity of loss linked to hazards. | DOS/ USAID |
| risk - Probability and severity of loss linked to hazards. See also hazard; risk management. | DOD |
| risk - The net mission impact considering - (1) the probability that a particular threat-source will exercise (accidentally trigger or intentionally exploit) a particular IT system vulnerability; and (2) the resulting impact if this should occur. IT system-related risks arise from legal liability or mission loss due to - (1) Unauthorized (malicious or accidental) disclosure, modification, or destruction of information; (2) Unintentional errors and omissions; (3) IT disruptions due to natural or man-made disasters; and (4) Failure to exercise due care and diligence in the implementation and operation of the IT system. | DOS/ USAID |
| risk - The potential for encountering negative technical, costs, or schedule impacts in a project. | DOS/ USAID |
| risk analysis - An evaluation of the physical, electronic, and software security of a computer system and its vulnerabilities to establish an expected loss from certain events based on estimated probabilities of occurrence, and to identify potential safeguards. | USAID |
| risk analysis - systematic examination of the components and characteristics of risk. | DHS |

Administrative Terms

| | |
|---|-------------------------|
| risk assessment - A documented review of the susceptibility of an assessable unit, program, or activity to the occurrence of fraud, waste, loss, unauthorized use, misappropriation, or susceptibility to generate significant improper payments. General reviews will focus on areas such as the existing inherent risk or vulnerability, existing general control environment and safeguards in place, and adherence to the internal control standards. The Department will employ a systematic method of reviewing all programs and activities to identify programs and activities that are susceptible to significant improper payments. | DOS/ USAID |
| risk assessment - A method to calculate risk. Risk is the result of three factors - (1) The impact or consequences of an undesirable event that causes the loss of or damage to a Department asset (i.e., people, information, equipment, facilities, activities, and operations); (2) The threat or likelihood that undesirable event will occur; and (3) All vulnerabilities associated with that undesirable event. | DOS/ USAID |
| risk assessment - an evaluation of-(A) the potential for the introduction, establishment or spread of a pest or disease and associated biological and economic consequences; or(B) the potential for adverse effects on human or animal life or health arising from the presence of an additive, contaminant, toxin or disease-causing organism in a food, beverage, or feedstuff. | DHS |
| risk assessment - An internal management process for identifying, analyzing and managing risks relevant to achieving the objectives of safeguarding assets, compliance with relevant laws and regulations and reliable financial reporting. | USAID |
| risk assessment - an on-site investigation to determine and report the existence, nature, severity and location of lead-based paint hazards in residential dwellings, including- (A) information gathering regarding the age and history of the housing and occupancy by children under age 6;(B) visual inspection;(C) limited wipe sampling or other environmental sampling techniques; (D) other activity as may be appropriate; and (E) provision of a report explaining the results of the investigation. | DHHS/ HUD/ EPA/ FEMA |
| risk assessment - Organizations must periodically assess the risk to organizational operations (including mission, functions, image, or reputation), organizational assets and individuals, resulting from the operation of organizational information systems and the associated processing, storage, or transmission of organizational information. Also called RA. | DOS/ USAID |
| risk assessment - product or process evaluating information based on a set of criteria and assigns values to risks for the purpose of informing priorities, developing or comparing courses of action, and informing decision making appraisal of the risks facing an entity, asset, system, network, geographic area or other grouping ³ | DHS |
| risk assessment - The identification and assessment of hazards (first two steps of risk management process). Also called RA. | DOD |

