

INVERTEBRATE SYSTEMATICS

publish.csiro.au/is

> SCOPE

Invertebrate Systematics is an international journal publishing contributions on the systematics, phylogeny and biogeography of all invertebrate taxa. Journal articles provide comprehensive phylogenetic treatments of clearly defined taxonomic groups, often emphasising biodiversity patterns and/or biological aspects.

The journal welcomes morphological and molecular studies, and encourages review or discussion papers on methodology, theoretical systematics, cladistics and molecular biology.

Invertebrate Systematics also includes contributions on the systematics of select species that are of particular conservation, economic, medical or veterinary importance.

> AUTHOR BENEFITS

- International reach and discoverability
- Indexing in a wide variety of relevant databases
- Professional copyediting for every paper
- Capture impact through citation tracking and Altmetrics
- Authors retain copyright
- Gold Open Access compliant with major funders
- Green Open Access with no embargo
- No page charges
- Eligible authors receive APC-free Open Access

JOURNAL METRICS

> METRICS

These metrics are shared as a way of quantifying the impact this journal has on the research community. However, they should always be considered in the context of how they are calculated, and we emphasise that none of these journal-level metrics should be used to judge the impact of an individual article or author, or their research outputs.

> ABOUT CSIRO PUBLISHING

CSIRO Publishing operates as an editorially independent science publisher within Australia's premier research group, Commonwealth Scientific and Industrial Research Organisation (CSIRO), and has been publishing journals since 1948.

Our internationally recognised publishing program includes journals, books and magazines and covers a wide range of scientific disciplines.
