

## **Guidelines for submitting a Review synopsis to *Molecular Omics***

*Molecular Omics* reviews are a concise and critical appraisal of an important area in omics science or a related topic. Reviews should focus on the key developments that have shaped the topic, rather than comprehensive reviews of the literature. Authors are encouraged to include their own perspective on developments, trends and future directions, particularly identifying areas where further developments are imminent or that are in urgent need of being addressed.

Please email your synopsis to [molomics-rsc@rsc.org](mailto:molomics-rsc@rsc.org)

Please provide the following information:

**Proposed title:**

**Author(s) and affiliations:**

**Proposed submission date:**

**The current importance of the field, and why a Review on this topic is needed at this time:**

**The implications for the wider scientific community:**

**Communities your article will appeal to:**

**Suggested section headings, along with a brief discussion of what will be covered in each section and associated key references:**

**Any other reviews which have been published on a similar topic:**

Please note that pre-approval of a proposal does not guarantee final publication: the manuscript will be subject to full peer review in accordance with the journal's high standards.
