Master of Public Health and Tropical Medicine

(36 CREDIT POINTS)

Graduate Diploma of Public Health and Tropical Medicine

(24 CREDIT POINTS)

“I come from a background that is endemic with tropical diseases and I really wanted to study a Master of Public Health and Tropical Medicine, so that’s why I chose JCU. My experience at JCU was a beautiful experience. The support was really extraordinary and way beyond my expectations. I know that now when I’m given the opportunity to work in the public health sector, I could do things so much more differently compared to when I was working without that prior knowledge that I gained during the Masters. It’s an amazing course and I’d recommend it to anyone, everywhere.”

Dr Faith Alele

MASTER OF PUBLIC HEALTH AND TROPICAL MEDICINE

“In Public Health and Tropical Medicine, we have an unusually broad range of subjects that allows students to tailor their Master degree to meet any one of the many options that public health graduates have. For example we run a suite of subjects in aeromedical retrieval. For those interested in the Tropics, we offer tropical medicine, travel medicine and communicable disease control. We have several subjects that suit those interested in humanitarian and emergency work. For those interested in global health more generally we run subjects in global health and development, reproductive health in developing countries and offer the chance for students to combine their studies with work abroad through the public health placement option.”

Dr Stephanie Topp

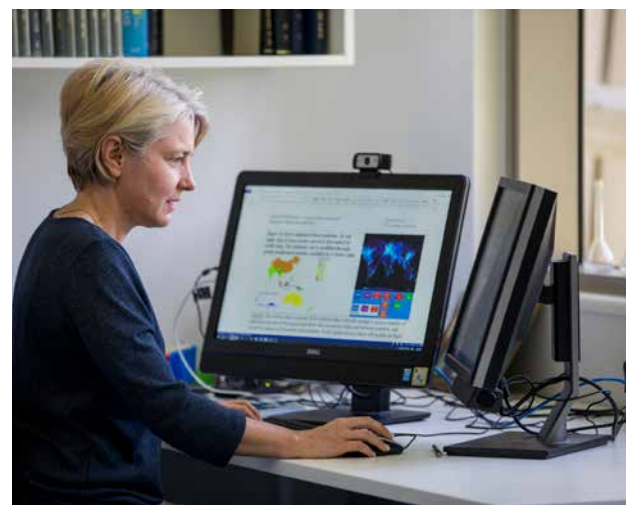

PROFESSOR GLOBAL HEALTH AND DEVELOPMENT

Career Opportunities

JCU Public Health and Tropical Medicine graduates acquire the knowledge and skills needed to enhance their practice and manage public health priorities in tropical environments.

Graduates have the knowledge and skills to work in disease control and prevention programs that focus on conditions found in tropical areas of Australia and internationally.

You could find employment in State and Commonwealth Government organisations, health care settings, community settings, non-profit and international organisations. This could include working in roles related to disease control and protection of the health of the population living in tropical areas, and promotion of health and wellbeing. Opportunities to engage in further research training via a PhD is also possible.

Postgraduate coursework applications

Apply directly to JCU, either by a form you download, complete and return, or by using the [Online Application Portal](#).

Your application must reach us before the deadline for your course.

ENTRY REQUIREMENTS

Postgraduate courses will usually require completion of an appropriate undergraduate degree for entry. You'll need to include certified copies of qualifications and academic records with your application. For some programs, appropriate work experience or equivalent qualifications will be considered.