| | |
|---|------------|
| risk assessment - The process of analyzing threats to and vulnerabilities of an IS [information system] and the potential impact the loss of information or capabilities of a system would have on national security. The resulting analysis is used as a basis for identifying appropriate and cost-effective countermeasures. | USAID |
| risk assessment - The process of identifying risks to organizational operations (including mission, functions, image, or reputation), organizational assets, individuals, other organizations, and the Nation, arising through the operation of an information system. | DOS/ USAID |
| risk assessment - The process of identifying the risks to system security and determining the probability of occurrence, the resulting impact, and additional safeguards that would mitigate this impact. This is part of risk management and synonymous with risk analysis. | DOS/ USAID |
| risk assessment methodology - set of methods, principles, or rules used to identify and assess risks and to form priorities, develop courses of action, and inform decision-making | DHS |
| risk assessment tool - activity, item, or program that contributes to determining and evaluating risks. | DHS |
| risk avoidance - strategies or measures taken that effectively remove exposure to a risk | DHS |
| risk category - Subdivisions of a cohort of direct loans or loan guarantees into groups of loans that are relatively homogeneous in cost, given the facts known at the time of obligation or commitment. Risk categories will group all loans obligated or committed for a program during the fiscal year that share characteristics predictive of defaults and other costs. | USAID |
| risk communication - exchange of information with the goal of improving risk understanding, affecting risk perception and/or equipping people or groups to act appropriately in response to an identified risk. | DHS |
| risk control - deliberate action taken to reduce the potential for harm or maintain it at an acceptable level. | DHS |
| risk data - information on key components of risk that are outputs of or inputs to risk assessments and risk analyses. | DHS |
| risk exposure - contact of an asset, system, or geographic area with a potential hazard. | DHS |
| risk governance - actors, rules, practices, processes, and mechanisms concerned with how risk is analyzed, managed, and communicated. | DHS |
| risk identification - process of finding, recognizing, and describing potential risks ³ | DHS |
| risk management - process of identifying, analyzing, and communicating risk and accepting, avoiding, transferring or controlling it to an acceptable level considering associated costs and benefits of any actions taken. | DHS |

Administrative Terms

| | |
|--|-------------|
| risk management - The process concerned with the identification, measurement, control, and minimization of security risks in information systems to a level commensurate with the value of the assets protected. | USAID |
| risk management - The process to identify, assess, and control risks and make decisions that balance risk cost with mission benefits. Also called RM. | DOD |
| risk management - the program and supporting processes to manage risk to agency operations (including mission, functions, image, reputation), agency assets, individuals, other organizations, and the Nation, and includes: establishing the context for risk-related activities; assessing risk; responding to risk once determined; and monitoring risk over time. | White House |
| risk management - the systematic application, by the owner or operator of a pipeline facility, of management policies, procedures, finite resources, and practices to the tasks of identifying, analyzing, assessing, reducing, and controlling risk in order to protect employees, the general public, the environment, and pipeline facilities. | DOT |
| risk management - The total process of identifying, controlling, and mitigating IT system-related risks. It includes risk assessment; cost benefit analysis; and the selection, implementation, test, and security evaluation of security controls. This overall system security review considers both effectiveness and efficiency, including impact on the mission and constraints due to policy, regulations, and laws. | DOS/ USAID |
| risk management plan - document that identifies risks and specifies the actions that have been chosen to manage those risks. | DHS |
| risk management strategy - course of action or actions to be taken in order to manage risks proactive approach to reduce the usually negative impacts of various risks by choosing within a range of options that include complete avoidance of any risk that would cause harm or injury, accepting the risk, controlling the risk by employing risk mitigation options to reduce impacts, or transferring some or all of the risk to another entity based on a set of stated priorities. | DHS |
| risk management strategy - the description of how an agency intends to assess risk, respond to risk, and monitor risk, making explicit and transparent the risk perceptions that organizations routinely use in making both investment and operational decisions. | White House |
| risk mitigation - application of measure or measures to reduce the likelihood of an unwanted occurrence and/or its consequences. | DHS |
| risk perception - subjective judgment about the characteristics and/or severity of risk. | DHS |
| risk profile - description and/or depiction of risks to an asset, system, network, geographic area or other entity. | DHS |
| risk reduction - decrease in risk through risk avoidance, risk control or risk transfer. | DHS |

