Summary of default COVID-19 patient management^, by age group

Age	Vaccination Status	
	Fully Vaccinated*	**Not Fully Vaccinated***
<3 months#	Care Facility	
3 months to <1 year#	Home Recovery Programme	
1 year to <70 years#	Primary Care Doctors	
70 years to <80 years	Primary Care Doctors	Home Recovery Programme
≥80 years	Home Recovery Programme	Care Facility

^ The above default dispositions **only apply to individuals with no co-morbidities of concern and no symptoms of concern**. The existing safety mechanisms to filter out high risk individuals with co-morbidities of concern or severe symptoms will remain in effect, and will continue to flow these individuals to a COVID-19 Treatment Facility (or a hospital, if acutely unwell).

* "Fully Vaccinated" based on 14 Feb 2022 definition. Vaccination status may be checked at https://go.gov.sg/vax-status-query.

Children below 5 years old are currently not eligible for vaccinations in Singapore

Note: Those who test ART positive at non-clinical settings (e.g. unsupervised self-swab or supervised self-swab by test providers in non-clinical settings) but who have the following conditions should visit a doctor after testing positive for COVID-19, even if they are feeling well. Doctors will clinically assess these individuals and decide whether they can be managed under Protocol 2 or require referral to MOH for further management.

     a. Children below 1 year old;
     b. Individuals aged 70 years old and above;
     c. Had organ transplant surgery in the past;
     d. Have any disease or are taking any medication that weakens the immune system;
     e. Have been diagnosed with cancer (including blood cancers) before;
     f. Are on dialysis;
     g. Are diagnosed with HIV or AIDS;
     h. Have a disease affecting the heart, lungs, kidneys, liver, or brain that required hospital admission in the last 6 months;
     i. Are pregnant;
     j. Are less than 12 years old and have a congenital or chronic condition that affects the heart, lung, brain, nerves, or muscles; or
     k. Are less than 12 years old and have either Diabetes Mellitus or Hypertension.
