

A) hnRNPL

Uncropped image of markers

Red stars indicate the bands of the molecular marker at 75 KDa (upper) and 50 KDa (lower)

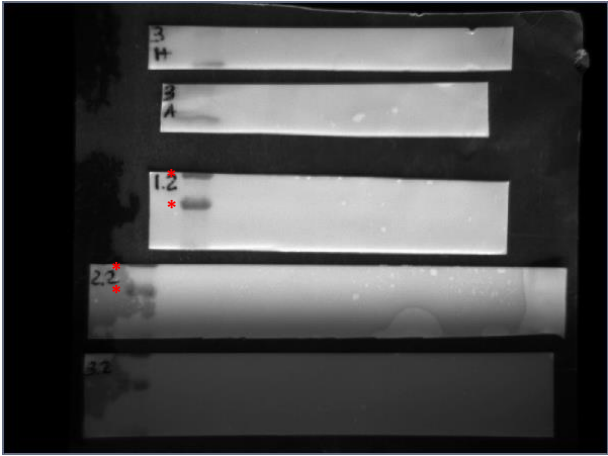

Uncropped image of hnRNPL

Blue numbers indicate the analyzed bands for hnRNPL protein quantification (predicted MW 68KDa)

B) GAPDH

Uncropped image of markers

Red stars indicate the bands of the molecular marker at 50 KDa (upper) and 37 KDa (lower)

Uncropped image of GAPDH

Blue numbers indicate the analyzed bands for GAPDH protein quantification (predicted MW 37 KDa)
