<u>Sr.No.</u>	<u>Page No</u>	<u>Query</u>	<u>NDMC Reply</u>
1	Networth of Rs 50 crore (page 14)	This seems to be too high, given the fact most of the utility-scale solar power projects policies in India have stipulated networth equivalent to Rs 2-3 per MW. Given the fact that solar rooftop projects are quite different from MW-scale projects in their execution, the networth should be kept in a floating (proportionate) basis with an indicative limit of Rs 1 crore per MW.	Networth is Rs 25 Crore. (page 14)