| | |
|--|-------------|
| risk response - accepting, avoiding, mitigating, sharing, or transferring risk to agency operations, agency assets, individuals, other organizations, or the Nation. | White House |
| risk transfer - action taken to manage risk that shifts some or all of the risk to another entity, asset, system, network, or geographic area. | DHS |
| risk-based decision making - determination of a course of action predicated primarily on the assessment of risk and the expected impact of that course of action on that risk. | DHS |
| risk-informed decision making - determination of a course of action predicated on the assessment of risk, the expected impact of that course of action on that risk, as well as other relevant factors. | DHS |
| root cause - initiating cause of a causal chain which leads to an outcome or effect of interest. | DHS |
| root cause analysis - method for identifying the underlying causes of why something occurred. | DHS |
| standard operating procedure - The specific references made in this subchapter to auxiliary and supplementary material that further details procedures and processes that apply to the FS assignment process. Also called SOP. | DOS/ USAID |
| standard operating procedure - A set of instructions applicable to those features of operations that lend themselves to a definite or standardized procedure without loss of effectiveness. Also called SOP; standing operating procedure. | DOD |
| standard operating procedure - Complete reference document or an operations manual that provides the purpose, authorities, duration, and details for the preferred method of performing a single function or a number of interrelated functions in a uniform manner. Also called SOP. | DHS/ FEMA |
| strategic goal - Includes the goal statement and goal overview. The highest level statement of aim or purpose that is included in the strategic plan. This plan's five strategic goals articulate clear statements of what the Department wants to achieve to advance its mission and address relevant national problems, needs, challenges, and opportunities. | DOC |
| strategic goal - statement of aim or purpose in a strategic plan that articulates what is needed to achieve objective. | DHS |
| strategic level - indication of scale of significance for plans, activities, or directions that integrate and synchronize activities into overarching common objectives. | DHS |
| strategic mission - primary area in which the organization will engage in order to ensure the desired end state. | DHS |
| strategic mobility - The capability to deploy and sustain military forces worldwide in support of national strategy. | DOD |

Administrative Terms

| unity of command - The operation of all forces under a single responsible commander who has the requisite authority to direct and employ those forces in pursuit of a common purpose. | DOS/ USAID |
| unity of command - The vesting of a single commander with the requisite authority to direct and coordinate the actions of all forces employed toward a common objective. Unity of command obtains the unity of effort that is essential to the decisive application of all available combat power. Subordinates are then focused on attaining the overall objectives as communicated from a single commander. In turn, this fosters freedom of action, decentralized control, and initiative. Hierarchical organization principle that no subordinate should report to more than one boss. | DOS/ USAID |

| <p>unity of effort - 1. Coordination and cooperation toward common objectives, even if the participants are not necessarily part of the same command or organization - the product of successful unified action. (DOD) A cooperative concept, which refers to coordination and communication among USG organizations toward the same common goals for success; in order to achieve unity of effort, it is not necessary for all organizations to be controlled under the same command structure, but it is necessary for each agency's efforts to be in harmony with the short- and long-term goals of the mission. Unity of effort is based on four principles: Common understanding of the situation. Common vision or goals for the R&S mission. Coordination of efforts to ensure continued coherency. Common measures of progress and ability to change course if necessary.</p> | DOD |

ADMINISTRATIVE INSTRUCTIONS

1. Supersession and Updating

a. This document supersedes the *USG Compendium 2018, 2nd Edition*. Terms and definitions for this edition were updated by inputs from the Departments of Defense, Labor, and Transportation, according to standing operating procedure for modifications, deletions, or additions approved in accordance with this document. Terms and definitions are accompanied with a source and date. The date reflects issuance per Presidential policy with the remaining terms and definitions with dates as entered into the Compendium.

b. The following terms provide a baseline for usage in this document:

| Term | Action | Source |
|--------------------------|--|--------------------------------------|
| Glossary | a list that provides definitions for the difficult or unusual words used in a book; specialized vocabulary with definitions but does not provide other information about the words. | Merriam-Webster; Dictionary.com |
| Lexicon/ Vocabulary | the vocabulary of a language; a stock of terms used in a particular profession, subject, or style; a vocabulary. | Merriam-Webster; The Free Dictionary |
| Nomenclature | a system or set of terms or symbols especially in a particular science, discipline, or art | Merriam-Webster |
| Ontology | a branch of metaphysics concerned with the nature and relations of being <i>Ontology deals with abstract entities</i> | Merriam-Webster |
| Taxonomy | the study of the general principles of scientific classification | Merriam-Webster |
| Taxonomy versus ontology | On the technical side, ontologies imply a broader scope of information. People often refer to a taxonomy as a 'tree', and extending that analogy I'd say that an Ontology is often more of a "forest". An ontology might encompass a number of taxonomies, with each taxonomy organizing a subject in a particular way | |
| Terminology | the technical or special terms used in a business, art, science, or special subject | Merriam-Webster |
| Thesaurus | a book of words or of information about a particular field or set of concepts; <i>especially</i> : a book of words and their synonyms | Merriam-Webster |
| Topic map | A standard for the representation and interchange of knowledge, with an emphasis on the findability of information. Similar to concept maps and mind maps in many respects, though only Topic Maps are ISO standards. Topic Maps are a form of semantic web technology similar to the Resource Description Framework | Merriam-Webster |
