

Expression of Interest
Appointment of Consultant

NDMC has identified 25 short targets to make NDMC an advanced and leading Utility by June 2015.

NDMC will also make a long-term road map and monitor use of latest technologies to be more intelligent and efficient in the use of resources, resulting in cost and energy savings, improved service delivery and quality of life, and reduced environmental footprint--all supporting innovation and the low-carbon economy.

NDMC is half way through on many projects; we just need to complete our tasks in time bound manner. Brief about some of the projects are:

More cycle tracks to be added to current tracks

Street art / open gyms

Installation of Laundromats

Weather and pollution monitors / culture events LED display on all NDMC buildings

Waste to energy gasification plant

Mobile App for complaint fully integrated with all field level supervisors on mobile.

Utility meters controlled centrally

All parking automated and online advanced booking possible

All NDMC buildings with solar rooftops

Companies having experienced resources and willingness to be a consultant may apply through a closed bid latest by 27.10.2014 to the following address. Those who had applied against our advertisement issued earlier on website need not apply again.
