

# FastQC: Mean Quality Scores

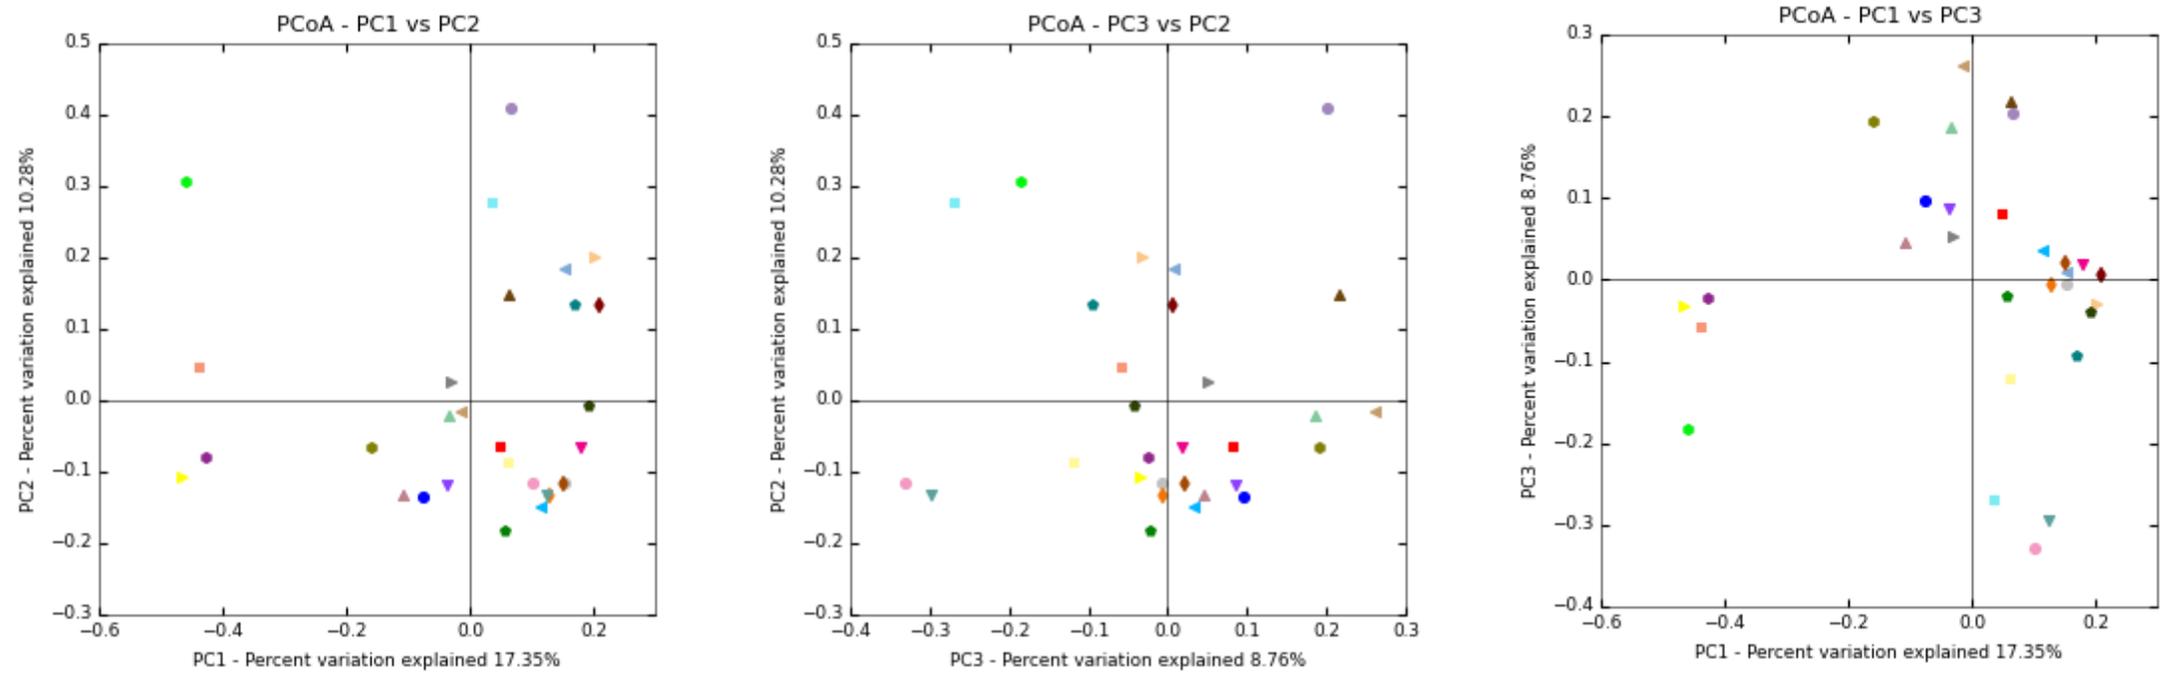

Created with MultiQC

**Figure S1.** Phred scores of study samples (n = 28) indicating >99.9% accuracy.

**Figure S2.** Rarefaction curve of alpha diversity (observed species) by sample. The sample with ~300 observed species was excluded due to its corresponding sample having insufficient (<10 k) reads per sample.

**Figure S3.** Principal Coordinate Analysis (PCoA) plots of Beta Diversity (Bray Curtis),  $p = 0.819$
